pain.; The patient has 6 weeks of completed conservative care in the past 3 months or
had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back
pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back
pain.; The patient has Neurological deficit(s)

x-ray done-mild degeneration.; The study requested is a Lumbar Spine MRI.; Acute or
Chronic back pain; The patient does have new or changing neurologic signs or
symptoms.; There is weakness.; Weakness in LLE, drags leg at times, frequent leg
numbness.; The patient does not have new signs or symptoms of bladder or bowel
dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence
of a recent lumbar fracture.

This study is being ordered because of a suspicious mass/ tumor.;"The patient has had a pelvic
ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are
documented physical findings (painless hematuria, etc.) consistent with an abdominal
mass or tumor.; Yes this is a request for a Diagnostic CT

This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This study is being ordered for trauma or injury.; October 2016; There has been treatment or conservative therapy.; knee neck and shoulder pain Joint pain and headaches; Pt has completed PT and 12 weeks of conservative measures.

FELL ONTO LEFT KNEE WHILE IN FLEXION,HIT CURB.HAVING SWELLING DISTAL PATELLA AND DECREASE RANGE OF MOTION,DIFFICULTY WITH WEIGHT BEARING.; EXAM: SWELLING AND TENDERNESS DISTAL PATELLA; XRAYS: DISTAL PATELLA LATERAL VIEW VIEW CHIP VS SPUR; DX: LEFT ; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This study is being ordered for a neurological disorder.; 2/15/2017; There has been treatment or conservative therapy.; swelling, pain and difficulty walking; PT, Inceds and steroids

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.
This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot. "; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient does not have a documented limitation of their range of motion.

This is a request for a foot MRI.; The study is being ordered for suspected fracture.; They had 2 normal xrays at least 3 weeks apart that did not show a fracture.; The patient has been treated with a protective boot for at least 4 weeks.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; Pain greater than 3 days

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.
This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture);; This is not a pre-operative study for planned surgery.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

unknown; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone);; The patient has a documented limitation of their range of motion.
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone).

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Abdominal pain x 2 months; Pt here for c/o sharp pain midsternal and down left side x5 days; she says that the gerd medication prescribed is not working; 22y/o female presents c/o continued epigastric pain w/ radiation to LUQ abdomen, mildly tender. She ; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT
c/o increase in right flank pain over the last month or so, feels like kidney stone, feels right flank pain that is worse when bladder is full, has Hx 6 yrs prior with one large stone removed with lithotripsy. pt states had large amount of caffeine intake; This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; This patient is not experiencing hematuria.; Yes this is a request for a Diagnostic CT

Mass was found by visual exam in the abdomen, upper gastric tendernous, hernia, palpable by reducible; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient does not have new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.

Patient complains of right flank pain. It has been constant for the past few weeks. It is a cramp-like pain. Also has a residual cough since January 2017. Chest x-ray on this visit shows the follow: hyperexpansion of the lung fields and flattening of the ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The patient has a history of hernia, had it repaired in 2011. Patient has been experiencing similar symptoms since 12/1/2016 that are worsening.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis

The Pt has a mass around umbilical area.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient does not have new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.  
This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.
This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Abscess.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

TREATING FOR OVER A YEAR WITH NO RELIEF; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT
unknown; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Yes, this is a request for CT Angiography of the abdomen.

&lt;Enter answer here - or Type In Unknown If No Info Given.&gt; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

Patient is having abdominal pain and a loss in appetite.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Provider believes patient has hernia. She has abd pressure and pain that is ongoing. Failed oral treatment.; Palpation was limited due to burn grafts.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

Pt has Rt flank pain; r/o renal stone; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT
pt with hx of diverticulosis. has failed 2-3 months of outpatient abx therapy. needs ct to r/o diverticulitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

She is having increased cervix tenderness with lower right quadrant. Cervical Motion tenderness. She is having vomiting. Fever, chills, abdominal pain, abnormal bleeding. History of recent tubal ligation.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.
This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; &lt;Enter Additional Clinical Information&gt;

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; abdominal pain, diarrhea, constipation; The symptoms began 20 years ago. The symptoms are reported as being moderate. The symptoms occur randomly. The location is abdomen. Aggravating factors include nothing. Relieving factors include nothing. She states; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; &lt;Enter Additional Clinical Information&gt;; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; ABDOMINAL TENDERNESS-RIGHT MID AREA, CHANGE IN APPETITE, NAUSEA, FEVER, &amp;#x0D; 1. Abdominal pain &amp;#x0D; Onset: 1 Week 3 Days. The severity of the problem is moderate. The problem has worsened. The symptoms are constant. The location is right lower quadrant. The quality; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Blood in stool; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; pain with movement increasing over past few days, had pain several weeks, palpable bulge on right side, tenderness, reducible with flat line, did ultrasound which was inconclusive;; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has NOT been a recent (within the last 3 months) Abdomen and/or Pelvis CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; yes, there is a palpable or observed abdominal mass.; Yes this is a request for a Diagnostic CT 1

This is a request for an abdomen-pelvis CT combination.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Trauma; &lt;Enter Additional Clinical Information&gt;.; Yes this is a request for a Diagnostic CT 1

unknown; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT 1

unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT 1

The Pt had a ultrasound, which showed hydronephrosis and masses on the kidney; Can't do a CT because the creatinine levels are too high, so an MRI was recommended for further evaluation.; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A kidney abnormality was found on a previous CT, MRI or Ultrasound.; It is unknown if the patient has a renal cyst or tumor. 1

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study."; UNKNOWN 1
This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; mass on gall bladder

Yes, this is a request for CT Angiography of the abdominal arteries.

The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

elevated blood pressure, pre op clearance for scheduled neck surgery; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Syncpe/Chest Pain/Hx Premature CAD in Family and sudden cardiac death.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. It is not known if the patient has a physical limitation to exercise.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.

---

**Patient Information:**
- **Symptoms:** Intermittent pain to right flank to right groin for 2 weeks.
- **Diagnosis:** Kidney stone in left kidney.
- **Recent Evidence:** Thoracic spine fracture.
- **Medication:** Numbness and tingling in legs and feet.
- **Additional Observations:**
  - Bowel dysfunction.
  - Recent evidence of foot drop.
  - Treatment or conservative therapy.
  - Events:
    - 02/26/2015: Treatment or conservative therapy.
    - 11/07/2016: Treatment or conservative therapy.
  - Medication:
    - Pain medication.
    - Medication for other conditions.

---

**Medical Objective:**
- **Request:** Thoracic spine MRI.
- **Indication:** Acute or Chronic back pain.
- **Eligibility:** Known trauma or injury, metastatic disease, neurological disorder, inflammatory or infectious disease, congenital anomaly, vascular disease.
- **Evidence:**
  - Treatment or conservative therapy.
  - Recent evidence of foot drop.
  - Medication:
    - Pain medication.
    - Medication for other conditions.

---

**Decision:**
- **Approval:** Denied
- **Reason:** Not medically necessary.
- **Note:**
  - Disapproval of thoracic spine MRI.
  - Need for additional evidence or investigation.
  - Consider referrals to spine specialist.
  - Updated MRIs within 12 months.
  - New or changing neurologic signs or symptoms.
  - Duration of back pain.
  - Previous treatments or conservative therapy.
  - Recent evidence of foot drop.
  - Evidence of bowel dysfunction.
  - Medication:
    - Pain medication.
    - Medication for other conditions.

---

**Follow-Up:**
- **Consultation:** Spine specialist.
- **Plan:**
  - Updated MRIs within 12 months.
  - Treatment or conservative therapy.
  - Additional investigation.
  - Referral to spine specialist.
- **Outcome:**
  - Improved pain management.
  - Reduced need for medication.
  - Improved function.
  - Chances of recovery.

---

**Summary:**
- **Diagnosis:** Kidney stone.
- **Treatment:**
  - Treatment or conservative therapy.
  - Medication.
  - Referral to spine specialist.
- **Recommendations:**
  - Updated MRIs within 12 months.
  - Medication:
    - Pain medication.
    - Medication for other conditions.
  - Consultation with spine specialist.
  - Follow-up with treatment or conservative therapy.

---

**Patient Education:**
- **Medication:**
  - Pain medication.
  - Medication for other conditions.
- **Activities:**
  - Pain management.
  - Physical therapy.
  - Consultation with spine specialist.
- **Follow-Up:**
  - Updated MRIs.
  - Treatment or conservative therapy.
  - Medication:
    - Pain medication.
    - Medication for other conditions.
- **Outcome:**
  - Improved pain.
  - Reduced need for medication.
  - Improved function.
  - Improved quality of life.

---

**Notes:**
- **Recent Evidence:**
  - Thoracic spine fracture.
  - Foot drop.
  - Bowel dysfunction.
  - Medication:
    - Pain medication.
    - Medication for other conditions.
- **Consultation:**
  - Spine specialist.
  - Updated MRIs.
  - Treatment or conservative therapy.
- **Plan:**
  - Treatment or conservative therapy.
  - Medication:
    - Pain medication.
    - Medication for other conditions.
  - Referral to spine specialist.
  - Follow-up with treatment or conservative therapy.

**MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST**

- RECOMMEND MRI CERVICAL SPINE -&amp;quot;&amp;quot; MRI cervical spine is being requested to further evaluate the patients persistent pain as well as the more worrisome&amp;quot;&amp;quot; neurologic symptoms. MRI is not typically needed prior to initiating treatment, unless there is a rapid; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; The patient complains of pain in&amp;quot;&amp;quot; neck, in lower back and in mid back. The patient has been experiencing this pain for Greater than 1 year.; There has been treatment or conservative therapy.; Mrs. Austin presents to clinic today on a referral from Dr. Joseph Long. She is having pain in her mid to lower back which&amp;quot;&amp;quot; radiates into her left hip and down her leg, anterior thigh, knee and sometimes is associated with burning/numbness and&amp;quot;&amp;quot; tingling. ; She is currently prescribed no pain medications. Chiropractic&amp;quot;&amp;quot; care, structure exercise at the gym and OTC meds have provided some relief, but she feels her pain is worsening over&amp;quot;&amp;quot; last 1-2 years.
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Do52-year-old female presents for initial evaluation upon referral from Dr. Kevin Jackson. She reports neck and low back pain that began greater than 10 years ago and is related to a history of working as a cleaner. &x0D; Lumbar MRI without contrast ta; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
Approval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more then once for these symptoms; The physician has directed conservative treatment for the past 6 weeks; It is not known if the patient has completed 6 weeks of physical therapy; The patient has been treated with medication; other medications as listed; The patient has not completed 6 weeks or more of Chiropractic care; The physician has directed a home exercise program for at least 6 weeks; The home treatment did include exercise, prescription medication and follow-up office visits; Patient did neck exercise she has decreased in her grip strength; hydrocodone morphine 1

Approval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; There has been treatment or conservative therapy; Pain in right shoulder. Spine pain; Medications, injections, & PA. 1
ICD: Chronic pain syndrome (G89.4); ICD: Generalized osteoarthritis (M15.9); ICD: Lumbago (M54.5); ICD: Cervical disc disorder with radiculopathy of cervical region (M50.10); ICD: Intervertebral disc disorder with radiculopathy of lumbosacral region (M51.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.;

MRI cervical spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment plan for this; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; amlodipine 10 mg-benzapril 40 mg capsule 1 Every Morning, Prescribe 1 Unspecified; clonidine 0.1 mg/24 hr weekly transdermal patch 1 Twice A Day PRN, Prescribe 2 Unspecified; Vitamin D3 5,000 unit tablet 1 Every Morning, Prescribe 1 Unspecified; metho.

Order MRI C and L spine. Schedule for bilateral LMBB . She might also benefit from CMBB in the future.; This study is being ordered for trauma or injury.; Unknown; There has not been any treatment or conservative therapy.; Worsening factor(s) include: bending, house chores, lifting, sitting, standing and walking. Alleviating factors include medications and rest. Other associated symptoms/problems include but not limited to: difficulty staying asleep due to pain and weakness.

Pain has failed to respond to rest, activity modification, NSAIDs therapy, physical therapy, and current prescription medications, which include both opioid and non-opioids. Severe neck and shoulder pain and muscle spasm unresponsive to conservative manag; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.
Patient has been unable to sleep.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness radiating to upper and lower extremities.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.  

Patient is being considered for steroid injection; This study is being ordered for trauma or injury.; 4-2015; There has been treatment or conservative therapy.; Low back and neck pain; PT Meds  

Pt has chronic pain that is located in the neck and radiates down both arms and low back. She is being referred to spine surgery and needs an updated MRI for evaluation.; This is a request for cervical spine MRI; Pre-Operative Evaluation; Surgery is not scheduled within the next 4 weeks.  

There has been treatment or conservative therapy.; decrease sensation; physical therapy, medication  

Radiculopathy; This study is being ordered for a neurological disorder.; 1/2/2017; There has been treatment or conservative therapy.; Low back pain w/ radiculopathy; Home exercise, Nsaids, PT and chiropractic  

Recommend MRI Cervical Spine-&#x0D; &#x0D; MRI cervical spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in form; This study is being ordered for trauma or injury.; Date of injury: 2010; There has been treatment or conservative therapy.; He reports onset of pain gradual. Reports frequency of his pain as constant with intermittent flare ups., constant and Intermittent. He describes the quality of pain as aching, burning, cramping, deep, dull, numbness, penetrating, pins and needle, pulling; Cervical Medical Branch Block  

Recommend MRI Lumbar Spine - MRI lumbar spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulatin; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has not been any treatment or conservative therapy.; The patient has an ongoing non-radicular lower back pain. Pain has failed to respond to rest, activity modification, NSAIDs therapy, physical therapy, and current prescription medications, which include both opioid and non-opioids.
Right paramidline lower cervical, Right periscapular pain and posterior arm pain and Right anterior brachium, Right posterior thigh and leg. Right paramidline lumbosacral. The patient has been experiencing this pain for more than a year.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Reports loss of strength, numbness and tremors.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

She has tried NSAIDs- ibuprofen, Aleve, Tylenol, sports creams, Paxil and Hydrocodone in the past. The treatment tried in the past includes Heat, home exercises, Massage and tens. She says that the prior treatments tried have not helped much. The treatmen; This study is being ordered for trauma or injury.; Unknown; There has not been any treatment or conservative therapy.; Reports frequency of his pain as constant with intermittent flare ups. He describes the quality of pain as aching, burning, deep, penetrating, pins and needle, sharp, shooting, tender, throbbing and tingling. Pain radiates to left upper extremity, left fo

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.
The patient has failed conservative treatment (include activity modifications, physical/home exercise therapy, NSAIDs and opioid medication therapy) and wishes to proceed with a cervical epidural steroid injection.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.

The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; None of the above; &lt;Enter Additional Clinical Information&gt;.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness.; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.
This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; Trauma or recent injury; He describes the quality of pain as aching, burning, cramping, deep and numbness. Pain radiates to bilateral upper extremities. He reports severity of pain on numerical reporting scale, at its worse is 10/10, least is 7/10, on an average 7/10, and right n; No, the patient does not have new or changing neurological signs or symptoms.

unknown; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; 01/16/2017 - still attending

UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/15/2016; There has been treatment or conservative therapy.; NECK PAIN WITH ARM NUMBNESS AND WEAKNESS, LOW BACK PAIN RADIATING DOWN BOTH LEGS; PHYSICAL THERAPY AND MEDICATIONS

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/1/2000; There has been treatment or conservative therapy.; Pt has increased pain in the neck that radiates to the upper left extremities and lower left extremities, reports onset after Motor Vehicle accident; PT, injections, medications, ice/heat, massage therapy, chiro, and home exercise program
unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; Pt has low back pain that radiates down to her left leg to the left foot, neck pain that worsens with movement that occasionally goes down to her arm, occasional loss of grip.; Pt has had medication, surgery lumbar spine, and PT.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; left sided pain radiating down left side, numbness and tingling; physical therapy and medications

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; CHRNIC PAIN IN BACK; MEDS

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2016; There has been treatment or conservative therapy.; NECK AND BACK PAIN; MEDS

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; &lt;Enter Additional Clinical Information&gt;; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

MRI lumbar spine is being requested to further evaluate the patients persistent pain as well as the more worrisome; neurologic symptoms. MRI is not typically needed prior to initiating treatment, unless there is a rapid change in condition; or a deterioration; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

numbness into bilateral hips down leg.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; pt has bilateral L4L5 numbess; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Order MRI C and L spine. Schedule for bilateral LMBB. She might also benefit from CMBB in the future.; This study is being ordered for trauma or injury.; Unknown; There has not been any treatment or conservative therapy.; Worsening factor(s) include: bending, house chores, lifting, sitting, standing and walking. Alleviating factors include medications and rest. Other associated symptoms/problems include but not limited to: difficulty staying asleep due to pain and weakness

Patient complains of back pain since 2001. Recommend Lumbar MRI to rule out abnormalities and treat accordingly.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Patient is being considered for steroid injection; This study is being ordered for trauma or injury.; 4-2015; There has been treatment or conservative therapy.; Low back and neck pain; PT Meds

Patient presents with mid and lower back pain for last 3 years. She also reports radicular pain in left L5 S1 distribution.; She had PT therapy without much relief. She was on Tramadol which used to help before her PCP stopped prescribing it. The patient c; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.
Patient reports that she has had low back pain for years. The pain in her low back travels down bilateral lower extremity as well. Pain is associated with numbness/tingling in her feet and hands and calves. Pain changes in severity but always present.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.;

- Flexeril 10mg PRN&x0D; Gabapentin 400mg TiD&x0D; Elavil 50mg &x0D; Cymbalta

- PT with no help; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness and numbness down low back to right leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

- r/o fracture; This study is being ordered for a neurological disorder.; 02/01/2017; There has been treatment or conservative therapy.; decrease sensation; physical therapy, medication

- Radiculopathy; This study is being ordered for a neurological disorder.; 1/2/2017; There has been treatment or conservative therapy.; Low back pain w/ radiculopathy;

- Home exercise, Nsaids, PT and chiropractic

Recommend MRI Cervical Spine-;&x0D; &x0D; MRI cervical spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in form; This study is being ordered for trauma or injury.; Date of injury: 2010; There has been treatment or conservative therapy.; He reports onset of pain gradual. Reports frequency of his pain as constant with intermittent flare ups., constant and Intermittent. He describes the quality of pain as aching, burning, cramping, deep, dull, numbness, penetrating, pins and needle, pulling; Cervical Medical Branch Block
Recommend MRI Lumbar Spine - MRI lumbar spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulatin; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has not been any treatment or conservative therapy.; The patient has an ongoing non-radicular lower back pain.

Pain has failed to respond to rest, activity modification, NSAIDs therapy, physical therapy, and current prescription medications, which include both opioid and non-opioids.

Recommend MRI Right Shoulder and Lumbar spine - MRI RIGHT Shoulder and Lumbar spine is being requested to further evaluate the patient’s persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, in; This study is being ordered for trauma or injury.; Date of injury: 2014; There has been treatment or conservative therapy.; Reports frequency of her pain as constant with intermittent flare ups. She describes the quality of pain as aching, burning, deep, sharp and pressure. Pain radiates to No radiation. She reports severity of pain on numerical reporting scale, at its worse i; Left SI Joint Injection

Bursa Injection #1

Hip Burse Injection #2

Reports frequency of her pain as constant with intermittent flare ups. She describes the quality of pain as burning, deep, dull, penetrating, pins and needle, sharp, spreading, tender, throbbing and tingling. Worsening factor(s) include: cold and rainy weather; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Reports frequency of her pain as constant with intermittent flare ups. She describes the quality of pain as burning, deep, pins and needle and sharp. Pain radiates to No radiation. She reports severity of pain on numerical reporting scale, at its worse i; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Rhizotomy right and left side in the last two months; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

She describes the quality of pain as aching, burning, dull, stabbing, throbbing and tingling. Pain radiates to lower back and into back sides of both thighs, left foot, left knee, right foot and right knee. She reports severity of pain on numerical report; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above
The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

The patient has tried NSAIDs- ibuprofen, Aleve, Tyleol, sports creams, Paxil and Hydrocodone in the past. The treatment tried in the past includes Heat, home exercises, Massage and tens. She says that the prior treatments tried have not helped much. The treatment; This study is being ordered for trauma or injury.; Unknown;
There has not been any treatment or conservative therapy.; Reports frequency of his pain as constant with intermittent flare ups. He describes the quality of pain as aching, burning, deep, penetrating, pins and needle, sharp, shooting, tender, throbbing and tingling. Pain radiates to left upper extremity, left fo

The patient complains of pain at lower back and hips and legs. Reports frequency of her pain as constant with intermittent flare ups. She describes the quality of pain as aching, burning, cramping, deep, numbness, sharp and pressure. Pain radiates to bila; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

The patient complains of pain in Lower Back Pain. He has been experiencing this pain for last several years. He reports onset of pain gradual. The patient describes the pattern of pain as constant with intermittent flare ups.; He describes the quality of; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain;
The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; NEUROLOGY-MOTOR STRENGTH &x003D; LEFT LE STENGTH-FLEXORS: 4/5 RIGHT LE STRENGTH-FLEXORS 5/5. LEFT LE STRENGTH-EXTENSORS 4/5, RIGHT LE EXTENSORS 5/5. LEFT LE TONE NORMAL. RIGHT LE TONE NORMAL. Palpation of lumbar facet joints at bilateral L4-5, and L5-S1 level

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with an Epidural.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.
unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; worse to stand or walk; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/15/2016; There has been treatment or conservative therapy.; NECK PAIN WITH ARM NUMBNESS AND WEAKNESS, LOW BACK PAIN RADIATING DOWN BOTH LEGS; PHYSICAL THERAPY AND MEDICATIONS

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/1/2000; There has been treatment or conservative therapy.; Pt has increased pain in the neck that radiates to the upper left extremities and lower left extremities, reports onset after Motor Vehicle accident; PT, injections, medications, ice/heat, massage therapy, chiro, and home exercise program

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; Pt has low back pain that radiates down to her left leg to the left foot, neck pain that worsens with movement that occasionally goes down to her arm, occasional loss of grip.; Pt has had medication, surgery lumbar spine, and PT.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; left sided pain radiating down left side, numbness and tingling; physical therapy and medications

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;
This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; There are no documented findings of crepitus.; There are no documented findings of swelling.; The ordering physician is not an orthopedist.; ; The patient is experiencing joint locking or instability.; The patient does not have a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.

The study is requested for evaluation of elbow pain.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; There are no documented findings of crepitus.; There are no documented findings of swelling.; The ordering physician is not an orthopedist.; ; The patient is experiencing joint locking or instability.; The patient does not have a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.

Recommend MRI Right Shoulder and Lumbar spine- MRI RIGHT Shoulder and Lumbar spine is being requested to further evaluate the patient’s persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, in; This study is being ordered for trauma or injury.; Date of injury: 2014; There has been treatment or conservative therapy.; Reports frequency of her pain as constant with intermittent flare ups. She describes the quality of pain as aching, burning, deep, sharp and pressure. Pain radiates to No radiation. She reports severity of pain on numerical reporting scale, at its worse i; Left SI Joint Injection
Hip Bursa Injection #1
Hip Burse Injection #2

The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months.; This is a request for an elbow MRI; Hip Bursa Injection

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/09/2017; There has been treatment or conservative therapy.; Member is having hip and shoulder pain; physical therapy. celiboex medication

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; There are no documented findings of crepitus.; There are no documented findings of swelling.; The ordering physician is not an orthopedist.; ; The patient is experiencing joint locking or instability.; The patient does not have a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.
This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.; This is a request for a Knee CT; Yes this is a request for a Diagnostic CT.

This study is being ordered for trauma or injury.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;.

Abscess; This is a request for a Knee MRI.; The study is not requested for knee pain.; The study is not requested for any of the standard indications for Knee MRI.

R/O DISC RELATED PATHOLOGY.; This study is being ordered for a neurological disorder.; July 2016; There has been treatment or conservative therapy.; chronic radiating pain; nsaids, pain medication and home exercise.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

&amp; Enter answer here - or Type In Unknown If No Info Given. &amp;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/09/2017; There has been treatment or conservative therapy.;

Member is having hip and shoulder pain; physical therapy. celiboex medication.
Approval

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT

Radiculopathy, pain.; surgery, PT, inseds,

This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

Approval

93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.

Disapproval

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Radiology Services Denied Not Medically Necessary

Enter answer here - or Type In Unknown If No Info Given. &gt;.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.

Disapproval

72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

Radiology Services Denied Not Medically Necessary

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2011; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDICATIONS

Disapproval

72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

Radiology Services Denied Not Medically Necessary

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

Disapproval

72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST

Radiology Services Denied Not Medically Necessary

Diagnostic Tests: ORDERING CT SCAN OF L-SPINE AND C-SPINE FOR CHRONIC PAIN AND R/O DISC RELATED PAIN. ALSO GETTING CT SCAN OF LEFT HIP.; This study is being ordered for a neurological disorder.; 09/13/2016; There has been treatment or conservative therapy.; Location of Pain: Neck pain &amp; lower back pain, both in the center and on sides and chronic left hip pain s/p fractured and surgery; nsaids, pain medications and home exercise program.

Only radiographic study has been plain films of the lumbar spine noting no obvious acute process. Discussed with patient further evaluation including MRIs both lumbar and cervical spine. Discussed initiating a trial of physical therapy. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. 3-6 months ago; There has been treatment or conservative therapy. He presents with a complaint of neck pain radiating to both shoulders and low back pain which is primarily axial in distribution. Patient notes the problems with neck and back is related to a diagnosis of scoliosis that he received about 12 years ago. Plan: Consult Dr. Dyer/ Hep C; Schedule MRI Lumbar Spine/Cervical; Consult Physical Therapy; meloxicam 15 mg qd; trial tizanidine 4mg QHS; trial oxycodone/apap 7.5/325mg 3/day

Pain; Pain Details: S/P Lumbar medial branch block. The patient complains of pain in lower back and in shoulder. The patient has been experiencing this pain for more than 10 years. She reports onset of pain while lifting weight. The patient describes this is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. Previous Imaging Reviewed: MRI Lumbar 2014: Mild multilevel spondylosis without focal disc herniation, spinal stenosis; or foraminal narrowing; MRI Right Shoulder 2011: Complete or near complete tear of distal supraspinatus tendon

Pain; Pain Details:; There has been treatment or conservative therapy; Review of Systems; Constitutional Symptoms: Denies having fever. Denies feeling fatigued. Patient denies gaining weight recently. She denies loss of weight recently. She denies of poor appetite. She denies of difficulty in sleep; HEENT: Denies ringing; Treatment History: Professional caregivers seen in the past include family physician, physical therapist and chiropractor. The following tests have been done in the past: MRI scan or CT scan and X-rays. She has tried NSAIDsbuprofen, aleve, tylenol, sp

R/O DISC RELATED PATHOLOGY; This study is being ordered for a neurological disorder; July 2016; There has been treatment or conservative therapy; chronic radiating pain; ns aids, pain medication and home exercise

Radiology Services Denied Not Medically Necessary

56 years old Caucasian female presenting with ongoing low back pain, secondary to lumbar spondylosis, she states PT provided minimal relief. This pain has been ongoing for more than a year.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has not been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.

Disapproval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST
Radiology Services Denied Not Medically Necessary

Evaluate increase of lumbar pain; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Lower extremity weakness, bilateral facets, flexion on bending causing pain.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.
General: The patient is well developed and well-nourished. She is alert and oriented. She is in no acute distress. She has good hygiene. Eyes: Pupils are equal, round and reactive to light and accommodation. There is no corneal abrasion noted. Sclera; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient reports of pain in her right side of her low back that radiates down her right leg. She also reports of numbness and tingling in her right leg.; Again, reviewed with her history of systemic MRSA infection. Reviewed with her results of her most recent treatment or conservative therapy.; However she continues to note only partial control of her comorbid chronic pain.; Patient reports of pain in her right side of her low back that radiates down her right leg. She also reports of numbness and tingling in her right leg.; Current Medication: oxycodone; nortriptyline; Cymbalta; oxycodone 15 mg tablet 1 Tablet Every 6 Hours PRN for 30 Days, Prescribe 120 Tablet; Suboxone 8 mg-2 mg sublingual film 1 Unit Three times a Day for 7 Days, Prescribe 24 Film 1

He has continued low back pain. His lumbar MRI auth has expired.; He has been having worsening pain in the neck and down the right arm; He has been having worsening pain in the neck and down the right arm; He has been having worsening pain in the neck and down the right arm.; He has continued low back pain. His lumbar MRI auth has expired.; He has been having worsening pain in the neck and down the right arm.; He has been having worsening pain in the neck and down the right arm.; He has been having worsening pain in the neck and down the right arm.; He has been having worsening pain in the neck and down the right arm.; He has been having worsening pain in the neck and down the right arm.; He has been having worsening pain in the neck and down the right arm.; He has been having worsening pain in the neck and down the right arm.; Previous PT: did not help

He reports onset of pain gradual. Reports frequency of his pain as constant with intermittent flare ups. He describes the quality of pain as aching, burning, deep and pressure. Pain radiates to lower extremities and feet. He reports severity of pain on nu; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

LESI's that he was unresponsive to; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Low back pain going down both legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pain; Pain Details: S/P Lumbar medial branch block. The patient complains of pain in lower back and in shoulder. The patient has been experiencing this pain for more than 10 years. She reports onset of pain while lifting weight. The patient describes pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Previous Imaging Reviewed: MRI Lumbar 2014- Mild multilevel spondylosis without focal disc herniation, spinal stenosis; Pain Details: There has been treatment or conservative therapy.; Review of Systems: Constitutional Symptoms: Denies having fever. Denies feeling fatigued. Patient denies gaining weight recently. She denies loss of weight recently. She denies of poor appetite. She denies of difficulty in sleep.; HEENT: Denies ringing i; Treatment History: Professional caregivers seen in the past include family physician, physical therapist and; chiropractor. The following tests have been done in the past: MRI scan or CT scan and X-rays. She has tried:

- Ibuprofen,
- Aleve,
- Tylenol,
- Sp

NSAIDsibuprofen, ibuprofen, aleve, tylenol, sp

Patient has been having lower back pain that will at times radiate into his lower extremities. Patient requests to now; resume a prior evaluation and treatment of his low back pain with lower extremity radiculopathy.; Reviewed with the patient results of; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

- Patient has lumbar axial back pain with radiculopathy in left lower extremity. Numbness and tingling. Positive straight leg test. patient is on a pain medication as well as anti inflammatories and muscle relaxers. MRI because patient may have left
- Selecte; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

- R/O DISC RELATED PATHOLOGY.; This study is being ordered for a neurological disorder.; July 2016; There has been treatment or conservative therapy.; chronic radiating pain; nsaid, pain medication and home exercise
Reports frequency of her pain as constant with intermittent flare ups. She describes the quality of pain as aching, burning, cramping, deep, dull, numbness, pins and needles, sharp, shooting, stabbing, throbbing and tingling. Pain radiates to lower back; This study is being ordered for trauma or injury.; Unknown; There has been treatment or conservative therapy.; Worsening factor(s) include: any increased physical activity, bending, coughing, cold and rainy weather, house chores, lifting, lying flat on back, lying flat on stomach, sitting, standing and walking. Alleviating factors include exercise, hot packs, massage; Professional caregivers seen in the past include family physician, physical therapist, chiropractor and general surgeon. The following tests have been done in the past: MRI scan or CT scan, X-rays, EEG, EKG and ultrasound. She has tried NSAIDs-ibuprofen.

