N/A; This study is being ordered for trauma or injury.; 1/3/2016; There has been treatment or conservative therapy.; LOW BACK PAIN, PELVIC PAIN, DECREASED RANGE OF MOTION, MODERATE PAIN WITH MOTION, AND LUMBAR SPINE TENDERNESS, RIGHT HIP TENDERNESS. PAIN RADIATING ON THE RIGHT SIDE ALL THE WAY DOWN TO THE RIGHT FOOT. PELVIS TENDERNESS ALSO.; ANTI INFLAMMATORY, MUSCLE RELAXERS, AND PHYSICAL THERAPY.

Neck pain that has been going on since 11/14/2014 and getting worse; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Neck pain that radiates down arm, middle, and low back pain; This study is being ordered for trauma or injury.; Current pain started two months ago. The event precipitated this pain was a motor-vehicle accident (she was struck from behind, she was the driver.; It is not known if there has been any treatment or conservative therapy.; Additionally, she presents with history of chronic low back pain. the location is primarily in the lower lumbar spine. The pain radiates to the left and right foot. She characterizes it as intermittent, moderate in intensity, aching, and burning. She

None.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; About a year and a half ago.; There has not been any treatment or conservative therapy.; LBP and bilateral pain in hips radiating to LE's. Neurologic deficits, DTR=and bilateral LE.

none; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

none; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.
none; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks. Onset 10 days ago from 2/1/17; problem is worsening. Occurs persistently. Pain is in lower back. Injury occurred when lifting a heavy object. Sx are aggravated by daily activity and there is no relieving factors. Associated sx include decreased mobility; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above osteoporosis; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/2015; There has been treatment or conservative therapy.; lower back pain, shoulder pain, upper back pain; anti-inflammatory, pain meds, Pain down right leg and right foot Throbbing and cramping, Numbness and tingling; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pt says he hurt knee x 3 years ago, problems with ever since, last 2-3 months there is popping in left knee, feels like it’s moving side to side, kneeling is hard- hard to get back up w falling, numbness in knee, knee unstable, tolerated pain but now li; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks.

pt has bilateral knee pain. She states she heard a "popping" sound in her right knee and it has been especially painful for a week now.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; It is not known if the physician has directed conservative treatment for the past 6 weeks.

pt twisted knee while wrestling with her children and has c/o burning and swelling since that is not improved with RICE therapy.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthros copy is not scheduled in the next 4 weeks.

Right knee pain, unable to straight, with hx of ACL repair. Treat with scheduled NSAIDs, muscle relaxer at night, and refer for MRI and to our orthopedic department.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; Cyclobenzaprine HCL 5-10mg Oral TID PRN/#x0D; Diclofenac Sodium 75 mg Oral BID PRN; The patient recevied medication other than joint injections(s) or oral analgesics.

Right knee: She exhibits decreased range of motion. She exhibits no swelling and no effusion. Tenderness found. Medial joint line and lateral joint line tenderness noted. 6 weeks of medication without improvement; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; ; The patient received oral analgesics.

Rt foot pain, swelling, dorsal surface, tripped over jacket falling down steps; This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has NOT had foot pain for over 4 weeks.

This is a request for an abdomen-pelvis CT combination. There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy. There are no new symptoms including hematuria. There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings. There is not a suspicion of an adrenal mass. This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound. Suspicious Mass or Tumor; pain.

This is a request for an abdomen-pelvis CT combination. This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment. This is not a request for initial staging of a known tumor other than prostate. There has been a recent (within the last 3 months) Abdomen and/or Pelvis CT. This would be a repeat of a CT of the abdomen and or pelvis within 6 weeks. This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10. Known Tumor, Cancer, Mass, or Rule out metastases; yes, there is a palpable or observed abdominal mass. Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination. This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment. This is not a request for initial staging of a known tumor other than prostate. There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT. There are no new signs or symptoms including hematuria, presenting with known cancer or tumor. This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10. Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass; see scanned info; Yes this is a request for a Diagnostic CT.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; Chest pain in a longtime smoker, large chest mass, chronic neck pain. This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Thyroid Cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a more than 1 of the following; diagnostic test, imaging study, or biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Head/Neck Cancer.; The patient has Thyroid cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; Unknown if a nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; This study is being requested for Lung Cancer.

Patient was seen in ER and chest xray shows patient has several bilateral lung nodules. Patient also has COPD.; This study is being ordered for a metastastic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being requested for Melanoma.

Enter answer here - or Type In Unknown If No Info Given. &gt;. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2-16-2017; There has not been any treatment or conservative therapy.; chest pain on l side of chest goes to her neck last for a couple of mins moderate to severe and pt has numbness and tingling.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has NOT been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.

Approval 70450 CT BRAIN, HEAD
This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Approval 70450 CT BRAIN, HEAD
This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Approval 70450 CT BRAIN, HEAD
This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.
1. Anaplastic large cell lymphoma, ALK positive, diagnosed 10/15/15 by left groin biopsy. MRI Pelvis at BMC on 10/1/15 revealed pathologically enlarged lymph node in the left groin measuring over 5cm in maximum dimension. There are smaller but slight; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

1. Bladder cancer diagnosed 8/11/14 with biopsy BMC revealing urothelial carcinoma, high-grade. Pathology #514-11697.CARTI CTs on 10/21/16 revealed Stable unremarkable exam with no evidence of recurrent tumor at site of previously resolved right tempora; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

1. Mass of thoracic structure WCMC MRI of thoracic spine on 1/3/17 revealed abnormal soft tissue involving the prevertebral region, posterior mediastinal mass encasing the descending thoracic aorta from approximately T6-T10 levels. Findings are susp; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

1. Primary mediastinal diffuse large B-cell lymphoma diagnosed 7/14/14 by mediastinal mass biopsy after having had abnormal CXR. History of pain secondary to malignancy. Left arm deep venous thrombosis diagnosed 3/23/15 at BMC.; Completed Xarelto, taki; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

1. Invasive ductal carcinoma of the right central breast, diagnosed 5/2016. Postmenopausal s/p TAH/BSO.; Completed Xarelto, taki; Postmenopausal, s/p TAH-BSO in the early 1990s. She has been on Premarin for hot flashes and mood swings for the past 8+ years. She is still taki; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.
Abnormal labs, elevated platelets and elevated CRP. Outside labs:
Plts 340 on 9/1/16; Plts 401 and CRP 78.9 on 11/2/16.
Current status 2/16/17: Normal Plt count today.

Abnormal labs, elevated platelets and elevated CRP.

CARTI lab:
Plts 328 on 2/16/17.

Current status 2/16/17: Normal Plt count today.

2. Anemia;

Hgb 12.7 and Hct 38.2 with MCV;

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

Abnormal labs, elevated platelets and elevated CRP.

CARTI lab:
Plts 328 on 2/16/17.

Current status 2/16/17: Normal Plt count today.

Anemia;

Hgb 12.7 and Hct 38.2 with MCV;

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

Abnormal labs, elevated platelets and elevated CRP.

CARTI lab:
Plts 328 on 2/16/17.

Current status 2/16/17: Normal Plt count today.

2. Anemia;

Hgb 12.7 and Hct 38.2 with MCV;

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

Abnormal labs, elevated platelets and elevated CRP.

CARTI lab:
Plts 328 on 2/16/17.

Current status 2/16/17: Normal Plt count today.

2. Anemia;

Hgb 12.7 and Hct 38.2 with MCV;

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.
Faxing clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Faxing clinicals; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

follow up after chemo therapy.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Newly diagnosed Colon/liver/lung cancer//pt has acute chest pain and abd pain//initial staging for chemotherapy; Metastatic colon cancer; Mucinous adenocarcinoma of GI tract diagnosed September, 2016; Presacral biopsy at MAYO on 8/10/16 reveals; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Pain 7 out of 10, L leg aching and goes into his hip and lower back, not sleeping, could be his medication causing his headaches.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Patient is experiencing the same headaches as before, when he had a cranial bleed.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.".; This study is being requested for a headache.

Patient reports recent fall, passing out, nausea and vomiting. Patient does have history of tonsil cancer.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.".; This study is being requested for a headache.
Patient with known RCC. CTs to evaluate disease status.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

PLAN:
1. Followup bone marrow aspiration and biopsy as indicated.
2. Continue current home medications:
   - Paxil 5 mg daily
   - Nexium 40 mg daily
   - Estradiol 0.05 mg/24 hour patch
   - Lorazepam prn
   - Ondansetron prn
   - B12 1000 mcg sq every other we

This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Required by the ordering doctor for the comparison to the last scans to check for reoccurrence.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer.; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.

Re-staging Follicular lymphoma, grade 2 of 3 by axillary lymph node biopsy 6/3/08 per Dr. Osam after presenting for evaluation after CT scan was obtained to rule out renal calculi in patient with hematuria which revealed left supraclavicular node and an ; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Restaging for Lymphoma; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Restaging of Cancer; It is unknown if imaging studies have been performed on the member in the past 3 months.
Restaging Hodgkin’s lymphoma, presenting as adenopathy. ACC PET/CT on 1/4/16 reveals stable examination with no evidence of metabolically active recurrent lymphoma. Stable inactive partially calcified thyroid nodules, which likely represent benign adenom; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Approval 70450 CT BRAIN, HEAD

Restaging. 1. Non-Hodgkins lymphoma, follicular grade I, diagnosed 1/26/07 from positive biopsy of mediastinal lymphadenopathy at BMC; Discussed diagnosis, treatment options and prognosis of follicular lymphoma at length with Mr. Turner; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Approval 70450 CT BRAIN, HEAD

Scans requested to assess response to therapy.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. SURVEILLANCE FOR MELANOMA; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for evaluation of known tumor.

Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.

Approval 70450 CT BRAIN, HEAD

This study is being requested for a headache.; There is headache not improved by pain medications.; ”There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.”;

Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; There is not a suspected or known brain tumor.; The patient currently has cancer.; There is no recurrence or metastasis.; ”The patient has had a recent course of chemotherapy, radiation therapy, or been treated surgically within the last two years.”; There are not new or changing lymph nodes.; This study is being requested for known or suspected brain tumor, mass or cancer.

Approval 70450 CT BRAIN, HEAD

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval  70450 CT BRAIN, HEAD  2

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval  70450 CT BRAIN, HEAD  4

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval  70450 CT BRAIN, HEAD  3

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Approval  70450 CT BRAIN, HEAD  7

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval  70450 CT BRAIN, HEAD  49

Ultrasound guided ParacentesisCARTI Abd U/S 1/9/17.; Moderate ascites. This ascites would certainly be amenable to percutaneous access and drainage.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval  70450 CT BRAIN, HEAD  1
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT

This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

1. Anaplastic large cell lymphoma, ALK positive, diagnosed 10/15/15 by left groin biopsy. &x0D; &x0D; MRI Pelvis at BMC on 10/1/15 revealed pathologically enlarged lymph node in the left groin measuring over 5cm in maximum dimension. There are smaller but slight; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

1. Primary mediastinal diffuse large B-cell lymphoma diagnosed 7/14/14 by mediastinal mass biopsy after having had abnormal CXR. History of pain secondary to malignancy. &x0D; &x0D; Left arm deep venous thrombosis diagnosed 3/23/15 at BMC. &x0D; &x0D; Completed Xarelto, taki; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.
Abnormal EKG, swelling of neck after injury; This study is being ordered for trauma or injury.; 11/29/2016; There has not been any treatment or conservative therapy.; Swelling of neck

Abnormal labs, elevated platelets and elevated CRP. Outside labs: Plts 340 on 9/1/16; Plts 401 and CRP 78.9 on 11/2/16; CARTI lab: Plts 328 on 2/16/17; Current status 2/16/17: Normal Plt count today. 2. Anemia; Hgb 12.7 and Hct 38.2 with MCV; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; IMPRESSION: 1. Abnormal labs, elevated platelets and elevated CRP. Outside labs: Plts 340 on 9/1/16; Plts 401 and CRP 78.9 on 11/2/16; CARTI lab: Plts 328 on 2/16/17; Current status 2/16/17: Normal Plt count today. 2. Anemia; Hgb 12.7 and; There has been treatment or conservative therapy.; ECOG Performance Status; 1 Symptoms, but ambulatory. Restricted in physically strenuous activity, but ambulatory and able to carry out work of a light or sedentary nature (e.g., light housework, office work). (Date: 02/16/2017) he has not had a temperature; HPI: He presents to clinic for evaluation and treatment of elevated platelets and elevated CRP. He has history of Rocky Mountain spotted fever in August of 2016. Other medical history includes hypertension.

Assessment & Plan: 1. Follicular lymphoma, grade 2 presenting as lymphadenopathy with symptoms of night sweats. Splenomegaly present. He presented to Dr. Pittman for lower abdomen pain that he had had for a long time, over the last few w; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

CARTI CT 6/23/16 reveals normal head CT without contrast. Bilateral mastectomies with decrease in size of a left lateral subpectoral mass now measuring 3.5 cm compared to 6.0 x 5.3 cm on 3/16/16. Enlarging fluid filled abnormality involving the left later; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

hx Hodgkin’s lymphoma; 3 mo f/u appt; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.
patient with known history of Diffuse Large B Cell lymphoma. Has small posterior cervical nodes and mass on left thigh that need further investigation.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.  

Patient with known RCC. CTs to evaluate disease status.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.  

PLAN

1. Follow up bone marrow aspiration and biopsy as indicated.
2. Continue current home medications:
   - Paxil 5 mg daily
   - Nexium 40 mg daily
   - Estradiol 0.05 mg/24 hour patch
   - Lorazepam prn
   - Ondansetron prn
   - B12 1000 mcg sq every other week

Restaging Follicular lymphoma, grade 2 of 3 by axillary lymph node biopsy 6/3/08 per Dr. Osam after presenting for evaluation after CT scan was obtained to rule out renal calculi in patient with hematuria which revealed left supraclavicular node and an ; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.  

Re-staging Follicular lymphoma, grade 2 of 3 by axillary lymph node biopsy 6/3/08 per Dr. Osam after presenting for evaluation after CT scan was obtained to rule out renal calculi in patient with hematuria which revealed left supraclavicular node and an ; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.  

Restaging Hodgkin’s lymphoma, presenting as adenopathy. ACC PET/CT on 1/4/16 reveals stable examination with no evidence of metabolically active recurrent lymphoma. Stable inactive partially calcified thyroid nodules, which likely represent benign adenom; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.  

Restaging for Lymphoma; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.  

Restaging Hodgkin’s lymphoma, presenting as adenopathy. ACC PET/CT on 1/4/16 reveals stable examination with no evidence of metabolically active recurrent lymphoma. Stable inactive partially calcified thyroid nodules, which likely represent benign adenom; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.  

Restaging, 1. Non-Hodgkins lymphoma, follicular grade I, diagnosed 1/26/07 from positive biopsy of mediastinal lymphadenopathy at BMC. Discuss diagnosis, treatment options and prognosis of follicular lymphoma at length with Mr. Turner.; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.  

Right neck swelling with pain.; This study is being ordered for Inflammatory/ Infectious Disease.; 03/13/2017; There has not been any treatment or conservative therapy.; New supra clavical adenopathy right.
Approval 70490 CT NECK SOFT TISSUES, LARYNX, THYROID ETC. NO CONTRAST

Scans requested for upcoming followup visit to see if disease has progressed. This study is being ordered for a metastatic disease. There are 3 exams being ordered. One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Strong indication of possible CLL, CT for staging workup of possible CLL. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. 12/2016; There has not been any treatment or conservative therapy. Leukocytosis and lymphocytosis

SURVEILLANCE FOR MELANOMA; This study is being ordered for a metastatic disease. There are 4 exams being ordered.

This is a request for neck soft tissue CT. The study is being ordered for Follow Up. The patient has a known tumor or metastasis in the neck. The patient completed a course of chemotherapy or radiation therapy within the past 90 days.

This is a request for neck soft tissue CT. The study is being ordered for Follow Up. The patient has a known tumor or metastasis in the neck. The patient completed a course of chemotherapy or radiation therapy within the past 90 days. Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT. There has been recent trauma or other injury to the neck. Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT. There has not been recent trauma or other injury to the neck. There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.

This is a request for neck soft tissue CT. There has not been recent trauma or other injury to the neck. There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass. Yes this is a request for a Diagnostic CT

This study is being ordered for a metastatic disease. There are 2 exams being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. The diagnosis of cancer or tumor has been established. Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease. There are 2 exams being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. The diagnosis of cancer or tumor has been established. Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.
Ultrasound guided Paracentesis
CARTI Abd U/S 1/9/17; Moderate ascites. This ascites would certainly be amenable to percutaneous access and drainage.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; unknown

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; unknown

This examination is NOT being requested to evaluate lymphadenopathy or mass.; It is unknown if there is a suspicion of a bone infection (osteomyelitis).; There is a suspicion of an orbit or face neoplasm, tumor, or metastasis.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.

There is not a suspicion of an infection or abscess.; This examination is being requested to evaluate lymphadenopathy or mass.; This is a request for a Face MRI.; There is not a history of orbit or face trauma or injury.
This is a request for a sinus MRI.; This study is not being ordered in conjunction with a head or brain CT or MRI.; "There is evidence of tumor from a physical exam, plain sinus film, or previous CT or MRI study."

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

UNKNOWN; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Follow up scans for further treatment recommendations.; This study is being ordered for Vascular Disease.; Approximately 08/2016.; There has been treatment or conservative therapy.; Fairly asymptomatic at the moment.; Coumadin Therapy.

There is an immediate family history of aneurysm.; This is a request for a Brain MRA.

There is not an immediate family history of aneurysm.; The patient has a known aneurysm.; This is a request for a Brain MRA.
Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; It is unknown why this study is being ordered.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is a new and sudden onset of headache (less than 1 week) not improved by pain medications.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).
Approval

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; It is not known if there is a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation).

Approval

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell's Palsy.

Approval

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

Approval

63 yr old man with a history of nonobstructive CAD, seizure disorder, abdominal aortic aneurism (4.7mm on surveillance), nephrolithiasis, and small cell lung cancer. Completing chemo on 3/24/2017.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Attaching records; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Faxing clinicals; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Faxing records.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

FOLLOW UP IN MEMBER WITH NEWLY FOUND MASS OF TEMPOROPARIETAL REGION OF THE BRAIN. PREVIOUS MRI DONE WAS OF POOR QUALITY DUE TO HER HAVING BRACES. SHE HAS HAD HER BRACES REMOVED. MRI RECOMMENDED FOR CONTINUED TREATMENT EVALUATION OF THE MASS; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Follow up scans for further treatment recommendations.; This study is being ordered for Vascular Disease.; Approximately 08/2016.; There has been treatment or conservative therapy.; Fairly asymptomatic at the moment.; Coumadin Therapy
Henry returns for red tender spots under left arm. He developed an erythematous rash just beneath his left axilla about 2 weeks ago. He has been applying hydrocortisone as it was pruritic, but this is now improved. It does remain slightly tender to touch; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Initial lung cancer staging.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Initial staging for breast cancer diagnosis.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

INITIAL STAGING FOR NEWLY DIAGNOSED BREAST CANCER.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Initial Staging for non-small cell lung cancer just recently diagnosed with pathology report.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Initial staging workup for cancer. Also complaining of headaches. Ruling out brain mets.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Initial staging workup with Brain imaging. CT Chest to get clearer picture of anatomy. MRI Abdomen to evaluate elevated liver enzymes and rule out metastatic disease.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

KNOWN LUNG CANCER. LOOKING FOR METASTATIC DISEASE.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Michael returns today for follow-up with lab. He has completed 15 fractions of Whole Brain Radiation for PCI as of 12/07/2016. Restaging scans of PET and CT c/a/p results from early January were with possible infection in the RUL and no evidence of new d; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

newly diagnosed Breast Cancer, Stage IIIC. MRI Brain to complete staging workup and rule out brain mets.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Overall stable disease, only the RLE intramuscular lesions (right medial tight), has increased in intensity. Plan to continue surveillance; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient continues to lose weight although she says she is doing well overall. Scans requested for restaging purposes.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Patient had CT scan that showed right lung mass; This study is being ordered for a metastatic disease.; There are 3 exams being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient has lost excessive weight, hemoptysis, adult-onset diabetes mellitus, shortness of breath and fatigue.; This study is being ordered for a metastatic disease.; There are 3 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Patient has lung mass/cancer.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient started to have hands and feet neuropathy from around one and half years prior to the lymphoma diagnosis with symptoms of numbness, tingling and painful sensation. The neuropathy has been getting so bad to interfere his daily life. Neuropathy was.; This study is being ordered for a metastatic disease.; There are 4 exams being ordered.

Patient with known Stage IV lung cancer complaining of headaches, dizziness, and memory loss. MRI to rule out cancer progression.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Plan: carboplatin and paclitaxel cycle 2 TODAY; -restaging scans; if he had good response we could consider RFA or SBRT; Konstantinos Arnaoutakis, MD; This study is being ordered for a metastatic disease.; There are 3 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.
Progression of disease, needs re-evaluation to productively come up with a stronger solution to the regimen.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Pt has had a PET with changes and we need to evaluate possible mets of breast cancer; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Pt is having neurological issues; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; SEE CLINICALS; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

SMALL CELL CA OF THE LEFT LUNG. STATUS POST CHEMO WITH RADIATION THERAPY IN 2011. NOW WE ARE 6YRS OUT FROM HER PRIMARY TREATMENT AND THE RIGHT LUNG HAS DEVELOPED A MASS WHICH WAS BIOPSIED AND CONTAINS SMALL CELL CA. DR WANTING SCANS.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Small cell lung cancer -with brain mets-see progression; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.