Review of Systems:
Constitutional Symptoms: Denies having fever. Reports feeling fatigued. Patient reports gaining weight in the recent past. She denies loss of weight recently. She denies poor appetite. She reports difficulty in sleep. HEENT: Den; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; The patient has been experiencing this pain for greater than 1 year. She reports onset of pain; gradually over time without significant initiating factor. The patient describes her pain as constant with intermittent flare-ups. The pain is aching, throbbing; There has been treatment or conservative therapy.; The patient describes her pain as constant with intermittent flare-ups. The pain is aching, throbbing, tender, pins and needles. The pain radiates to lower back and into back sides of both thighs, bilateral upper extremities and back of neck, shoulders; PT and pain medication. Dates of all treatments are unknown.; Professional caregivers seen in the past include family physician, physical therapist and; chiropractor. The following tests have been done in the past: MRI scan or CT scan. She has tried N.
S/P Lumbar epidural steroid injection. S/P SI Joint Injection. The patient complains of pain in neck and in the lower back. The patient has been experiencing this pain for more than 10 years. She reports onset of pain gradually over time without significant change; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; She is experienced these complaints for many years relating them to episodes of domestic abuse experienced in the 1980s; There has been treatment or conservative therapy; The patient complains of pain in the neck and lower back. The patient has been experiencing this pain for more than 10 years. She reports onset of pain gradually over time without significant initiating factor and sudden onset. The patient describes her pain severity as worst 10/10, least is 8/10, on average 10/10, and right now it is 8/10. Worsening factor(s) include: any increased physical activity, bending, cold and rainy weather, lifting, pressure; The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more than once for these symptoms; The physician has not directed conservative treatment for the past 6 weeks.

The pain radiates to the back and left hip. Reports limitation of joint movement; The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms; There is weakness; muscle weakness, muscle pain and tenderness; The patient does not have new signs or symptoms of bladder or bowel dysfunction; It is not known if the patient has a new foot drop; It is not known if there is x-ray evidence of a lumbar recent fracture.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a pericardial disease.

This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.

3 mo f/u for 11/2016 ct; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

PT had a CT on 8/16 that showed nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Yearly follow-up; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a post-operative evaluation.; There is no physical evidence of re-bleed or re-stenosis.; There is no physical evidence of an infection or other complication.; Yes, this is a request for a Chest CT Angiography.

This study is being ordered for vascular disease.; "The ordering physician is a surgeon, pulmonologist, or cardiologist."; This is a request for a chest MRI.

This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being ordered for something other than Breast CA, Lymphoma, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.

Mr. Castro comes in today to establish care with us. He denies any previous cardiac evaluation. Significant family history for MI. He does have occasional numbness in his left arm and leg. He states it happens about once a week. No precipitating factors o; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack);; It is unknown why an MRI is not being considered

No angina...no syncpe....lost vision yesterday...90 minutes, and recovered.....and last week had headache; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack);; Imaging is needed and availability of MRI would delay treatment is the reason an MRI is not being considered

Patient having equilibrium problems since stent. Feels like he is "leaning to one side". Wants to know if Dr. Ribeiro thinks there is anything wrong. Discussed with Dr. Ribeiro. CT Head without contrast; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack);; There is another reason why an MRI is not being considered; Patient having equilibrium problems since stent. Feels like he is "leaning to one side". Wants to know if Dr. Ribeiro thinks there is anything wrong. Discussed with Dr. Ribeiro. CT Head without contrast

Reason for Appointment 
1. Hypertension 
2. History of Present Illness 
HPI: Mr. Moore is a new patient here for evaluation of hypertension. He says when his BP is elevated, he gets blurred vision. He has also had left arm and facial numb; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.
This is a request for a brain/head CT.; There is not headache not improved by pain medications.; “There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.”; This study is being requested for a headache.

This study is being ordered for Vascular Disease.; 2/2016; There has been treatment or conservative therapy.; mbr has carotid stenosis and dizziness; medications

Yes, this is a request for CT Angiography of the brain.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.;

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.; This study is being ordered for vascular Disease.; ; There has been treatment or conservative therapy.; Abnormal stress echo results.; This study is not requested to evaluate suspected pulmonary embolus.; It is not known if this study will be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.
71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

Approval: 1. Chest Pain 44 year old male here for a 2 mo return visit. He has history of hyperlipidemia, family history significant for premature coronary artery disease. CTA measured ascending aorta to 4.4cm. He is established with CV surgery, who follows his care. There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.

2. This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or Suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

1. This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is no other type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.

1. This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography.

1. This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.

1. This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; It is not known whether this is an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.
abdominal aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

Ascending aorta measuring 4.3cm by echocardiogram, hypertension; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

Danny returns for f/u of CAD and thoracic aortic aneurysm. He denies angina or exertional limitations. Tolerating meds; Follow up of known thoracic aortic aneurysm.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

F/U for this 45-year-old gentleman. His cardiac catheterization revealed normal coronary arteries and renal arteriogram revealed normal renal arteries. His blood pressure precipitously came down with minoxidil. His girlfriend states that he became lethargic; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has been performed within the last month.; Yes, this is a request for a Chest CT Angiography.

HISTORY OF PRESENT ILLNESS; Cathy is followed for coarctation of the aorta previously surgically repaired. She is on the medications listed. She has occasional chest discomfort, often in her back. She feels a little short of breath on exertion. Overall; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a post-operative evaluation.; It is not known whether there is physical evidence of re-bleed or re-stenosis.; There is no physical evidence of an infection or other complication.; Yes, this is a request for a Chest CT Angiography.
n/a; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1. Atrial Fibrillation &gt; 2. BSC DC PPM &gt; 3. Chest Pain &gt; 4. Syncope &gt; Mr. Byrd is a 59 year old white male here today for 6 month return appointment. Patient has a history of sick sinus syndrome status post Boston Scientific dual chamber pacemaker; There has been treatment or conservative therapy.; The patient is extremely symptomatic with his a-fib. He has had near syncopal spells. complaints of chest pain that he states is in the middle of his chest that feels like a burn and mild pressure and makes him feel like he is going to pass out that last; status post Boston Scientific dual chamber pacemaker implanted 3/30/15 by Dr. Nair with RV lead revision on 3/31/15. History of atrial fibrillation on Amiodarone and Eliquis. He has a very high CHA2DS2VASC score and is on anticoagulation for stroke preven

None; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

Patent stent and nonobstructive CAD on recent cath at the hospital for possible unstable angina. Echo showed dilated ascending aorta. He denies angina or exertional limitations. Occasional episodes of brief muscular pain. Imdur has helped with his chest p; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a post-operative evaluation.; It is not known whether there is physical evidence of re-bleed or re-stenosis.; There is no physical evidence of an infection or other complication.; Yes, this is a request for a Chest CT Angiography.

Patient has history of paroxysmal atrial fibrillation which has recently become persistent. Her echocardiogram showed normal left ventricular systolic function, moderately dilated left atrium with left atrial diameter 4.7 cm. She failed 120 mg of sotalol; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

Pre-EPS/Ablation; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.
Pt here for followup of afib and bradycardia on sotalol and xarelto therapy. He denies any chest pain. He denies any syncope. He has been feeling well. He comes in today for further evaluation.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.

Pt is here for follow up on paroxysmal to persistent atrial fibrillation with device check. In AF today. He was scheduled for PVI but cancelled. Breakthrough despite Tikosyn.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.

Pt with worsening exertional SOB and chest pain lower mid sternal area. Hx of CAD. Hx of Ascending aortic aneurysm last evaluated 4/25/16 showing aneurysm to be 4.1 cm. Due to progressing symptoms physician recommends CTA chest to assess.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.

Pulmonary Vein Ablation with A-FIB.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

Pulmonary Vein Ablation.; Pulmonary Vein Mapping; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.
Recent CP eval in the AHH ER with normal stress test and echo. CXR at BMC conway showed density in the thoracic aorta and CT recommended. Feeling well since discharge.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography.

This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are signs or symptoms indicative of vascular insufficiency to the neck or arms.; Yes, this is a request for a Chest CT Angiography.

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

Thoracic aortic aneurysm.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This study is scheduled/planned.; Yes, this is a request for a Chest CT Angiography.

This study is being ordered for Known or Suspected Coarctation of the aorta.; There is no other type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.

The patient does not have any neurological deficits.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is no other type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.

In August of 2014, patient had a 5.1cm Aortic Aneurysm.; This is a request for an MR Angiogram of the chest or thorax.

The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.

n/a; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1. Atrial Fibrillation & x0D; 2. BSC DC PPM & x0D; 3. Chest Pain & x0D; 4. Syncope & x0D;& x0D; Mr. Byrd is a 59 year old white male here today for 6 month return appointment. Patient has a history of sick sinus syndrome status post Boston Scientific dual chamber pacemaker i; There has been treatment or conservative therapy.; The patient is extremely symptomatic with his a-fib. He has had near syncopal spells. complaints of chest pain that he states is in the middle of his chest that feels like a burn and mild pressure and makes him feel like he is going to pass out that last; status post Boston Scientific dual chamber pacemaker implanted 3/30/15 by Dr. Nair with RV lead revision on 3/31/15. History of atrial fibrillation on Amiodarone and Eliquis. He has a very high CHA2DS2VASC score and is on anticoagulation for stroke preven

75572 CT Heart

Approval

This is a request for a Heart CT.

75573 CT Heart Congenital Study

Approval

This is a request for Heart CT Congenital Studies.

75574 CT Angiography Heart coronary arteries, CCTA

Approval

;& Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for CTA Coronary Arteries.; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

75574 CT Angiography Heart coronary arteries, CCTA

Approval

; This is a request for CTA Coronary Arteries.; A study not listed has been completed.; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.
75574 CT Angiography Heart coronary arteries, CCTA

Approval

Chest Pain that last 10 hours.; This is a request for CTA Coronary Arteries.; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

1

Chest Pain, Dyspnea; This is a request for CTA Coronary Arteries.; The patient has had a stress echocardiogram; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

1

Patient has been to the emergency room multiple times for chest pain. Patient was referred to cardiology for stress echocardiogram testing. Test was negative but chest pain was provoked during treadmill portion of test. Patient has a history of hypertension; This is a request for CTA Coronary Arteries.; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

1

The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Pt is here to establish care. Pt states she was recently in the hospital for Afib & they made this appointment for her. Pt states she sometimes feels like she can't take a deep breath & also complains of fatigue. Pt complains of palpitations and a "hard p; Yes, there is Chronic Chest Pain.

1
The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; pt with continued chest pain, hypertension, obesity, and shortness of breath; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; 1. Abnormal MPI & Mr. Gray is a 64 yo male with no prior history of cad. History of IDDM recently started on insulin, hypertension, 2 ppd smoker and strong family history of cad with multiple family members undergoing CABG or stenting in their 50-60's.; Yes, there is Chronic Chest Pain.
The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking. This request is for a Coronary CT Angiography study. No, patient did not have a Nuclear Cardiology study within the past six months. This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic? No, patient does not have new onset congestive heart failure. Mr. Jones is a new patient here for cardiac evaluation. He was hospitalized at Saline Memorial on January 4th for chest pain and released the next day. He says he was told he had high cholesterol and blood pressure and he says he wanted a second opinion. Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking. This request is for a Coronary CT Angiography study. No, patient did not have a Nuclear Cardiology study within the past six months. This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic? No, patient does not have new onset congestive heart failure. Patient referred to cardiology by the emergency room for chest pain/chest discomfort. Patient has had two previous negative stress test. Patient has good history of exercise tolerance but continues to have chest pain despite negative stress testing with n; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking. This request is for a Coronary CT Angiography study. No, patient did not have a Nuclear Cardiology study within the past six months. This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic? No, patient does not have new onset congestive heart failure. Patient with chest pain/pressure and shortness of breath. RSE performed. Exercise stress test negative for ischemia based on ECG criteria. Chest pain was provoked during stress test. Serial ECG's done during stress & during recovery showed no significant; Yes, there is Chronic Chest Pain.
Mr. Mabray has some symptoms that are, in many respects, very worrisome for angina. However, they seem to have improved as well. Mr. Mabray has some symptoms that are, in many respects, very worrisome for angina. However, they seem to have improved as well.

We will perform an ischemic evaluation at this time with a coronary CT angiogram. This will allow us to hope.

Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; PLAN&x0D; 1

Mr. Mabray has some symptoms that are, in many respects, very worrisome for angina. However, they seem to have improved as well.

We will perform an ischemic evaluation at this time with a coronary CT angiogram. This will allow us to hope.

Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Pt complains of cp and tightness with being easily fatigues and also has palpitations On Rest Stress Echo she complained of pressure like cp. No significant ST changes on ecg during stress or recovery. Exercise stress Echo is ambiguous for ischemia due; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; pt having severe chest pain with no known CAD.; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Unknown.; Yes, there is Chronic Chest Pain.

This is a request for CTA Coronary Arteries.; The study is requested for known or suspected valve disorders.

2. palpitations
3. hypertension
Mrs. Hall is a 39 year old white female here for New patient evaluation with no known hx of CAD. She has a hx of Glaucoma and hypertension. She was seen with PCP for palpitations that occur at rest and; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

1. Chest Pain
61 yo male here for new pt visit. PMH of syncope back in 2011. Has c/o left sided chest pain in recent past. Pt presents today with c/o occasional leftsided sharp pains and tightness in chest that lasts about 10 min and ongoing for 6 mo. ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

2. cad
Mr. Kain is a 61 year old white male here for a return appointment. He has history of SSS status post Boston Single Chamber Pacemaker that was implanted on April 6 2016 for av synchrony by Dr. Nair. Device is followed by Lati; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress Ekg.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
34-year-old white female who over the last 3-4 months has been experiencing episodes of pressure-like, tightness type of chest discomfort located to mid precordium, nonradiating, associated with dyspnea, happening in a random fashion, no identifiable prec; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

41-year-old gentleman with: Chronic systolic congestive heart failure, ejection fraction normalized from 25% to 55%, NYHA class II symptoms; He has a history of coronary artery disease status post myocardial infarction and percutaneous coronary interve; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

44 yr old with chest pain on exertion and heavy smoker.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

50 y.o. male with h/o HLD and HTN here for &x0D; For the past several months he c/o SOB. moderate to severe. Worse with exertion (NYHA III). Sometimes associated with chest pain. Fluctuates but overall getting worse. Treated for PNA multiple times sin; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

58 y.o. male with HTN, HLD and CAD (RCA STEMI 6/2016; mLAD and OM2 Promus 9/2016) and Afib in the setting MI here for chest pain triggered by cold. For the past one week he c/o substernal burning pain with exposure to cold weather. Also worse with; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

1

58 year old patient presented to ER in December with left sided chest pain, states it lasted for about 2 hours, also has complaints of shortness of breath.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

1

63 yo male with HTN and DEM Type II, (RX Januvka and Meformin) complaining of chest pain. EKG shows anterosetal infarction.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

1

A 46-year-old lady with a history of hypertension, hyperlipidemia, strong family history of coronary artery disease, multiple family members had very premature coronary artery disease presented to the Cardiology Clinic with complaint of dyspnea on exertion; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

1
A 54-year-old lady with a history of hypertension, untreated hyperlipidemia, family history of coronary artery disease, and history of smoking presented with typical angina like symptoms. Patient is unable to exercise because of lung disease and back injury; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

A 57-year-old lady with a known history of coronary artery disease and previous percutaneous transluminal coronary angioplasty stent unable to exercise because of the leg injury presented with typical angina like symptoms. At this time myocardial perfusion; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

A 63-year-old gentleman with a history of diabetes and hypertension presented with palpitations and chest discomfort which is poorly defined. Patient does not have a previous cardiac history. Symptoms seem to come and go.; The caller indicated that the study was not ordered for; Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

A 64-year-old gentleman with known history of coronary artery disease, previous percutaneous transluminal coronary angioplasty stent 11 years ago presented with recurrent index symptom. Also patient has a murmur; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29
Abnormal cardiac CT, Palpitations, sleep apnea, obesity.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Abnormal EKG; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; x 2 weeks; It is not known if there has been any treatment or conservative therapy.; Chest Pain, shortness of Breadth.

Abnormal electrocardiogram stress test suggestive of myocardial ischemia.; Hypertensive response to exercise.; Diabetes mellitus; Palpitations; Shortness of breath; Hypertension; Chest Pain; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

Abnormal electrocardiograph with a borderline prolonged QT interval at 476 ms. &amp; The patient is unable to exercise due to the shortness of breath. Would recommend avoiding any QT prolonging medication, and we will monitor his QT interval.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

Abnormal Heart CT saver. HTN, Hyperlipidemia, Strong Family History CAD.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
ADMITTING DIAGNOSES: 1. Near syncope. 2. Hypertension. 3. Bradycardia; HISTORY OF PRESENT ILLNESS: Mr. Otwell has had no chest pain, no chest discomfort; he had an episode of near syncope on Thursday. His blood pressure has been running in the normal range; the study is being ordered for suspected CAD. It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath; the patient has not had a recent non-nuclear stress test. It is not known if the patient had a recent abnormal EKG consistent with CAD. The patient has not had a recent stress echocardiogram; the patient’s age is between 45 and 64; the patient has not had a stress echocardiogram within the past eight weeks; this is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Angina and Palpitation; it is not known if the patient is diabetic; the patient is less than 45 years old; the patient has not had a recent exercise treadmill test that was positive; it is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; this is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Angina pectoris, arteriosclerosis of extremity with rest pain, lower extremity edema, hypertension, shortness of breath, chest pain, left arm pain, current tobacco user, family history of coronary artery disease, abnormal EKGs, tachycardia; the patient is not diabetic; the patient is less than 45 years old; the patient has not had a recent exercise treadmill test that was positive; the patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; this is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Angina pectoris, palpitations, essential hypertension, shortness of breath, diaphoresis. The patient is not diabetic; the patient is less than 45 years old; the patient has not had a recent exercise treadmill test that was positive; the patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; this is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Angina, Hyperlipidemia, HTN; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).  

Anterior chest wall discomfort.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Anxiety; GERD w/o esophagitis; Fatigue; Palpitations; Shortness of breath: SOB/DOE; Varicose veins of leg w/ pain; Varicose veins of leg w/ edema; Arteriosclerosis of native coronary artery w/ other form of angina pectoris; Pain in right knee; Insomnia; ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

Atypical chest pain and SOB; This study is being ordered for Congenital Anomaly.; Unknown; It is not known if there has been any treatment or conservative therapy.; Chest pain, SOB

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

Atypical chest pain with dyspnea on exertion, has history of CAD; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has had Myocardial Perfusion Imaging including SPECT (single photon Emission Computerized Tomography) or Thallium Scan.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

CAD, HTN, Fatigue; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

CAD, Hyperlipidemia, SOB; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

CAD, HTN; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

CAD/Angina, HTN, Fatigue, Hyperlipidemia; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Came in today due to weakness/numbness in both arms that is intermittent, last about 3 minutes. Numbness is equal in both arms. She doesn't "walt to even try to grasp anything. Its like her shoulder just droop and she loses all muscle strength. No CP. N; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient does not have a physical limitation to exercise.

Cardiac murm, cp, hypertension, smoker, dyspnea; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient does not have a physical limitation to exercise.

Cardio gram is abnormal; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Chest pain and pressure, HTN, shortness of breath; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29
Chest pain and shortness of breath in this 45-year-old gentleman unable to complete the stress test which was suboptimal with adequate chronotropic response to exercise, heart rate went to 125. At this time we are going to request Cardiolite for further e; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration.;" The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Chest pain once a week.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). 1

Chest pain with typical and atypical features & DOH; Hx of CHF&DOH; Preop clearance for ovarian surgery; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). 1

CHEST PAIN, ABNORMAL EKG, HISTORY OF CHF; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). 1

CHEST PAIN, ABNORMAL EKG; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise. 1

CHEST PAIN, EXERTION, SHORTNESS OF BREATH, STRONG FAMILY HISTORY OF CAD, PATIENT IS A SMOKER.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). 1
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

CHEST PAIN, PERICARDITIS, LUPUS, FAMILY HX OF CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

chest pain, htn, obesity; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

chest pain, unspecified type, patient in emergency room. 52-year-old female presents for evaluation of 2 months of intermittent chest pain. The patient's chest pains become more frequent and longer lasting during the last week. She notes her last episode; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

CHEST PAIN; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Myocardial perfusion imaging, tomographic (SPECT); single study

The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

Chest pains, hx of stroke; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

Chest tightness and pain uncontrolled hypertension family hx CAD dyspnea abnormal ekg; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Chest tightness, other chest pain, essential hypertension, heart palpitations; Patient with history of hypertension, family history of early onset CAD, here for evaluation of chest discomfort. She was recently seen in emergency room about 3 weeks ago for; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
chronic cp; severe mitral stenosis; chest pressure; dyspnea; muscle cramps; edema; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Connie R Hill 57 y.o. female presents for follow up: Mrs. Hill is a pleasant 57-year-old woman with known coronary artery disease. She's had chest pain for at least a couple of years. Is been atypical and tends to occur at random although is a substernal; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

copd, hyperlipidemia, hypertension, cad, a fib, cp, smoker; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

Coronary artery disease with recurrent chest pain. Patient also needs surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

coronary artery disease with significant co-morbidities to include hypertension, hyperlipidemia and diabetes mellitus. Of which he may not have typical ischemic pain; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).1

coronary atherosclerosis due to calcified coronary lesion, mixed hyperlipidemia, essential hypertension, encounter for Department of Transportation (DOT) examination for driving license renewal; Pt here today for follow up. She has a known history of ht; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).1

Cp related to the Left Arm. Patient was seen in the ER and was given nitro to relieved the cp.; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).1

Cp, DM2, smoker, Dizziness, HTN; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.1
CP, HTN, went to ER with SOB and Cp; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

cp, hypertension, smoker, obesity; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

cp, past smoker; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

cp, smoker, obesity, abn ekg; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

cp, dyspnea, abn ekg; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

Episodes angina, precordial area, associated dyspnea, left sided numbness, relieved NTG...; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

Essential (primary) hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

Essential (primary) hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.
ETT incomplete, evaluate for CAD; The patient is not diabetic; The patient is less than 45 years old; The patient has not had a recent exercise treadmill test that was positive; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).  

Family hx of heart disease smoker; The study is being ordered for suspected CAD; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had previous cardiac surgery or angioplasty; The patient has not had a recent non-stress test; The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.  

First new patient clinic visit for Ms. Eskridge, referred for syncope. She came for a visit last week but had an episode of syncope with post-syncopal confusion concerning for post-ictal activity and was sent to the ER for emergent evaluation. CT head has; The patient is not diabetic; The patient is less than 45 years old; The patient has not had a recent exercise treadmill test that was positive; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).  

has chest pain, SOB and Hypertension; The study is being ordered for suspected CAD; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had previous cardiac surgery or angioplasty; The patient has not had a recent non-nuclear stress test; The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.  

has hyperlipidemia, hypertension, diabetic; The study is being ordered for known CAD; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG; The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

The patient has hypertension, hyperlipidemia, Obese; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

He has a carotid bruit; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 weeks ago; There has not been any treatment or conservative therapy.; Shortness of breath, fatigue, chest pain

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

heart murmur.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

High blood pressure Diabetic High Cholesterol; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

hospital admission on 12/28/2016. He was admitted with a diagnosis of unstable angina. He ended up with two stents being placed. He was back at the er and had another heart cath; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Hyperlipidemia and hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Hyperlipidemia, diabetes, essential hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Hyperlipidemia, hypertension, cad w bp, ventricular premature depolarization, abn ekg; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Hyperlipidemia, unspecified; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is less than 20.

Hyperlipidemia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.
Hypertensive heart disease is present
Hypercholesterolemia/Hypertriglyceridemia.
Normal left ventricular systolic function;
The patient's age is between 45 and 64.;
The patient has had a stress echocardiogram within the past eight weeks.;
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Impression: 1. Chest pain R07.9
Plan: Atypical, plan ST
2. Edema R60.9
Plan: None on exam. Check labs, echo, needs weight loss
3. Hypercholesterolemia E78.00
Plan: Check lipids
Planned Diagnostic Testing: Planned Diagnostic Test; The patient is not diabetic.;
The patient is less than 45 years old.;
The patient has not had a recent exercise treadmill test that was positive.;
It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.;
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Impression: 1. Shortness of breath R06.02
Plan: Nuclear stress test to evaluate for ischemia. Continue daily aspirin. add Spironolactone 25 mg/d;
2. Cardiomyopathy I42.9
Plan: LVEF of 20-25%. Continue Lasix add Spironolactone 25mg once daily;
The patient's age is between 45 and 64.;
It is not known if the patient has had a stress echocardiogram within the past eight weeks.;
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

In 2016 patient attempted tmst but could not reach 85% target; hx of chest discomfort; dyspnea on exertion; abnormal ekg; hypertension; morbid obesity with BMI of 66.08;
The patient is not diabetic.;
The patient is less than 45 years old.;
The patient has not had a recent exercise treadmill test that was positive.;
The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.;
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

In ULV Function:
Ejection Fraction 60 %.
Interpretation:
1. Technically poor 2-D, M-mode, color Doppler, and tissue Doppler echo were performed.
2. The aortic root is normal.
3. The left atrium is normal. Right atrium normal.
4. Le; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.;
The patient's age is between 45 and 64.;
The patient has not had a stress echocardiogram within the past eight weeks.;
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
known CAD patient with new complaints of chest pressure and increasing shortness of breath. Has history of STEMI in 2015 with stent placement in March and another in April of that year. He is a new patient to our clinic; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29.

known CAD, 10 years since last Angiogram, HTN; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

known CAD, new onset chest pain with radiculopathy. Shortness of breath. Worse with exertion, relieved with rest. Previous MI, has Rx for nitro.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

Known CHS, has pace maker; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

known heart failure with known CAD and shortness of breathe; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Mild bradycardia, no symptoms. &x0D; May-Thurner syndrome status post stent to the left iliac vein.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

mitral valve disorder, htn, angina, hyperlipidemia; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Mr. Self is a 40 year old male referred for chest pain. He is in remission from methamphetamine use. He has not used it in 2 weeks. He also smokes. He was discharged today from HRMC where he presented with chest pain and markedly elevated BP. He had not us; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Mr. Hales is 60 years old with history of CAD, HTN and HLP. He comes in today for surgical clearance for a lumbar decompression to L2-L3. This surgery is scheduled for 4/6/17. He had SCA on 12/21/17 that revealed 50% stenosis proximal to patent RCA stent.; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent ) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Mr. Lott is a new patient here to establish cardiac care. He has a history of coronary artery disease and is status post PCI in October 2016 at UAMS. He is easily fatigued but he tries to stay active. He says he is limited by knee pain. He denies any ches; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29.

Mr. McIntyre is referred for cardiac evaluation of chest pain. He has a chronic past medical history of tobacco use, obesity, and OSA with CPAP. He reports non-radiating right-sided chest pain that first started approximately 2 years ago. He describes ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Mr. Tumbleson has CAD. Heart cath in September 2016. Now has new onset chest pain and shortness of breath. need to evaluate for worsening disease process.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39.
Mr. Vick is here with complaints of dizziness, edema and dyspnea. He has known ASD s/p closure, syncope, CKD, and HTN. His PCP started him on a diuretic that doesn't seem to be helping. He doesn't know what diuretic it is. His medication list indicates th; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

Mr. Whitted is a 38 year old male here today for return appointment. No known history of CAD. He has a history of hypertension and hyperlipidemia. Patient presents today with complaints of dull and achy left-sided chest pain that is better with rest, dysp; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Mrs Dickerson is a 33 y/o female patient with no previous cardiac history who had ECHO with preserved EF with diastolic dysfunction. She has had multiple admits to the ER with chest pain and dizziness over the year. She presented to ER last night from She; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Ms Trice is here as a new patient after being referred by Dr William Riley. She is referred with complaints of dyspnea, diaphoresis, palpitations and fatigue. She has a chronic past medical history of PE with history of IVC filter placement and removal.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Ms. Flick is referred by Dr. Joel Cobb for evaluation of chest pain. She presents with left-sided chest discomfort, moderate severity at times but worsening to very severe. She notes these episodes generally at rest and it resolved spontaneously. The patient is not diabetic. The patient is less than 45 years old. The patient has not had a recent exercise treadmill test that was positive. The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs. This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Ms. Morris is a 46 y/o AAW with a h/o PAF, HTN, here today for a follow up. She says that her palpitations have been less since she started taking the propafenone. She says that she was having episodes of this 4-5 times daily and now these are down to 1; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). The patient has known or suspected coronary artery disease. The BMI is 30 to 39; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders. The study is requested for suspected coronary artery disease. The member has known or suspected coronary artery disease. The BMI is 30 to 39; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation. The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

N/A; The study is being ordered for suspected CAD. The patient is presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had previous cardiac surgery or angioplasty; The patient has not had a recent non-nuclear stress test. The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). The patient does not have a physical limitation to exercise.
New patient referred Dr Campbell, dyspnea with moderate exertion, no associated chest pain, not at rest, since AMI one year ago and had CABG times 3 and grafts closed, and had coronary stent in March 2016 and last stent in April 2016, and has ankle duma.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

New patient referred Dr newbun cardiac clearance.. No angina, no dyspnea, knee limits activity... non smoker.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had a recent non-nuclear stress test.; The results of the previous nuclear cardiology study were normal.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

New patient referred Dr Tarpley 2 years, got worse 2 weeks ago, precordial area, lasting 5 minutes, and no radiation, associated dyspnea, at rest, and 3 episodes in tandem, since the time daily episodes angina., smoker till 2016 1/2 a pack... non diabetic.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

none given; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
none; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

none; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

none; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.

None; This study is being ordered for Vascular Disease.; 2001; There has been treatment or conservative therapy.; SOB & Chest Pain; PCI 2001 & 2005

Obesity, Syncopy; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

other chest pain, essential hypertension; Chest Pain (Angina); This is a new problem. The current episode started more than 1 week ago. The problem occurs rarely. The problem has not changed since onset. Associated symptoms include chest pain. Pertinent; The study is being ordered for suspected CAD; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had previous cardiac surgery or angioplasty; The patient has not had a recent non-nuclear stress test; The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

other chest pain, shortness of breath; Wayne Epperly is a 36 y.o. male who presents as new. Pertinent history includes: Hypertension, hyperlipidemia. Other past medical history is normal; The patient is not diabetic; The patient is less than 45 years old; The patient has not had a recent exercise treadmill test that was positive; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

1

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

other chest pain, shortness of breath on exertion, palpitations. Sherie L Grant is a 53 y.o. female who presents as re-establish. Pertinent history includes: None. Other past medical history is noted below. Patient complains of chest pain described feels; The study is being ordered for suspected CAD; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had previous cardiac surgery or angioplasty; The patient has not had a recent non-nuclear stress test; The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

other chest pain, shortness of breath; Robin M Smoke is a 43 y.o. female who presents as new patient. Pertinent history includes: None. Other past medical history is noted below. Patient complains of right sided chest pain at rest radiating to the back; The patient is not diabetic; The patient is less than 45 years old; The patient has not had a recent exercise treadmill test that was positive; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Approval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Palpitation, DM II, HTN, Hyperlipidemia, Dyspnea on exertion.; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Approval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Palpitation, HTN, Ventricular Premature Complex, Atrial Premature Depolarization; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient has had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Approval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Palpitations, dizziness, shortness of breath, and chest pain; I feel a rapid forceful heart beat and my heart races and it makes me dizzy. I have a had a left arm that feels uncomfortable at the same times when my chest feelings strange; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Approval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Palpitations, dyspnea, family history, obesity; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Approval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study

PATIENT HAD COMPLAINTS OF CHEST PAIN ON LEFT SIDE OF CHEST UNDER LEFT ARM. PT DOES HAVE SHORTNESS OF BREATH WITH EXERTION AS WELL AS A STRONG FAMILY HISTORY OF CARDIAC DISEASE; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.
patent had surgery; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

PATIENT HAS A PACE MAKER, EXERCISE STRESS TEST PERFORMED 12/12/2014, CHEST PAIN RADIATING DOWN LEFT ARM AND UP TO THE NECK, SWEATING, SHORTNESS OF BREATH, DIZZINESS AND SYNCOPE; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has Abn-EKG, PVC's and Bigeminy; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. It is not known if the patient has diabetes.; The patient has not had a cardiology study in the past 3 years.; No other testing was completed more than 3 years ago.

Patient has asthma on inhalors cannot walk good on treadmill, chest pain, shortness of breath.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has been having these recurrent typical chest pain episodes, unable to exercise due to her lightheadedness and dizziness and back problem, requesting pharmacological stress test. Abnormal tilt table test secondary to POTS syndrome.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.
Patient has CAD; The patient is not diabetic; The patient is less than 45 years old; The patient has not had a recent exercise treadmill test that was positive; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has complaints of chest pain and attempted to complete a RSE but due to back pain could not reach target heart rate and so the test was non diagnostic. She also has had a syncopal episode and has 1st degree familial CAD; The patient’s age is between 45 and 64; The patient has had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has CP, some radiating to the back and some radiating down his arm. He has a very strong FM HX of CAD with both brothers having heart attacks at his age. CP is relatively new onset over the past month or two. He as well is associated with SOB; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath; The study is requested for suspected coronary artery disease; The member has known or suspected coronary artery disease; The BMI is 20 to 29

Patient has diabetes, hypertension and known CAD; The study is being ordered for known CAD; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG; The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient has hyperlipidemia and chest pain; The study is being ordered for known CAD; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG; The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Patient has hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Patient has shortness breath and chest pain. The patient has not had a stress echo. Patient has Hypertension, dizziness and giddiness.; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient is a current smoker; patient cannot walk on treadmill due to back and knee pain. He complains of chest pain that radiates across his chest and history of tachycardia and SOB; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29.

Approval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient is a smoker; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/17/2017; There has been treatment or conservative therapy.; chest pain radiating to right arm; medication.

Approval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient is blind and can not walk on a treadmill. Patient has also had a stroke, a c-spine fracture, and a pelvic fracture. Patient is short of breath on exertion. Patient has a family history of diabetes and CAD. Patient has a long history of tobacco use; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29.

Approval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient is diabetic, hyperlipidemia, and CAD by CT scan; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Approval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient is needing to have a cardiac clearance. Patient is scheduled to have a tumor removed from his neck. Patient has a history of CAD.; This study is being ordered as a pre-operative evaluation.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient had a previous cardiac surgery or angioplasty.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Patient is unable to walk on a treadmill due to back problems.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/09/17; There has been treatment or conservative therapy.; Patient presented to ER with stabbing chest pain; patient was given narcotic pain pills without relief of chest pain

Patient presented today with chest pain, shortness of breath and palpitations that are worse with rest.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Patient presented with c/o chest pain--atypical in description. no hx CAD. ekg showed nsr with no ischemic change. cardiac enzymes negative x3. ct chest to r/o pe ordered but patient unable to fit in machine. suggested transferring to sbmc for test to be.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient unable to complete bike stress echo; could only reach 64% max heart rate before needing to stop due to fatigue; recent episode of syncope and dizziness.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

Patient with a complaint of Chest Pain. Stress test was attempted. Patient had to stop before heart rate achieved due to back and knee pain.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

patient with a-fib/flutter; cardiomyopathy w EF 25-30%; sob on moderate exertion; recent hospital stay because of near cardiogenic shock; new onset a-fib; The patient is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration.;"; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

patient with hx of cad and 2 coronary stents having chest pain and sob; relieved by nitro; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

patient with recent stents Nov 2016; now with sob on exertion; abnormal ekg; ef still in 20s; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

Patient with the complaint of chest pain, palpitations, tachycardia. Stress Test was attempted and patient was not able to complete study due to morbid obesity (BMI 51.1) and sedentary lifestyle (truck driver). Patient is a former smoker.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
PMH includes HTN. He underwent left heart cath with LV angio, aortic root angio and coronary angios done via RFA without apparent complication on 2/2016. LVEF= approx 40%. Resolute stents in RPLB and in distal segment of RPDA and also placed a Resolute. The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Matthew Armstrong is a 44 y.o. Caucasian male who presents for evaluation of chest pain. Onset was 10 years ago, with waxing and waning course since that time. The patient admits to chest discomfort that is intermittent, with radi; The patient is not diabetic; The patient is less than 45 years old; The patient has not had a recent exercise treadmill test that was positive; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Precordial chest pain, dyspnea, nausea, dyspnea on exertion; female who over the last month has been experiencing recurrent episodes of pressure in mid precordium radiating into his jaw and into her neck occasionally associated with dyspnea and shortness of breath; It is not known if the patient is diabetic; The patient is less than 45 years old; The patient has not had a recent exercise treadmill test that was positive; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Precordial pain, dyspnea on exertion; Robert Varnedore is a 51 y.o. male who presents for post hospital discharge follow up. PMH includes psychosis and multiple illicit drug use. Was in hospital 1/2/17 to 1/10/2017 with encephalopathy and coffee ground em; The study is being ordered for suspected CAD; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had previous cardiac surgery or angioplasty; The patient has not had a recent non-nuclear stress test; The patient's age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

Precordial Pain, Palpitations, SVT and PAT; The study is being ordered for suspected CAD; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had previous cardiac surgery or angioplasty; The patient has not had a recent non-nuclear stress test; The patient's age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.
Precordial Pain, SOB, HTN, Dyslipidemia, Tobacco use, anxiety; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Pressure like chest pain and dyspnea for 2-3 weeks; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Pressure like chest pain and dyspnea for 2-3 weeks; There has not been any treatment or conservative therapy.; chest pain&abn; ekg&htn

Pressure like chest pain and dyspnea for 6-8 weeks; Angina; Hypertension; Hypothyroidism; Hyperlipidemia; Morbid obesity; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

pressure, dyspnea on exertion, and fatigue but reports no lightheadedness, no chest pain, no leg edema, no syncope, no orthopnea, no palpitations, no PND, and no claudication. He reports exercise intolerance but reports no fever, no night sweats, no signi; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

previous stroke, and patient is smoker.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Pt called stating both of his legs are swelling, his right more than left. He also stated
his blood pressure is running high. He says that he does not feel right. Patient has CAD
and a history of CABG.; The study is being ordered for known CAD.; The patient is not
presenting new symptoms of chest pain or increasing shortness of breath.; The patient
has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG
consistent with CAD.; The patient has not had a recent stress echocardiogram.; This
patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45
and 64.; The patient has not had a stress echocardiogram within the past eight weeks.;
The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear
Cardiology Study).

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

pt did a ett in nov and exercised 4.41 minutes with reaching targe hr. she had some
heart burn during exercise. see attached clinicals.; This is a request for Myocardial
Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing
done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk
factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal
defects, or valve disorders.; There are new or changing cardiac symptoms including
atypical chest pain (angina) and/or shortness of breath.; The study is requested for
suspected coronary artery disease.; The member has known or suspected coronary
disease.; The BMI is 20 to 29

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

pt has chest pain shortness of breath and syncope; The study is being ordered for
suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or
shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.;
The patient has not had a recent non-nuclear stress test.; The patient's age is between
45 and 64.; The patient has not had a stress echocardiogram within the past eight
weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).;
The patient does not have a physical limitation to exercise.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

pt has diabetes 2; The study is being ordered for suspected CAD.; The patient is not
presenting with symptoms of atypical chest pain and/or shortness of breath.; The
patient has not had a recent non-nuclear stress test.; The patient has not had a recent
abnormal EKG consistent with CAD.; The patient has not had a recent stress
echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a
stress echocardiogram within the past eight weeks.; This is a request for Myocardial
Perfusion Imaging (Nuclear Cardiology Study).
Pt has diabetes, hyperlipidemia and hypertensive heart disease; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Pt has history of diabetes with h/o stents so we want a follow up myoview. last cath in 2010; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pt has hyperlipidemia Pt has essential hypertension; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pt has hyperlipidemia, chest pain, central hypertension; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pt has hyperlipidemia, hypertensive heart disease, chest pain; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

PT HAS UNCONTROLLED HYPERTENSION, DIABETES 2, RX METFORMIN, AND C/O CHEST PAIN AND DOE. RX’S FOR HTN: 162/100, MD INCREASED LOSARTAN TO 50MG, AND CONTINUED HCTZ.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

PT HAS Vertigo, Syncope, HTN, ASHD, and Dyslipidemia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

PT HAVING CHEST PRESSURE WITH SHORTNESS OF BREATH CHEST PAIN INCREASING IN NATURE PT HAVING POOR ENERGY; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; PT HAVING CHEST PRESSURE WITH SHORTNESS OF BREATH CHEST PAIN INCREASING IN NATURE PT HAVING POOR ENERGY; There has not been any treatment or conservative therapy.; PT HAVING CHEST PRESSURE WITH SHORTNESS OF BREATH CHEST PAIN INCREASING IN NATURE PT HAVING POOR ENERGY

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

pt having CP and SOB.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.
Pt here for followup of ischemic cardiomyopathy and cad. He denies any chest pain. He denies any syncope. He had some abdominal pain which was relieved with a loosening of his lap band by Dr. Baker, however he has since had trouble keeping weight off and ; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent ) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

PT IS HAVING CHEST PRESSURE WITH RADIATION, ALSO HAVING SHORTNESS OF BREATH AND HIGH BLOOD PRESSURE, PT ALSO DOES HAVE ARTHRITIS; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurism, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

pt present palpitations, family hx CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

Pt states that he has been having seizures a couple of times a night approx every other night that wakes him from his sleep. STates that his whole left side goes numb with these episodes. Pt has not been to neurologist since getting out of jail. States th; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Pt suffers with prolonged Q T on EKG.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; It is not known if the patient has had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

1

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Pt unable to exercise due to ddd; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

1

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

pt unable to walk on treadmill due to recent foot surgery... nsvt on halter monitor; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study)

1

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Pt was born w/ aortic valvotomy. Undergone aortic valve replacement for severe aortic regurgitation in 2014; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

1
Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

R/O CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

Reason for Appointment: 1. Afib

History of Present Illness: HPI: He is feeling better on medication. he has cut back on his drinking. no concerning cardiac symptoms.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Reason for Appointment: 1. CHF

History of Present Illness: HPI: He is here to re-engage with a cardiologist. He has not had one in several years. He had an MI and stents in 2006 at UAMS. He was also seen at the VA after that. he was to; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39.
Reason for Appointment: 1. PAF; History of Present Illness: Symptoms: New patient referred DR Jon Tarpley episode PAF 3 years ago, and transfer cardiologist, no angina, no palpitations, no dyspnea...history hypertension....negative nu; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Recent hospitalization with chest pain with sob & abnormal EKG. Chronic right leg problems with multiple surgeries and a brace make walking difficult; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Referral for chest pain. Substernal chest discomfort, lasted 5 minutes and resolved spontaneously. She has dyspnea on exertion during her daily activities.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

Right precordial chest pain/left arm tightnessDyspnea on exertionType II diabetes mellitus without complications Essential hypertension.; Family history of coronary artery diseaseHypercholesterolemia.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.
Ronald E. Riddle is a 59 y.o. Native American male who presents for evaluation of atherosclerotic coronary artery disease with myocardial infarction due to occluded diagonal branch treated with angioplasty and stenting on November 30, 2013. He was seen in; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
SEVERAL CALCIFICATION DUE TO A CTA HEAVY SMOKER CARDIAC MURMUR; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent; The member has known or suspected coronary artery disease; The BMI is less than 20

Shortness of breath on exertion; Jaw pain; Tobacco user; The study is being ordered for suspected CAD; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had a recent non-nuclear stress test; The patient had a recent abnormal EKG consistent with CAD; The patient has not had a recent stress echocardiogram; The patient's age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; The patient is male; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Shortness of breath; Weakness; Essential (primary) hypertension; Goiter; Nonrheumatic mitral regurgitation; The study is being ordered for suspected CAD; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had previous cardiac surgery or angioplasty; The patient has not had a recent non-nuclear stress test; The patient's age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Shortness of breath, chest of breath; The patient is not diabetic; The patient is less than 45 years old; The patient has not had a recent exercise treadmill test that was positive; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Shortness of breath, Chest Pressure, PVD, ASHD; The study is being ordered for suspected CAD; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had previous cardiac surgery or angioplasty; The patient has not had a recent non-nuclear stress test; The patient's age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.
SHORTNESS OF BREATH, PALPATIONS; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Shortness of breath: DOE
Fatigue
Arteriosclerosis of native coronary artery w/ other form of angina pectoris: Exertional angina CC II
Varicose veins of bilateral legs w/ pain: L greater than R
Varicose veins of bi low extrem with other complication; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Sob, Htn, Chronic heart failure, chf, cardiomyopathy; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Sob; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Enter date of initial onset here - or Type In Unknown if No Info Given &gt;.; It is not known if there has been any treatment or conservative therapy.; angina

States at times he does have an "uncomfortable feeling" in his middle chest area but no pains in his jaw or arm. Sob comes and goes. SOB has worsened since he had his stent in 11/2/16. He states that last night he had laid down in the bed and sudden; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent ) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

stress echo attempted, could not achieve max heart rate due to deconditioning and testing had to be stopped for shortness of breath and fatigue.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

2 strong family hx, diabetic, htn, hyperlipidemia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

3 substernal chest pain; dyspnea; fatigue; abnormal ekg; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

4 suspected CAD and Paroxysmal A Fib.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.
Sycope and collapse; Dizziness; Other chest pain; Shortness of breath; Weakness: Weakness/fatigue, hypersomnia; Stasis dermatitis; COPD; Other specified diabetes mellitus without complications; Mixed hyperlipidemia; Essential (primary) hypertension; Dis; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Oma C Vaughn is a 59 y.o. female who presents w c/o syncope. Has had multiple episodes in the past week. Each time she feels lightheaded and as if the world is spinning around her. She can usually get; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Tachycardia, shortness of breath on exertion, heart palpitations, essential hypertension, chest pain.; Patient with a past history of hypertension and tachycardia, and other medical problems, tells me she sees several specialist, here for followup evalua; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.

The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient is diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

unknown; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise. 

unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29 

unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39
unknown; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; Chest pain, shortness of breath, dizziness, and palpitations

1

UNSTABLE ANGINA, CHEST PAIN, KNOWN CAD S/P STENT & CABG, HTN, HYPERLIPIDEMIA, DIABETES, OBESITY, FAMILY HX OF CAD; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39 very obese, smoker, aortic valve problem; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

This is a request for a MUGA scan.; This study is being ordered for Congestive Heart Failure.; The patient has recently been diagnosed with and/or treated for congestive heart failure.; The patient has not had a previous MUGA scan.; The patient is not presenting any new cardiac signs or symptoms.; Eval need for ICD

78472 CARDIAC OR HEART BLOOD POOL IMAGING

Approval

This is a request for a MUGA scan.; This study is being ordered for Congestive Heart Failure.; The patient has recently been diagnosed with and/or treated for congestive heart failure.; The patient has not had a previous MUGA scan.; The patient is presenting new cardiac signs or symptoms.; The patient had a recent MI.; ejection fraction has lowered

78472 CARDIAC OR HEART BLOOD POOL IMAGING

Approval
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

It is not known if there has been any treatment or conservative therapy.

Describe primary symptoms here - or Type In Unknown If No Info Given.

MEDICATION

This study is being ordered for Vascular Disease.

About a year ago; There has not been any treatment or conservative therapy.

Chest pain, palpitations, short of breath.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

It is not known if there has been any treatment or conservative therapy.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

This is a recurrent problem. The current episode started more than 1 month ago. The problem occurs every several days. The problem has been unchanged.

Atypical chest pain, shortness of breath on exertion, fatigue, no previous workup.
01. Angina, class III (I20.9): Recurrent. Assoc with doe. Lexiscan MPI to be done first available. Pt unable to walk on treadmill due to leg, knee & back pain. ADD ASA 81mg q day. Reluctant to add BB at this time due to h/o low HR. 02. DOE (dyspnea o; This study is being ordered for Vascular Disease.; 08/04/2016; There has been treatment or conservative therapy.; CHIEF COMPLAINT: Chest Pain, Dyspnea, dizziness; 1. Chest Pain &x0D; The patient complains of chest discomfort. The discomfort is located in the substernal area. The patient describes the pain as dull and aching. Patient was scheduled for an echo and NSC last September, but she cancelled the appointments a

Abnormal EKG; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; x 2 weeks; It is not known if there has been any treatment or conservative therapy.; Chest Pain, shortness of Breadth.

He has a carotid bruit; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 weeks ago; There has not been any treatment or conservative therapy.; Shortness of breath, fatigue, chest pain

None; This study is being ordered for Vascular Disease.; 2001; There has been treatment or conservative therapy.; SOB & Chest Pain; PCI 2001 & 2005

PATIENT HAD NUMEROUS EPISODES OF CHEST PAIN, SHORTNESS OF BREATH. PAIN WENT INTO JAW AND HAD COMPLAINTS OF DIAPHORESIS DURING BOTH EPISODES. PATIENT DID HAVE EPISODES OF HYPERTENSION DURING THESE EPISODES ALONG WITH NEAR SYNCOPE.; This study is being ordered for Vascular Disease.; APPROX MID JANUARY 2017; There has not been any treatment or conservative therapy.; PATIENT HAD NUMEROUS EPISODES OF CHEST PAIN, SHORTNESS OF BREATH. PAIN WENT INTO JAW AND HAD COMPLAINTS OF DIAPHORESIS DURING BOTH EPISODES. PATIENT DID HAVE EPISODES OF HYPERTENSION DURING THESE EPISODES ALONG WITH NEAR SYNCOPE.

patient is a smoker; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/17/2017; There has been treatment or conservative therapy.; chest pain radiating to right arm; medication
Patient is unable to walk on a treadmill due to back problems.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/09/17; There has been treatment or conservative therapy.;

Patient presented to ER with stabbing chest pain; patient was given narcotic pain pills without relief of chest pain

PATIENT PRESENTED WITH CHEST PRESSURE THAT COMES AND GOES WITH EXERTION AND AT REST. PAIN IS RELIEVED WITH RESET. PT DOES HAVE PALPITATIONS AS WELL AS SOB WITH AND WITH EXERTION; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;

PATIENT PRESENTED WITH CHEST PRESSURE THAT COMES AND GOES WITH EXERTION AND AT REST. PAIN IS RELIEVED WITH RESET. PT DOES HAVE PALPITATIONS AS WELL AS SOB WITH AND WITH EXERTION; There has not been any treatment or conservative therapy.;

PATIENT PRESENTED WITH CHEST PRESSURE THAT COMES AND GOES WITH EXERTION AND AT REST. PAIN IS RELIEVED WITH RESET. PT DOES HAVE PALPITATIONS AS WELL AS SOB WITH AND WITH EXERTION

Pressure like chest pain and dyspnea for 2-3 weeks; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;

Pressure like chest pain and dyspnea for 2-3 weeks; There has not been any treatment or conservative therapy.;

Pressure like chest pain and dyspnea for 2-3 weeks;

PT HAVING CHEST PRESSURE WITH SHORTNESS OF BREATH CHEST PAIN INCREASING IN NATURE PT HAVING POOR ENERGY; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;

PT HAVING CHEST PRESSURE WITH SHORTNESS OF BREATH CHEST PAIN INCREASING IN NATURE PT HAVING POOR ENERGY; There has not been any treatment or conservative therapy.;

PT HAVING CHEST PRESSURE WITH SHORTNESS OF BREATH CHEST PAIN INCREASING IN NATURE PT HAVING POOR ENERGY;

sob; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;

&\lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.;

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has high blood pressure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There is a change in the patient's cardiac symptoms.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has high blood pressure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected left ventricular disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is NOT for the initial evaluation of heart failure.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected Congestive Heart Failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has shortness of breath; Known or suspected pulmonary hypertension.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of heart failure.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected Congestive Heart Failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This request is NOT for initial evaluation of a murmur.; This is NOT a request for follow up of a known murmur.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has abnormal heart sounds.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.
This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; It is unknown if there has been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of a pericardial disease.

Approval 93307 TTHRC R-T IMG 2D +M-MODE REC COMPL

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for evaluation of Pericardial Disease.; There has NOT been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a pericardial disease.

Approval 93307 TTHRC R-T IMG 2D +M-MODE REC COMPL

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Embolism.

Approval 93307 TTHRC R-T IMG 2D +M-MODE REC COMPL

This is a request for an echocardiogram.; This study is being ordered for Evaluation of Cardiac Mass.; It is unknown if there has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a cardiac mass.

Approval 93307 TTHRC R-T IMG 2D +M-MODE REC COMPL

This is a request for an echocardiogram.; This study is being ordered for Evaluation of Cardiac Mass.; This is for the initial evaluation of a cardiac mass.

Approval 93307 TTHRC R-T IMG 2D +M-MODE REC COMPL

This is a request for an echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; It is unknown if there has been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.

Approval 93307 TTHRC R-T IMG 2D +M-MODE REC COMPL

This is a request for an echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is a request for follow up of a known murmur.

Approval 93307 TTHRC R-T IMG 2D +M-MODE REC COMPL

This is a request for an echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.

Approval 93307 TTHRC R-T IMG 2D +M-MODE REC COMPL

This is a request for an echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is NOT a request for follow up of a known murmur.
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is NOT grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is NOT for initial evaluation of a murmur.; It is unknown if this is a request for follow up of a known murmur.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 12 - 23 months or more since the last echocardiogram.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 24 months or more since the last echocardiogram.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 7-9 months since the last echocardiogram.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It is unknown when the last echocardiogram was performed.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of artificial heart valves.

This is a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for evaluation of atrial fibrillation or flutter to determine the presence or absence of left atrial thrombus or evaluate for radiofrequency ablation procedure.

Disapproval 93350 ECHO TTHRC R-T 2D +M-MODE COMPLETE REST&STRS

Radiology Services Denied Not Medically Necessary

Patient had OTCA in 2016, stress testing requested for follow up.; This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is not experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.
PATIENT PRESENTED WITH CHEST PRESSURE THAT COMES AND GOES WITH EXERTION AND AT REST. PAIN IS RELIEVED WITH RESET. PT DOES HAVE PALPITATIONS AS WELL AS SOB WITH AND WITH EXERTION; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; PATIENT PRESENTED WITH CHEST PRESSURE THAT COMES AND GOES WITH EXERTION AND AT REST. PAIN IS RELIEVED WITH RESET. PT DOES HAVE PALPITATIONS AS WELL AS SOB WITH AND WITH EXERTION; There has not been any treatment or conservative therapy.; PATIENT PRESENTED WITH CHEST PRESSURE THAT COMES AND GOES WITH EXERTION AND AT REST. PAIN IS RELIEVED WITH RESET. PT DOES HAVE PALPITATIONS AS WELL AS SOB WITH AND WITH EXERTION.

PATIENT PRESENTED WITH CHEST PRESSURE THAT STARTS IN CHEST AND GOES INTO ARM. PATIENT ALSO HAS COMPLAINTS OF SHORTNESS OF BREATH; There has not been any treatment or conservative therapy.; PATIENT PRESENTED WITH CHEST PRESSURE THAT STARTS IN CHEST AND GOES INTO ARM. PATIENT ALSO HAS COMPLAINTS OF SHORTNESS OF BREATH.

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a "thunderclap" or the worst headache of the patient’s life.

The patient has failed a course of anti-inflammatory medication or steroids.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; There has not been a supervised trial of conservative management for at least 6 weeks.; "The caller indicated that the patient is not experiencing or presenting symptoms of Abnormal Gait, Lower Extremity Weakness, Asymmetric Reflexes, Cauda Equina Syndrome, Bowel or Bladder Disfunction, New Foot Drop, or Radiculopathy."; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient has had 3 or fewer follow-up Cervical Spine CTs.
This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.

This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; PATIENT HAS BEEN EXPERIENCING RADIATING RIGHT ARM PAIN, WEAKNESS, NUMBNESS AND LOSS OF GRIP STRENGTH FOR APPROXIMATELY 7 MONTHS. PATIENT ALSO IS SUFFERING FROM EXTREME SWELLING IN RIGHT HAND WHICH IS LIMITING HER ABILITY TO PERFORM DAILY TASKS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.; No, this patient did not have a recent course of supervised physical Therapy.
This is a request for cervical spine MRI; Neurological deficits; parathesia; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness; No, the patient is not demonstrating unilateral muscle wasting; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms; The patient does not have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has had back pain for over 4 weeks; The patient has seen the doctor more then once for these symptoms; The patient has seen the doctor more then once for these symptoms; The physician has directed conservative treatment for the past 6 weeks; The physician has directed conservative treatment for the past 6 weeks; The patient has completed 6 weeks of physical therapy; The patient has not completed 6 weeks of physical therapy; The patient has been treated with medication; other medications as listed; The patient has completed 6 weeks or more of Chiropractic care; IBUPROFEN

&l; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 10/17/2016; There has been treatment or conservative therapy; pt is having spinal pain; pt is having ultrasound therapy

The patient does have neurological deficits; This is a request for a thoracic spine MRI; The study is being ordered due to chronic back pain or suspected degenerative disease; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

The patient does not have any neurological deficits; This is a request for a thoracic spine MRI; There has been a supervised trial of conservative management for at least 6 weeks; The study is being ordered due to chronic back pain or suspected degenerative disease.
The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/17/2016; There has been treatment or conservative therapy.; pt is having spinal pain; pt is having ultrasound therapy; The patient does not have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; Pre-Operative Evaluation; No, the last Lumbar spine MRI was not performed within the past two weeks.; Surgery is scheduled within the past 4 weeks.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection.
Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST
The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality.

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST
The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s).

Approval 72192 CT PELVIS WITHOUT CONTRAST
unknown; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT.

Approval 72196 MRI PELVIS
This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

Approval 72196 MRI PELVIS
This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.

Approval 73220 MRI UPPER EXTREMITY, ENTIRE EXTREMITY, NOT A JOINT
The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;.

Approval 73221 MRI JOINT OF UPPER EXTREMITY
The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.

Approval 73221 MRI JOINT OF UPPER EXTREMITY
The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.
This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

Abnormal X-ray from 2/28/2017.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; home treatment documentation: tx plan 2x's a week she goes for Physical Therapy and 3 days a week she does HEP (exercise from PT). No improvement in swelling or pain.; The patient received oral analgesics.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI.".; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

<&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment; This study is being requested for Lymphoma or Myeloma; It is unknown if the patient completed a course of treatment initiated in the last 8 weeks or are experiencing new signs or symptoms.

There is an immediate family history of aneurysm; This is a request for a Brain MRA.

MEMBER WITH TETRALOGY OF FALLOT WITH ANOXIC BRAIN INJURY RESULTING IN DEFICITS IN COGNITION, POSSIBLE DYSPHAGIA, MOBILITY AND ADLS; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

The patient had a seizure was in hospital has had a severe headache since having seizure; This request is for a Brain MRI; The study is being requested for evaluation of a headache; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes; The patient does not have HIV or cancer; The patient has a sudden and severe headache; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; This request is for a Brain MRI; The study is being requested for evaluation of a headache; The study is NOT being requested for evaluation of a headache; The headache is described as chronic or recurring; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects; Requested for evaluation of seizures; There has been a previous Brain MRI completed; The brain MRI was abnormal.
There are no documented clinical findings of immune system suppression; This study is not to be part of a Myelogram; This is a request for a Cervical Spine CT; None of the options listed is the reason for the study; There is a reason why the patient cannot have a Cervical Spine MRI; The patient is experiencing cervical neck pain not improving despite treatment; This study is being ordered for a neurological disorder; gradually over time; There has been treatment or conservative therapy; neck and back pain; physical therapy, pain medication, NSAIDs, muscle relaxers chiropractic did not help. decompression made the pain worse. pain meds did help. Spurlings test is positive to the right. ROM is limited to 20 degrees. Obrians test causes pain to the right; This study is not to be part of a Myelogram; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

Patient comes to clinic today for follow up of her chronic pain. She denies any new numbness/tingling/weakness or loss of bowel or bladder control. She is s/p left SI Joint injection with 70% relief. She denies any medication side effects. CT of the l; This study is not to be part of a Myelogram; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

The patient does not have any neurological deficits; This study is not to be part of a Myelogram; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease; There has been a supervised trial of conservative management for at least 6 weeks; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is to be part of a Myelogram; This is a request for a Cervical Spine CT; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; There has been treatment or conservative therapy.

This is a request for a thoracic spine CT; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; The study is being ordered due to follow-up to surgery or fracture within the last 6 months; There is a reason why the patient cannot undergo a thoracic spine MRI.

This has been treatment or conservative therapy; back and right knee pain; physical therapy, pain medications, NSAIDs.