Small cell lung cancer with paraneoplastic cerebellar ataxia. Radiation completed on 2/6/2017 and concurrent chemo completed on 2/10/2017.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Stage iv breast ca: pt currently taking ixempar and xeloda. dr wanting scans to assess response to tx.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there are recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient’s life (within the last 3 months).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

Approval 71250 CT CHEST, THORAX

; This study is being ordered for Vascular Disease.; 2014; There has been treatment or conservative therapy.; FOLLOW UP; Lovenox\x0D; Xarelto\x0D; ASA
Michael is a middle-aged male with PMH significant for Wegener’s granulomatosis and venous thrombosis of his RLE. He was initially diagnosed with a RLE DVT in 2015 (approximate). He took Coumadin for 6 months with resolution of DVT. He had a recurrent RLE.

1. Anaplastic large cell lymphoma, ALK positive, diagnosed 10/15/15 by left groin biopsy. MRI Pelvis at BMC on 10/1/15 revealed pathologically enlarged lymph node in the left groin measuring over 5cm in maximum dimension. There are smaller but slight; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

1. Bladder cancer diagnosed 8/11/14 with biopsy BMC revealing urothelial carcinoma, high-grade. Pathology #514-11697.CARTI CTs on 10/21/16 revealed Stable unremarkable exam with no evidence of recurrent tumor at site of previously resolved right tempora; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

1. Mass of thoracic structure; WCMC MRI of thoracic spine on 1/3/17 revealed abnormal soft tissue involving the prevertebral region, posterior mediastinal mass encasing the descending thoracic aorta from approximately T6-T10 levels. Findings are susp; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

1. Primary mediastinal diffuse large B-cell lymphoma diagnosed 7/14/14 by mediastinal mass biopsy after having had abnormal CXR.History of pain secondary to malignancy. ; Left arm deep venous thrombosis diagnosed 3/23/15 at BMC. Completed Xarelto, taki; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

1. Invasive ductal carcinoma of the right central breast, diagnosed 5/2016. Postmenopausal s/p TAH/BSO. Completed Xarelto, taki; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.
12/13/16: Mr. Joye presents for follow-up. He went to MD Anderson for evaluation and they felt he needed to proceed with further therapy so we are going to continue with his therapy for two more cycles and rescan him. 11/14/16 only a X-ray of the chest was; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

12/19/16: Maria is seen today in chemo room. A family member interprets for me today. She reports that Maria complains of a cough that persist. Benzoanate pearls provide some improvement. At night, she takes her pain pills and they provide some improvement; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

2/9/2017: Rosa Mendoza is here today for ongoing evaluation and management of her metastatic adenocarcinoma. Mrs. Mendoza is a very pleasant Hispanic female who presented to NWMC in Jan 2014 with a new seizure. Routine imaging revealed a 2cm mass. Staging; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

3 month follow up scans to evaluate disease.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Faxing clinicals; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Follow up scans to evaluate disease after completion of radiation and chemotherapy, 11/2016.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease and evaluate response to current treatment.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease and further treatment recommendations.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease response to treatment.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up screening; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
An approval for CT Chest, Thorax is being considered for the following reasons:

1. Follow up to test done in Nov; This study is being ordered for a metastatic disease.
   - There are 2 exams being ordered.
   - One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
   - The ordering physician is a hematologist/oncologist.
   - The diagnosis of cancer or tumor has been established.
   - Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

2. Has cancer - checking for other lesions; A Chest/Thorax CT is being ordered.
   - This study is being ordered for none of the above.
   - This study is being ordered for non of the above.
   - Yes this is a request for a Diagnostic CT.

3. His nivolumab was held until 11/2/2016 when it was restarted. He again developed respiratory symptoms. CT on 12/7/2017 showed persistent right upper lobe soft tissue density and fibro aplectatic changes connected to the right hila. Interval development of; This study is being ordered for a metastatic disease.
   - There are 2 exams are being ordered.
   - One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
   - The ordering physician is a hematologist/oncologist.
   - The diagnosis of cancer or tumor has been established.
   - Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

4. Hx Hodgkin's lymphoma; 3 mo f/u appt; This study is being ordered for a metastatic disease.
   - There are 2 exams are being ordered.
   - One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
   - The ordering physician is a hematologist/oncologist.
   - The diagnosis of cancer or tumor has been established.
   - Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

5. I am scheduling CAT scans to be done on that day to further evaluate recurrent pain.
   - This study is being ordered for a metastatic disease.
   - There are 2 exams are being ordered.
   - One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
   - The ordering physician is a hematologist/oncologist.
   - The diagnosis of cancer or tumor has been established.
   - Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

   - This study is being ordered for a metastatic disease.
   - There are 4 exams are being ordered.

7. Initial staging workup with Brain imaging. CT Chest to get clearer picture of anatomy.
   - MRI Abdomen to evaluate elevated liver enzymes and rule out metastatic disease.
   - This study is being ordered for a metastatic disease.
   - There are 3 exams are being ordered.
   - One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
   - The ordering physician is a hematologist/oncologist.
   - The diagnosis of cancer or tumor has been established.
   - Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.
Last scans showed the regimen prior to was not covering all the different areas and some uptake is registering in areas of the patients body.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Left chest pain, increased pain in left rib; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Lung ca suspected; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

Ms. Garvin presented for her first visit on 3/1/17 at the age of 38, date of birth 6/10/78. She was referred by Dr. Rogers with a recently diagnosed colorectal carcinoma. She had undergone a screening colonoscopy on 1/9/17 by Dr. Jacob Joseph that showed ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

N/A; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

N/A; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

New metastasis disease showing on prior CT, a new pulmonary mass.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Newly diagnosed Colon/liver/lung cancer//pt has acute chest pain and abd pain//initial staging for chemotherapy.

1. Metastatic colon cancer;
Mucinous adenocarcinoma of GI tract diagnosed September, 2016;
Presacral biopsy at MAYO on 8/10/16 reveals; This study is being ordered for a metastatic disease.
There are 3 exams being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI;
The ordering physician is a hematologist/oncologist;
The diagnosis of cancer or tumor has been established;
Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Approval 71250 CT CHEST, THORAX

newly diagnosed stage IA pure seminoma. CTs to follow up scans.

1. This study is being ordered for a metastatic disease;
There are 2 exams being ordered;
One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI;
The ordering physician is a hematologist/oncologist;
The diagnosis of cancer or tumor has not been established;
Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.

Approval 71250 CT CHEST, THORAX

none; This study is being ordered for a metastatic disease;
There are 2 exams being ordered;
One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI;
The ordering physician is a hematologist/oncologist;
The diagnosis of cancer or tumor has been established;
Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Approval 71250 CT CHEST, THORAX

Patient complained of being fatigued, weak with low energy and shortness of breath.
Patient has also had some constipation;
This study is being ordered for a metastatic disease;
There are 2 exams are being ordered;
One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Approval 71250 CT CHEST, THORAX

Patient complains of feet pain. Patient continues to have vaginal bleeding. She has numbness and tingling in her fingers and toes;
This study is being ordered for a metastatic disease;
There are 2 exams are being ordered;
One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Approval 71250 CT CHEST, THORAX

Patient has decreased breath sounds. Also from last scan in January 2017 There has been interval progressive disease in the pleura mets, pericardial mets, bone metastasis and also the soft tissue mass in the posterior left hemithorax.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient has lost excessive weight, hemoptysis, adult-onset diabetes mellitus, shortness of breath and fatigue.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Patient is complaining of chest and back pain.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

Patient is in clinical research.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Patient is on a research program and the Pet done in Nov. showed hypermetabolic uptake within the sclerotic left femoral neck osseous lesion compatible with metastatic disease.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Patient was having left side weakness in arm and they did MRI’s of Thoracic spine and Cervical Spine and EKG was borderline. There is mixed responses to the patients cancers on the regimen that was first started.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.
Patient with known history of Hodgkin Lymphoma with known paratracheal node that is being followed. Most recent CT Chest was 10/2016.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Patient with known RCC. CTs to evaluate disease status.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

PET SCAN; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

PLAN
  
  1. Followup bone marrow aspiration and biopsy as indicated.
  2. Continue current home medications
  -Paxil 5 mg daily
  -Nexium 40 mg daily
  -Estradiol 0.05 mg/24 hour patch
  -Lorazepam prn
  -Ondansetron prn
  -B12 1000 mcg sq every other we; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Plan; carboplatin and paclitaxel cycle 2 TODAY; -restaging scans; if he had good response we could consider RFA or SBRT; Konstantinos Arnaoutakis, MD; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Pt has had a PET with changes and we need to evaluate possible mets of breast cancer; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Pt has recently undergone surgery for Breast Cancer and had one positive lymph node. Pt needs scans to evaluate for further disease prior to starting treatment.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.
Pt is under treatment/evaluate response; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

pt. is a former smoker; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient does NOT have a 30 pack per year history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

R/O lung cancer; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; It is unknown if the patient has a 30 pack per year history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

Required by the ordering doctor for the comparison to the last scans to check for reoccurrence.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.

restage corpus uteri and endometrial carcinoma after completion of chemotherapy on 2/2017; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

restage fallopian tube cancer with rising ca-125 tumor marker; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

restage lung cancer after completion of chemotherapy regimen; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

restage lung cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Re-staging Follicular lymphoma, grade 2 of 3 by axillary lymph node biopsy 6/3/08 per Dr. Osam after presenting for evaluation after CT scan was obtained to rule out renal calculi in patient with hematuria which revealed left supraclavicular node and an; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Restaging and checking the response to treatments.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

RESTAGING BREAST AND THYROID.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Restaging for Lymphoma; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Re-staging; 1. Transverse Colon Cancer; She initially presented to ED at SVI for abdominal pain and was admitted. She was taken to surgery for transverse colectomy, mobilization of splenic flexure, lymph node dissection, omentectomy and repair of inca; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; It is unknown if imaging studies have been performed on the member in the past 3 months.