There has been treatment or conservative therapy; neck and back pain; physical therapy, pain medication, NSAIDs, muscle relaxers.
Approval 72131 CT LUMBAR SPINE, LOW BACK

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.;

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT

Approval 72131 CT LUMBAR SPINE, LOW BACK

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT

Approval 72131 CT LUMBAR SPINE, LOW BACK

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT

Approval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

Radiating Pain; injections, narcotic and inset treatment, past pt none recently

72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST

Approval

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/7/2014; There has been treatment or conservative therapy.; Radiating Pain; injections, narcotic and inset treatment, past pt none recently

1

Approval

This study is being ordered for a neurological disorder.; There has been treatment or conservative therapy.;

1

Approval

This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication, NSAIDs

2

Approval

This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs

1

Approval

This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, muscle relaxers, NSAIDs

1

Approval

This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs, muscle relaxers

1

Approval

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; Mrs. Owens presents for follow-up evaluation of many years progressive low back pain. To review lumbar MRI report from the VA on 05/16/16 she's had a laminectomy with posterior fusion from L2-L5. There is grade 1 retrolisthesis of L2 on L3. At L2-3 there

1

Approval

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; Sprain of T7-8 interspinous ligament and scoliosis with apex at T7.

1

Approval

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.

3
The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; &lt;Enter Additional Clinical Information&gt;; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; On my review of her thoracic x-rays done on 03/17/17 she has significant thoracic scoliosis centered at T3-4 with disc height loss at this level and anterior spurring. I educated her that scoliosis can increase force through the facets and also cause myofa; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient is presenting new symptoms.; It is not known if the study is for follow up or staging.; It is not known if the patient is undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of asymmetric reflexes.

Pain Details: The patient presents today for follow up. They report pain as basically stable and controlled with current medications. Denies any side effects from their medications and maintains physical activity. Requests no changes today.

The patient ; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Patient was approved for Lumbar MRI in November 2016 and was unable to attend the scheduled appt.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient has had neck and back pain since November 2016. Patient has tried home exercises with no relief.; There has been treatment or conservative therapy.; Neck and back pain. Numbness; Home therapy exercises.

Recent falls off her bed which caused more pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; First seen by MDO on 01/26/2016. Back pain 10+ yrs.; There has been treatment or conservative therapy.; Pain and worsening pain in mid to lower back region; Epidural injection; facet injection; pain meds; PT x 6wks 1yr ago

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

unknown; This study is being ordered for a neurological disorder.; has had symptoms since age of 13; There has been treatment or conservative therapy.; pain that goes down R side into arm, low back pain down left leg with numbness; PT, injections

This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.
This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT 1

The request is for an upper extremity non-join MRI.; This is a preoperative or recent postoperative evaluation.

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Her left shoulder pain is 50% reduced status post ultrasound-guided injection, therefore think the majority of her pain now is related to the rotator cuff, there were areas of tendinopathy and possible small tear at the distal portion of the Supraspinatus.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.
This study is being ordered for a neurological disorder; gradually over time; There has been treatment or conservative therapy; back and right knee pain; physical therapy, pain medications, NSAIDs.

This is a request for a Lower Extremity CT; This is not a preoperative or recent postoperative evaluation; There is no suspicion of a lower extremity neoplasm, tumor or metastasis; There is no suspicion of lower extremity bone or joint infection; There is not a history of lower extremity joint or long bone trauma or injury.

This study is being ordered for trauma or injury; 10/2015; There has been treatment or conservative therapy; Tenderness, positive painful arch test; Pain management, PT.

This is a request for a Knee MRI; The ordering physician is an orthopedist; Suspected meniscus, tendon, or ligament injury.

This is a request for a Knee MRI; The ordering physician is not an orthopedist; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee; Instability; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI; The ordering physician is not an orthopedist; There is no supsected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; Instability.

This is a request for a Knee MRI; The patient has not had recent plain films of the knee; The ordering physician is not an orthopedist; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment; Physician directed course of non-steroidal anti-inflammatory medications.

He has had a lot of fluoroquinolone antibiotics for chronic sinus infections in suspect this may have predisposed him to Achilles and iliohypsoas tendon tear and tendinopathy, the best recommendation for this would be platelet rich plasma injection. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; Hip pain initially started in May 2016. Right ankle pain started October 2016; There has been treatment or conservative therapy; Stabbing pain in right hip and right ankle; Chiropractic care for 8 months and physical therapy for 6 months.

Radiology Services Denied Not Medically Necessary

Disapproval 74176 CT ABD & PELVIS W/O CONTRAST
Radiology Services Denied Not Medically Necessary

Approval 70450 CT BRAIN, HEAD
This is a request for a brain/head CT.; This study is being requested for a recent head trauma or injury.

Approval 70450 CT BRAIN, HEAD
This is a request for a brain/head CT.; This study is being requested for a headache.

Approval 70450 CT BRAIN, HEAD
This study is being requested for a history of stroke, (CVA) known or follow-up.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The study is being requested for evaluation of seizures; There has not been a previous Brain MRI completed.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
03/02/17; It is not known if there has been any treatment or conservative therapy.; weakness, numbness

patient has pain 90% of the day with medication to calm pain. patient has lost time from work because of the pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/10/2013; There has been treatment or conservative therapy.; swelling, pain while walking, sitting, bending and sleeping; patient has taken inflammatory medications, pain medications, injection therapy

This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; bilateral hip and knee pain; pain medication, NSAIDs

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; ; Yes this is a request for a Diagnostic CT
This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.".; This study is being requested for a recent head trauma or injury.
This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.";
This study is being requested for a headache.
This is a request for a brain/head CT.; This study is being requested for a history of stroke, (CVA) known or follow-up.
This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.
This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The study is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.
weakness, numbness; This study is being ordered for a neurological disorder.;; weakness, numbness

04/02/17; It is not known if there has been any treatment or conservative therapy.
"There is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT.;

There is no radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.".; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection.".; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.".; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT.

Patient has sob, patient just recently quit smoking and is afraid she could possibly have black mold poisoning from her house; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.
This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

03/02/17; It is not known if there has been any treatment or conservative therapy;

weakness, numbness

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Left-sided low back pain with left-sided sciatica;&

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

None; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a known mass.; The diagnosis of Mass, Tumor, or Cancer has not been established.; The patient has not had recent plain films, bone scan or ultrasound of the knee.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.".; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient does not have a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.".; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has a documented limitation of their range of motion.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Locking

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days
This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is a suspected tarsal coalition.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for a hip MRI.; Intra-abdominal and pelvic swelling, mass and lump, unspecified site; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT.
This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; patient has an umbilical hernia; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Palpable mass located in left lower abdomen near source of pain

This request is for an Abdomen MRI.; This study is being ordered for hematuria.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the pancreas during a previous CT, MRI or Ultrasound.
74185 MRA, MRI ANGIOGRAPHY ABDOMEN WITH/WITHOUT CONTRAST

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. 12/02/2016; There has been treatment or conservative therapy; pain, swelling, large amount of drainage, redness, tenderness. arterial Doppler aortoiliac disease on left with pulsatile monophasic flow from the common femoral artery all the way to the foot small vessel disease on right calf; wound care for last three weeks and oral antibiotics.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

pt was brought to er with chest pain.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; “Patient is not clinically obese, nor has an emphysematous chest configuration.”; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."
; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study.); The patient has a physical limitation to exercise.

Approval

93350 ECHO TTHRC R-T 2D +M-MODE COMPLETE REST&STRS

This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.

Disapproval

70450 CT BRAIN, HEAD

Radiology Services Denied Not Medically Necessary

This study is being ordered for a neurological disorder.; August 2016; There has not been any treatment or conservative therapy.; Tingling to the left side of the body that started about a year ago and has progressed.He has trouble standing with an unsteady gait.

Disapproval

70544 Mr angiography head w/o dye

Radiology Services Denied Not Medically Necessary

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

Disapproval

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Radiology Services Denied Not Medically Necessary

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/28/2017; There has been treatment or conservative therapy.; dizziness, double vision, neck pain, numbness and tingling; physical therapy

Disapproval

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Radiology Services Denied Not Medically Necessary

This study is being ordered for a neurological disorder.; August 2016; There has not been any treatment or conservative therapy.; Tingling to the left side of the body that started about a year ago and has progressed.He has trouble standing with an unsteady gait.

Disapproval

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

Radiology Services Denied Not Medically Necessary

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This is a request for a Diagnostic CT.

This is a request for neck soft tissue CT.; The study is being ordered for something other than Trauma or other injury, Neck lump/mass, Known tumor or metastasis in the neck, suspicious infection/abscess or a pre-operative evaluation.; Yes this is a request for a Diagnostic CT; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.

This is a request for a Diagnostic CT.

PRIOR PET SCAN SHOWED TUMOR MARKERS AND DID NOT REVEAL ANY ABNORMALITIES. SOME AREAS COULD NOT BE WELL VISUALIZED. THESE TESTS NOW RECOMMENDED.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

This is a request for a Diagnostic CT.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

member has grave's disease; There is not a suspicion of an infection or abscess.; This examination is NOT being requested to evaluate lymphadenopathy or mass.; There is not a suspicion of a bone infection (osteomyelitis); There is NOT a suspicion of an orbit or face neoplasm, tumor, or metastasis.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.
Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell’s palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell’s palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This study is being ordered for Congenital Anomaly.; There has been treatment or conservative therapy.; 2015 MRI revealed a tiny pituitary adenoma. This is a f/u MRI; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell’s palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Adrenal insufficiency; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

No imaging, elevated prolactin level, discharge in left nipple and lump under the areola. She is having some headaches off and on. They are looking closely at the pituitary.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

No; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell’s palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.
This is a request for an Internal Auditory Canal MRI; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear; There is not a suspected cholesteatoma of the ear; The patient has not had a recent brain CT or MRI within the last 90 days; There are no neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness; This is not a pre-operative evaluation for a known tumor of the middle or inner ear.

This request is for a Brain MRI; The study is being requested for evaluation of a headache; The headache is described as chronic or recurring; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache; The headache is described as chronic or recurring; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

thyroid issues and cycles have stopped, pre diabetic; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.
unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma. ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Approval 71250 CT CHEST, THORAX
This study is being ordered for Congenital Anomaly.; There has been treatment or conservative therapy.; ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; follow up cts needed see notes.; It is not known if there has been any treatment or conservative therapy.;

Approval 71250 CT CHEST, THORAX
A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.

Approval 71250 CT CHEST, THORAX
PRIOR PET SCAN SHOWED TUMOR MARKERS AND DID NOT REVEAL ANY ABNORMALITIES. SOME AREAS COULD NOT BE WELL VISUALIZED. THESE TESTS NOW RECOMMENDED.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Approval 71250 CT CHEST, THORAX
She had a history of a posterior mediastinal paraspinal mass at the level of the carina many years ago so he was just doing follow-up on that. Here's what his note from 2010 said: "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Approval 71250 CT CHEST, THORAX
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease; There are 3 exams are being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering physician is a hematologist/oncologist; The diagnosis of cancer or tumor has been established; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This is a request for cervical spine MRI; "The patient is not being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; Known Tumor with or without metastasis; No, the patient does not have new or changing neurological signs or symptoms.

This is a request for a Pelvis MRI; The request is for suspicion of pelvic inflammatory disease or abscess.

This study is being ordered for Congenital Anomaly; There has been treatment or conservative therapy; left adrenal and bilateral mass, pancreatic mass, checking for stability, 6 month post to see if surgery is needed; This is a request for an Abdomen CT; This study is being ordered for a known tumor, cancer, mass, or rule out metastases; This is not a request for initial staging of a known tumor other than prostate; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10; No, this is not a request for follow up to a known tumor or abdominal cancer; No, there is a palpable or observed abdominal mass; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT; This study is being ordered as a pre-op or post op evaluation; The requested study is for post-operative evaluation; The requested study is a first follow up study for a post operative complication; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT; This study is being ordered for a known tumor, cancer, mass, or rule out metastases; This is a request for initial staging of a known tumor other than prostate; No, this is not a request for follow up to a known tumor or abdominal cancer.

This is a request for an Abdomen CT; This study is being ordered for a known tumor, cancer, mass, or rule out metastases; This is a request for initial staging of a known tumor other than prostate; No, this is not a request for follow up to a known tumor or abdominal cancer; Yes this is a request for a Diagnostic CT
This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, & Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, & Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of Diabetic patient with gastroparesis.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, & Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, & Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Yes this is a request for a Diagnostic CT

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; follow up cts needed see notes.; It is not known if there has been any treatment or conservative therapy.;

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.
This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is being ordered for follow-up.; It is not known if the patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is female.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; &lt;Enter Additional Clinical Information&gt.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 4 or more follow-up abdomen MRIs.; The last abdomen MRI was performed more than 6 months ago.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; It is not known if the ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

PATIENT IS HAVING NAUSEA, VOMITING, ALTERED MENTAL STATUS AND DIZZINESS. HE HAS HAD AN EGD THAT WAS NORMAL. US WAS ALSO NORMAL. HE IS HIV POSITIVE. WE ARE TRYING TO R/O ANY BRAIN ISSUES.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

"Enter answer here - or Type In Unknown If No Info Given."; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

"Enter answer here - or Type In Unknown If No Info Given."; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/2016; There has been treatment or conservative therapy.; chest and abdominal pain; antibiotics

"Enter answer here - or Type In Unknown If No Info Given."; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/26/2016; There has not been any treatment or conservative therapy.; Left lower quadrant abdominal pain
Enter answer here - or Type In Unknown if No Info Given.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/28/2016; There has not been any treatment or conservative therapy.; Epigastric pain, nausea

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.; Yes this is a request for a Diagnostic CT

A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.

Abnormal X-Ray, dysphasia; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

barium swallow; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Dec 6, 2016; There has been treatment or conservative therapy.; heartburn, constipation, vomiting, abdominal pain, increasing gas, reflux; medications

Chest pain and dysphasia. Having throat spasms. Scheduled for esophageal mobility testing.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Had a liver transplant 2/4/2015 due to liver cancer. Last CT of chest showed changes in lungs. This is to check those changes.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; on going for years; There has been treatment or conservative therapy.; see faxed info; cts for stones
Patient currently being evaluated for a liver transplant. Imaging is following treatment to surveillance for mets.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is NOT a smoker nor do they have a history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

Patient currently listed for a liver transplant with abnormal finding on previous CT Chest. Imaging is to evaluate any changes in a patient with hepatocellular carcinoma.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

Pt had liver transplant in 2008, developing ascites, on long term immunotherapy; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/2017; There has been treatment or conservative therapy.; accumulation of fluid in the abdominal area; Post liver transplant
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Tumor; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

will fax clinical; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.
The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of bowel or bladder dysfunction.
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.
The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection.
1. The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s);

2. This study is being ordered due to known or suspected infection.; “The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient.”; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

3. Had a liver transplant 2/4/2015 due to liver cancer. Last CT of chest showed changes in lungs. This is to check those changes.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

4. &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/1/16; There has not been any treatment or conservative therapy.; ABDOMINAL PAIN, DIVIRTICULITIES

5. atypical hemangioma in left aspect of sacrum 6 month follow up; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

6. Dr is ordering MRI Pelvis (Defecography) due to Constipation due to outlet dysfunction.; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

7. None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/17/2017; There has been treatment or conservative therapy.; Severe abd pain RLQ pain; Ultrasound small bowel follow through hida scan

8. This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.

9. This is a request for a Pelvis MRI.; The study is being ordered for joint pain or suspicion of joint or bone infection.; The study is being ordered for bilateral hip avascular necrosis.

10. unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; k92.2 GI bleed iron deficienci, Abdominal pain; flagyl and Doxycycline, colonoscopy

11. 1
&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.; Yes this is a request for a Diagnostic CT 1

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT 1

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &lt;x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicous Mass or Tumor, Organ Enlargement, &lt;x0D; Known or suspected infection such as pancreatitits, etc.;.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT 1

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &lt;x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicous Mass or Tumor, Organ Enlargement, &lt;x0D; Known or suspected infection such as pancreatitits, etc.;.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT 1

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/2016; There has been treatment or conservative therapy.; chest and abdominal pain; antibiotics 1

74150 CT ABDOMEN WITHOUT CONTRAST

Enter answer here - or Type In Unknown If No Info Given. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/26/2016; There has not been any treatment or conservative therapy.; Left lower quadrant abdominal pain

Approval
74150 CT ABDOMEN WITHOUT CONTRAST

Enter answer here - or Type In Unknown If No Info Given. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/28/2016; There has not been any treatment or conservative therapy.; Epigastric pain, nausea

Approval
74150 CT ABDOMEN WITHOUT CONTRAST

This is a request for an Abdomen CT.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

Approval
74150 CT ABDOMEN WITHOUT CONTRAST

1.4 cm hyperechogenic lesion right lobe of the liver may reflect hemangioma but cannot be definitively characterized. Other foci presumably reflect cysts. Consider biphasic postcontrast CT to further evaluate these findings.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

Approval
74150 CT ABDOMEN WITHOUT CONTRAST

Abdominal pain, constipation, abnormal imaging, gallstones; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis.

Approval
74150 CT ABDOMEN WITHOUT CONTRAST

Abdominal pain: Will obtain CT abdomen to evaluate for possible umbilical hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis.
Abnormality of AFP, Hx Of Hep C; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

CIRRHOSIS OF THE LIVER, ELEVATED LIVER FUNCTION TEST AND AFP, HISTORY OF HEPATIC ENCEPHALOPATHY; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Complicated PMHx. The GI symptoms may be a manifestation of EDS: recommend colonoscopy and CT to assess further.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Continued pain.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

ELEVATED AFP; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

elevated LFTs and is likely to have NASH.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT
Having epigastric and abdominal pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT 1

None; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT 1

Pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis 1

Patient had ultrasound in August that showed cirrhosis. She had a liver biopsy in January that showed Stage 0 fibrosis. Need to get closer imaging of the liver. Ordering Triple Phase CT scan.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT 1

Pt had liver transplant in 2008, developing ascites, on long term immunotherapy; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurologic disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/2017; There has been treatment or conservative therapy.; accumulation of fluid in the abdominal area; Post liver transplant

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer. 1

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT 1
This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn’s disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.
This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; Yes this is a request for a Diagnostic CT.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are known or endoscopic findings of Acute Non-ulcerative Colitis. This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of unexplained abdominal pain in patient over 75 years of age.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month.

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT.

Tumor; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

barium swallow; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Dec 6, 2016; There has been treatment or conservative therapy.; heartburn, constipation, vomiting, abdominal pain, increasing gas, reflux; medications

Chronic Hexi patient; Rectal bleeding - 8 out of 10 pain level. Rebound gastric tenderness.; This is a request for an abdomin-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.

did a abdominal exam has rigidity, tender to potion no mass was present; This is a request for an abdomin-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT have had a previous studies, US of abdomen showed fatty infiltration of liver; This is a request for an abdomin-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT

Left lower quadrant pain with concern for diverticulitis. Patient has had diverticulitis in past with same symptoms present.; This is a request for an abdomin-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT

None; This is a request for an abdomin-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; on going for years; There has been treatment or conservative therapy.; see faxed info; cts for stones
PATIENT HAD ABDOMEN ULTRASOUND IN 12/09/2016; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

patients Crohn's disease markers were elevated.. patient has continuous diarrhea, nausea and vomiting; This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient has Crohn's Disease.; Yes this is a request for a Diagnostic CT

Pt has had a small bowel follow through and upper gi series, labs, stool study and ultrasound; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT

pt. have diarrhea 10 times a day; pain 10/10; constant vomiting; dry heaves and; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.
This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained abdominal pain in patient over 75 years of age.; Other; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Other; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other;

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; &lt;Enter Additional Clinical Information&gt;; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; 52-year-old with recent bleeding that was likely diverticular in origin. Looking for the possibility of small bowel pathology, Meckel's diverticulum, etcetera. Requesting CT imaging of the small bowel.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Abd pain urgency; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; abdominal pain and changing bowel pattern; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Abdominal pain, ongoing, referred to this doctor 2/23 for gastritis; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; CROHNS DISEASE OF THE LARGE INTESTINE WITH COMPLICATIONS, ACUTE ONSET ABD PAIN, ABNORMAL LABS, R/O OBSTRUCTION OR ACUTE PROCESS, PT WITH COMPLICATED HX OF CROHNS DISEASE; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; diabetes, persistent right quadrant pain, a risk for fibrosing colonopathy; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Epigastric abdominal pain, Diarrhea, Change in bowel habits, Disease of stomach, and diverticulosis

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; k58.2; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; left lower quad and back pain

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; ongoing severe pain for 10 months, bloating.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient had CT Abdomen/Pelvis performed on January 30th, 2017 that revealed intussusception of jejunum. CT enterography of small bowel being ordered to evaluate further; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; previous CT shows possible IBS, Pt still having pain, nausea an vomiting, recently had colonoscopy showed mild inflammation in the small intestines; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt has diarrhea, trying to r/u pancreatic or any other pathology, c/o of chronic cough, shortness of breath, vomiting, abdominal swelling, cramps and change in bowel movements; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; replaces T# 055611310 which was ab ct only; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; The patient reports peri umbilical for the past 13 yrs. Pain described as sharp, cramping, dull, squeezing, and discomfort. The pain worsens when she's undergoing 24 hour urine collection per endocrinology: concern would be mastocytosis (need S HIA collection), neu...

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Unknown

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Unknown

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

Approval 74181 MRI ABDOMEN

5. Screening for HCC: The patient had an ABUS (4.18.2016) concerning for thrombus therefore, will schedule MRI w EOVIST protocol to further characterize ABUS findings.; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.

Autoimmune hepatitis. Her disease has been difficult to control in the past. Currently, her liver chemistries are not completely normal but they have only rarely been normal. She is not a candidate for budesonide given her cirrhosis on biopsy; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.
Enter answer here She has had epigastric pain that started September 2016, pain was significant when it stated her pain is episodic most of the time she has abd pain, the pain worse after meals. She has associated shortness of breath with the pain. She ha;
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; Describe primary symptoms here epigastric Pain, episodic pain high level of lipase, Disease of stomach and duodenum.; Type In Unknown If No Info Given;
Describe treatment / conservative therapy here; H. pylori (neg) 9/14/16; Abdominal U/S 9/16/16; Hida Scan 1/24/17; EGD 1/27/17; labs 2/2/17.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.

None; This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; Surgery is not planned for within 30 days.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; Severe abd pain RLQ pain; Ultrasound small bowel follow through hida scan.

Pt. has abnormal CT scan, elevated lab work, CEA & CA19-9. Pt. has obstructive jaundice; we are looking for a tumor or obstruction in the biliary tract.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, ECT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

The Pt has liver cancer, hep C and scirrhosis.; This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; There are NO physical findings or abnormal blood work consistent with peritonitis, pancreatitis or appendicitis.; There is active or clinical findings of ulcerative colitis, bowel inflammation or diverticulitis.

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist.";

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;
This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; Dx at 16 Crohn's disease with fistula of small intestines; loose stools; small bowel obstruction; has a significant high risk of complication.

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; Elevated liver functions and enlarged pancreas on recent ultrasound and ct scan.

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; Epicgastric pain and pancreatic cyst.

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; Epigastric is mildly tender on physical exam and her LFT’s are elevated.

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; He describes sudden onset diarrhea 1 year ago, now occurring 10-15 mins after eating. It is watery and occurs 6-10 times/day. Prior to this, he had 1-2 BMs/week only. He lost 30 lbs initially, his weight is now stable at 120 lbs. He has nocturnal incontin

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; Sepsis, due to unspecified organism.

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; Wendy Fry is a 37 y.o. female with a history of Crohn's disease (small bowel) diagnosed in 1997. She presented with V=V, anorexia and fevers at diagnosis. She cannot recall where the disease is located but thinks it is the small bowel. She has not had GI

This request is for an Abdomen MRI.; This study is being ordered for known or suspected vascular disease.; The ordering physician is not a surgeon.; There are plain film or ultrasound evidence of vascular abnormality.; history of primary biliary cholangitis, auto immune hepatitis, persistent elevated liver function test.
This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.\"; unknown
This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."
; Rectal bleeding, constant nausea and a 'full feeling'.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient did NOT have chemotherapy, radiation therapy or surgery in the last 3 months.; They had an Abdomen MRI in the last 10 months.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."

Patient is currently listed for a liver transplant, imaging is for surveillance of treated hepatocellular carcinoma.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."

Patient is being evaluated for a liver transplant. Imaging is to determine tumor size.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; staging of liver cancer

This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the pancreas during a previous CT, MRI or Ultrasound.

This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.
This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is ultrasound or plain film evidence of an abdominal organ enlargement.; CT SCAN WAS PERFORMED AND THE LIVER MEASURED 21 CM. THERE IS ALSO A LOW DENSITY LESION ON THE LIVER MEASURING 10MM.

This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is ultrasound or plain film evidence of an abdominal organ enlargement.; multiple lesions need to be looked at annually

This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is ultrasound or plain film evidence of an abdominal organ enlargement.; Other specified diseases of biliary tract

This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."

EVALUATION FOR A LIVER TRANSPLANT

This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."

Patient is currently being evaluated for a liver transplant.

This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."

Patient is currently being evaluated for listing for a liver transplant. Imaging is to abnormalities and lesions.

This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."

unknown

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;"

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" 

Enter answer here - or Type In Unknown If No Info Given. &gt;
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; aab showd possible lesion on 12/15/2016

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; CT imaging of her abdomen showed a 4.9x3.5cm pseudocyst in the tail of the pancreas along with para-aortic and retroperitoneal lymphadenopathy. The pseudocyst was slightly larger than it was on a previous CT aab from 1/2016 which showed it to be 4.5x3.4cm

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; Ct showed masslike appearance in the second portion of the duodeum and wall thicking in common bile duct. She has weight loss, nausea and vomiting, abdom pain.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; follow up MRI

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; None

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; pt has known cirrhosis

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has not had an abdominal ultrasound, CT, or MR study.".; Elevated liver enzymes
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; It is not known if the patient had and abdominal ultrasound, CT or MR study.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; Liver lesions

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.".; Abdominal Ultrasound should can not rule out liver mass vs fatty liver sparing.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.".; Patient has a history of cirrhosis and has complaints of LUQ abdominal pain. Had recent ultrasound of abdomen and there were multiple hepatic masses noted. Recommended MRI

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.".; Patient has MRI last year that showed a pancreatic lesion. Recommended one year follow up MRI.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.".; Pt had a abdom Ultrasound that showed a 2.1 cm liver lesion and bilateral renal cyst. He has left upper quad pain.
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; It is not known if the patient had and abdominal ultrasound, CT or MR study.; abnormal US showing a mass that has occurred within the last 6 months

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the pancreas during a previous CT, MRI or Ultrasound.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.;

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; 

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; 42-year-old with multiple GI complaints and a significant history of small bowel resection. He has also had a past history of abnormal liver tests. Recent CBC, CMP, TTG Ab, and thyroid testing were relatively unremarkable. Odd finding in cecum.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; elevated AFP

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; has cirrhosis of the liver

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; male with a history of Crohn's disease (terminal ileum) diagnosed in 2007 in Conway

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; pt had US showed dilated biliary tree
This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; R/O abnormality in the tail of the pancreas, such as a pancreatic cyst.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; She describes the pain as dull and radiating to her back and flanks. She denies any diarrhea or steatorrhea. A 90 minute GES was completed and report reviewed which showed 48% residual at 90 minutes. She has not had another GES but she states that when Dr.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; She reports a flare of symptoms for the past 2 weeks. Pain in the RIF going through to the back -beginning to ease now. She has been assessed at outside facilities and has had appendicitis excluded. Weight has decreased 11 lbs in the past 2 weeks accordin

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; unknown

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Vomiting, bloody stool, abdominal pain, previous pancreaitis

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; k92.2  GI bleed iron deficienci, Abdominal pain; flagyl and

Doxycycline, colonoscopy

This is a request for a MR Angiogram of the abdomen.
Approval 74261 CT Colonography, diagnostic without contrast
  This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.

Approval 74261 CT Colonography, diagnostic without contrast
  Patient has exertional chest pain; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.

Approval 74261 CT Colonography, diagnostic without contrast
  Patient needs CT colon due to not able to tolerate anesthesia due to abnormal EKG, pt has iron def anemia; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.

Approval 74261 CT Colonography, diagnostic without contrast
  PT was unable to complete it bc they were only able to go so far in the colon due to angulation; This patient does not have a medical problem that makes him/her unsuitable for conventional colonoscopy.; This patient has undergone an attempted but incomplete conventional colonoscopy.; The member had colon screening studies completed prior to this request.

Approval 74263 CT Colonography, screening
  This is a request for CT Colonoscopy for screening purposes only.

Approval 75571 Coronary Artery Calcium Score, EBCT
  Mrs. Cook is a 63-year-old with cryptogenic cirrhosis referred for a liver transplant evaluation. Her MELD is only at 14. She is having a follow up EGD later today. Although she is frail, will start her LT evaluation. Diagnoses are as follows:
  1. Cryptog;
  This is a request for a CT scan for evaluation of coronary calcification.

Approval 75571 Coronary Artery Calcium Score, EBCT
  Patient currently being evaluated for a liver transplant, patient has a history of hypertension and short of breath. Imaging is to determine abnormal cardiac activities.; This is a request for a CT scan for evaluation of coronary calcification.

Approval 75571 Coronary Artery Calcium Score, EBCT
  Patient currently being evaluated for a liver transplant.; This is a request for a CT scan for evaluation of coronary calcification.

Approval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study
  Patient currently being evaluated for a liver transplant.; The patient’s age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient with HCC currently being evaluated for a liver transplant with abnormal EKG.; The patient’s age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Approval 78813 PET IMAGING WHOLE BODY
  This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; The patient does NOT have Thyroid or Brain cancer.; 1 PET Scans has already been performed on this patient for this cancer.

Deviated septum surgery 2016, but has not found relief; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)

70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST

Approval

Facial swelling; "This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; This is not a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT
Fever, fatigue, frequent throat clearing, nasal congestion, nasal drainage, purulent nasal drainage, sinus pressure, cough. Tried and failed antibiotics ceftin, decadron injection, dexameth na injection. Now on Bactrim since 2/6/17; this study is being ordered for sinusitis; this is a request for a sinus CT.

The patient is NOT immune-compromised; the patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); it has been 14 or more days since onset and the patient failed a course of antibiotic treatment; yes this is a request for a diagnostic CT.

Migraine headache about 12 a year, cluster pattern, sharp throbbing. History of craniosynostosis, s/p surgical release of coronal suture as infant. Permanently dysmorphic forehead, concave in left and convex in right. Symptoms started about 8-9 weeks ago started; this study is being ordered for sinusitis; this is a request for a sinus CT. The patient is NOT immune-compromised; the patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); it has been 14 or more days since onset and the patient failed a course of antibiotic treatment; yes this is a request for a diagnostic CT.

Ongoing eye pain since the antibiotics; this study is being ordered for sinusitis; this is a request for a sinus CT. The patient is NOT immune-compromised; the patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); it has been 14 or more days since onset and the patient failed a course of antibiotic treatment; yes this is a request for a diagnostic CT.

Other reporting data: Patient complaining of yellow sinus discharge, productive cough with thick yellow sputum, states sinus drainage runs down back of throat causing him to very nauseated in the morning, onset one month ago and failed to get better after; this study is being ordered for sinusitis; this is a request for a sinus CT. It is unknown if the patient is immune-compromised; the patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); it has been 14 or more days since onset and the patient failed a course of antibiotic treatment; yes this is a request for a diagnostic CT.
PATIENT IS HERE WITH DECREASED AIR FLOW TO LEFT NOSTRIL AND HITTIN HIS NOSE ON ANOTHER PERSONS HEAD; "This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; This is not a preoperative or recent postoperative evaluation.

PATIENT has a foreign body in his sinus cavity. X-ray shows metal object; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.

PATIENT has a foreign body in his sinus cavity. X-ray shows metal object; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.

PATIENT has had problems with sinuses for two years. Pt has purulent drainage, headaches. Pt is having ear pain associated with this as well.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment; Yes this is a request for a Diagnostic CT.

PATIENT has a foreign body in his sinus cavity. X-ray shows metal object; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.

PATIENT is here with decreased air flow to left nostril and hitting his nose on another person's head; "This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; This is not a preoperative or recent postoperative evaluation.

Pt has had problems with sinuses for two years. Pt has purulent drainage, headaches. unknown; This study is being ordered for sinusitis.; This is a request for a Sinus CT.;

The patient is immune-compromised.; Yes this is a request for a Diagnostic CT will fax; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, preoperative or a post operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; It is not known if there is a palpable neck mass or lump.; Yes this is a request for a Diagnostic CT

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; It is unknown if a fine needle aspirate was done.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has NOT been examined twice at least 30 days apart.; Yes this is a request for a Diagnostic CT

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT A Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT A Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.
This is a request for neck soft tissue CT.; Surgery is NOT scheduled within the next 30 days.; The patient has a suspicious infection or abscess.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT

He has a history of prostate cancer. Patient is diabetic, long time smoker; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; face pain down to left side of neck and swelling; anti- inflammatory

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; pain; pain medications, ice, heat, stretching techniques
known smoker, lymphadenopathy, worsening SOB; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

Lack of energy noted. patient describes of fatigue moderate tiredness for the last 5 months. This has been a constant problem. She denies associated symptoms. She is not taking any medications. Patient states that she use to take medication for her t; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has NOT been examined twice at least 30 days apart.

lymphadenopathy of the cervical and headaches; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;.; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;.; steroids anti inflammatories mass interior neck just below the jaw line. pt is having hair loss and fatigue; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; It is not known if the neck mass has been examined twice at least 30 days apart.; Yes this is a request for a Diagnostic CT member had more then 1 mass and ultra sound was abnormal; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.

none; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

NONE; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/2016; There has been treatment or conservative therapy.; The Pt has an enlarged nodule on left side of neck. Pt has nausea and abdominal Pain.; Medication therapy
Option: Solid echogenic heterogeneous 4.3 cm mass demonstrating abundant internal arterial and venous flow is present adjacent to the right submandibular gland. I cannot determine its etiology with certainty. I favor neoplasm arising from the right parotid gland; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT.

Patient has supraclavicular mass. Patient has a history of breast cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

Persistent Headache & neck and head lymphadenopathy; concern for some form of abnormal lymphoma; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient with continued headaches and lymphadenopathy. This has not resolved and has developed vague chest pains. Concerned for some form of abnormal lymphoma.; There has been treatment or conservative therapy.; New Daily Persistent Headache; Head & Neck Lymphadenopathy; Patient was given clindamycin @ FastCare to take for 10 days and still has not helped any.

PT HAVING ISSUE WITH THERE JOINTS AND SLEEPING; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/2/2015; There has not been any treatment or conservative therapy.; NECK PAIN; pt is unable to swallow and has multiple knots in her throat; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has NOT been examined twice at least 30 days apart.

The lump started 1-2 years ago, The lump is located under the chin, The affected area is draining purulent material not warm is tender at times - is intermittently swollen, The size of the lump is less than 1 cm but patient states can get as big as 2 cm.; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has been examined twice at least 30 days apart.; The lump got smaller.

This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT.
70490 CT NECK SOFT TISSUES, LARYNX, THYROID ETC. NO CONTRAST

This is a request for neck soft tissue CT.; The study is being ordered for Follow Up.; The patient has a known tumor or metastasis in the neck.; They have not had a previous Neck CT in the last 10 months.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; There are NO new or changing symptoms in the neck.; Yes this is a request for a Diagnostic CT

1

This is a request for neck soft tissue CT.; The study is being ordered for recent trauma or other injury.; Yes this is a request for a Diagnostic CT

1

This is a request for neck soft tissue CT.; There has been recent trauma or other injury to the neck.

1

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.; Yes this is a request for a Diagnostic CT

3

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.

3

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT

48

THIS PATIENT HAS HAD A RECENT EGD DONE AND IT HAS SHOWED SHE HAS A LARGE MASS ON THE OUTSIDE OF HER ESOPHAGUS. THIS NEEDS TO BE FURTHER EVALUATED, SO THESE TEST ARE NECESSARY; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

1
Unknown; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT

unknown; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT

Yes, this is a request for CT Angiography of the brain.

"This is a request for orbit, face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of infection or abscess

"This is a request for orbit, face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

CT scan1-2 months ago at BHMC-NLR reportedly showed a sinus polyp; This study is being ordered for a neurological disorder.; Neck pain for the last 2 years.; There has been treatment or conservative therapy.; The location is primarily back of head from neck area. The pain radiates to the neck. Associated symptoms include nausea, vision disturbance and vomiting; He has tried Naproxen, Tylenol, BC, hydrocodone (which helped)
There is not a history of orbit or face trauma or injury.

There is not a suspicion of an infection or abscess.; This examination is being requested to evaluate lymphadenopathy or mass.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.

There is not a suspicion of an infection or abscess.; This examination is being requested to evaluate lymphadenopathy or mass.; This is a request for a Face MRI.; There is not a history of orbit or face trauma or injury.

There is not a history of orbit or face trauma or injury.

There is not a history of orbit or face trauma or injury.

There is not a history of orbit or face trauma or injury.

There is not a history of orbit or face trauma or injury.

There is not a history of orbit or face trauma or injury.

There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

Approval

70540 MRI ORBIT/FACE/NECK

W/O DYE

Patient has pain in his neck that radiates to his head. Patient states the pain is sharp. C/o decreased mobility, spasms, weakness, and nausea x6weeks.; "This is a request for orbit, face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection, cancer, mass, tumor, pre or post-operative evaluation

Approval

70540 MRI ORBIT/FACE/NECK

W/O DYE

Patient is a pleasant 41 year-old white female who presents to clinic complaining that 2 days ago she woke up with left ocular pain. She states when she moved her eyes she would feel discomfort. She then 1 day ago woke up and had loss of lower visual fiel; This study is being ordered for a neurological disorder.; 03/06/2017; There has not been any treatment or conservative therapy.; Left ocular pain. She states when she moved her eyes she would feel discomfort. loss of lower visual field and left peripheral vision.

Approval

70540 MRI ORBIT/FACE/NECK

W/O DYE

There is a suspicion of an infection or abscess.; This is a request for a Face MRI.; There is not a history of orbit or face trauma or injury.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell’s palsy, Congenital abnormality, loss of smell, hearing loss or vertigo; It is unknown why this study is being ordered.

This study is being ordered for a neurological disorder; ER VISIT 2/27/2017; There has been treatment or conservative therapy.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

This study is being ordered for trauma or injury;

This study is being ordered for Vascular Disease;

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

This study is being ordered for trauma or injury; 02/21/2017; There has been treatment or conservative therapy.

Pain medication and muscle relaxants.

This study is being ordered for Vascular Disease.

There has been treatment or conservative therapy.

Pain pills
In regard to the headache, onset was more than 6 months ago. The location is primarily left occipital. She has had prior headaches similar to this one. She characterizes it as moderate in severity and "knife-like". Associated symptoms include vision dis; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.

; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing vertigo.

This request is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head occured more than 1 week ago.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient does not have a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; The doctor does not note on exam that the patient has delirium or acute altered mental status.; The patient does not have a Brain CT showing abscess, brain infection, meningitis or encephalitis.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; It is not known if there is a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are not physical findings or laboratory values indicating abnormal pituitary hormone levels.; There has been a previous Brain MRI completed.; The brain MRI was normal.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell’s palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

This study is being ordered for a neurological disorder.; There has been treatment or conservative therapy.;
70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This study is being ordered for a neurological disorder. 03-02-2017. There has not been any treatment or conservative therapy. Sudden onset left side numbness, hyperreflexia, blurred vision in left eye.

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This study is being ordered for trauma or injury. There has been treatment or conservative therapy.

27 year old here states that he is still having some problems, feels like he has something neurological going on. Onset over 4 years ago. States that his mother has a chiari malformation and he is scared that he has something neurological going on. This request is for a Brain MRI; The study is being requested for evaluation of a headache; The patient has a chronic or recurring headache.

36 year old here with complaints of Migraines. Onset 1 year ago. Reports that today’s headache started about 2 hours ago. Located in the back of his head and over his eyes and nose. Pressure. Reports blurry vision. Headaches have progressively gotten worse; This request is for a Brain MRI; The study is being requested for evaluation of a headache; The headache is described as chronic or recurring; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

4.9mm nodule in the right lower lobe that does not appear to be calcified, meaning it is likely benign but I would like to order a a CT scan of the chest to eval newly found lung nodule in a smoker with a cough a 26# unexplained weight loss over the past.

Abn finding on Brain MRI in 2014; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications; The tumor is not a pituitary tumor or pituitary adenoma.
Abnormal swallowing, bilateral side laxity of temporomandibular joint ligament, limited mandibular range of motion, bilateral muscle spasm, bilateral myalgia, left otalgia bilateral pain in jaw, bilateral temporal tendinitis and temporomandibular joint sou; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient does not have a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; The doctor does not note on exam that the patient has delirium or acute altered mental status.; The patient does not have a Brain CT showing abscess, brain infection, meningitis or encephalitis.

ATAXIA, WEIGHT LOSS, EXTREMITY WEAKNESS, GAIT DISTURBANCE, ANXIETY, DEPRESSION; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing fatigue or malaise.

Brain CT showed cyst; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

c/o full body tremors yesterday. Episode lasted 45 min. Went to ER/ambulance. Did not lose consciousness during this episode. This is the first time this has happened. Associated s/s include "tongue thickening", nervousness.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. Chronic headaches with failed medication attempts.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
chronic headaches, stabbing pain, increased on medicines, r/o tumor; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Chronic migraine headaches, was seen by her eye doctor and had abnormalities on retinal examination consistent with optic neuritis. She has not had any specific neurological symptoms that she was aware of but findings could well be consistent with early M; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

concussion with loss of consciousness due to a fall.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head was between 24 hours and 1 week ago.

confusion, gait disturbance, auditory hallucinations, history of CVA; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient has a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).

confusion, vertigo, visual changes; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient has a recent onset (within the last 3 months) of neurologic symptoms.

cT scan recommends MRI; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is not known if the headache is described as a "thunderclap" or the worst headache of the patient's life.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is a new and sudden onset of headache (less than 1 week) not improved by pain medications.

CT scan 1-2 months ago at BHMC-NLR reportedly showed a sinus polyp; This study is being ordered for a neurological disorder.; Neck pain for the last 2 years.; There has been treatment or conservative therapy.; The location is primarily back of head from neck area. The pain radiates to the neck. Associated symptoms include nausea, vision disturbance and vomiting; He has tried Naproxen, Tylenol, BC, hydrocodone (which helped)....
Ct was negative, recommend MRI. Her symptoms are worsening; This study is being ordered for a neurological disorder.; 12/03/2016; There has been treatment or conservative therapy.; headache, blurred vision, pain in left arm, dizziness, right side facial numbness; Pt was in ER given medication for migraine. She had ct which came back negative. She is having cont. symptoms.

Current headaches and since this has not been done in over 10 years then I recommend that she get this; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; document in notes that pt has had headaches since 7/10/16. taking soma and aleve with no relief.; There has been treatment or conservative therapy.; headaches worsening over the last 3-4 days. no change in vision. no numbness or tingling. her last MRI of brain was 15 years ago. last angiogram of brain was 30 years ago and it was normal. mother and brother both died of aneurysms.frequent or severe head; taking soma and aleve without relief. headaches worsening over the last 3-4 days. no change in vision. no numbness or tingling. her last MRI of brain was 15 years ago. last angiogram of brain was 30 years ago and it was normal. mother and brother both die

Dec 9, 2016 - Patient presents to the clinic today with complaints of migraines, nausea/vomiting, and possible anemia. States that she was also in a wreck last Saturday. Her car hydroplaned and she ended up hitting her head on the steering wheel.&x0026; 2) Her; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

difficulty moving on her own; This study is being ordered for a neurological disorder.; 9/22/2016; There has been treatment or conservative therapy.; pins and needles and spasms in feet for the past month, hard for Pt to move legs and hands, unable to function properly, stiffness in LE. Work up was negative; medication
dix hallpike without nystagmus but dizziness for 3-5 seconds. repeated and same result without nystagmus but dizziness prolonged. romberg wnl. EOMi. can ambulate without assist. RAMs intact.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/04/2017; There has not been any treatment or conservative therapy.; Patient c/o dizziness since Wednesday and she called Friday and we called her in some Meclizine. The dizziness is still there and now her (R) ear is bothering her. She states this is worse than the dizziness she had in August.

Duration of Symptoms: Start: 12/02/2016; Physical Exam Findings: timing no pattern; dizziness; photophobia; tender over left scalp and forehead; worsened with sumatriptan and menstruation; affected left temporal and left occular.; The severity of the pr; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Prior wo; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell’s palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

n/a; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)
Nausea aspers syndrome; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Nausea no vomiting headaches is all over daily /5x months worse in the am failed medications vision exam normal; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

NEW DAILY WORSENED PERSISTENT HEADACHE, PERSONALITY CHANGES, FATIGUE, R/O MIGRAINES, TUMOR, ARTERITIS, MALFORMATION; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.

None; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/04/2016; There has not been any treatment or conservative therapy.; Numbness and parathesia in arms and legs.
Patient complaining of dizziness with numbness and tingling; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/anerysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was completed.; The patient is experiencing dizziness.

Patient had surgical resection by Dr. Bruce Mickey, Neurosurgeon in April 2006. Was informed will likely have recurrence and would need repeat imaging in the future if symptoms returned.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

PATIENT HAS ALTERED MENTAL STATUS, HEADACHES, AND DROP FOOT; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.

Patient has elevated prolactin levels along with headaches and need to know if the medication is causing the elevated prolactin or if something else is going on; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient has had a dule headaches for the past 5 months with meds and other alternatives that are not helping. Dr Thompson needs further eval for this patient.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Patient has had headaches for 2 months; This request is for a Brain MRI; The study is being requested for evaluation of a headache; The headache is described as chronic or recurring; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation)

Patient has had persistent diplopia for more than six weeks. He reports seeing the ear nose and throat doctor and also the eye doctor all testing was normal but patient continues to have double vision; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; The patient has dizziness; It is unknown why this study is being ordered.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Patient has migraines; This request is for a Brain MRI; The study is being requested for evaluation of a headache; The headache is described as chronic or recurring; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient has normal lab and has a mmse with a score of 23/30; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed; The lab results were normal; The patient is experiencing fatigue or malaise.

Patient has worsening headache with no history of headaches. Lasting over 2 weeks behind left eye and extending to top of head. Worse when bending over. She is a smoker and is on BCP; This request is for a Brain MRI; The study is being requested for evaluation of a headache; The patient has a sudden and severe headache; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.

Patient is a pleasant 41 year-old white female who presents to clinic complaining that 2 days ago she woke up with left ocular pain. She states when she moved her eyes she would feel discomfort. She then 1 day ago woke up and had loss of lower visual field; This study is being ordered for a neurological disorder; 03/06/2017; There has not been any treatment or conservative therapy; Left ocular pain. She states when she moved her eyes she would feel discomfort. Loss of lower visual field and left peripheral vision.

Possible tumor; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is not known if the headache is described as a “thunderclap” or the worst headache of the patient’s life.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is a new and sudden onset of headache (less than 1 week) not improved by pain medications.

pseudotumor cerebri double vision photophobia; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has fatigue or malaise; It is unknown why this study is being ordered.

Pt had a CT in the ER that was abnormal and now requesting these studies for possible aneurysm; This study is being ordered for Vascular Disease.; 2/8/17; There has not been any treatment or conservative therapy.; Pt has headaches, dizziness, heart palpitations, vertigo, weakness.

pt has a history of bells palsy, she went to ER last week due to her entire left side of her body went numb; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is not known if there is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell's Palsy.

PT HAS HAD HEADACHES SINCE 2015, HAS JUST TAKEN OTC MEDICATIONS AND NOTHING HAS HELPED. MRI ORDER 2015 BUT NEVER WAS DONE.ALSO HAS DIZZINESS AND VISUAL DISTURBANCE. Progressive headaches; Most likely migraine headaches but some features of tension headache; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Pt has had persistant headache for one month that began suddenly. Worst headache of her life for the past week. Meds have not helped. Pt has pending appointment with neurologist.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
Pt has intermittent dizziness for last 2 months. Pt says she has daily ha's. Pt also has fatigue. Pt says otc meds help her ha's. Pt says dizziness last about 30 min.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Pt has pituitary adenoma. Multiple endocrine neoplasia. Memory loss.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; A metabolic work up was done including urinalysis, electrolytes and complete blood count with results completed.; The lab results were normal.; The patient is experiencing loss of smell.

Pt has headaches along with low pituitary hormones. Dr. Bell fears that patient has something abnormal with his pituitary and needs this MRI to evaluate the headaches and pituitary insufficiency.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Pt is having intermittent weakness and then is also having numbness in left leg and left arm; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has fatigue or malaise; It is unknown why this study is being ordered.

Pt still c/o tremors that sometimes seem to affect his whole body x 3 months, getting worse, carbidopa-levodopa didn’t seem to help and diazepam caused AMS; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.

Pt has ongoing c/o headache, dizziness, nausea, and paresthesia; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

R/O MS; This study is being ordered for a neurological disorder.; 01/23/2017; There has been treatment or conservative therapy.; Ongoing, progressively worse pain in leg, essential tremors, myoclonic jerks; Physical therapy
R26.9; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing vertigo.

Radiologist recommended MRI after CT was done; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

recent memory loss w/ hx CVA w/ R hemiparesis; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; It is not known if there are recent neurologic symptoms such as one sided weakness, speech impairments, or vision defects.; It is not known if there a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Reports pulsatile headache with photophobia and phonophobia and emesis. Has never been worked up for migraine. Has a moist cough but lungs are clear, no ant. cerv. lymphadenopathy; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

requested to bypass clinicals; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; n/a; It is not known if there has been any treatment or conservative therapy.; n/a

Seizure like activity. Headache with aura. Had another one last night. Increasing in frequency; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

sensitive to light, h/a; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
she indicates that she has had headache daily over the past week. during episodes describes feeling lightheaded. describes feeling that she could pass out during the episodes. &

The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.

This is a request for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

This is a request for a brain MRI WITH CONTRAST.&

This is a request for an Internal Auditory Canal MRI.; There is a suspected Acoustic Neuroma or tumor of the inner or middle ear.
This is a request for an Internal Auditory Canal MRI; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear; There is not a suspected cholesteatoma of the ear; The patient has not had a recent brain CT or MRI within the last 90 days; There are neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache; Requested due to trauma or injury; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache; The headache is described as chronic or recurring; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects; There is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is being requested for evaluation of a headache; The headache is described as chronic or recurring; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient’s life (within the last 3 months).

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell’s Palsy.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing vertigo.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient did not have a normal audiogram.; The patient is experiencing hearing loss.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; It is not known if the patient has undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has undergone treatment for multiple sclerosis.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; There has been a previous brain MRI completed.; The brain MRI was abnormal.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient’s visual acuity.; This study is being ordered for an aneurysm.; This study is being ordered for neurological deficits.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient’s visual acuity.; This study is being ordered for stroke or TIA (transient ischemic attack).

This request is for a Brain MRI; The study is being ordered for a tumor.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for and infection or inflammation.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has been a change in seizure pattern or a new seizure.

This request is for a Brain MRI; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The study is NOT being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.; There has not been a previous Brain MRI completed.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient is having increased headache with nausea with vomiting.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.
Unknown; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.  

Approval  70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).  

Approval  70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).  

Approval  70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.  

Approval  70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; It is unknown if the patient had a recent onset (within the last 3 months) of neurologic symptoms.  

Approval  70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

UNKNOWN; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient has Bell's Palsy.
Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

Unknown; This study is being ordered for trauma or injury.; 12/2016; There has not been any treatment or conservative therapy.; headaches, left shoulder pain, blurred vision in the left eye, nose bleeds, decreased hearing, loss of appetite.

Unknown; This study is being ordered for trauma or injury.; 2/2017; There has not been any treatment or conservative therapy.; headaches, dizziness, joint pain, back and arm, tremors, swelling in abdomen, weakness, on 3/4 episode of stop breathing, vomiting, weight loss.

Upper bilateral tremors; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Vertigo of central origin, unspecified ear; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.

Weakness (generalized weakness to each upper ext especially when twists in certain way, and generalized weakness to both lower ext when on feet excessively) and headache (generalized), low back pain, neck pain with certain movement, tenderness paraspinal.; This study is being ordered for a neurological disorder.; January 13, 2017; There has been treatment or conservative therapy.; low back pain, Headache, weakness (generalized weakness to each upper ext especially when twists in certain way, and generalized weakness to both lower ext when on feet excessively) and headache (generalized); Suggested OTC meds and continued PT/chiropractic care and recommendations from them.
unknown; This study is being ordered for a neurological disorder.; 1 year ago; There has been treatment or conservative therapy.; headaches, difficulty finding words.; insets over a year, chiropractic, pt, home exercise

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

"The ordering physician is a surgeon, pulmonologist, or cardiologist."; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT

"The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is no radiologic evidence of mediastinal widening.; ; PFT shows abnormality consistent with pulmonary vascular abnormalities/fibrosis; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT

"The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is no radiologic evidence of mediastinal widening.; ; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT

"The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is no radiologic evidence of mediastinal widening.; Pt has had a Chronic cough for up to 3 years and never reported to doctor he now presents with a Chronic cough up to 3 to 4 times daily that causes him to become light headed and SOB we have treated him for respiratory illness and with antibiotic therapy; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.".; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.".; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

There is no radiologic evidence of asbestosis, tuberculosis or fungal infection.

There is no radiologic evidence of a lung abscess or empyema.

There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.

There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.

A Chest/Thorax CT is being ordered.

This study is being ordered for known or suspected inflammatory disease or pneumonia.

Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

This study is being ordered for a metastatic disease.

There are 2 exams being ordered.

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The ordering physician is not a hematologist/oncologist.

Approval 71250 CT CHEST, THORAX

This study is being ordered for Inflammatory/ Infectious Disease.

There has been treatment or conservative therapy.

Describe primary symptoms here.

medications

Approval 71250 CT CHEST, THORAX

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

It is not known if there has been any treatment or conservative therapy.

shortness of breath/gasp for air/dyspnea/difficulty swallowing/choking

Approval 71250 CT CHEST, THORAX

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

01/13/2017; There has been treatment or conservative therapy.

abdominal pain for 4 days, fatigue, shortness of breath with exertion , excruciating epigastric pain; GI cocktail, morphine and Proventil

Approval 71250 CT CHEST, THORAX

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

2 years ago; There has not been any treatment or conservative therapy.

abdominal pain, right flank pain, short of breath

This study is being ordered for something other than: known trauma or injury, metastatic disease, neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; There has been treatment or conservative therapy.; 

Approval 71250 CT CHEST, THORAX
- 1 year F/U to a pulmonary nodule, 10mm; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX
- 4.9mm nodule in the right lower lobe that does not appear to be calcified, meaning it is likely benign but I would like to order a a CT scan of the chest to eval newly found lung nodule in a smoker with a cough a 26# unexplained weight loss over the past ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4.9mm nodule in the right lower lobe that does not appear to be calcified (found in chest xray on 12/29/16), meaning it is likely benign but I would like to order a a CT scan of the chest to eval newly found lung nodule in a smoker with a cough a 26# un; There has been treatment or conservative therapy.; 4.9mm nodule in the right lower lobe that does not appear to be calcified, meaning it is likely benign but I would like to order a a CT scan of the chest to eval newly found lung nodule in a smoker with a cough a 26# unexplained weight loss over the past ; 

Approval 71250 CT CHEST, THORAX
- 4mm indeterminate noncalcified nodule in right upper lobe found on CT Chest performed on 09/08/2015. Needs follow up evaluation.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
4mm pulmonary nodule along major fissure in the lingula and 2 mm nodule in right lower lobe; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12-20-2016; There has not been any treatment or conservative therapy.; unknown

53 yo female noted to have a history of a 7 mm LUL nodule. Please re-eval. Thanks!

STABLE 7 mm left upper lobe nodule encouraging for benignity and likely reflects a noncalcified granuloma. Follow-up CT in 6 months to evaluate for furt; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

55yr old male who smokes w/chronic nasal obstruction, SOB, DOE and fatigue.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01.16.17; There has not been any treatment or conservative therapy.; 55yr old male who smokes w/chronic nasal obstruction, SOB, DOE and fatigue

6 month follow-up from last CT which showed lung nodules.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

6/29/2016 last xray l spine suspicious mediastinum mass Further imaging chest ct required; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor. A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.; Yes this is a request for a Diagnostic CT

A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; The patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT
A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.

A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.; Yes this is a request for a Diagnostic CT

A5-6mm nodule is noted in the right lung base on the x-ray report from 2/6/2017; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

ABD PAIN, SHORTNESS OF BREATH WT LOSS, ABNORMAL CT, NAUSEA, POOR APPETITE, BILATERAL LEG AND FEET TINGLING, NUMBNESS, R/O METASTATIC PROCESS FOR MRI R/O HNP, LOW CIT B12 AND D; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

abdominal pain; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Abnormal chest imaging is described as the following: &nbosd; Radiographic findings include a solitary nodule (8mm lulu). Recommendation to repeat study in 3 months. Last CT of Chest was September 2016.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Abnormal chest x-ray in the lung area; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Abnormal chest x-ray requires further imaging; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
Abnormal chest xray showing mass vs infiltrate of the right lower lobe. Per radiologist, a CT- Chest is recommended.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."

Abnormal chest xray, Pt came to office to cough and lung pain, SOB; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; It is unknown if the patient quit smoking in the past 15 years.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

An indeterminant pulmonary nodule was incidentally found on a kidney x-ray and needs work up.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.

Assess pulmonary nodule; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

BEEN TO ER 4X WITHIN 6 MONTHS, SHARP PAIN AND SHORTNESS OF BREATH; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.

Chest ct done 03/22/2017 showed multiple small lung nodules that needs to be evaluated; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

Chest pain compression fracture abnormal xray history of smoking; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT
Chest pain and shortness of breath; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

CHEST XRAY DONE 08/16/2016 WAS SHOWING A 9MM NODULE ON THE RIGHT SIDE OF CHEST NOW CHEST DONE 02/03/2017 IS SHOWING 1 CMM SIXE NODULE WHICH INDICATES HAS GROWN WE ARE TRYING TO RULE OUT CANCER.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.".; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Chest x-ray showed calcifications. Radiologist recommended CT of chest be performed to evaluate the calcifications further.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Chest x-ray was done left lung Nodule was found.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.".; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

chronic cough with chest heaviness. trying to rule out a hiatal hernia or mediastinal mass; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days.".; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Chronic cough with hemoptysis; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

Chronic Cough; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.".; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Congested shortness of breath chest compression xrays came back abnormal crackle fluid meds not working.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Cough greater than 4 weeks. Treated with medicine, inhaler; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT
CT cervical spine showed incidental findings of cavitation with emphysema and bullous emphysema; The patient has NOT had a chest x-ray recently.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for hemoptysis.; Yes this is a request for a Diagnostic CT
CTA found pulmonary nodule in September and it recommended follow up CT in 6 months to check status.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT
enlarged Hila, To r/o Hilar Adenopathy; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT
Enter answer here - Pt had a pulmonary nodule on previous ct and is to have f/up Ct.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
Evaluate weight loss, abdominal pain, nausea and vomiting.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.
f/o for nodule, previous CT found lung nodule 6/20/2016; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
f/u for solitary nodule of lung, 4 mm noncalcified pulmonary nodule right lower lobe; A Chest/Thorax CT is being ordered.; The study is being ordered for non of the above.; This study is being ordered for non of the above.
Family hx of lung, throat, prostate & breast cancer Specialist suggests cancer Eval for thymoma Abnormal labs; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
FOLLOW UP FROM PREVIOUS TEST; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
Follow up to known nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
Has SOB; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; It is unknown if the patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

He has a history of prostate cancer. Patient is diabetic, long time smoker; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.; Dysphagia, sore throat, feels like lump in his throat

Hypertension and sleep Apnea, lower extremity swelling, Palpatations; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

IMPRESSION from CT 1/10/17
  1. Bilateral calcified and partially calcified pulmonary nodules have benign pattern of central calcification which is most consistent with partially calcified granulomas. A few of these were visible on the 3/25/2014 CT abdo; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

It is not known if there is radiologic evidence of non-resolving pneumonia.; It is not known if there is radiologic evidence of asbestosis.; FIRST VISIT COMPLAINING WAS 2/6/17; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."); "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."); There is no radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT
It is not known if there is radiologic evidence of non-resolving pneumonia.; It is not known if there is radiologic evidence of asbestosis.; This patient has a personal history of small cell lung cancer in remission since 2011. Now with complaints of chest pain, cough and an abnormal plain film xray.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn’t know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."

There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumonia other than the one above.; Yes this is a request for a Diagnostic CT;

It is not known if there is radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Doctors impression: mild pneumomediastinum; scarring right lower lung? diaphragm; haziness left lower heart border and posterior inferior on lateral; ekg- rbb no acute st elevation; troponin neg; has had this pressure for a week. plan was to send for sta; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection.";

There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumonia other than the one above.; Yes this is a request for a Diagnostic CT;

It is not known if there is radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Patient had CT in August of 2016. It should be abnormal findings consistent with pneumonia that recommended follow up to see if it is cleared.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumonia other than the one above.; Yes this is a request for a Diagnostic CT;

Known smoker, lymphadenopathy, worsening SOB; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.
LARGE PLEURAL EFFUSION; A Chest/Thorax CT is being ordered.; This study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT
Left lingular lung nodule was noted incidentally on an Abd CT/Abd last year. Is due for a repeat surveillance CT chest; "There is NO evidence of a lung, mediastinal or chest mass noted with the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
LOW BACK PAIN, MASS, AND HAS ASTHMA.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
mass in chest.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.".; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
mass located in left axillary region; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days.".; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
MOD PERSISTENT ASTHMA, SOB, COUGH, WHEEZING, ABNORMAL CHEST X-RAY, R/O PULMONARY FIBROSIS, BILATERAL INFLTRARE, GROUND GLASS; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection.".; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.
MULTIPLE PULMONARY NODULES IN THE LUNGS THAT HAVE BEEN SEEN.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT
Need to follow up on patients lung nodules. Subpleural nodules scattered throughout the left and right lungs. Sizes from 3mm to 5mm.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days.".; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
 Needing further evaluation of pectus excavatum. The right side of his chest wall is more protuberant than the lower.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT
No info Given; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

None; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."