Restaging; Hodgkin’s lymphoma, presenting as adenopathy.ACC PET/CT on 1/4/16 reveals stable examination with no evidence of metabolically active recurrent lymphoma. Stable inactive partially calcified thyroid nodules, which likely represent benign adenom; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Restaging, 1. Non-Hodgkins lymphoma, follicular grade I, diagnosed 1/26/07 from positive biopsy of mediastinal lymphadenopathy at BMC.; Discussed diagnosis, treatment options and prognosis of follicular lymphoma at length with Mr. Turner.; Initiate; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Right neck swelling with pain.; This study is being ordered for Inflammatory/Infectious Disease.; 03/13/2017; There has not been any treatment or conservative therapy.; New supra clavical adenopathy right

Scans are requested for continued monitoring and management of her breast cancer and to evaluate her response to treatment.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Scans requested for upcoming followup visit to see if disease has progressed.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Scans requested to assess response to therapy.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Scans requested to continue to monitor his colon cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Scans to establish new baseline after break from chemotherapy.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

See attached; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

See CLINICALS; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

See CLINICALS; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

She also had CT c/a/p done on 2/2/17 for restaging, showed stable to treatment; response in the chest. However, there are bony destruction of the T2 and T3 vertebral bodies which can indicate worsening disease. She is asymptomatic and will start Xgeva to; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.
Small cell lung cancer with paraneoplastic cerebellar ataxia. Radiation completed on 2/6/2017 and concurrent chemo completed on 2/10/2017.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Stage IV infiltrating ductal breast carcinoma, ER+, right; Pt had ct done without contrast during an recent ER visit; Physician requires a study w contrast for comparison to restage patients cancer during treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Strong indication of possible CLL, CT for staging workup of possible CLL.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/2016; There has not been any treatment or conservative therapy.; Leukocytosis and lymphocytosis

Surgery, History of Testicular type number 3C, Abnormal Lympho Nodes; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

SURVEILLANCE FOR MELANOMA; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered. 

swollen lymphnodes; fever unknown origin; elevated lab levels; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
THE PROVIDER IS WANTING TO KNOW ABOUT THE CURRENT STATUS OF THE PTS CANCER AND TO SEE IF THE TREATMENTS ARE WORKING. This study is being ordered for a metastatic disease. There are 2 exams being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. The diagnosis of cancer or tumor has been established. Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

the pt has a history of breast cancer and this is for restaging of that cancer and to see if the current treatments are working. A Chest/Thorax CT is being ordered. This study is being ordered for screening of lung cancer. The patient is between 55 and 80 years old. This patient is NOT a smoker nor do they have a history of smoking. The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months. Yes this is a request for a Diagnostic CT

the pt has recently been diagnosed with rectal cancer and this is for staging of that cancer and to check current treatment options. There is no radiologic evidence of asbestosis. "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed. A Chest/Thorax CT is being ordered. This study is being ordered for known or suspected inflammatory disease or pneumonia. Yes this is a request for a Diagnostic CT

There is no radiologic evidence of non-resolving pneumonia. "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is radiologic evidence of a lung abscess or empyema; A Chest/Thorax CT is being ordered. This study is being ordered for known or suspected inflammatory disease or pneumonia. Yes this is a request for a Diagnostic CT

There is no radiologic evidence of non-resolving pneumonia. There is no radiologic evidence of asbestosis. Pt has consistent cough, chest discomfort, headache, blurred vision. Dr. wants to rule out pneumonia or other infections. "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis. A Chest/Thorax CT is being ordered. This study is being ordered for known or suspected inflammatory disease or pneumonia. Yes this is a request for a Diagnostic CT
There were changes in the regimen the patient has undergone, trying to evaluate the response to therapy.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

This patient has had recent onset for worsening abdominal pain, nausea and vomiting. He is currently being treated and I suspect progressive tumor or possible obstruction. Joseph Beck MD; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease. There are 2 exams are being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. The diagnosis of cancer or tumor has been established. Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease. There are 2 exams are being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease. There are 3 exams are being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. The diagnosis of cancer or tumor has been established. Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease. There are 3 exams are being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease. There are 3 exams are being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. The diagnosis of cancer or tumor has been established. Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease. There are 3 exams are being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease. There are 3 exams are being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. The diagnosis of cancer or tumor has been established. Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease. There are 3 exams are being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.
Ultrasound guided Paracentesis

CARTI Abd U/S 1/9/17: Moderate ascites. This ascites would certainly be amenable to percutaneous access and drainage.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncolologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Approval 71250 CT CHEST, THORAX

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unk; It is not known if there has been any treatment or conservative therapy.; rt. chest pain, fatigue, shortness of breath, Chemo; CT Scans-(June 2016) no evidence of Metastases disease, enlarged prostate.

Approval 71250 CT CHEST, THORAX

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Approval 71250 CT CHEST, THORAX

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncolologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Approval 71250 CT CHEST, THORAX

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncolologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.

Approval 71250 CT CHEST, THORAX

unknown; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncolologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.

Approval 71250 CT CHEST, THORAX

Upon last office visit patient states that she has occasional dizziness and spotting.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
We are going to schedule a followup CT scan of chest and abdomen to further evaluate the lesion seen on the study of 01/10/2017 in about 3-1/2 weeks and I will see him again after those results are available.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has not been established.; It is unknown if other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

We are scheduling CAT scans in a month to evaluate the disease status.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has not been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Ms. Fields is a middle aged female who presented with RLE DVT on 4/3/11. Her hypercoagulable work up showed PROTEIN C DEFICIENCY (13%), PROTEIN S DEFICIENCY (42%)-FALSE POSITIVE with HIGH tumor markers (CEA 6.6 and CA 19-9 86.2); This study is being ordered for Vascular Disease.; 04/2011; There has been treatment or conservative therapy.; Carcinoembryonic antigen present (finding) ( Date of Dx:04/24/2012 )&amp;#x0D; Deep venous thrombosis (disorder) ( Date of Dx:02/2012 )&amp;#x0D; Iron deficiency anemia&amp;#x0D; Protein C deficiency disease (disorder) ( Date of Dx:04/2011, Protein C&amp;amp;S deficiencies; )&amp;#x0D; Pulmonary em; Lovenox&amp;#x0D; Coumadin&amp;#x0D; Arixtra&amp;#x0D; Xarelto

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has not been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has not been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.
| Approval | 71275 CT ANGIOGRAPHY CHEST W/CONTRA | This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring. |
| Approval | 71275 CT ANGIOGRAPHY CHEST W/CONTRA | This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are signs or symptoms indicative of vascular insufficiency to the neck or arms.; Yes, this is a request for a Chest CT Angiography. |
| Approval | 71275 CT ANGIOGRAPHY CHEST W/CONTRA | This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography. |
| Approval | 71550 MRI CHEST | This study is being ordered for a metastatic disease.; There are 4 exams are being ordered. |
| Approval | 71550 MRI CHEST | This study is being ordered for a known tumor.; The ordering physician is an oncologist, surgeon, pulmonologist, or cardiologist.; This study is being ordered for staging.; This is a request for a chest MRI. |
| Approval | 71550 MRI CHEST | This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months. |
| Approval | 71550 MRI CHEST | This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months. |
| Approval | 71550 MRI CHEST | This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months. |
Approval 71550 MRI CHEST

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

This is a newly diagnosed patient with ovarian and endometrial cancer. There is pathologic fracture the doctor is concerned with and needs these scans for verification.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Approval 72131 CT LUMBAR SPINE, LOW BACK

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 72131 CT LUMBAR SPINE, LOW BACK

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.
72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

Approval

Enter answer here - or Type In Unknown If No Info Given.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; pain; radiation; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Approval

This study is being ordered for a neurological disorder.; ; There has not been any treatment or conservative therapy.;

Approval

FOLLOW UP IN MEMBER WITH NEWLY FOUND MASS OF TEMPOROPARIETAL REGION OF THE BRAIN. PREVIOUS MRI DONE WAS OF POOR QUALITY DUE TO HER HAVING BRACES. SHE HAS HAD HER BRACES REMOVED. MRI RECOMMENDED FOR CONTINUED TREATMENT EVALUATION OF THE MASS; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Approval

Patient started to have hands and feet neuropathy from around one and half years prior to the lymphoma diagnosis with symptoms of numbness, tingling and painful sensation. The neuropathy has been getting so bad to interfere his daily life.

Approval

Neuropathy was ; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Approval

pt has cervical cancer and is experiencing radiating back pain from her lower back.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Approval

The patient is presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; Known Tumor with or without metastasis

Approval

This is a request for cervical spine MRI; It is not known if there is evidence or tumor or metastasis on bone scan or x-ray.; Suspected Tumor with or without Metastasis; &lt;Enter Additional Clinical Information&gt;

Approval

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.; yes, there are documented clinical findings of Multiple sclerosis.

Approval

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;; There has been treatment or conservative therapy.; pain; radiation
72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST

Approval

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is recent evidence of a thoracic spine fracture.

1

72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST

Approval

This study is being ordered for a neurological disorder.; There has not been any treatment or conservative therapy.;

1

72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST

Approval

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

FOLLOW UP IN MEMBER WITH NEWLY FOUND MASS OF TEMPOROPARIETAL REGION OF THE BRAIN. PREVIOUS MRI DONE WAS OF POOR QUALITY DUE TO HER HAVING BRACES. SHE HAS HAD HER BRACES REMOVED. MRI RECOMMENDED FOR CONTINUED TREATMENT EVALUATION OF THE MASS; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

1
Known Prostate cancer with bone mets. Complaining of back pain. Recent bone scan showed multiple osseous metastases. A few new or enlarging lesions are identified (T11, S1, R proximal femur, and L femoral head). MRIs to further evaluate.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months. Patient started to have hands and feet neuropathy from around one and half years prior to the lymphoma diagnosis with symptoms of numbness, tingling and painful sensation. The neuropathy has been getting so bad to interfere his daily life. Neuropathy was.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.  

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.  

The patient does not have any neurological deficits.; It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; &lt;Enter Additional Clinical Information&gt;  

The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.  

This is a request for a thoracic spine MRI.; There is evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis.
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.
This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.".; The study is being ordered due to known tumor with or without metastasis.

The study is being ordered due to known tumor with or without metastasis.

This study is being ordered for staging.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.".; The study is being ordered due to known tumor with or without metastasis.

This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

c/o of pain under left rib, surgery was performed before. Pt has had chemo for cancer, feels numbness and tingling.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;; There has been treatment or conservative therapy.;; pain; radiation pain.;; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.;; The patient has none of the above.

This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

c/o of pain under left rib, surgery was performed before. Pt has had chemo for cancer, feels numbness and tingling.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;; Office visit when he c/o of the problem was 2/28/17; It is not known if there has been any treatment or conservative therapy.;; pain and numbness and tingling radiating to his thigh.

Evaluation of progressive weakness in legs. Previously diagnosed metastatic spinal lesion and cord compression seen on MRI thoracic and lumbar spine done on with and without contrast 10/25/2016.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

MRIs to further evaluate.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months. 

Patient started to have hands and feet neuropathy from around one and half years prior to the lymphoma diagnosis with symptoms of numbness, tingling and painful sensation. The neuropathy has been getting so bad to interfere his daily life. 