They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

None; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

none; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

Onset started 01/05/2017; hacking cough; coughing up blood; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

pain in upper back and chest, chest x ray with pulmonary changes and persistant Atelectasis; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; It is unknown if the patient has a 30 pack per year history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

Patient had previous abnormal X-ray and presented to office with shortness of breath.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."

They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Patient has a chronic cough that is worsening.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.
Patient has a history of colon cancer and currently has 3 month+ adenopathy which has not resolved with antibiotic treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncolologist.

Patient has been treated in the past for irregular blood cells.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; approx 7-1-16; There has been treatment or conservative therapy.; abnormal weight loss greater than 30 pounds, prostate cancer and abdominal pain; medication

Patient has COPD and is having shortness of breath.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Patient has COPD. Patient has had sinus issues including bronchitis since 12/12/16 with no resolve.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Patient has had a previous ct of the chest in January 2016, and dr goss is wanting a repeat ct of chest w/contrast for follow up; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Patient has history of abnormal mammogram demonstrating lymphadenopathy right axilla and patient has history of carcinoma of the kidney. Patient presents for diagnostic mammogram and the impression is right axillary adenopathy which is nonspecific but wi; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncolologist.

Patient has supraclavicular mass. Patient has a history of breast cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncolologist.
patient is a smoker; chest x-ray showed well circumscribed density to L 5th incostal space. decreased bs in L and decreased bs on R; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

Patient is has had UTI's in the past and Microscopic Hematuria and multiple occasions. Continues to have pain and Blood in urine.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/6/16 for the Flank and Abdominal pain. On 3/9/17 an X-ray was done and a pulmonary nodule was seen.; There has been treatment or conservative therapy.; Pain in flank, lower abdominal pain.; Patient was given Antibiotics for an infection, and referred to a Urologist. No treatment has been given for the Pulmonary nodule.

Patient presents with bronchitis and states coughing up small amounts of blood for 2 days. Patient had chest X-Ray which shows bronchitis and mild hyperinflation of the lungs. Radiologist recommends a follow up chest CT to exclude a subtle endobronchial; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

Patient presents with complaint of cough, congestion, fatigue, weight loss x one week. Patient short of breath on exam today and no better from last office visit on 01/03/17 whee; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Patient was seen in ER and chest xray shows patient has several bilateral lung nodules. Patient also has COPD.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Approval 71250 CT CHEST, THORAX

PLEURITIC CHEST PAIN, MILD TENDERNESS UPPER ANTERIOR CHEST, ABNORMAL X-RAY, MALAISE, DYSPNEA, PULMONARY NODULE; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

Positive for chest pain (episodes of burning in the chest). He does have a history of an abnormal chest CT over a year ago but did not pursue the follow-up CT that we had recommended and scheduled. &amp;#x0D; A 1.4 cm patch of density which could be a nodule or.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

Precordial pain that does not go away; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

Pt came in for cough, cxr showed hyperdense nodule in retrocardiac area. &amp;#x0D; Pt needs CT Chest to further evaluate this nodule.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

Pt had an abnormal mammogram w/ no involvement and now having rib pain.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

Pt had an xray on November 17 that should a pulmonary nodule. Cough, shortness of breath.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

Pt had positive TB test ... with chest x-ray; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

Pt has elevated white blood cell count, persistent cough, xray non diagnostic, levaaquin started with no improvement, fever.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

Yes this is a request for a Diagnostic CT
Pt has family Hx of myocardial infarction; Pt has shortness of breath, fluid around the heart (seen on Xray); A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Pt has lung nodules, has been coughing up blood; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

Pt has non-Hodgkins lymphoma, stage 1; now having abnormal weight loss; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

Pt has pneumonia and acute bronchitis; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

Pt is experiencing breast and chest wall pain, swelling on the L upper chest and axilla area for approximately 3 days w/abnormal CXR. R/O thoracic root disorder; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

PT IS HAVING PERSISTANT SOB, AND ABNORMAL CXR TODAY IN CLINIC; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Pt with c/o left sided chest wall pain, knots on left side of chest, reports is growing and causing some pain.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days.\"; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

pt. had a neck CT, mass is extending down into the chest...; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days.\"; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.
PULMONARY NODULE, CHRONIC COUGH, COPD; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

Pulmonary nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Questionable superior mediastinal widening seen by in-house radiologist Dr. Riner.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

Radiologist recommended a 6 month follow-up after suspicious mass found on prior CT of chest.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

repeat every 6 months to determine if solitary pulmonary nodule is stable; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/23/2016; There has not been any treatment or conservative therapy.; no info given

Approval 71250 CT CHEST, THORAX

RIGHT CLAVICAL PAIN, SWOLLEN LYMPH NODES ON THE LEFT ANTECUBITAL SPACE, FEVER AND NIGHT SWEATS, HEMATURIA; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Right upper lobe nodule on X-ray; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

SEPT/ CHEST CT SHOWED PULMONARY NODULE, 3MONTH FOLLOW UP MONITERING SIZE; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.
She had a x-ray in the office and it was sent for over read with the radiologists and they did observe enlargement in the left hilum. May be due to pulmonary artery enlargement vs. adenopathy.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

SHE IS HAVING PAIN AND PROBLEMS IN THE STERNAL AREA.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

short of breath, cough; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

SIX MONTH FOLLOW-UP FOR A NODULE; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

SOB, Cough, abnormal chest x ray; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

soft tissue mass left lateral to posterior chest wall present for several years, increased in size in the last year. Pt has a history of Tobacco Abuse.; There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

spots showed mri from the thoracic spine; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

Suspicious right pulmonary nodule.; There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

swollen lymph node on right side of neck for about a year and has gotten bigger and chest nodule grown bigger over last 6 months; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

*Clinical info. will be provided*; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; It is not known whether there is a known or suspected coarctation of the aorta.; It is not known if there is another type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.

; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

Patient scheduled to see surgeon who is requesting testing to be done prior to appointment.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is not scheduled/planned.; Yes, this is a request for a Chest CT Angiography.
71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

Approval

rule out any Aneurism or cardiac pathology or lung pathology; negative GI workup; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.

Approval

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

Approval

wanted to do cardiovascular evaluation for unspecified carotid artery; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

Approval

71550 MRI CHEST

Date of initial onset: MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/espec; This study is being ordered for trauma or injury.; MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/especially of the clavicle; There has not been any treatment or conservative therapy.; Date of initial onset: MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/espec

Approval

rates pain at 8/10.; This study is being ordered for trauma or injury.; 12/25/2016; It is not known if there has been any treatment or conservative therapy.; left arm pain radiating to elbow and hand; parasthesias, weakness

Approval

This study is being ordered for a work-up of a suspicious mass.; There is radiographic or physical evidence of a lung or chest mass.; This is a request for a chest MRI.

Approval

This study is being ordered for follow-up to trauma.; "The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is no radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; This is a request for a chest MRI.

Approval

This study is being ordered for follow-up to trauma.; "The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is radiologic evidence of mediastinal widening.; This is a request for a chest MRI.
Upper back pain noted. She does not recall any precipitating event or injury. Ms. BACA presents with a diagnosis of upper back pain. This was diagnosed 1 week ago. The course has been progressively worsening. It is of moderate intensity. Aggravating; This study is NOT being ordered for a Work-up for Suspicious Mass, Known Tumor, Known or Suspected Inflammatory Disease, etc.; This is a request for a chest MRI.

Abnormal findings on diagnostic imaging of other specified body structures, MRI scan abnormal, Findings: Motion artifact limits the examination particularly on axial imaging, Impression: Nonspecific bone marrow edema along the left C4-C5 vertebral bod; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

| Approval | 72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST |

Having neck shoulder and upper back pain. Patient has hardware in C spine area; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

| Approval | 72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST |

Pt has already had MRI cervical spine and is needing CT to check for screw placement; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.
pt has neck pain and pain in both arms; pt appears in acute distress, pain is chronic, unrelenting; pt has been given medication therapy home range of motion exercises to no avail; This study is not to be part of a Myelogram; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

rule out CVA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/03/2017; There has not been any treatment or conservative therapy.; visual disturbances

She needs a myelogram. MRI was inconclusive in 2015; This study is being ordered for a neurological disorder.; Pt has experienced severe neck and upper back pain with radiculopathy. She has failed conservative treatment and is in need of a myelogram of her c and t spines.; There has been treatment or conservative therapy.; Pain in neck and back, tingling, numbness. She failed conservative treatment; pt has had PT and medications. muscle relaxers and pain reliever.

soft tissue anterior cervical mass; This study is not to be part of a Myelogram; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

The patient does have neurological deficits.; This study is not to be part of a Myelogram; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; This study is being ordered for another reason besides Abnormal gait, Lower extremity weakness, Asymmetric reflexes, Documented evidence of Multiple Sclerosis, & Bowel or bladder dysfunction, Evidence of new foot drop, etc...

The patient does have neurological deficits.; This study is not to be part of a Myelogram; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Abnormal gait.

The patient does have neurological deficits.; This study is not to be part of a Myelogram; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.
The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to trauma or acute injury within 72 hours.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Evidence of a recent fracture on previous imaging studies.

The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; The patient is experiencing or presenting symptoms of radiculopathy.; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; There is a known condition of neurological deficits.; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT

4/1/2016; There has been treatment or conservative therapy.; Back pain, increased radiculopathy.

11/15/2016; There has been treatment or conservative therapy.; Severe pain; brace, medication

2/1/2017; There has been treatment or conservative therapy.; Back pain, decreased ROM; Physical Therapy

4/4/16; There has been treatment or conservative therapy.; Chronic pain / pain in lower back / pain progressively gotten worse; PT/ pain managements previous MRI/ CT /bone scans / NSAIDS / topical sports creams / muscle relaxers
PATIENT HAS HAD PT FOR 6 WEEKS & ORAL MEDICATIONS WITH NO RELIEF FROM CHRONIC BACK PAIN. PATIENT HAS HAD XRAYS 1/24/17.; This is a request for a thoracic spine CT.; Caller does not know whether there is a reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT

Recommended by radiologist for follow up from x ray reports on 01/03/2017; This study is being ordered for trauma or injury.; Unknown; There has been treatment or conservative therapy.; Having constant pain during therapy and focal pain to touch. Xray adnormal at T-12 and S-1; Continue with Therapy and stretching

She needs a myelogram. MRI was inconclusive in 2015; This study is being ordered for a neurological disorder.; Pt has experienced severe neck and upper back pain with radiculopathy. She has failed conservative treatment and is in need of a myelogram of her c and t spines.; There has been treatment or conservative therapy.; Pain in neck and back, tingling, numbness. She failed conservative treatment; pt has had PT and medications. muscle relaxers and pain reliever.

The patient does have neurological deficits.; This is a request for a thoracic spine CT.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; The patient has a recent fracture or abnormality seen on a previous imaging study; Yes this is a request for a Diagnostic CT

The patient does not have any neurological deficits.; This is a request for a thoracic spine CT.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT

THE PT HAS TO HAVE THIS EXAM IN ORDER TO SEE A NEUROSURGEON.; This study is being ordered for trauma or injury.; 4 YEARS AGO; There has been treatment or conservative therapy.; low back pain, discomfort in the thoracic and lumbar spine, constant, tightening sensation. This is a chronic problem, with essentially constant pain.; PHYSICAL THERAPY AND PAIN MEDICATION

mri recommended after bilat upper ext ncv was abnormal.
weakness/numbness/pain bilat upper arms/hands; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness\#x0D; numbness\#x0D; pain \#x0D; bilateral arms/hands that radiate from neck\#x0D; ncv has been preformed &\#x26; they recommended an mri; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Neck Pain,  myalgia (spams in neck, spasms in low back especially if twists with arms elevated, pt demonstrated here in office; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

Neurologic: tingling AND NUMBNESS DOWN HIS ARMS and frequent or severe headaches. NO RELIEF FROM PT, FLEXERIL OR HYDROCODONE; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

No Info Given; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Several Years; There has been treatment or conservative therapy.; Pt. has weakness, Achilles tendon pain. Pt. range of motion is off, visual disturbance, and numbness.; Pt. did Physical therapy and had an injection. NONE; This study is being ordered for a neurological disorder.; 01/25/2017; There has been treatment or conservative therapy.; The Pt has pain, radiating into right shoulder. Pt thus numbness in right arm. Pt had EMG recommends this study; Pt has had medication therapy

NONE; This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; The Pt has back pain, bulging discs in lumbar spine , bilateral canal stenosis. Pt has bilateral leg pain, numbness and tingling. Pt had nerve conduction study cervical spine disease.; The Pt has had Ct scans, medication therapy.

Patient has continued neck pain and low back pain; has numbness of left arm and left leg; This study is being ordered for a neurological disorder; 09/27/16; There has been treatment or conservative therapy; neck pain with paresthesia of left arm & left leg; low back pain with paresthesia of left leg; patient has done physical therapy without success, pain is worse now; patient has been on pain medications, steroids without controlling the pain.

Patient has had recent bouts with numbness in fingers and with faintness if she extends her neck upwards. CT performed at ER did not show enough details, requesting MRI study; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms; There is weakness; Patient becomes faint if extends her head up; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction; There is not x-ray evidence of a recent cervical spine fracture.

Patient has had six weeks of conservative treatment with no improvement; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms; There is weakness; Upper extremity right V/V Left III/V Strength and grip; The patient does not have new signs or symptoms of bladder or bowel dysfunction; There is not x-ray evidence of a recent cervical spine fracture.

Patient has had worsening neck pain that causes headaches. He has taken Neurontin with somewhat good response, but has had to continue taking pain medicine; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; Neck: Diffuse posterior tenderness mostly around C3-5 area. Neurologic: Upper extremities reveal strength is 4/5 in the right triceps, others are 5/5. Sensation & DTRs are equal; The patient does not have new signs or symptoms of bladder or bowel dysfunction; There is not x-ray evidence of a recent cervical spine fracture.

Patient is a candidate for cervical and lumbar epidural injections. Possible surgical candidate pending MRI results; This study is being ordered for trauma or injury; 1998, but worsened on 01/23/2017 after falling; There has been treatment or conservative therapy; Neck pain radiating down both arms. Midline midback pain that worsens with movement, lying down, when going from sitting to standing, and lower back pain chronic duration. Tingling of both legs. Posterior cervical and lumbar spine exhibited moderate tende; Previously treated with Physical Therapy—didn’t help. Patient is unable to participate in therapy again due to recent injury on 01/23/2017.
Patient is a candidate for Epidural Steroid Injections.; This study is being ordered for a neurological disorder.; 10/11/2014; There has been treatment or conservative therapy.; Tingling of the posterior right thigh. Neck pain in trapezius extends into shoulder. Lower back pain radiating to the legs posteriorly on the right and chronic duration. Cervical and lumbar spine midline tenderness exhibited on palpation. Range of motion ; Chiropractic Therapy with Dr. Chris Tate-which didn't help. Home therapy exercises-which hasn't helped.

Patient is a pleasant 41 year-old white female who presents to clinic complaining that 2 days ago she woke up with left ocular pain. She states when she moved her eyes she would feel discomfort. She then 1 day ago woke up and had loss of lower visual fiel; This study is being ordered for a neurological disorder.; 03/06/2017; There has not been any treatment or conservative therapy.; Left ocular pain. She states when she moved her eyes she would feel discomfort. loss of lower visual field and left peripheral vision.

Patient with spindle cell lipoma had MRI c-spine and t-spine done in August. artifax noted on films recommendation of repeat done after braces taken off; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; August 2016; There has not been any treatment or conservative therapy.; patient with spindle cell lipoma had MRI c-spine and t-spine done in august. artifax noted due to patient's braces; recommendation for repeat MRI after braces taken off.

Pending MRI results patient is a candidate for cervical and lumbar epidural steroid injections and possibly surgery.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/24/2010; There has been treatment or conservative therapy.; Numbness and tingling of the lateral left arm. Midline upper back pain, radiating along the midline, and lower back pain chronic duration. Cervical and lumbar spine midline tenderness on palpation. Pain demonstrated with flexion and rotation. Previously t; Physical Therapy for several months with no improvement.

Plain film abnormal widening of the C-5 and C-6 radiologist suggests further imaging; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; decreased sensation left inner forearm DTR's abnormal Tenderness in C-3 C-4 right infrascapular; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if there is x-ray evidence of a recent cervical spine fracture.
Previous CT showing posterior disc bulge. Needing MRI to be evaluated by Neurosurgeon; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Pt had EMG/NCV on 3/6/17 which was abnormal. Radiologist recommended patient have MRI of Cervical and Thoracic Spine.; This study is being ordered for trauma or injury.; January 30, 2017; There has been treatment or conservative therapy.; neck pain that goes from neck to shoulder, down to elbow and fingers/forearm numb.; pt started Tramadol, Prednisone and Decadron on 2/22/17. Was seen again on 2/27/17 and started Meloxicam and continued Tramadol. Pt was seen on 3/1/17 by Dr. Joseph/Orthopedic doctor and was given injections. Still continued pain.

Pt has complaints of neck and shoulder pain with paresthesia x 3 months. She has failed treatment with NSAIDS, muscle relaxers, and physical therapy. This study is for further eval; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Pt is having back and shoulder pain; is having some numbness and tingling in bilateral lower extremities; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; shoulder and back pain; pt has under went injections, chiropractor

Pt is having worse pain and now having numbness in bilateral hands. She has had steroid dose pack and on medication daily. She has tried heat therapy and has done 2 weeks of pt and now doing home exercises; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Pt with neck pain radiculopathy to left arm, numbness tingling and weakness noted to left arm and grip.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness of grip to left hand. fourth and fifth digit of left hand with paraesthesia; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
Pt. c/o of low back pain started on right side and now goes all the way across, also numbness in bilateral arms, no longer drives as she cannot feel her arms; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.  
R/O herniated disc; This study is being ordered for a neurological disorder.;
01/31/2017; There has been treatment or conservative therapy.; pain in back radiating to legs and feet; physical therapy, injections
R/O MS; This study is being ordered for a neurological disorder.; 01/23/2017; There has been treatment or conservative therapy.; Ongoing, progressively worse pain in leg, essential tremors, myoclonic jerks; Physical therapy
rates pain at 8/10.; This study is being ordered for trauma or injury.; 12/25/2016; It is not known if there has been any treatment or conservative therapy.; left arm pain radiating to elbow and hand; parasthesias, weakness
rule out spinal stenosis as cause of upper and lower extremity pain and radiculopathy; This study is being ordered for a neurological disorder.; 1/2015; There has been treatment or conservative therapy.; neck pain, hand numbness, low back pain, bil foot numbness.&lt;#x0D; pt was evaluated by neurology and EMG studies were unremarkable except bil carpal tunnel syndrome; PT, Cymbalta, Mobic
Severe C Spine lesion found with nerve conduction study and severe cervicalgia; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; C spine lesion found on nerve conduction study, severe cervicalgia; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.  
symptoms not improving and worsening with time; This study is being ordered for Inflammatory/ Infectious Disease.; 01/26/2017; There has been treatment or conservative therapy.; neck pain, right shoulder pain and weakness in right hand; x-ray right shoulder showing arthropathy, mobic
The patient has failed a course of anti-inflammatory medication or steroids.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.
The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient does demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."

Follow-up to Surgery or Fracture within the last 6 months

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is x-ray evidence of a recent cervical spine fracture.

| Approval | 72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST | This is a request for a thoracic spine MRI.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis. | 1 |
| Approval | 72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST | This is a request for a thoracic spine MRI.; There is x-ray or laboratory evidence of paraspinal abscess.; The study is being ordered due to known or suspected infection or abscess. | 1 |
| Approval | 72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST | This study is being ordered for staging.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis. | 1 |
Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/15/2016; There has been treatment or conservative therapy.; neck and back pain which radiates into lower extremity, numbness in arm, tingling, pain in right leg, hip down to toes, pain in left leg down to knee, Radiculopathy; medications , PT

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/01/2016; There has been treatment or conservative therapy.; numbness and tingling, pain, weakness in right leg.; PT and medications

Unknown; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Hypoesthesia, and bilateral CA 21 R L2-4, decreased ROM; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/02/2017; There has been treatment or conservative therapy.; back pain, leg pain, unsteady gait, dizziness, numbness, tingling and pain in arm, fatigue; medication

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2012; There has not been any treatment or conservative therapy.; Pain, Low and upper back pain, Numbness and tingling down his right thigh and leg.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/20/2017; There has been treatment or conservative therapy.; back pain, abdominal pain; mediation

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/14/2016; There has been treatment or conservative therapy.; weakness, numbness, tingling.; pt, medication

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.
The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; CHRONIC LOW BACK PAIN, LIMITED ROM, NUMBNESS OF FOOT, WEAKNESS, has limited his mobility to a point he cannot get out of bed.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Increased weakness and numbness to bilateral lower extremities. With increased pain and limited ROM; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.
The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more than once for these symptoms; The physician has directed conservative treatment for the past 6 weeks; The patient has not completed 6 weeks of physical therapy; The patient has been treated with medication; The patient was treated with oral analgesics; The patient has not completed 6 weeks or more of Chiropractic care; The physician has directed a home exercise program for at least 6 weeks; The home treatment did include exercise, prescription medication and follow-up office visits; formal home exercise program with gabapentin and hydrocodone with no relief.

The study requested is a Lumbar Spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms; It is not known if there is weakness or reflex abnormality; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction; It is not known if the patient has a new foot drop; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms; There is reflex abnormality; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction; It is not known if the patient has a new foot drop; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms; There is weakness; Documented pain is not improving and getting worse. Left sided low back pain continues. Pt with shooting pains down his left leg. Denies urinary or bowel complaints. Denies saddle anesthesia. He admits to stenosis dx with MRI done in the fall of 2014. Pt s; The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI; The patient has acute or chronic back pain; The patient has none of the above; The patient does have new or changing neurologic signs or symptoms; The patient has NOT had back pain for over 4 weeks.

This study is being ordered for a neurological disorder; There has been treatment or conservative therapy; This study is being ordered for a neurological disorder; 01/04/2017; There has not been any treatment or conservative therapy; Patient is having back and neck pain with radiating numbness.
This study is being ordered for a neurological disorder; see attached clinicals; It is not known if there has been any treatment or conservative therapy; see clinicals attached.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.;

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/8/2016; There has been treatment or conservative therapy.; Severe low back pain with radiculopathy. she has numbness in left foot with cramping. pain radiates down bilateral legs and buttocks; medication including anti-inflammatory. Physical therapy stretches.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; lower back and neck pain with numbness into both hands pt. has finished PT and NSAIDS for months and she is not improved; physical therapy, NSAIDS.

This study is being ordered for trauma or injury.; There has been treatment or conservative therapy.;

This study is being ordered for trauma or injury.; 12/30/16; There has been treatment or conservative therapy.; Back pain radiating down legs; Physical therapy, naprosyn, flexeril, tylenol #3 , medrol dose pack

This study is being ordered for trauma or injury.; Patient involved in an MVA on 01/02/17. Hit by semi truck. still having severe thoracic and lumbar pain.; There has been treatment or conservative therapy.; Patient can't walk very far due to exacerbation of the pain. Pain limits his ambulation and movement.; Patient treated at ER with Fentanyl injection and morphine as well as Hydrocodon and Valium. No Physical therapy as patient can't tolerate moving.

a/o, pat. in pain w l and t spine pain.. focal pain to palp of spinous processes of L 3 and T 10 or so. xrays w both above vert. bodies w mild abnormalities. Additionally reports: osteoporotic thoracic spine compression fx w cruciform brace, micacalcin, pr; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/13/2016; There has been treatment or conservative therapy.; 2 days of mid back pain starting abruptly w/o trauma, w/o radiation/radicular s/s. known osteoporosis on meds. pain worse w activity, movement. paraspinal muscles tender.; she has been using a back brace and had was off of work for the first 2 weeks
ACUTE LEFT SIDED LOW BACK PAIN WITH LEFT SIDED SCIATICA, LEFT FLANK PAIN THRU BUTTOCK AREA DOWN LEFT LEG, LEFT ANKLE, CONSTANT PAIN, FEELS LIKE CHARLIE HORSE, PT. CHRONIC KIDNEY DISEASE STAGE 2, CHRONIC HEPATITIS C; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

Patient complains of low back pain. The discomfort is most prominent in the thoracic spine and in the lumbar spine. This is a chronic, but intermittent problem with an acute exacerbation. He states that the current episode of pain started one year ago.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Patient complains of low back pain. The discomfort is most prominent in the thoracic spine and in the lumbar spine. This is a chronic, but intermittent problem with an acute exacerbation. He states that the current episode of pain started one year ago.

Back stiffness and pain radiates to bilateral LE, standing, walking and climbing stairs are difficult. Paraspinal muscle spasms, tenderness over and lumbar and sacral vertebrae. MVA in 2008.; Pain since accident.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.

Back surgery in 80's, back pain since then; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.

Bakc and neck ddd; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/02/17; There has been treatment or conservative therapy.; Back and neck ddd; Naproxen.
Bilateral Lumbar sacral spasms Limited flexion Lumbar sacral spine Abnormal deep tendon reflections X-ray - Intervertebral disk space narrowing at L4-05 and L5-S1 Degenerative; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Decreased bi-lateral quadriceps reflex

Chief Complaint of Numbness (bilat legs. all symptoms have been going on for the past two months); Fall (falling due to numbness in legs); Back Pain; and Cyanosis (in bilateral legs); The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Numbness (bilat legs. all symptoms have been going on for the past two months); Fall (falling due to numbness in legs); Back Pain; and Cyanosis (in bilateral legs); The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Chronic back pain with history of recent fall and compression fracture; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; cyclobenzaprine, flexeril, hydrocodone, ibuprofen, medrol, percocet

Chronic back pain, previous imaging shows some abnormalities; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Chronic pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; L2 is less than 10% of normal size, DJD. Weakness in rt. LE, radiculopathy.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

completed pt; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above
DETERMINING IF PAIN COMING FROM LUMBAR SPINE OR RIGHT HIP; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/16/2016; There has been treatment or conservative therapy.;

JOINT PAIN, RIGHT HIP AND RIGHT LEG PAIN; MEDICATIONS

difficulty moving on her own; This study is being ordered for a neurological disorder.;

9/22/2016; There has been treatment or conservative therapy.; pins and needles and spasms in feet for the past month, hard for Pt to move legs and hands, unable to function properly, stiffness in LE. Work up was negative; medication failed conservative therapy. getting worse with PT. Mobic not helping. low back xray showed severe dextroratary, scoliotic curve of the lumbar spine, and severe degenerative disc disease; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have a new foot drop.;

The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The patient has acute or chronic back pain.; The patient has none of the above

Patient fell and landed on knee and buttocks. Low back pain that is radiating down into the left leg with difficulty walking; The study requested is a Lumbar Spine MRI.; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient states that the pain is radiating down into her left leg with trouble walking.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.

Patient has a new onset elevated CRP level.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient with complaints of back pain, neck pain more than 2 years.; There has been treatment or conservative therapy.; Persistent back pain, cervical radiculopathy and neuropathy; Patient has had medication therapy and physical therapy. previous treatment with Pain Management.

patient has continued neck pain and low back pain; has numbness of left arm and left leg; This study is being ordered for a neurological disorder.; 09/27/16; There has been treatment or conservative therapy.; neck pain with paresthesia of left arm & leg; low back pain with paresthesia of left leg; patient has done physical therapy without success, pain is worse now; patient has been on pain medications, steroids without controlling the pain
Patient has had failed attempts by medication and physical therapy; The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; patient has weakness in upper extremities; The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.

Patient has tried PT, heat, ice, chiropractic, acupuncture, and positive leg raise; The study requested is a Lumbar Spine MRI; The patient has acute or chronic back pain; The patient has none of the above.

Patient has tried warm compresses, rest, back exercises, NSAIDs and had 2 ER visits while on PT and after 4 sessions her pain has worsened and even hydrocodone or oxycodone are not helping; The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more then once for these symptoms; The physician has not directed conservative treatment for the past 6 weeks.

Patient is a candidate for cervical and lumbar epidural injections. Possible surgical candidate pending MRI results; This study is being ordered for trauma or injury; 1998, but worsened on 01/23/2017 after falling; There has been treatment or conservative therapy; Neck pain radiating down both arms. Midline midback pain that worsens with movement, lying down, when going from sitting to standing, and lower back pain chronic duration. Tingling of both legs. Posterior cervical and lumbar spine exhibited moderate tende; Previously treated with Physical Therapy-which didn't help. Patient is unable to participate in therapy again due to recent injury on 01/23/2017.

Patient is a candidate for Epidural Steroid Injections; This study is being ordered for a neurological disorder; 10/11/2014; There has been treatment or conservative therapy; Tingling of the posterior right thigh. Neck pain in trapezius extends into shoulder. Lower back pain radiating to the legs posteriorly on the right and chronic duration. Cervical and lumbar spine midline tenderness exhibited on palpation. Range of motion; Chiropractic Therapy with Dr. Chris Tate-which didn't help. Home therapy exercises-which hasn't helped.

Patient is having severe pain; The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; Having thigh weakness, with limping gait; The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.
Patient presents for follow-up regarding chronic back pain over the past 10 years, from lumbar spine through thoracic and cervical spines; patient has been seen x2 over the past couple of months for symptoms. Was tried on meloxicam daily; increased to twice daily with minimal relief. Patient reports he is seeing a chiropractor with minimal relief as well. Patient has been doing physical exercises at home (per handouts provided at previous visits) with stretching; Meloxicam 7.5 mgs, 1 tab twice a day.

Patient presents today with c/o right-sided lumbar back pain with right sided sciatica. This is an acute on chronic problem that first began approximately 9 months ago. No known injury. The pain is positional with bending or lifting, with radiation down to the leg. The patient does not have a new foot drop. There is no x-ray evidence of a recent lumbar fracture.

Patient with acute onset of low back pain, sciatica. Pain is severe and stabbing. Patient was seen in the Emergency room on 01/01/17. Xray notes L5-S1 facet arthropathy. At the time of ER visit patient was treated with steroid injection and pain meds. Seen; The patient has NOT had back pain for over 4 weeks.

Patients pain in the lower pain is going down into her left leg. she is not responding to pain meds and the pain is just getting worse. The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.
Pending MRI results patient is a candidate for cervical and lumbar epidural steroid injections and possibly surgery. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/24/2010; There has been treatment or conservative therapy.; Numbness and tingling of the lateral left arm. Midline upper back pain, radiating along the midline, and lower back pain chronic duration. Cervical and lumbar spine midline tenderness on palpation. Pain demonstrated with flexion and rotation. Previously t; Physical Therapy for several months with no improvement.

Possible lumbar stenosis, narrowing or disk abnormality; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; pain radiating to the legs;&lt;#xD;&gt;Quality: sharp;&lt;#xD;&gt;Severity: moderate (5-7)&lt;#xD;&gt;Duration: cannot identify &lt;#xD;&gt;Onset/Timing: recurrent episode &lt;#xD;&gt;Context: prior back problems; used medications for back pain &lt;#xD;&gt;Alleviating Factors: rest &lt;#xD;&gt;Aggravating Factors: movement/po; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Previous back strain and radiculopathy; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has none of the above.; This procedure is being requested for Trauma or recent injury

Previous spine fusion; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Pt does have degenerative disc disease of the lumbar.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient also has degenerative disc disease of the lumbar.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

PT FELL WAS HIT AND KICKED; This study is being ordered for trauma or injury.; 2013; There has been treatment or conservative therapy.; SEVERE BACK PAIN RADIATING TO HIP AND LEG; EPIDURAL INJECTION
Pt had left lower extremely weakness with leg swelling.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Decreased rang of motion. Unable to flex, rotate and extend without pain. Tender to palpitations at sacral region with mild fullness to the muscle.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pt has a h/x of degenerative disc disease; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

PT HAS DONE SOME SESSIONS OF PHYSICAL THERAPY WITH ONLY IMMEDIATE TEMPORARY PAIN RELIEF LASTING ONLY 30MIN TO 1HOUR AFTER TREATMENT. DOING AT HOME EXERCISES WITHOUT RELIEF. PAIN IS WORSENING. HE IS TAKING GABAPENTIN, HAS TRIED AND FAILED OXYCODONE, TAKEN ; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; DECREASED ROM WITH BACK FLEXION, CREPITUS, TENDERNESS, EFFUSION. TENDERNESS NOTED IN THE LEFT S-I JOINT. POS STRAIGHT LEG LIFT ON LEFT. RELEXES KNEE JERKS 2+, ANKLE JERKS, ZERO SENSATION TO LEFT FOOT

pt having back pain since fall January 2017...pain scale 10/10.&

pt is having back and should pain, is having some numbness and tingling in bilateral lower extremeties; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; shoulder and back pain; pt has under went injections, chiropractor

Pt. recently had CT of Lumbar Spine performed. Impression per Radiologist indicated "No acute fracture of the lumbar spine" and "Probable small central disk protrusion at L5-S1. Follow up with MRI of the lumbar Spine"; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Pt. went to ER on Friday w/severe back pain. MRI recommended.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above
Radicular pain of both legs, suspected degenerative disc disease; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above
radicular symptoms when he bends down; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pain in his legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

RADIOLOGY: I have ordered (There is documentation of the patient completing and failing a 4-6 week trial of P.T. and/or NSAIDS.), MRI lumbar spine w/o contrast to be done. Continue current medications, Continue current t; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; worsening low back pain and radiculopathy; Gabapentin 300mg 2 tabs tid - started 2013&x0D; Meloxicam 15mg 1 tab daily - started 12/01/2016&x0D; Hydrocodone 10/325mg

RIGH LUMBAR RADICULOPATHY WITH PERINEAL NUMBNESS AND POSSIBLE CAUDA EQUNA SYNDROM FROM FALL OFF LATER; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; PATIENT HAS LUMBAR RADICULOPATHY THAT IS CAUSING LEG PAIN AND WEAKNESS; POSSIBLE SYMPTOMS OF CAUDA EQUNA SYNDROME; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

right side hip low back pain that is now radiating down leg&x0D; started about year ago but continues to get worse&x0D; has been to ER previously--- was told nerve&x0D; Nov Sherwood urgent care--- x-ray and CT---- they said needed MRI because thinks nerve; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.
Rt sided sciatica and back pain; Has tried medication, back brace, PT and injections; wants to refer to a neurosurgeon r/o HNP; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

rule out spinal stenosis as cause of upper and lower extremity pain and radiculopathy; This study is being ordered for a neurological disorder.; 1/2015; There has been treatment or conservative therapy.; neck pain, hand numbness, low back pain, bil foot numbness.&lt;#x0D;&gt; pt was evaluated by neurology and EMG studies were unremarkable except bil carpal tunnel syndrome; PT, Cymbalta, Mobic

Spasms on the right side, numbness in the feet, pain in mid back, right LB posture, bilateral LE tingling, decreased sensation in S1 nerve root right.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; 1) motor deficit of lower extremity&amp;lt;#x0D;&gt; 2) myelopathic sx's (lost reflexes &amp;lt;/or weakness lower ext.)&amp;lt;#x0D;&gt; 3) Sciatica (pain radiates below knee)&amp;lt;#x0D;&gt; 4) LBP worse with activity&amp;lt;#x0D;&gt; 5) LBP worse w/ lumbar extension (downhill walking-standing-reaching overhead); The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Surgery performed 5/2016, pain is getting worse.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above
tenderness and limited ROM, back pain (shooting pain ever once in awhile), lower back and middle back has hurt intermittently for years, she has known degenerative disc disease, x-rays at er confirm this, has never had an MRI, pain radiates around trunk; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; lower back and middle back has hurt intermittently for years; It is not known if there has been any treatment or conservative therapy; has known degenerative disc disease, x-rays at er confirm this, has never had an MRI, pain radiates around trunk to the anterior, radiates down both legs, some numbness and tingling down the legs, back pain (shooting pain ever once in awhile), tenderness

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more than once for these symptoms; The physician has directed conservative treatment for the past 6 weeks; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication; the patient was treated with a facet joint injection.

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more than once for these symptoms; The physician has directed conservative treatment for the past 6 weeks; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more than once for these symptoms; The physician has directed conservative treatment for the past 6 weeks; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication; It is not known was medications were used in treatment; The patient has completed 6 weeks or more of Chiropractic care.

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; It is not known if the patient has new signs or symptoms of bladder or bowal dysfunction; The patient does not have a new foot drop; There is x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; The patient does have a new foot drop.
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.; The patient has been treated with medication.; the patient was treated with a facet joint injection.

Enter answer here - or Type In Unknown if No follow up on US results from 2/6 JHicks CNA.

HPI: Followup

Patient had US (Abd/Pelvis) of abdominal mass on 2/6. Here for results.

Current Medication: Given.

This study is being ordered because of a suspicious mass/ tumor.

“The patient has had a pelvic ultrasound, barium, CT, or MR study.”

This is a request for a Pelvis CT.

There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.

Yes this is a request for a Diagnostic CT

---

Has had Doppler and found enlarged lymphnodes; This study is being ordered because of a suspicious mass/ tumor.

“The patient has had a pelvic ultrasound, barium, CT, or MR study.”

This is a request for a Pelvis CT.

There are NO documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.

Yes this is a request for a Diagnostic CT

---

Having abdominal tenderness; pain with palpation RLQ and LLQ; worsened since previous visit. Hx of ovarian cyst.

This study is being ordered due to known or suspected infection.

"The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient.’’

"There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis.”

This is a request for a Pelvis CT.

Yes this is a request for a Diagnostic CT

---

Left hip pain; radiating to buttocks; legs, foot; weak limbs; numbness of the legs/feet; instability; This study is being ordered for some other reason than the choices given.

This is a request for a Pelvis CT.

Yes this is a request for a Diagnostic CT

---

Pain 2.5 years after childbirth. abnormal xray; This study is being ordered for some other reason than the choices given.

This is a request for a Pelvis CT.

---

Patient had a 4.7 cm stone on CT abdomen, shows mild diverticulosis of colon and right renal cysts.

The hematuria is not painful.

“The patient has had a pelvic ultrasound, barium, CT, or MR study.”

This is a request for a Pelvis CT.

Yes this is a request for a Diagnostic CT
PATIENT HAD AN ABNORMAL ABDOMEN CT. PAINFUL GAS, NAUSEA, ECT.; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

Patient has a pelvic US and it showed a mass in her uterus.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT

Patient is passing large blood clots, having severe abdominal pain, and ongoing menstrual period.; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

Patient with persistent groin and thigh pain following treatment for pelvic infection. Physical exam showed pain and tenderness in pelvic bone area.; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are NO active, clinical findings or endoscopic findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "There are no radiographical or ultrasound findings consistent with abnormal fluid collection, pelvic abscess, pelvic inflammation or ascites."; "Caller does not know if there are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

pt came in with a knot in her gorin. we have only seen her this one time she said it is very painful and will not go away and seems to grow.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT
Approval

72192 CT PELVIS WITHOUT CONTRAST

Pt had an MRI L Spine, with a finding of boney lesion, and recommended by radiologist was a CT Sacrum focusing on the S3.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is NOT an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient.".; This study is being ordered for initial staging.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT 1

PT WAS IMPALED BY HAY SPEAR. MARCH THE 4TH 2015. HE WAS LIFTED AND THROWN. WAS SEEN BY A SURGEON DR TREPTOW ON 1/5/2017. DR TREPTOW WANTED ANOTHER CT TO FOLLOW UP AND DR TUCKER IS PT's PCP. & #x0D; PT HAD A LEFT INGUINAL LACERATION.; This study is being ordered as a follow-up to trauma.; "The ordering physician is a gastroenterologist, urologist, gynecologist, or surgeon or PCP ordering on behalf of a specialist who has seen the patient.".; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT 1

SHARP PELVIC PAIN IN MALE, PAIN WHEN LIFTING LEGS, LEUKOCYTOSIS, ABNORMAL LAS, HEMATURIA, DECREASED URINE OUTPUT, DIFFUSE PELVIC PAIN, RASH, PAIN RADIATING TO HIPS AND THIGHS; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient.".; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis.".; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT 1

swelling and pain in scrotal area, clinical finding of a mass.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study.".; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. 1

U/S soft tissues of Groin done for Right Groin pain. U/S Showes 4.8x6.5x2.7 CM mass in the suprapubic region to the right of the midline. need to r/o an Organizing endometrioma vs. other masses.; The patient is not undergoing active treatment for cancer.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is NOT an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient.".; This study is not being ordered for initial staging.; The patient is presenting new signs (e.g. lab findings or imaging) or symptoms.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT 1

Will Attach Clinicals.; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT 1

Approval 72196 MRI PELVIS

Abdominal pain; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

Approval 72196 MRI PELVIS

chronic right groin pain evaluating for avn; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

Approval 72196 MRI PELVIS

Diffusely heterogeneous appearance to the uterus. Further evaluation with a contrast-enhanced MR examination of the uterus may be of benefit given the patient's symptoms and clots. The problem began; This is a request for a Pelvis MRI.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; An abnormality was found in the uterus.; The study is being ordered for suspicion of tumor, mass, neoplasm, or metastatic disease.

Approval 72196 MRI PELVIS

Evaluate reason for severe pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/30/2016; There has been treatment or conservative therapy.; Hip and groin pain and low back pain; Physical therapy

Approval 72196 MRI PELVIS

Pain in lumbar/sacral region not improved after 3 lumbar epidural injections.; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

Approval 72196 MRI PELVIS

Patient presents to clinic today to discuss her right pubic pain. It's about a 5 on a 1 to 10 scale of pain. 10 being the worst in one being the best. Says it hurts worse when she sits, standing actually makes it better. She says it feels like a constant.; This is a request for a Pelvis MRI.; The study is being ordered for pelvic trauma or injury.; This is NOT an evaluation of the pelvic gurdle, sacrum or the tail bone (coccyx).
PELVIS PAIN UNSPECIFIC; This is a request for a Pelvis MRI.; The request is not for any of the listed indications. Persistent diffuse low back pain which worsens throughout the day. Pain is unimproved with IM steroid injection. Lower back pain bilaterally, lumbar spine painful on movement, lumbar pain on palpation, chronic duration, and pain is significantly effecting; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Please see attached clinicals; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

Pt had abdominal ultrasound; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/25/2016; There has been treatment or conservative therapy.; Pt has had CT and vaginal ultrasound; medication: Bactrim DS/Metroall, Pt has been to office several time and also referred a GYN doctor.

Pt has completed 6 weeks of physical therapy with failed treatment.; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

R sided pelvis/hip pain w/o known injury. Pt has failed rest, activity mod, therapy, stretching exercises, massage therapy and NSAIDs. MRI to further evaluate pelvic structure and for stress fx R hip. positive for pain, decreased mobility, joint pain, ten; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

R/O cancer; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/14/2016; There has not been any treatment or conservative therapy.; Abnormal CT scan of abdomen and pelvis with hematuria

SWELLING X 2 WEEKS,MILD,NO INJURY,BULGE ON RIGHT LOWER SIDE OF ABDOMEN WITH PRESSURE.SMALL RECTUS MUSCLE HERNIA; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.

This is a request for a Pelvis MRI.; The request is for suspicion of joint or bone infection.

This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. "; "The patient has had an abdominal ultrasound, CT, or MR study. "; ORGAN ANOMOLIES NOTED WITH INCREASING ABD/PELVIS PAIN. HEMATURIA AND MASS PRESENT.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; Unknown

UNKOWN; This study is being ordered for Inflammatory/ Infectious Disease.; 2 YEARS AGO?; There has been treatment or conservative therapy.; LUMBAR PAIN&D; RUQ, PAIN&D; R HIP PAIN&D; PELVIC PAIN; HOME EXERCISES&D; ANTI-INFLAMMATORY MEDICATIONS&D; PAIN MEDICINE

with ambetter, this will go to review, will just fax notes; This is a request for a Pelvis MRI.; The study is being ordered for something other than suspicion of tumor, mass, neoplasm, metastatic disease, PID, abscess, Evaluation of the pelvis prior to surgery or laparoscopy, Suspcion of joint or bone infect

&It; Enter answer here - or Type In Unknown If No Info Given. &gt; This study is being ordered for trauma or injury.; 3/2016; There has not been any treatment or conservative therapy.; NUMBNESS  PAIN

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or joint infection.; Yes this is a request for a Diagnostic CT

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.
This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

This study is being ordered for a neurological disorder.; 01/25/2017; There has been treatment or conservative therapy.; The Pt has pain, radiating into right shoulder. Pt has numbness in right arm. Pt had EMG recommends this study; Pt has had medication therapy.

The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.
The requested study is a Shoulder MRI.; The pain is described as chronic.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; PATIENT HAS 6 WEEKS WITH NO IMPROVEMENT & SYMPTOMS ARE WORSENNING.; The patient received oral analgesics.

The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; Pain, popping, soreness, and sharp pain, limited ROM; Medications

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/19/2017; There has been treatment or conservative therapy.; shoulder pain neuropathy arthritis low back left shoulder pain lumbar radiculopathy; PT tramadol gabapentin

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/10/2016; There has been treatment or conservative therapy.; neck and shoulder pain, tenderness going down arm, headache; physical therapy, muscle relaxers, heat and ice

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 29, 2015; There has been treatment or conservative therapy.; The patient has pain in his shoulder. Sharp and throbbing.; Patient is in Physical Therapy, Pain medication.

This study is being ordered for trauma or injury.; 3/2016; There has not been any treatment or conservative therapy.; NUMBNESS PAIN
Approval 73221 MRI JOINT OF UPPER EXTREMITY

; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; It is not known if there is a suspicion of fracture not adequately determined by x-ray.; The request is for shoulder pain.; It is not known if there is a suspicion of tendon, ligament, rotator cuff injury, or labral tear. 1

Approval 73221 MRI JOINT OF UPPER EXTREMITY

; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear. 2

Approval 73221 MRI JOINT OF UPPER EXTREMITY

; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Continued pain and dysfunction.; The patient received oral analgesics. 1

Approval 73221 MRI JOINT OF UPPER EXTREMITY

; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Patient still have pain getting worsen doing the home treatment, nothing seems to help at all; The patient received oral analgesics. 1

Approval 73221 MRI JOINT OF UPPER EXTREMITY

; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain. 1

Approval 73221 MRI JOINT OF UPPER EXTREMITY

; The requested study is a Shoulder MRI.; The study is not requested for any of the standard indications for Knee MRI; It is not known if the study is requested for shoulder pain. 1

Approval 73221 MRI JOINT OF UPPER EXTREMITY

; This study is being ordered for a neurological disorder.; It is not known if there has been any treatment or conservative therapy.; 2

Approval 73221 MRI JOINT OF UPPER EXTREMITY

; This study is being ordered for a neurological disorder.; Enter date of initial onset here - or Type In Unknown If No Info Given &x0D; Info Given &x0D; &x0D; January of 2016; There has been treatment or conservative therapy.; 1
Approval 73221 MRI JOINT OF UPPER EXTREMITY

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; There has been treatment or conservative therapy; bilateral shoulder pain, Doctor assessment from 01/17/2017 Severe arthritis in shoulders bilaterally; Patient has been seen on 10/19/2016, 11/16/2016, 12/15/2016, and 01/17/2017 all for shoulder pain. Patient was using Voltaren gel on 10/19/2016, nothing was changed. On 11/16/2016 Kenalog and Toradol injections were given along with a prescription for Zantac.

Approval 73221 MRI JOINT OF UPPER EXTREMITY

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 11/23/2016; It is not known if there has been any treatment or conservative therapy; constant pain in both wrists, pt denies injury, pain increasing. Radiates in hand up to forearm. No decreased ROM or overuse. Hx of mild wrist pain in the past. Denies other joint pain. Pain improved with Ibuprofen. X-ray did not show fracture, dislocation.

Approval 73221 MRI JOINT OF UPPER EXTREMITY

40 yr old female w/ shoulder pain; numbness and tingling in right arm; weakness in that arm; The requested study is a Shoulder MRI; The pain is described as chronic; The request is for shoulder pain; The physician has directed conservative treatment for the past 6 weeks; The patient has not completed 6 weeks of physical therapy; The patient has been treated with medication; It is not known if the patient has completed 6 weeks or more of Chiropractic care; The physician has not directed a home exercise program for at least 6 weeks; The patient received oral analgesics.

Approval 73221 MRI JOINT OF UPPER EXTREMITY

Constant worsening bilateral wrist pain and swelling. MRI needed to evaluate increased swelling about the carpal tunnel space; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 7 months ago; There has been treatment or conservative therapy; Pain, swelling, decreased mobility, joint tenderness, numbness, popping, swelling, tingling, weakness; Rest, splint, corticosteroid injection, NSAIDs.

Approval 73221 MRI JOINT OF UPPER EXTREMITY

CONTINUED PAIN SINCE FALL INJURY 1/4/2017, WENT TO ER TREATED BUT STILL ALOT OF PAIN WITH SHOULDER. XRAYS: NORMAL&x0D; R/O: ROTATOR TEAR; The requested study is a Shoulder MRI; The pain is from a recent injury; Surgery or arthroscopy is not scheduled in the next 4 weeks; The request is for shoulder pain; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Approval 73221 MRI JOINT OF UPPER EXTREMITY
Date of initial onset: MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/espec; This study is being ordered for trauma or injury.; MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/especially of the clavicle; There has not been any treatment or conservative therapy.; Date of initial onset: MUSCULOSKELETAL: normal gait; range of motion: decreased ROM in right shoulder; pain with ROM of right shoulder; Crepitus, Tenderness, Effusion: tenderness noted in the exquisite over the right anterior chest wall and shoulder/espec

INJURY IN 1986 WITH WORSENING PAIN THAT HAS BEEN CHRONIC IN NECK AND LEFT SHOULDER; This study is being ordered for trauma or injury.; It is not known if there has been any treatment or conservative therapy.;

LEFT ANTERIOR SHOULDER PAIN, DECREASED ACTIVE AND PASSIVE ROM. NORMAL X-RAY. R/O ROTATOR CUFF INJURY; The requested study is a Shoulder MRI; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.

left SHOULDER EFFUSION moderate to large, with crepitus and cracking over extremes of flexion and extension. Rotation is painful and range of motion is limited partially due to capsular tendon secondary to the SHOULDER effusion. Pain in left shoulder with; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

MVA about 6 weeks ago, having pain to right elbow, any movement with her right arm causes pain to the right elbow, has used anti inflammatories and has had a cortisone injection, xray to right elbow showed no acute fracture; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.

N/A; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/2014; There has been treatment or conservative therapy.; Right shoulder- previous mri in 2014 showed full thickness tear (suprastinatus), tear is posterior superior labrum. Left shoulder- pain that is worse when reaching above head or behind back, suspected tear.; Pain medication.
Neg EKG and member has had meds and PT with no relieve; The requested study is a Shoulder MRI; The pain is from a recent injury; Surgery or arthroscopy is not scheduled in the next 4 weeks; The request is for shoulder pain; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Patient had abnormal X-rays on shoulder and neck; This study is being ordered for a neurological disorder; Enter date of initial onset here - 11/5/16; There has been treatment or conservative therapy; Describe primary symptoms here - Right arm numbness, pain, tingling, weakness and swelling. Pain with movement, lifting and laying down at night; Describe treatment / conservative therapy here - Patient has had home physical therapy since 11/5/17 and medications.

Patient had x-ray which stated that a MRI could be considered for further evaluation; The pain is from an old injury; It is not known if the member has failed a 4 week course of conservative management in the past 3 months; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.

Patient has pain in left shoulder increasing pain with motion; The requested study is a Shoulder MRI; The pain is from a recent injury; Surgery or arthroscopy is not scheduled in the next 4 weeks; The request is for shoulder pain; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Patient has a cat bite. She received it on the 9th. It is painful, red, swollen, has drainage, fever, weakness, stiffness, and decreased motion. Today its worsening. Concerned for osteomyelitis; The study is for infection or inflammation; There are physical exam findings, laboratory results, other imaging including bone scan or ultrasound confirming infection, inflammation and or aseptic necrosis; Surgery or other intervention is not planned for in the next 4 weeks; This request is for a wrist MRI; The reason for the study is not for evaluation of wrist pain.

Pt hurt herself on the job about a month ago and has had severe pain since; The requested study is a Shoulder MRI; The pain is from a recent injury; Surgery or arthroscopy is not scheduled in the next 4 weeks; There is not a suspicion of fracture not adequately determined by x-ray; The request is for shoulder pain; There is not a suspicion of tendon, ligament, rotator cuff injury or labral tear.

r/o tear; The requested study is a Shoulder MRI; The pain is from a recent injury; Surgery or arthrosopy is not scheduled in the next 4 weeks; The request is for shoulder pain; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

rates pain at 8/10; This study is being ordered for trauma or injury; 12/25/2016; It is not known if there has been any treatment or conservative therapy; left arm pain radiating to elbow and hand; parasthesias, weakness

Recent shoulder injury by lifting a gun safe. Decreased range of motion; The requested study is a Shoulder MRI; The pain is from a recent injury; Surgery or arthrosopy is not scheduled in the next 4 weeks; The request is for shoulder pain; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

severe shoulder pain 10/10; aggravated by movement, overhead activity and lifting. painful ROM, tried Ibrophren with no relief, decreased ROM, abduction restricted, external rotation restricted, extension painful, tender, have a normal X-ray; The requested study is a Shoulder MRI; The pain is not from a recent injury, old injury, chronic pain or a mass; The request is for shoulder pain.

symptoms not improving and worsening with time; This study is being ordered for Inflammatory/ Infectious Disease; 01/26/2017; There has been treatment or conservative therapy; neck pain, right shoulder pain and weakness in right hand; x-ray right shoulder showing arthropathy, mobic

tendon rupture in the right shoulder; The requested study is a Shoulder MRI; The pain is from an old injury; The request is for shoulder pain; The physician has directed conservative treatment for the past 6 weeks; The patient has not completed 6 weeks of physical therapy; The patient has been treated with medication; The patient has not completed 6 weeks or more of Chiropractic care; The physician has not directed a home exercise program for at least 6 weeks; It is not known what type of medication the patient received.

The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.

The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months; This request is for a wrist MRI; This study is requested for evaluation of wrist pain.

The pain is from a known mass; The diagnosis of Mass, Tumor, or Cancer has not been established; The patient has had recent plain films, bone scan or ultrasound of the knee; The imaging studies were abnormal; This request is for a wrist MRI; This study is requested for evaluation of wrist pain.

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; It is not known if the ordering physician is an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; There is no symptom of locking, Instability, Swelling, Redness, Limited range of motion or pain.

Approval

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; There is no symptom of locking, Instability, Swelling, Redness, Limited range of motion or pain.; No, patient has not completed and failed a course of conservative treatment.

Approval

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.

Approval

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; It is not known if the physician has directed conservative treatment for the past 6 weeks.

Approval

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Approval

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This study is being ordered for Inflammatory/ Infectious Disease.; 3/20/17; There has been treatment or conservative therapy.; Swelling cant walk tender pain; medication 03/29/17

Approval

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/19/2017; There has been treatment or conservative therapy.; Pain, popping, soreness, and sharp pain, limited ROM; Medications

Approval
Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This study is being ordered for trauma or injury.; 1/18/2017; There has not been any treatment or conservative therapy.; Pain in the neck, back, and ankle, leg swelling.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This study is being ordered for trauma or injury.; 11/03/2016; There has been treatment or conservative therapy.; Pain, swelling and bruising.; Pt received SHE program, and NSAIDs.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; ; The patient received oral analgesics.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; It is not known if there is a suspected meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; It is not known if there is a suspicion of fracture not adequately determinjed by x-ray.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This study is being ordered for trauma or injury.; This study is being ordered for trauma or injury.; HPI: 58 y.o. female presents with ankle and foot pain that started 3 days ago. The day prior she was playing tennis but doesn't recall an injury. Pain has worsened until she is unable to walk on it. She has been trying ice and elavation with some benefit.; There has not been any treatment or conservative therapy.; pain, bruising, swelling.
3 views of the left knee. Joint spacing is very slightly narrowed with soft tissue shadowing suggesting medial compartment hemarthrosis, patella is well seated in the distal femoral patellar groove very slight medial deviation, tibiofibular articulation;

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; After at home exercises to try and re-strengthen the left knee, the pain still progressively got worse.; The patient received oral analgesics.

Abnormal phy exam, abnormal x-ray, mem did 6 weeks on C.C. insaids, rest, ice, heat.;

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthrosopy is not scheduled in the next 4 weeks.

Concern for ligament tear. Not much swelling, but painful. Been using a brace. Hurts worse when moving on it. Does ok with rest. Feels like knee is going to give out.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthrosopy is not scheduled in the next 4 weeks.

Conservative therapy not helping; This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; The patient has been treated with anti-inflammatory medication for at least 6 weeks.

Continued knee pain after fall; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthrosopy is not scheduled in the next 4 weeks.

Enter answer here - or Type In Unknown ER Follow Up knee/ankle injury; patient reports that the injury occurred about 36 hours ago. Reports she was seen in the ER early this morning. States that they did do Xrays and states that they were negative.. 

HP; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthrosopy is not scheduled in the next 4 weeks.
Enter answer here - or Type INew symptom(s): HE WAS STANDING WELDING 3 DAYS AGO AND STEPPED BACKWARD AND FELT HIS POSTERIOR LEFT KNEE POP LOUDLY AND WAS UNABLE TO SUPPORT WEIGHT ON IT OR EXTEND IT STRAIGHT AFTERWARD. ER VISIT FOR NORMAL XRAYS WA; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

FAX; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

knee and hip pain, for several years aggravated by exercise and better with rest.; has seen orthopedic, has had injections, nsaid, steroids.; This study is being ordered for Inflammatory/ Infectious Disease.; 06/10/2014, initial visit for left knee pain, pt fell going down stairs and tore ligaments, has had medication therapy and seen orthopedic specialist; now has arthritis in joins of left side; There has been treatment or conservative therapy.; knee and hip pain, grating pain, worse on arising; Injections 2014&; medications 2014-2017; exercise, range of motion

knee swelling, e66.9; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.

LEG PAIN AND ADEMA ON THE RIGHT SIDE; This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had recent plain films of the knee.; There are no physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; Suspicious Mass or Suspected Tumor/ Metastasis

PAIN AND SWELLING IN RIGHT KNEE SINCE NOV 2016; This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had a recent bone scan.; The results of the plain films is not known.; There are no documented physical or laboratory findings of a joint infection.; Known or Suspected Joint Infection

Pain is more at rest in right knee than left knee.; This study is being ordered for Inflammatory/ Infectious Disease.; knee pain 1/2017; There has not been any treatment or conservative therapy.; both knee pain

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

- 这是一个膝关节MRI的请求；这项研究是由于膝盖疼痛而要求的；疼痛来自较近的受伤；有一个怀疑是半月板、肌腱或韧带损伤的情况；没有被X光确定的可疑骨折。

- 这是一个踝关节MRI的请求；这项研究是由于膝盖疼痛而要求的；疼痛来自较旧的受伤；医生已经指导保守治疗6周；患者已经完成了6周的物理治疗。

- 这是一个踝关节MRI的请求；这项研究是由于膝盖疼痛而要求的；疼痛来自较旧的受伤；医生已经指导保守治疗6周；患者已经完成了6周的物理治疗；患者已经接受关节注射（或）。

- 这是一个踝关节MRI的请求；这项研究是由于下肢疼痛而要求的；有一个脉动性肿块；“有一个来自先前的检查、平片、超声或先前的CT或MRI的肿瘤或肿块的证据。”有感染的怀疑；患者正在服用抗生素。

- 这是一个踝关节MRI的请求；这项研究是由于下肢疼痛而要求的；有一个脉动性肿块；“没有来自先前的检查、平片、超声或先前的CT或MRI的肿瘤或肿块的证据。”有感染的怀疑；患者正在服用抗生素。

- 这是一个踝关节MRI的请求；这项研究是由于下肢疼痛而要求的；有一个脉动性肿块；“没有来自先前的检查、平片、超声或先前的CT或MRI的肿瘤或肿块的证据。”没有感染的怀疑；患者正在服用抗生素。

- 这是一个踝关节MRI的请求；这项研究是由于下肢疼痛而要求的；有一个脉动性肿块；“没有来自先前的检查、平片、超声或先前的CT或MRI的肿瘤或肿块的证据。”没有感染的怀疑；患者正在服用抗生素；这是一项研究骨折（非-愈合骨折）。

- 这是一个踝关节MRI的请求；这项研究是由于下肢疼痛而要求的；有一个脉动性肿块；“没有来自先前的检查、平片、超声或先前的CT或MRI的肿瘤或肿块的证据。”没有感染的怀疑；患者正在服用抗生素；这是一项研究骨折（非-愈合骨折）；这不是一个为计划的手术的术前评估。

- 这是一个踝关节MRI的请求；这项研究是由于下肢疼痛而要求的；有一个脉动性肿块；“没有来自先前的检查、平片、超声或先前的CT或MRI的肿瘤或肿块的证据。”没有感染的怀疑；患者正在服用抗生素；这是一项研究骨折（非-愈合骨折）；这不是一个为计划的手术的术前评估。
This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."
; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a suspected tarsal coalition.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

&amp;lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 9/2016; There has been treatment or conservative therapy.; low back pains. new onset hip pains.; rest, heat, medication

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT
3 mm lesion seen on in-house xray of the left hip.; This is a requests for a hip MRI.; The member has not failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT
DETERMINING IF PAIN COMING FROM LUMBAR SPINE OR RIGHT HIP; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/16/2016; There has been treatment or conservative therapy.; JOINT PAIN, RIGHT HIP AND RIGHT LEG PAIN; MEDICATIONS
Ms. Manning presents with low back pain. Reason for visit: Pain. The discomfort is most prominent in the mid lumbar spine. This radiates to the hips. She is unable to describe the discomfort. The pain level between 1 and 10 is a 4. This is a chronic; This study is being ordered for a neurological disorder.; 10 years ago; There has been treatment or conservative therapy.; pain; joint injection, pain medication and muscle relaxer.