Neuropathy was; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered. 

patient with history of testicular teratoma complaining of increasing back pain at site of known paraspinal fluid. MRI to evaluate and see if it needs to be drained.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above 

pt has cervical cancer and is experiencing radiating back pain from her lower back.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. 

The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for Known or suspected infection or abscess 

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Known or suspected tumor with or without metastasis 

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection 

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine 

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)
Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI.; This study is being ordered for staging.; Known Tumor with or without metastasis; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.
This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Enter answer here - or Type In Unknown If No Info Given. &gt; The patient is undergoing active treatment for cancer.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This study is not being ordered for initial staging.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT
This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

; This is a request for a Pelvis MRI.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; An abnormality was found in something other than the bladder, uterus or ovary.; The study is being ordered for suspicion of tumor, mass, neoplasm, or metastatic disease.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months. Follow up to radiation treatments, Pt is diagnosed with cancer and completed course of radiation; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.
Known Prostate cancer with bone mets. Complaining of back pain. Recent bone scan showed multiple osseous metastases. A few new or enlarging lesions are identified (T11, S1, R proximal femur, and L femoral head). MRIs to further evaluate.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Initial lung cancer staging.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; The patient has had a recent bone scan.; The bone scan was not normal.; The patient has not had recent plain films of the shoulder.; UNKNOWN

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; The patient has had recent plain films of the shoulder.; The plain films were not normal.

The requested study is a Shoulder MRI.; This study is being ordered for Known Tumor.; The ordering physician is an oncologist or orthopedist.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.

The requested study is a Shoulder MRI.; This study is being ordered for Known Tumor.; The ordering physician is an oncologist or orthopedist.; This study is being ordered for staging.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

Patient with known history of Diffuse Large B Cell lymphoma. Has small posterior cervical nodes and mass on left thigh that need further investigation.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.
This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass adjacent to or near the hip.; There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is not a suspicion of AVN.; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient does not have a documented limitation of their range of motion.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.; Yes this is a request for a Diagnostic CT 1

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.; Yes this is a request for a Diagnostic CT 1

This study is being ordered for trauma or injury.; Enter date of initial onset here - or Type In Unknown If No Info Given.; It is not known if there has been any treatment or conservative therapy.; Enter answer here - or Type In Unknown If No Info Given.;

HAVING TROUBLE AMBULATING WITHOUT PAIN.; This study is being ordered for Inflammatory/ Infectious Disease.; FEBRUARY 2017; There has been treatment or conservative therapy.; PAIN AND SWELLING FROM THE FOOT UP THROUGH THE KNEE; PAIN MEDS, STEROIDS X2, ICE THERAPY AND STRETCHING 1

This is a request for a Knee MRI.; The ordering physician is an oncologist or orthopedist.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; Known Tumor 1

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI." 3

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is a mass near the hip.; The patient has a documented limitation of their range of motion.
This is a request for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

&lt;Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT ; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

CT guided biopsy done in 12/2016; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; It is unknown if the diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.
Follow up screening; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease. There are 2 exams being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. The diagnosis of cancer or tumor has been established. Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease. There are 3 exams being ordered. One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This study is being ordered for a metastatic disease. There are 3 exams being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. The diagnosis of cancer or tumor has been established. Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; It is not known if there has been any treatment or conservative therapy.; Describe primary symptoms here - or Type In Unknown If No Info Given.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/21 ultrasound was done; There has not been any treatment or conservative therapy.; anemia, spot found on gallbladder and liver.

Ms. Fields is a middle aged female who presented with RLE DVT on 4/3/11. Her hypercoagulable work up showed PROTEIN C DEFICIENCY (13%), PROTEIN S DEFICIENCY (42%)-FALSE POSITIVE with HIGH tumor markers (CEA 6.6 and CA 19-9 86.2). This study is being ordered for Vascular Disease.; There has been treatment or conservative therapy.; Carcinoembryonic antigen present (finding) Date of Dx:04/24/2012; Deep venous thrombosis (disorder) Date of Dx:02/2012; Iron deficiency anemia; Protein C deficiency disease (disorder) Date of Dx:04/2011; Protein C; Protein S deficiencies; Pulmonary em; Lovenox; Coumadin; Arixtra; Xarelto.
| Approval | 74176 CT ABD & PELVIS W/O CONTRAST | ; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT | 1 |

; This study is being ordered for Vascular Disease.; 2015; There has been treatment or conservative therapy.; Michael is a middle-aged male with PMH significant for Wegener’s granulomatosis and venous thrombosis of his RLE. He was initially diagnosed with a RLE DVT in 2015 (approximate). He took Coumadin for 6 months with resolution of DVT. He had a recurrent RLE;

1. Anaplastic large cell lymphoma, ALK positive, diagnosed 10/15/15 by left groin biopsy. &amp;#x0D; &amp;#x0D; MRI Pelvis at BMC on 10/1/15 revealed pathologically enlarged lymph node in the left groin measuring over 5cm in maximum dimension. There are smaller but slight; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

1. Bladder cancer diagnosed 8/11/14 with biopsy BMC revealing urothelial carcinoma, high-grade. Pathology #514-11697.CARTI CTs on 10/21/16 revealed Stable unremarkable exam with no evidence of recurrent tumor at site of previously resolved right tempora; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

1. Mass of thoracic structure&amp;#x0D; &amp;#x0D; &amp;#x0D; WCMC MRI of thoracic spine on 1/3/17 revealed abnormal soft tissue involving the prevertebral region, posterior mediastinal mass encasing the descending thoracic aorta from approximately T6-T10 levels. Findings are susp; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.
1. Primary mediastinal diffuse large B-cell lymphoma diagnosed 7/14/14 by mediastinal mass biopsy after having had abnormal CXR. History of pain secondary to malignancy. &x0D; Left arm deep venous thrombosis diagnosed 3/23/15 at BMC. &x0D; Completed Xarelto, taki; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

1. Invasive ductal carcinoma of the right central breast, diagnosed 5/2016. Postmenopausal s/p TAH/BSO. &x0D; &x0D; &x0D; Postmenopausal, s/p TAH-BSO in the early 1990s. She has been on Premarin for hot flashes and mood swings for the past 8+ years. She is still taki; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

12/13/16; Mr. Joye presents for follow-up. He went to MD Anderson for evaluation and they felt he needed to proceed with further therapy so we are going to continue with his therapy for two more cycles and rescan him. 11/14/16 only a X-ray of the chest was; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

12/19/16: Maria is seen today in chemo room. A family member interprets for me today. She reports that Maria complains of a cough that persist. Benzoate pears provide some improvement. At night, she takes her pain pills and they provide some improvement; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

2/9/2017; Rosa Mendoza is here today for ongoing evaluation and management of her metastatic adenocarcinoma. Mrs. Mendoza is a very plesanthispanic female who presented to NWMC in Jan 2014 with a new seizure. Routine imaging revealed a 2cm mass. Staging; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.
Approval 74176 CT ABD & PELVIS W/O CONTRAST

3 month follow up scans to evaluate disease.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

3 month follow up scans to evaluate Stage IIIC rectal cancer.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

4 month followup for surveillance of cervical cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Abnormal labs, elevated platelets and elevated CRP.

Outside labs:
Plts 340 on 9/1/16
Plts 401 and CRP 78.9 on 11/2/16
Plts 328 on 2/16/17

Current status 2/16/17: Normal Plt count today. &amp;x0D; &amp;x0D; 2. Anemia:&amp;x0D; &amp;x0D; Hgb 12.7 and Hct 38.2 with MCV; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; IMPRESSION:&amp;x0D; 1. Abnormal labs, elevated platelets and elevated CRP.; &amp;x0D; &amp;x0D; Outside labs:
Plts 340 on 9/1/16
Plts 401 and CRP 78.9 on 11/2/16
Plts 328 on 2/16/17

Current status 2/16/17: Normal Plt count today. &amp;x0D; &amp;x0D; 2. Anemia:&amp;x0D; &amp;x0D; Hgb 12.7 and; There has been treatment or conservative therapy.; ECOG Performance Status&amp;x0D; 1 Symptoms, but ambulatory. Restricted in physically strenuous activity, but ambulatory and able to carry out work of a light or sedentary nature (e.g., light housework, office work). (Date: 02/16/2017)He has not had a temperature; HPI&amp;x0D; Mr. Hawkins presents to clinic for evaluation and treatment of elevated platelets and elevated CRP.&amp;x0D; &amp;x0D; He has history of rocky mountain spotted fever in August of 2016. Other medical history includes hypertension.&amp;x0D; &amp;x0D; Outside labs:&amp;x0D; &amp;x0D; Plts 340 on 9/1/1
Approval

74176 CT ABD & PELVIS W/O CONTRAST

Assessment & Plan; IMPRESSION:

1. Follicular lymphoma, grade 2 presenting as lymphadenopathy with symptoms of night sweats.

Splenomegaly present.

He presented to Dr. Pittman for lower abdomen pain that he had had for a long time, over the last few w; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Attaching clinicals; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Attaching records; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

CARTI CT 6/23/16 reveals normal head CT without contrast. Bilateral mastectomies with decrease in size of a left lateral subpectoral mass now measuring 3.5 cm compared to 6.0 x 5.3 cm on 3/16/16. Enlarging fluid filled abnormality involving the left later; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.
checking for any mass or swollen lymphnodes that could be causing the pts symptoms; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/21/2017: It is not known if there has been any treatment or conservative therapy.; weight loss; abdominal pain; abnormal lab levels; fatigue

Chemotherapy, restaging.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Clinical research; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

CT Abdomen and Pelvis as well as a CT Chest have not been performed on the patient for breast cancer.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

CT scans for chest, abdomen, pelvis for restaging. Patient has a lot of aching in her back and numbness in her feet.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Enter answer here - or Type In U  CT scan as compared to August and November showed stable findings of the left apex infiltrate. No evidence of cancer recurrence. He previously had a left lower lobe superior segment infiltrate that measures about 2 cm w; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT
Faxing clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Faxing clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.

Faxing clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Faxing clinicals; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Faxing clinicals; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Faxing clinicals; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Faxing records.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Faxing records. Kg; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.
Follow up scans to evaluate disease after completion of radiation and chemotherapy, 11/2016.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease and evaluate response to current treatment.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease and further treatment recommendations.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease response to treatment.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up scans to evaluate disease.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Follow up to test done in nov.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.
His nivolumab was held until 11/2/2016 when it was restarted. He again developed respiratory symptoms. CT on 12/7/2017 showed persistent right upper lobe soft tissue density and fibro atelectatic changes connected to the right hila. Interval development of: This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

I am scheduling CAT scans to be done on that day to further evaluate recurrent pain.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Initial lung cancer staging.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.