This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; PAIN, NUMBNESS, AND TINGLING.; HOME EXERCISES, MEDICATIONS, AND X-RAYS

This is a requests for a hip MRI.; Surgery or arthroscopy is scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; The hip pain is due to a recent injury.; The request is for hip pain.

This is a requests for a hip MRI.; The diagnosis of Mass, Tumor, or Cancer has been established.; The study is requested for staging.; The hip pain is due to a mass.; The request is for hip pain.

This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is due to an old injury.; The request is for hip pain.

This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of Hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of unexplained abdominal pain in patient over 75 years of age.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for trauma.; This request is for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; Yes this is a request for a Diagnostic CT
THIS PATIENT HAS HAD A RECENT EGD DONE AND IT HAS SHOWED SHE HAS A LARGE MASS ON THE OUTSIDE OF HER ESOPHAGUS. THIS NEEDS TO BE FURTHER EVALUATED, SO THESE TEST ARE NECESSARY; This study is being ordered for a metastatic disease.; There are 3 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

Umbilical nodule.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &\#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &\#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

UNKNOWN; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT

UNKNOWN; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &\#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &\#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

This is a request for CT Angiography of the Abdomen and Pelvis.

Yes, this is a request for CT Angiography of the abdomen.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not known if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT

This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination; This study is being requested for abdominal and/or pelvic pain; The study is being ordered for chronic pain; This is not the first visit for this complaint; There has been a physical exam; The patient is female; A pelvic exam was NOT performed; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; This study is being requested for abdominal and/or pelvic pain; The study is being ordered for chronic pain; This is not the first visit for this complaint; There has been a physical exam; The patient is female; A pelvic exam was performed; The results of the exam were abnormal.

This study is being ordered for abdominal pain; The study is being ordered for chronic pain; This is not the first visit for this complaint; There has been a physical exam; The patient is male; A rectal exam was not performed; Yes this is a request for a Diagnostic CT

This study is being ordered for a metastatic disease; There are 2 exams are being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering physician is not a hematologist/oncologist.

This study is being ordered for Inflammatory/Infectious Disease; 1/5/17; There has been treatment or conservative therapy; abdomen/pelvis, tenderness, fatigue, neck-swelling; ultra sounds done

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 01/13/2017; There has been treatment or conservative therapy; abdominal pain for 4 days, fatigue, shortness of breath with exertion, excruciating epigastric pain; GI cocktail, morphine and Proventil
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; There has not been any treatment or conservative therapy.; abdominal pain, right flank pain, short of breath

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; abdomen pain and chest pain.; none

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for bilirubin.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for something other than bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; The patient did not have a amylase or lipase lab test.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

PATIENT HAS WEIGHT LOSS, ELEVATED LIVER ENZYMES. PATIENT ALSO HAD AN ABDOMINAL US DONE 09/28/2016 WHICH SHOWED A MODERATE DIFFUSE INCREASED ECHOCENICITY OF THE LIVER LIKELY REPRESENTING FATTY INFILTRATION; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Patient is has had UTI's in the past and Microscopic Hematuria and multiple occasions. Continues to have pain and Blood in urine.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/6/16 for the Flank and Abdominal pain. On 3/9/17 an X-ray was done and a pulmonary nodule was seen.; There has been treatment or conservative therapy.; Pain in flank, lower abdominal pain.; Patient was given Antibiotics for an infection, and referred to a Urologist. No treatment has been given for the Pulmonary nodule.

Patient is having abdominal pain.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Patient is having dizziness, nausea, vomiting, right lower quadrant pain, and flank pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT.

Patient is having right flank pain , abnormal ua , blood in urine, pain medications not helping; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.

Patient is here with complaints of bladder pain that started Sunday 2/19, and an urge to urinate along radiating pain down her legs into her feet. When she urinates she is not urinating a lot. She says it hurts to start urination and end urination. She; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT.
Patient to be evaluated for generalized abdominal pain. This is located primarily in the left lower quadrant. There is some radiation to the left lower quadrant. It began 1 week ago. The onset of pain occurred with no apparent trigger. He characterizes this as a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT

Patient unable to undergo MRI due to cardiac pacemaker.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Greater than 6 months.; There has not been any treatment or conservative therapy.; She has pain all over. Her worst pain is in her epigastric region. Pain is intermittent. Aggravated with eating or drinking no matter what it is happens immediately. She also has some burning in the mid back as well. Sometimes the pain in the epigastric region is intermittent.

Patient with persistent LUQ abdominal pain. Negative GI workup. Gastroenterologist requesting CT.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT

Positive for midline reducible epigastric hernia, fullness to right side of abdomen. Nontender. Liver edge 2-3 inches below costal margin. Dullness to percussion of the right upper quadrant. No fluid wave on auscultation. Suspected hepatic enlargement. CB; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

Prior approved CT scan by different MDO not completed. Pt. still having abd. pain, vomiting and weight loss.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT
Pt had gall bladder removal in November and there were complications with surgeries after Pt fall where sutures were ripped; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

Pt had ultrasound on 10/14/16 that showed fatty liver, w/possible right renal calculus.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT

Pt has an accident working at home. Was pulling a calf from a cow and felt a pop in groin.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

Pt has has ongoing central abdominal pain for 6 months. She has had abd/pelvic ultrasound and EGD by GI. Labwork has been normal.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.

Pt has kidney stones; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

Pt has LLQ tenderness on palpation. Questionable Mass that comes and goes. Abdominal Ultrasound negative.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

Pt has non-Hodgkins lymphoma, stage 1; now having abnormal weight loss; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.
PT ORIGINALLY CAME TO CLINIC COMPLAINING OF ABD PAIN, LLQ PAIN, AND DIARRHEA. ATTEMPTED TO GET A ABD/PELVIS CT ON 1/23 BUT INSURANCE REQUESTED ULTRASOUND. ABDOMINAL ULTRASOUND COMPLETED & CT.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.1

PT. HAD INCREASED WHITE BLOOD CELLS; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT

Pt. nausea/vomiting due to the pain, positive tenderness on both sides of ABD mainly on the L, does have a large trace of blood in her urine.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT

r/o cyst or tumor, diverticulitis; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT
R/O APPENDICITIS; PALPATION-GUARDING - RLQ PAIN, NAUSEA X 2 DAYS WORSENING; This is a request for an abdominal-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

right lower quad pain; grimacing and tenderness with palpation to RLQ.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

RLP pain off and on since Thursday 2-9-17, worsening every day. No injury. tenderness with palpitation. Pain over large area and now to right lower quadrant.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

rt and left abd pain getting worse discharge from nipple bloating pelvic pain; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

rt. side abdominal pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

rule out appendicitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT.

12/29 Abdomen & pelv ct showed 2.2 cm lesion; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/27/16; There has not been any treatment or conservative therapy.; none
Already had 2 lesions on the liver; u/s showed the size has changed; new liver on the kidney; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Abnormal ultrasound done on 1/23/2017; There has not been any treatment or conservative therapy.; Lesions seen on u/s HEPATIC LESION, NAUSEA, VOMITING, RT GROIN PAIN, WEIGHT LOSS, PELVIC PAIN, RLQ ABDOMINAL PAIN.; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.

HPI Comments: Patient is here today with concerns that a recent CT of the abdomen/Pelvis did show that she had a 1 mm lesion on her pancreas and they recommend that she get an MRI.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

Pt had abdominal ultrasound; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/25/2016; There has been treatment or conservative therapy.; Pt has had CT and vaginal ultrasound; medication: Bactrim DS/Metroall, Pt has been to office several time and also referred to a GYN doctor.

R/O cancer; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/14/2016; There has not been any treatment or conservative therapy.; Abnormal CT scan of abdomen and pelvis with hematuria

Renal mass protocol. Left renal mass measuring 1.9 cm concerning for a solid mass. Recommend further evaluation with renal mass protocol. Differential considerations include renal cell carcinoma and possibly other complicated renal cystic lesions per C; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A kidney abnormality was found on a previous CT, MRI or Ultrasound.; The patient has a renal cyst.

Ultrasound.; The patient has a renal cyst.

This request is for an Abdomen MRI.; This study is being ordered for follow-up trauma.; The ordering physician is a gastroenterologist or surgeon.

This request is for an Abdomen MRI.; This study is being ordered for hematuria.; "The patient has had an abdominal ultrasound, CT, or MR study.;" The hematuria is not painful.;
This request is for an Abdomen MRI.; This study is being ordered for hematuria.; The patient has painful hematuria.; It is unknown if the patient has had an IVP (intravenous pyelogram); abnormal CT, with complex Cysts.

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; "There are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis."

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; It is not known if there are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis.; It is not known if there are active of clinical findings of Crohn's disease, ulcerative colitis, bowel inflammation or diverticulitis.; "There is not radiographical or ultrasound findings consistent with abnormal fluid collection, abdominal abscess, or ascites."

This request is for an Abdomen MRI.; This study is being ordered for known or suspected vascular disease.; The ordering physician is not a surgeon.; There are plain film or ultrasound evidence of vascular abnormality.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for known or suspected vascular disease.; The ordering physician is not a surgeon.; There are plain film or ultrasound evidence of vascular abnormality.; pt had CT that showed what could be vascular phenomenon. need MRI for further look.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; patient is presenting with a liver lesion found on mri l-spine

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient did NOT have chemotherapy, radiation therapy or surgery in the last 3 months.; They did NOT have an Abdomen MRI in the last 10 months.
This request is for an Abdomen MRI; This study is being ordered for Known Tumor; This study is being ordered for staging; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; Mass found on CT 01/18/2017

This request is for an Abdomen MRI; This study is being ordered for Known Tumor; This study is being ordered for staging; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; PT Came IN WITH ABDOMINAL PAIN. WE DID A CT ON THE PT. CT SHOWED A 2CM LESION ON THE RIGHT LOWER LOBE OF THE LIVER. THERE IS A POSSIBLE LESION ON THE LEFT BUT MRI FOCUSING ON THE LIVER WAS RECOMMENDED.

This request is for an Abdomen MRI; This study is being ordered for organ enlargement; There is an ultrasound or plain film evidence of an abdominal organ enlargement; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI; This study is being ordered for organ enlargement; There is an ultrasound or plain film evidence of an abdominal organ enlargement; Jaundice

This request is for an Abdomen MRI; This study is being ordered for organ enlargement; There is an ultrasound or plain film evidence of an abdominal organ enlargement; Patient has had an abdominal ultrasound, CT of abdomen/pelvis with and without contrast, HIDA scan, and EGD for diagnostic testing that have so far been inconclusive. MRI is needed for further evaluation related to continued pain that has been going on for

This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."

This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; 1. Multiple hyperechoic hepatic masses, likely hemangiomas. &lt;x0D;&gt; Contrasted abdominal MRI recommended for further evaluation.
This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis.

1. There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.
2. The patient has an abdominal ultrasound, CT, or MR study.
3. A 2.6 centimeter lesion in the inferior right hepatic lobe

This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis.

1. There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.
2. The patient has an abdominal ultrasound, CT, or MR study.

Abd and Pelv ct recommended Abdomen MRI for further evaluation.

This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis.

1. There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.
2. The patient has an abdominal ultrasound, CT, or MR study.

ABNORMAL CT ABD/PEL SHOWS LESION IN PANCREAS AREA

This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis.

1. There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.
2. The patient has an abdominal ultrasound, CT, or MR study.

Abnormal CT scan requires further imaging

This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis.

1. There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.
2. The patient has an abdominal ultrasound, CT, or MR study.

Alpha Fetoprotein tumor marker is elevated at 6.4 ng/ml She had an abnormal CT and ultrasound showing a lesion and recommending an MRI of the abdomen for further investigation.

This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis.

1. There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.
2. The patient has an abdominal ultrasound, CT, or MR study.
3. CT showed a 1.5 cm enhancing lesion lower right hepatic lobe. Cavernous hemangioma favored. Recommended MRI with hemangioma protocol.

This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis.

1. There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.
2. The patient has an abdominal ultrasound, CT, or MR study.
3. Focal area of enhancement near the dome of the right hemidiaphragm in the right lobe of the liver. A lesion cannot be excluded and you may wish to consider MRI of the abdomen with and without contrast and dynamic technique.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; Pt has enlarged, violation of the pancreatic duct.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; pt recently had abd CT and it did not show what we were looking for. Trying to r/u abd soft tissue mass. MRI would provide best picture.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; radiologist recommended MRI for further look more views of the lesions found measuring 2.5cm.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; ultrasound suggest hepatic mass protocol for liver mass. US showed liver mass; Interval development of hyperechoic regions within the right lobe of the liver which are nonspecific and could represent focal fat or hemangiomas. Further evaluation with MR.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; unknown.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has not had an abdominal ultrasound, CT, or MR study.;"; lesion found on Chest CT, radiologist recommends Abdomen MRI.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; lesion on liver.
This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis. "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; pt had CT chest that showed liver masses. needs MRI to get closer look.

unknown; This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis. The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is NO suspicion of metastasis.

This is a request for a MR Angiogram of the abdomen.

This is a request for a heart or cardiac MRI

This is a request for a Heart CT.

The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No patient does not have new onset congestive heart failure.; 1. Chest Pain; 2. hypertension; 3. MVP; No known history of CAD. Stress echo 10/26/16 revealed EF 60-65%, grade I/IV diastolic dysfunction, and low risk for ischemia. History of fibromyalgia and vitamin D deficiency. Reports chest pressure onset 3 m; Yes, there is Chronic Chest Pain.

Yes, this is a request for CT Angiography of the abdominal arteries.

This is a request for Breast MRI. This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.

This is a request for Breast MRI. This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.
Had a Mammogram and needs MRI to check on nodule; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; No, there are no anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

MAMMOGRAM AND ULTRASOUND PERFORMED ON 12.28.2016.; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; No, there are no anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

Pt had a mammogram and was normal but she has been having bloody discharge and MDO is requesting the MRI.; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

the patient has a recently enlarged, tender mass in the right breast.; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; It is not know if there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

This is a request for Breast MRI.; This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, this is a confirmed breast cancer.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient’s further management.; Yes, the results of this MRI (size and shape of tumor) affect the patient’s further management.

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20.

1
ABNORMAL ECG WITH PREMATURE SUPRAVENTRICULAR COMPLEXES.
ANTEROSEPTAL INFARCT; The caller indicated that the study was not ordered for:
Known or suspected coronary artery disease, post myocardial infarction evaluation,
pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The
patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram
within the past eight weeks.; This is a request for Myocardial Perfusion Imaging
(Nuclear Cardiology Study).

C/o episode of chest pain yesterday that has since resolved. Pain described as
substernal pressure at mid chest without radiation. A/w sweats and sob. No n/v or
palpitations. Episode occurred at rest and resolved after about 20 minutes. No known
exacerbation; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology
Study).; The patient has 3 or more cardiac risk factors; The study is requested for
congestive heart failure.; The study is requested for suspected coronary artery
disease.; The member has known or suspected coronary artery disease.; The BMI is 30
to 39

Chest pain, unspecified; The caller indicated that the study was not ordered for:
Known or suspected coronary artery disease, post myocardial
infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or
stent) evaluation.; The patient’s age is between 45 and 64.; The patient has not had a
stress echocardiogram within the past eight weeks.; This is a request for Myocardial
Perfusion Imaging (Nuclear Cardiology Study).

H/O myocardial infarction; T&G; hypertension; This is a request for Myocardial
Perfusion Imaging (Nuclear Cardiology Study).; It is unknown if the patient had cardiac
testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MP), Coronary CT
angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The study is
requested for congestive heart failure.; There are not new or changing cardiac
symptoms including atypical chest pain (angina) and/or shortness of breath.; There is
known coronary artery disease, history of heart attack (MI), coronary bypass surgery,
coronary angioplasty or stent.; The member has known or suspected coronary artery
disease.
The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Palpitations and chest pressure for past several weeks. EKG, ECHO, HOLTER MONITOR were all normal. Needs further investigation; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Patient complains of Chest Pains; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient having chest pain on exertion; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
PATIENT PRESENTS TO CLINIC W C/O CHEST PAIN. PATIENT ALSO HAS COPD. PATIENT WAS SENT FOR STRESS ECHO @ MERCY HOSPITAL BUT WAS UNABLE TO COMPLETE DUE TO LUNG COMPLICATIONS. PCP STILL NEEDING NUC MED STRESS TEST COMPLETED FOR CONTINUATION OF CARE.; The patient’s age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

1

Patient was in office 2/16/17 and has had left upper chest pain for the past two weeks. 1-10 pain scale member rates 8.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

1

pt was not able to exercise long enough to give accurate findings.; The patient’s age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

1

Suden onset Severe Chest Pressure, sob, snd dyspnea on exertion.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

1

The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.

2

The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

6

The patient is not diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

1

The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.

5
The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for known CAD.; The study is being ordered for suspected CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient has congestive heart failure.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.
The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

This study is being ordered for known or suspected valve disorders.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater; The study is requested for congestive heart failure.; The member does not have known or suspected coronary artery disease; The study is requested for known or suspected cardiac septal defect.

This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The member has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
This study is being ordered as a pre-operative evaluation. The patient is presenting with symptoms of atypical chest pain and/or shortness of breath. There are documented clinical findings of hyperlipidemia. The patient has not had a recent non-nuclear stress test. The patient has not had a recent stress echocardiogram. The patient has suspected CAD. The patient's age is between 45 and 64. The patient has not had a stress echocardiogram within the past eight weeks. This evaluation is prior to major surgery involving general anesthesia. This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). The patient has a physical limitation to exercise.

This study is being ordered as a pre-operative evaluation. The patient is presenting with symptoms of atypical chest pain and/or shortness of breath. There are no documented clinical findings of hyperlipidemia. The patient has not had a recent non-nuclear stress test. The patient has not had a recent stress echocardiogram. The patient has suspected CAD. This patient is clinically obese or has an emphysematous chest configuration. The patient's age is between 45 and 64. The patient has not had a stress echocardiogram within the past eight weeks. This evaluation is prior to major surgery involving general anesthesia. This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). The patient has a physical limitation to exercise.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a more than 1 of the following: diagnostic test, imaging study, or biopsy. This study is being ordered to establish a cancer diagnosis. This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA; This study is being requested for an other solid tumor; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study. This study is being ordered to establish a cancer diagnosis. This study is being requested for Lymphoma or Myeloma; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.
This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; It is unknown how many PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being requested for Breast Cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Breast Cancer.; It is unknown if this is for an evaluation of axillary lymph nodes.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Brain Cancer/Tumor or Mass.
PREVIOUS HISTORY OF STROKE; This study is being ordered for a neurological disorder.; 02/23/2017; There has not been any treatment or conservative therapy.; RIGHT SIDED WEAKNESS

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has high blood pressure

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has NOT been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is an initial evaluation of artificial heart valves.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is an initial evaluation of suspected valve disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has an enlarged heart; The patient's enlarged heart is not due to any of the listed indications.
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected pulmonary hypertension

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of heart failure.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of heart failure.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected Congestive Heart Failure.
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Embolism.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is NOT for prolapsed mitral valve, suspected valve disease, new or changing symptoms of valve disease, annual review of known valve disease, initial evaluation of artificial heart valves or annual re-eval of artificial heart valves.

1

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for initial diagnosis of congenital heart disease.

4

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is fora routine follow up of congenital heart disease.; There has been a change in clinical status since the last echocardiogram.; It has NOT been at least 24 months since the last echocardiogram was performed.

1

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure.; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.

1

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure.; There has NOT been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.

1

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure.; This is for the initial evaluation of heart failure.

4

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.

1

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.

6

This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested after a completed NON diagnostic transthoracic echocardiogram.

1

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/15/2017; There has been treatment or conservative therapy.; chest pains tightness, fam hx of heart attack; lisinopril
This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.

approval

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; It is not known if the member has known or suspected coronary artery disease.

approval

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease

approval

This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.

approval

<i>&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;</i>; This request is for a Low Dose CT for Lung Cancer Screening.; It is unknown if this patient has had a Low Dose CT for Lung Cancer Screening in the past 11 months.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.

approval

<i>&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;</i>; This request is for a Low Dose CT for Lung Cancer Screening.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening.; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.

approval

59 year old female presents with shortness of breath. History of asthma, COPD-oxygen dependent, former smoker (quit 04/2016), passive smoke exposure. tobacco-years of use:46/1ppd.; This request is for a Low Dose CT for Lung Cancer Screening.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening.; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.

approval

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.
This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; The patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.

Disapproval 70450 CT BRAIN, HEAD
Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT. This study is being requested for None of the above. This procedure is being requested for Syncope/Fainting; There is another reason why an MRI is not being considered; Not clinically necessary for an MRI.

Disapproval 70450 CT BRAIN, HEAD
Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT. This study is being ordered for a metastatic disease. There are 2 exams are being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is not a hematologist/oncologist.

Disapproval 70450 CT BRAIN, HEAD
Radiology Services Denied Not Medically Necessary

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. There has been treatment or conservative therapy.

Disapproval 70450 CT BRAIN, HEAD
Radiology Services Denied Not Medically Necessary

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. Unknown; There has been treatment or conservative therapy.

Disapproval 70450 CT BRAIN, HEAD
Radiology Services Denied Not Medically Necessary

This study is being ordered for trauma or injury. There has been treatment or conservative therapy; mbr has pain in back and neck pain numbness and tingling and head injury was an auto accident in 2008 and has lumps in his head that were never dealt with; medication.

Disapproval 70450 CT BRAIN, HEAD
Radiology Services Denied Not Medically Necessary

This study is being ordered for trauma or injury. 2 to 3 years for back pain and 8 years for a head injury; There has been treatment or conservative therapy;

Disapproval 70450 CT BRAIN, HEAD
Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT. The study is being requested for evaluation of a headache; The headache is described as chronic or recurring.

Disapproval 70450 CT BRAIN, HEAD
Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT. The study is being requested for evaluation of a headache; The headache is described as sudden and severe; The patient has vision changes; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

Disapproval 70450 CT BRAIN, HEAD
Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT; There is headache not improved by pain medications; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.";

Disapproval 70450 CT BRAIN, HEAD
Radiology Services Denied Not Medically Necessary

This study is being requested for a headache.

- **Headache with hx of carotid stenosis and now having vision issues. seeing floaters and green spots; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.**

- **Headache; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.; This study is being requested for a headache.**

- **Headaches for 2 years now. CT is required to refer to a neurologist. Vomiting and nausea sensitive to light and noise 3 headaches per week or more Patient thinks it due to neck pain; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.**

- **Issues with memory loss and constant headache left posterior cervical she hurts all over all the time; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.; This study is being requested for a headache.**

- **Last few months the pt has had shingles twice The pt saw the eye doctor a year ago her last shingles was last month. Her vision is fine they did an eye check she had the shingles next to her eye. She has used the Vicodin for headaches and stuff like that.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.**

- **Nausea, breast pain, increased soreness in breast; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.; This study is being requested for a headache.**
Neck pain noted. The location of discomfort is posterior. It radiates to the intrascapular area, left shoulder, and left arm. The pain is characterized as severe. Initial onset was several years ago. He has had neck pain for years and years and has had neck pain for years and years and has pain medication, heat/ice packs.

New onset of headache with visual disturbance, severe nausea; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

None.; This is a request for a brain/head CT.; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Patient has a 4 cm indurated nodule to forehead, superior to bridge of nose. Nodule is increasing in size.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a recent onset (within the last 4 weeks) of neurologic symptoms.

Patient has a 4 cm indurated nodule to forehead, superior to bridge of nose. Nodule is increasing in size.; This is a request for a brain/head CT.; The study is not being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Disapproval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Patient is having cervical spine pain. MVA on 12/25/16, still having neck pain. No imaging done after MVA. Parathesias in right arm and bilateral sciatica.

Disapproval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; PT. has been complaining of neck pain that radiates to LUE with numbness. PT. is no better with steroids, Mobic, Flexeril, or Ultracet.

Disapproval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Trauma or recent injury; NECK PAIN,PAIN WITH MOVEMENT,R/O BULGING DISC,CERVICAL SPINE TENDER,PAIN WITH ROM,TINGLING IN LEGS DECREASED MOBILITY; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

Disapproval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary

This is a request for cervical spine MRI; Trauma or recent injury; patient involved in an MVA, has a concussion and neck pain, MRI brain was negative, still having problems with neck and migraines; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.
<p>| Disapproval | 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST | Radiology Services Denied Not Medically Necessary | This is a request for cervical spine MRI; Trauma or recent injury; presents with a Chief Complaint of Fall (Reports 2 weeks ago fell while in the shower, c/o having mid to low back pain and neck pain since); Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness.; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture. |
| Disapproval | 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST | Radiology Services Denied Not Medically Necessary | This is a request for cervical spine MRI; Trauma or recent injury; Pt. came to the clinic on 12/06/2016 stating that he fell in the shower and hit the back of his neck. At that visit pt. complained of a headache and blurred vision to left eye since the fall. Pt. was then set up for a CT of the head. The results were norm; No, the patient does not have new or changing neurological signs or symptoms. |
| Disapproval | 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST | Radiology Services Denied Not Medically Necessary | This is chronic pain for over two years with extensive weakness in lue and intermittent numbness; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; lue weakness and radiculopathy; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture. |
| Disapproval | 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST | Radiology Services Denied Not Medically Necessary | THIS PATIENT IS A NEW PATIENT TO US THAT PRESENTS TO CLINIC WITH CHRONIC NECK PAIN.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms. |
| Disapproval | 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST | Radiology Services Denied Not Medically Necessary | TO LOOK FOR ABNORMALITIES THAT CANNOT BE SEEN ON REGULAR XRAYS; This study is being ordered for a neurological disorder.; UNKNOWN; There has been treatment or conservative therapy.; PAIN, NUUMBNESS AND TINGLING IN AREAS OF CONCERN AND DOWN ALL EXTREMITIES; CHIROPRACTIC |
| Disapproval | 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST | Radiology Services Denied Not Medically Necessary | unknown.; This study is being ordered for a neurological disorder.; 08/17/2016; There has been treatment or conservative therapy.; Pain radiating with tingling and numbness; Patient has been on prescription medication for pain |
| Disapproval | 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST | Radiology Services Denied Not Medically Necessary | Unknown.; This study is being ordered for trauma or injury.; 3/22/2016; There has been treatment or conservative therapy.; Back and neck pain.; PT, injections, and oral medications. |</p>

**Past Medical History:**
- Patient has completed failed physical therapy. Mid back pain with tingling that radiates down arm. MVA injury.
- There is weakness.
- Patient has completed failed physical therapy. Mid back pain with tingling that radiates down arm. MVA injury.

**History of Present Illness:**
- Back pain;
- Onset: 1 week ago.
- The problem is worsening. It occurs persistently. Location of pain is upper back, middle back and lower back. Pain if;
- This study is being ordered for a neurological disorder.
- 01/24/2017;
- There has been treatment or conservative therapy.
- Physical Exam:
  - Tingling in lower extremities;
  - Generalized weakness in lower extremities; Gait changes, back pain aggravated by daily activities, numbness, tremor, neck pain, muscle weakness; following procedure(s) completed today Anodyne was performed on the Thoracic region(s), CMT 1-2 Spinal Regions, Electrical Stimulation Constant Attendance was applied to the Cervical and Thoracic regions for minute(s); Ice pack was applied to the Thora1

**Findings:**
- Tingling in lower extremities;
- Generalized weakness in lower extremities;
- Gait changes, back pain aggravated by daily activities, numbness, tremor, neck pain, muscle weakness;
- Following procedure(s) completed today Anodyne was performed on the Thoracic region(s), CMT 1-2 Spinal Regions, Electrical Stimulation Constant Attendance was applied to the Cervical and Thoracic regions for minute(s); Ice pack was applied to the Thora1

**Physical Exam:**
- Numbness bilaterally in finger tips, numbness and tingling in right leg, pain in left hip;
- Medication, anti-inflammatory, pt

**Patient:**
- Patient had a pop to the back; This study is being ordered for something other than:
- Known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease;
- 1/14/2017;
- There has been treatment or conservative therapy;
- Headache, pain in neck, shoulders, numbness bilaterally in finger tips, numbness and tingling in right leg, pain in left hip;
- Medication, anti-inflammatory, pt

**MRI requests:**

- Radiology Services Denied Not Medically Necessary

**Patient:**
- Patient has been diagnosed with Notalgia paresthetica, commonly associated with radiculopathy and nerve root compression. We have evaluated her c-spine, and no lesions were seen. Her specialist has recommended she have a thoracic spine MRI;
- This is a request for a thoracic spine MRI;
- Acute or Chronic back pain;
- The patient does have new or changing neurologic signs or symptoms;
- There is no weakness or reflex abnormality;
- The patient does not have new signs or symptoms of bladder or bowel dysfunction;
- The patient does not have a new foot drop;
- There is recent evidence of a thoracic spine fracture.

**Patient:**
- Patient has been to physical therapy with no signs of improvement;
- This is a request for a thoracic spine MRI;
- Acute or Chronic back pain;
- It is not known if the patient does have new or changing neurologic signs or symptoms;
- The patient has had back pain for over 4 weeks;
- The patient has seen the doctor more than once for these symptoms;
- It is not known if the physician has directed conservative treatment for the past 6 weeks.

**Patient:**
- Patient has completed failed physical therapy. Mid back pain with tingling that radiates down arm. MVA injury;
- This is a request for a thoracic spine MRI;
- Trauma or recent injury;
- The patient does have new or changing neurologic signs or symptoms;
- There is weakness;
- Patient has completed failed physical therapy. Mid back pain with tingling that radiates down arm. MVA injury;
- The patient does not have new signs or symptoms of bladder or bowel dysfunction;
- The patient does not have a new foot drop;
- There is recent evidence of a thoracic spine fracture.