Last scans showed the regimen prior to was not covering all the different areas and some uptake is registering in areas of the patients body.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Ms. Garvin presented for her first visit on 3/1/17 at the age of 38, date of birth 6/10/78. She was referred by Dr. Rogers with a recently diagnosed colorectal carcinoma. She had undergone a screening colonoscopy on 1/9/17 by Dr. Jacob Joseph that showed.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.
<p>| Approval | 74176 CT ABD &amp; PELVIS W/O CONTRAST | New metastasis disease showing on prior CT, a new pulmonary mass.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months. |

Patient is on a research program and the PET done in Nov. showed hypermetabolic uptake within the sclerotic left femoral neck osseous lesion compatible with metastatic disease.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Patient was having left side weakness in arm and they did MRI's of Thoracic spine and Cervical Spine and EKG was borderline. There is mixed responses to the patients cancers on the regimen that was first started.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Patient with known RCC. CTs to evaluate disease status.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.; PET SCAN; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Plan:
1. Followup bone marrow aspiration and biopsy as indicated.
2. Continue current home medications.
   - Paxil 5 mg daily
   - Nexium 40 mg daily
   - Estradiol 0.05 mg/24 hour patch
   - Lorazepam prn
   - Ondansetron prn
   - B12 1000 mcg sq every other week;

Konstantinos Arnaoutakis, MD; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Plan:
- Carboplatin and paclitaxel cycle 2 TODAY;
- Restaging scans; if he had good response we could consider RFA or SBRT;
- Konstantinos Arnaoutakis, MD; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.
Pt has had a PET with changes and we need to evaluate possible mets of breast cancer; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Pt has recently undergone surgery for Breast Cancer and had one positive lymph node. Pt needs scans to evaluate for further disease prior to starting treatment.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Pt is under treatment/evaluate response; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Required by the ordering doctor for the comparison to the last scans to check for reoccurrence.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.

restage corpus uteri and endometrial carcinoma after completion of chemotherapy on 2/2017; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

restage fallopian tube cancer with rising ca-125 tumor marker; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

restage lung cancer after completion of chemotherapy regimen; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Re-staging lung cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Re-staging Follicular lymphoma, grade 2 of 3 by axillary lymph node biopsy 6/3/08 per Dr. Osam after presenting for evaluation after CT scan was obtained to rule out renal calculi in patient with hematuria which revealed left supraclavicular node and anulus; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Restaging and checking the response to treatment.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

RESTAGING BREAST AND THYROID.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.
Restaging for Lymphoma; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Re-staging 1. Transverse Colon Cancer; She initially presented to ED at SVI for abdominal pain and was admitted. She was taken to surgery for transverse colectomy, mobilization of splenic flexure, lymph node dissection, omentectomy and repair of incision; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; It is unknown if imaging studies have been performed on the member in the past 3 months.

Restaging; Hodgkin's lymphoma, presenting as adenopathy ACC PET/CT on 1/4/16 reveals stable examination with no evidence of metabolically active recurrent lymphoma. Stable inactive partially calcified thyroid nodules, which likely represent benign adenom; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.

Restaging 1. Non-Hodgkins lymphoma, follicular grade I, diagnosed 1/26/07 from positive biopsy of mediastinal lymphadenopathy at BMC; Discussed diagnosis, treatment options and prognosis of follicular lymphoma at length with Mr. Turner.; There are 5 or more exams are being ordered.
Scans are requested for continued monitoring and management of her breast cancer and to evaluate her response to treatment.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

She also had CT c/a/p done on 2/2/17 for restaging, showed stable to treatment response in the chest. However, there are bony destruction of the T2 and T3 vertebral bodies which can indicate worsening disease. She is asymptomatic and will start Xgeva to; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Strong indication of possible CLL, CT for staging workup of possible CLL.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/2016; There has not been any treatment or conservative therapy.; Leukocytosis and lymphocytosis

Surgery, History of Testicular type number 3C, Abnormal Lympho Nodes; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

SURVEILLANCE FOR MELANOMA; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered. 

swollen lymphnodes; fever unknown origin; elevated lab levels; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

THE PROVIDER IS WANTING TO KNOW ABOUT THE CURRENT STATUS OF THE PTS CANCER AND TO SEE IF THE TREATMENTS ARE WORKING.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.
There were changes in the regimen the patient has undergone, trying to evaluate the response to therapy; This study is being ordered for a metastatic disease; There are 2 exams are being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to tumor or mass; This study is not being requested for abdominal and/or pelvic pain; The study is requested for hematuria; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This is not request for evaluation of prostate cancer.; This study is being ordered for follow-up.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is male.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This is not request for evaluation of prostate cancer.; This study is being ordered for follow-up.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is male.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is being ordered for staging.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is female.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is pre-op or post op evaluation.; The study is requested for preoperative evaluation.; Surgery is planned for within 30 days.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Vascular disease; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Vascular disease; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; It is not known if the requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation; Patient reports abdominal pain x 3 months, post gall bladder surgery.&lt;ref&gt;Abd US was negative, c/o of abd pain 7/10. Diagnosed with Hypercalcemia, GERD, elevated liver function test. History gall bladder surgery, hysterectomy.&lt;/ref&gt; trying to find etiology of ab

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is not a first follow up study for a post operative complication.; Pre-op or post op evaluation; Baseline monitoring, patient had known tumor it was removed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Lymphadenopathy.; Other

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Lymphadenopathy.; Other; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; ; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient receiving scans due to abdominal pain.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt has personal history of tumor.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Rule out occurrence of disease.

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; 1

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor; 1

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases.

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or Rule out metastases.
This is a request for an abdomen-pelvis CT combination; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment; This is not a request for initial staging of a known tumor other than prostate; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment; This is not a request for initial staging of a known tumor other than prostate; There is an abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment; This is not a request for initial staging of a known tumor other than prostate; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT; There are new signs or symptoms including hematuria, presenting with known cancer or tumor; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment; This is not a request for initial staging of a known tumor other than prostate; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.; known tumor treated w resection/chemo; no evidence of malignance; monitoring stage; annual scan; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.; Patient has advanced stage solitary lymphoma and left lower quadrant pain and a pelvic ultrasound shoed a right ovarian cyst; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.; Recent MRI Pelvis done 12/28/16 mentions that ileal mass is better characterized in a previous CT and possible that it has decreased in size. CT to get better picture of mass.
This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.; unknown; Yes this is a request for a Diagnostic CT

This is a research patient so there are request for scans for research.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

This patient has had recent onset for worsening abdominal pain, nausea and vomiting. He is currently being treated and I suspect progressive tumor or possible obstruction. Joseph Beck MD; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

ultrasound performed on 01/17/2017; tumor found on ultrasound; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

unk; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unk; It is not known if there has been any treatment or conservative therapy.; rt. chest pain, fatigue, shortness of breath, Chemo; CT Scans-(June 2016) no evidence of Metastases disease, enlarged prostate.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.1

Approval 74176 CT ABD & PELVIS W/O CONTRAST

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

unknown; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.
Upon last office visit patient states that she has occasional dizziness and spotting.; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

We are going to schedule a followup CT scan of chest and abdomen to further evaluate the lesion seen on the study of 01/10/2017 in about 3-1/2 weeks and I will see him again after those results are available.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; It is unknown if other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

We are scheduling CAT scans in a month to evaluate the disease status.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms do not indicate that the cancer may be present or reoccurring.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months. Attaching clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.
Initial staging workup with Brain imaging. CT Chest to get clearer picture of anatomy. MRI Abdomen to evaluate elevated liver enzymes and rule out metastatic disease.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

On previous CT scan of Abdomen pelvis performed on 01/12/2017 there is a 1.5 cm soft tissue attenuating nodular lesion in the right kidney. Further characterization with renal protocol MRI is recommended.; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.

Rising CEA, 3 masses in the liver, 1.1 cm para-aortic lymph nodes all new symptoms and signs.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Neuroendocrine cancer diagnosed 10/2016. MRI to evaluate disease status and determine treatment recommendations.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 4 or more follow-up abdomen MRIs.; The last abdomen MRI was performed within the last 6 months.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Follow up to radiation therapy. Will provide clincials

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; ACUTE ABDOMINAL PAIN. RULE OUT METS.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Attaching clinicals
This request is for an Abdomen MRI.; This study is being ordered for known tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; LEUKOCYTOSIS, SWELLING IN LEGS, EASY FATIGUE, DYSPNEA

This request is for an Abdomen MRI.; This study is being ordered for known tumor.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; FAXING RECORDS

This request is for an Abdomen MRI.; This study is being ordered for known tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.";

This request is for an Abdomen MRI.; This study is being ordered forknown tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Enter answer here - or Type In Unknown If No Info Given. &gt;

7. MRI with adrenal protocol to assess right adrenal gland. &lt;#x0D; &lt;#x0D; 8. Return to clinic in 6 months for repeat assessment with CBC, CMP, CEA.

This request is for an Abdomen MRI.; This study is being ordered for known tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Lymphoma

This request is for an Abdomen MRI.; This study is being ordered for known tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Patient with breast cancer new mass found on CT on 2/2/17 and radiologist recommended an MRI of the abdomen

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.";
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; 1. Newly diagnosed invasive ductal carcinoma of the RUO breast s/p lumpectomy, diagnosed 12/2016. Concern for possible metastatic disease on initial staging scans. Premenopausal.

Patient underwent a screening mammogram on 11/16/16 at BMC which revealed...

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; ABNORMALITY ON CT

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; ADRENAL NODULES

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; Attaching clinicals

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study.".; CT ABD/PEL 12/30/16-1.42 x 3.3 cm heterogeneously enhancing mass in the upper pole of the right kidney. Highly suspicious for renal cell carcinoma. Oncocytoma and metastatic disease are considered less likely. 2. No lymphadenopathy in the abdomen and

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has not had an abdominal ultrasound, CT, or MR study.".; Mr. Richardson presents for follow-up and to discuss treatment. He is having more abdominal pain, complains of pain in his liver, chills, nausea, fatigue, and no appetite. Complains of swollen lymph node in his groin.
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has not had an abdominal ultrasound, CT, or MR study.;"; unknown

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.;"; Follow up test after 03/23/17 CT Abdomen that showed multiple tiny hyper enhancing masses in the liver. Metastases cannot be excluded, MRI recommended.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.;"; Patient has had a CT scan when she was hospitalized that showed a 1.4 cm liver lesion in the right lobe of liver.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.;"; PER abd/pelvis CT: Mild diffuse fatty infiltration of the liver with subtle focal; fatty sparing around the gallbladder. Probably small cavernous hemangioma in the inferior right lobe. Please consider ultrasound if; the liver for confirmation; results of

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has not had an abdominal ultrasound, CT, or MR study.;"; abdominal pain

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is suspicion of metastasis.
This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Ms. Anderson is a 38 year old caucasian female who is referred to us for positive mutation for Lynch syndrome. She has a very strong family history of colon cancer, which is what prompted her to have genetic mutation testing. Her father was diagnosed with colon cancer.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; PATIENT HAS BLOOD IN STOOL AND VOMITING UP BLOOD. PAIN LUQ ALONG WITH WEAKNESS.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; SUSPECTED LIVER CANCER

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; unknown

This is a request for a heart or cardiac MRI

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; unknown

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; It is unknown if the patient completed a course of treatment initiated in the last 8 weeks or are experiencing new signs or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; This would be the first PET Scan performed on this patient for this cancer.
This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; The patient is experiencing new signs or symptoms indicating a recurrence of cancer.; 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Ovarian or Esophageal Cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

63 yr old man with a history of nonobstructive CAD, seizure disorder, abdominal aortic aneurism (4.7mm on surveillance), nephrolithiasis, and small cell lung cancer. Completing chemo on 3/24/2017.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.
Attaching records; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

Henry returns for red tender spots under left arm. He developed an erythematous rash just beneath his left axilla about 2 weeks ago. He has been applying hydrocortisone as it was pruritic, but this is now improved. It does remain slightly tender to touch; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

INITIAL STAGING FOR NON-SMALL CELL LUNG CANCER; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

INITIAL STAGING FOR NEWLY DIAGNOSED BREAST CANCER; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Initial Staging for non-small cell lung cancer just recently diagnosed with pathology report.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.

Approval 93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.

Approval G0297 Low dose CT scan (LDCT) for lung cancer screening

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

Approval S8037 mrcp

This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Approval S8037 mrcp

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; It is not known if patient requires evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.

Ms. Olson presents for initial evaluation of newly diagnosed adenocarcinoma of the right lung. Status post CT guided biopsy of right lower lobe lung mass 5/27/14 with pathology revealing this study is being ordered for a metastatic disease. There are 5 or more exams being ordered.

2. History of gastric bypass surgery in 1995, with subsequent malabsorption syndrome with inability to absorb oral iron. 3. Memory loss. 4. Headaches. 5. Hypertension. 6. Depression. 7. History of low potassium level at 2.9 on 6/8. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. 1. History of iron deficiency anemia due to gastric bypass surgery. Status post six cycle of IV iron 500 mg in 1997. Recurrent iron deficiency documented 6/10/03. with ferritin of 5 and symptomatic anemia with Hgb of 10.5. 2. History of gastric bypass surgery in 1995, with subsequent malabsorption syndrome with inability to absorb oral iron. 3. Memory loss. 4. Headaches. 5. Hypertension. 6. Depression. 7. History of low potassium level at 2.9 on 6/8. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. 1. History of iron deficiency anemia due to gastric bypass surgery. Status post six cycle of IV iron 500 mg in 1997. Recurrent iron deficiency documented 6/10/03. with ferritin of 5 and symptomatic anemia with Hgb of 10.5. and 

A Chest/Thorax CT is being ordered. This study is being ordered for known tumor.

A Chest/Thorax CT is being ordered. This study is being ordered for screening of lung cancer. The patient is between 55 and 80 years old. This patient is a smoker or has a history of smoking. The patient has a 30 pack per year history of smoking. The patient did NOT quit smoking in the past 15 years. The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition. The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

Attaching clinicals. This study is being ordered for a metastatic disease. There are 3 exams being ordered. One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
<p>| Disapproval | 71250 CT CHEST, THORAX | Radiology Services Denied Not Medically Necessary Radiology Services | Attaching clinicals; &quot;There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days.&quot;; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT study. There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. |

Records from outside hospital reviewed. A CT of the head showed stable hypodensities but no mass effect.; This study is being requested for None of the above.; This procedure is being requested for Infection or Inflammation; It is unknown why an MRI is not being considered.

The sudden sharp stabbing pains are occurring multiple times daily. They are very intense and are causing the patient extreme discomfort. They have been occurring for about 2 weeks with no relief from analgesics.; This is a request for a headache.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.

This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.

This is a request for a brain/head CT.; The study is being ordered for evaluation of known tumor.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer. This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This is a request for a brain/head CT.; This study is being requested for a history of stroke, (CVA) known or follow-up.

This is a request for a brain/head CT.; This study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.

The Pt has headache, left ear hearing loss.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; 
The patient has a chronic or recurring headache.
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change. 

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life. 

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects. 

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.  

This request is for a Brain MRI; The study is being ordered for a tumor.  

This request is for a Brain MRI; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The study is being requested for evaluation of a headache.; The study is being requested for evaluation of a headache.; The study is described as sudden and severe.; The headache is described as chronic or recurring.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is not known if the headache is described as a “thunderclap” or the worst headache of the patient’s life.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is a new and sudden onset of headache (less than 1 week) not improved by pain medications.
UNKNOWN; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.

unknown; This study is being ordered for a neurological disorder.; 1/9/2017; There has not been any treatment or conservative therapy.; Headache, numbness and tingling in left side of face, numbness and tingling in both hands, C Spine pain

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

"The ordering physician IS an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

The patient has acute or chronic back pain.;

The patient has none of the above

approval

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

This study is being ordered for a neurological disorder.;

There has been treatment or conservative therapy.;

approval
Constant right sided back and abd pain rated 4/5, neuropathy in toes and fingertips, painful urination with blood clots at times, anxiety, depression, dizziness, nausea, fatigue, swelling in left leg. Oxydone and Oxycontin as prescribed increase gabapen; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Constant right sided back and abd pain rated 4/5. Pt has diffuse large b-cell lymphoma. Want to see if there is disease process happening.; There has been treatment or conservative therapy.; Low back pain rated 4/5, also abdominal pain.; Pain medication, reduced activity.

Enter answer here - or Type In Unknown If No Info Given.; patient has severe lumbar and thoracic back pain onset 3 months. has tried Physical therapy, muscle relaxers, steroids and NSAIDS without relief. cannot work due to pain. difficulty walking, stand; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ;

Headaches, vision changes - wavy vision, occasionally can't see out of left eye, double vision, dizziness, chronic cervical and lumbar pain with radiation, paresthesias and numbness - not improved with injections or meds in a patient with history of mant; This study is being ordered for a neurological disorder.; 8/23/2016; There has been treatment or conservative therapy.; ; Headaches, vision changes - wavy vision, occasionally can't see out of left eye, double vision, dizziness, chronic cervical and lumbar pain with radiation, paresthesias and numbness - not improved with injections or meds in a patient with history of mant; patient was treated with hydrocodone, gabapentin, Aleve, injections by pain management physician - pain is unrelieved.

Lower back pain, numbness, paresthesias, positive straight leg raise, decreased deep tendon reflexes, weakness - conservative treatment not helping. Follow-up of mass along the posterior aspect of the left mid-brain, new symptoms of losing words, memory i; This study is being ordered for a neurological disorder.; Brain mass last seen on MRI 7/25/2014 - needs follow-up due to new symptoms. Lumbar pain since at least 8/17/2016.; There has been treatment or conservative therapy.; ; Lower back pain, numbness, paresthesias, positive straight leg raise, decreased deep tendon reflexes, weakness - conservative treatment not helping. Follow-up of mass along the posterior aspect of the left mid-brain new symptoms: losing words, memory issu; Sulindac, tizanidine, aspirin, home therapy.

M54.5,G89.29 (ICD-10-CM) - Chronic left-sided low back pain without sciatica; D17.1 (ICD-10-CM) - Lipoma of lower back; Scheduling Status: Pending Authorization; The study requested is a Lumbar Spine MRI; The patient has acute or chronic back pain.; The patient has none of the above.
the patient has continued to have low back pain unresponsive to continued conservative management and will reattempt having the MRI authorized...plain films were normal and his is having increased issues with; The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; the patient has continued to have low back pain unresponsive to continued conservative management and will reattempt having the MRI authorized...plain films were normal and his is having increased issues with; The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more then once for these symptoms; The physician has directed conservative treatment for the past 6 weeks; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more then once for these symptoms; The physician has directed conservative treatment for the past 6 weeks; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI; It is unknown if the patient has acute or chronic back pain; This procedure is being requested for Neurologic deficits

The study requested is a Lumbar Spine MRI; Pre-Operative Evaluation; No, the last Lumbar spine MRI was not performed within the past two weeks; Surgery is scheduled within the next 4 weeks.

The study requested is a Lumbar Spine MRI; The patient does NOT have acute or chronic back pain; This procedure is being requested for Neurologic deficits

The study requested is a Lumbar Spine MRI; The patient has acute or chronic back pain; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI; The patient has acute or chronic back pain; The patient has an Abnormal nerve study involving the lumbar spine
Approval

**72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST**

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality.

13

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks.

1

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s).

36

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval

**72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST**

Uncontrolled left sided sciatica; goes down to her leg; worse when she stands or walks; decreased strength in LLE; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.

2

Approval

**72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST**

unknown; This study is being ordered for a neurological disorder.; 4/25/16; There has been treatment or conservative therapy.; Pt has pain radiating from back down to the left hip and left leg, decrease ROM, loss of mobility on the left side.; PT and occupational therapy for 6 months and not getting any better.

She went to the ER on paragold, had X rays of both the knees which were negative and was given meds to help with pain. Her L knee pain resolved, but the R knee remained swollen and she states that she could hardly move her knee anyway. She is trying not t; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.
This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.

This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had recent plain films of the knee.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; per Physical Exam: FLUCTUANT MASS POSTERIOR LEFT KNEE WITH TENDERNESS. No redness or increased warmth. FROM KNEE WITH PAIN WORSE WITH FLEXION.; Suspicous Mass or Suspected Tumor/ Metastasis

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for staging.; Known Tumor

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.
This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There are documented physical or laboratory findings of a joint infection.; Post-operative Evaluation
This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.;

Physical Therapy

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture); This is not a pre-operative study for planned surgery.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture); This is not a pre-operative study for planned surgery.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is a suspected tarsal coalition.
73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT
unknown; This study is being ordered for trauma or injury.; 02/28/2017; There has not been any treatment or conservative therapy.; Pain

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient has a documented limitation of their range of motion.

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone).

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.
This is a request for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis; The patient has not used a cane or crutches for greater than four weeks; The patient has not been treated with and failed a course of supervised physical therapy; There is not a mass near the hip; The patient has been treated with anti-inflammatory medications in conjunction with this complaint; This is not for pre-operative planning; The patient has a documented limitation of their range of motion.

This is a request for an Abdomen CT; This study is being ordered for a neurological disorder; 4/25/16; There has been treatment or conservative therapy; Pt has pain radiating from back down to the left hip and left leg, decrease ROM, loss of mobility on the left side; PT and occupational therapy for 6 months and not getting any better

&l; Enter answer here - or Type In Unknown If No Info Given. &gt; This is a request for an Abdomen CT; This study is being ordered for a suspicious mass or tumor; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy; There are no new symptoms including hematuria; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings; There is not a suspicion of an adrenal mass; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.
This is a request for an Abdomen CT. This study is being ordered for another reason besides Kidney/Ureteral stone; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT.

This study is being ordered for a metastatic disease. There are 3 exams are being ordered. One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This study is being ordered for Inflammatory/ Infectious Disease. Enter date of initial onset here - or Type In Unknown If No Info Given. It is not known if there has been any treatment or conservative therapy. Describe primary symptoms here - or Type In Unknown If No Info Given.

Abnormal CTA showing a large AZYGOS VEIN, FURTHER STUDY IS NEEDED TO LOOK FOR VENOUS OBSTRUCTION IN THE CHEST AND ABDOMEN. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. Enter date of initial onset here - 10/21/16. There has not been any treatment or conservative therapy. On 10/21/16 pt had a CTA, this revealed A VERY LARGE AZYGOS VEIN. (This was ordered by another physician and never followed up on. We received these results on 3-1-17) Patient complains of pain in the left chest and neck. Radiologist recommends to do a

Adrenal Left Mass found on 10/11/2016 CT, 2cm atypical adrenal adenoma. Post left Nephrectomy for renal cancer 5 years ago, R/O malignant mass and confirm size of this mass. This is a request for an Abdomen CT. This study is being ordered for a suspicious mass or tumor. There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy. There is suspicion of an adrenal mass (pheochromocytoma). The suspicion of an adrenal mass was suggested by some type of imaging other than an Ultrasound. Lesions on the liver. This is a request for an Abdomen CT. This study is being ordered for a suspicious mass or tumor. There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy. Yes this is a request for a Diagnostic CT. Patient has several enlarged lymph nodes. This study is being ordered for Inflammatory/ Infectious Disease. 11/21/16; It is not known if there has been any treatment or conservative therapy. Enlarged lymph nodes.
patient is being seen for abd. pain pos. hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

pt c/o left side flank pain that isn’t getting any better; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis

Pt has a malignancy in her eye and wants to see if it has metastasized anywhere else in the body; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; No, this is not a request for follow up to a known tumor or abdominal cancer.; This study being ordered for initial staging of a known tumor other than prostate.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.
This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; This patient is experiencing hematuria.; The hematuria is newly diagnosed.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.
This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for CT Angiography of the Abdomen and Pelvis.

Yes, this is a request for CT Angiography of the abdomen.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This study is being ordered for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Intermittent, gradual onset of 1/4/17; It is not known if there has been any treatment or conservative therapy.; US abd shows fatty liver, normal gb, r/o hiatal hernia. abd pain, luq, ruq, bloating, no fever, red blood in stool. alcoholic fatty liver.

XR chest shows Mild airways thickening and possible bronchiectasis.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has not been established.; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Uknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; two years; There has been treatment or conservative therapy.; abdominal pain and Dysmenorrhea; pelvic and abdominal ultrasound, Gallbladder scans

Yes, this is a request for CT Angiography of the abdominal arteries.

PT HAS A FAMILY HISTORY OF BREAST CANCER IN A SISTER AND MULTIPLE 2ND DEGREE RELATIVES. SHE HAS A CALCULATED LIFETIME RISK OF 22%; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children). This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).
77058 MRI breast, without and/or with contrast; unilateral

This is a request for Breast MRI; This study is being ordered for a known history of breast cancer; No, this is not an individual who has known breast cancer in the contralateral (other) breast; Yes, this is a confirmed breast cancer; Yes, the results of this MRI (size and shape of tumor) affect the patient’s further management.

Approval

77058 MRI breast, without and/or with contrast; unilateral

This is a request for Breast MRI; This study is being ordered for a suspected implant rupture; Yes, this study is being ordered to evaluate a suspected silicone implant rupture.

Approval

77084 Magnetic resonance imaging, bone marrow blood supply

This study is being ordered for a metastatic disease; There are 2 exams are being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering physician is a hematologist/oncologist; The diagnosis of cancer or tumor has been established; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval

77084 Magnetic resonance imaging, bone marrow blood supply

This study is being ordered for a metastatic disease; There are 2 exams are being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering physician is a hematologist/oncologist; The diagnosis of cancer or tumor has been established; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Approval

77084 Magnetic resonance imaging, bone marrow blood supply

This study is being ordered for a metastatic disease; There are 2 exams are being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering physician is a hematologist/oncologist; The diagnosis of cancer or tumor has been established; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

The patient’s age is between 45 and 64; It is not known if the patient has had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors.; The study is not requested for preop evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.
chest pressure and pain, heaviness, Nausea; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

CP swelling in feet and legs DOE tightness SOB fatigue COPD dementia; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

LEFT SIDED CHEST PAIN AGGRAVATED WITH EXERCISE, EXTORTION, FATIGUE, DYSPNEA ON EXERTION, ANGINAL PAIN; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Ms. Owens is a 44-year-old white female with past medical history significant for a stroke 2 years ago followed by multiple (ministrokes) as she stated; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

newly diagnosed CHF. Will obtain SPECT to rule out ischemia; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
Obese patient with diabetes, hypertension, hyperlipidemia, family history of heart disease and abnormal ECG showing ST elevation; The study is being ordered for suspected CAD; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath; The patient has not had a recent non-nuclear stress test; The patient had a recent abnormal EKG consistent with CAD; The patient has not had a recent stress echocardiogram; The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; The patient is male; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Pain is worse after working as a mechanic. He was seen in the ER for chest pain and was told he needed to be admitted for further eval, but he refused. Describes the pain as sharp and radiating down L arm and into L neck. Pain started after 30 min of unlo; The patient is not diabetic; The patient is less than 45 years old; The patient has not had a recent exercise treadmill test that was positive; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Patient had an abnormal EKG, chest pain and shortness of breath; The study is being ordered for suspected CAD; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had previous cardiac surgery or angioplasty; The patient has not had a recent non-nuclear stress test; The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

Patient has periodic heart flutter; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation; The patient’s age is between 45 and 64; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

The patient has a physical limitation to exercise.
The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; It is not known if the member has known or suspected coronary artery disease.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease.

This study is being ordered as a pre-operative evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

had a ct of chest and neck in july of 2016 that was abnormal so needing a follow up and patient has destruction to the bone and need chemo started; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.
FINAL DIAGNOSIS: A. LEFT LOWER LOBE BRONCHIAL BIOPSY: SQUAMOUS CELL CARCINOMA; B. BRONCHIAL WASHINGS (THIN PREP): POSITIVE FOR MALIGNANCY, SQUAMOUS CELL CARCINOMA; Case Comment(s): Immunohistochemistry stains with appropriate controls were performed; This study is being ordered for a metastatic disease; There are 2 exams are being ordered; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study; This study is being ordered to establish a cancer diagnosis; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA; This study is being requested for an other solid tumor; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Colo-rectal Cancer; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment; This study is being requested for Breast Cancer; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer; More than 4 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment; This study is being requested for Lung Cancer; The patient has been diagnosed with NON small lung cancer; The patient completed a course of treatment initiated within the last 8 weeks; 1 PET Scans has already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment; This study is being requested for Lung Cancer; The patient has been diagnosed with small cell lung cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment; This study is being requested for Ovarian or Esophageal Cancer; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer; 3 PET Scans have already been performed on this patient for this cancer.
This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Melanoma.; This is NOT for evaluation of regional lymph nodes.; 1 PET Scans has already been performed on this patient for this cancer.

had a ct of chest and neck in july of 2016 that was abnormal so needing a follow up and patient has destruction to the bone and need chemo started; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lymphoma or Myeloma.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; More than 4 PET Scans have already been performed on this patient for this cancer.
| Approval | 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY | This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; It is unknown if the patient has been diagnosed with small cell or non small cell lung cancer. This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 3 PET Scans have already been performed on this patient for this cancer. |
| Approval | 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY | This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 1 PET Scans has already been performed on this patient for this cancer. |

| Approval | 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY | This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 2 PET Scans have already been performed on this patient for this cancer. |
| Approval | 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY | This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms. This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown. |
| Approval | 93307 TTHRC R-T IMG 2D +M-MODE REC COMPL | This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has a history of hypertensive heart disease.; There is a change in the patient’s cardiac symptoms.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has high blood pressure |
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is NOT for prolapsed mitral valve, suspected valve disease, new or changing symptoms of valve disease, annual review of known valve disease, initial evaluation of artificial heart valves or annual re-eval of artificial heart valves.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has an enlarged heart; The patient has high blood pressure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is NOT a request for follow up of a known murmur.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease.

Breast reduction surgery S/P; This study is being ordered for trauma or injury.; 09/23/2016; There has been treatment or conservative therapy.; LBP radiates to bilateral legs neck pain; PT x 6 weeks rx medication

I think this is a flare up of his chronic back pain. The neck seems to be new and more concerning given the numbness in his upper extremities. X-ray showed some chronic degenerative changes. Last MRI of neck or back was 7 years ago. Will get those MRIs sc; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3 years; There has been treatment or conservative therapy.; Low back pain noted. Reason for visit: Pain. The discomfort is most prominent in the lower lumbar spine. The pain does not radiate. He characterizes it as stabbing. This is a chronic, but intermittent problem with an acute exacerbation. He states th; home pt and nsaid

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; &lt;Enter Additional Clinical Information&gt;

None; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in left arm; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Pain is worse with prolong standing or sitting; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/31/2017; There has been treatment or conservative therapy.; back pain through flank.; meds

Pain with range of motion; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
Patient has been given stretching exercise, had done 6 weeks of physical therapy and tried and failed Nsaids, with no relief.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Neck pain: patient has been having neck pain for Several months. Pain is moderate and has been progressive. Sometimes radiating to both shoulders. Associated with spasm. He is a bartender and does a lot of lifting at work as well and these exacerbate the; There has been treatment or conservative therapy.; pain in neck radiating into both shoulders. hurting in lower back that is radiating into right leg; patient has had physical therapy, Nsaids, stretching and pain getting worse.

Patient has had this neck pain for over a month. The pain is described as severe, intermittent, sharp, stabbing, and throbbing. The neck pain is also causing bilateral upper extremity paresthesia.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Trying cold packs on the tight, painful areas in the neck. Heat applied to the neck may help relieve pain and stiffness (i.e. hot tub, shower, heating pad, hot water bottle). Massage the tight muscles in the back of the neck to help relieve the pain.; Norco, Prednisone &amp; Tizanidine

Patient to be evaluated for fibromyalgia. She is unable to estimate the duration of symptoms. The diagnosis was arrived at by the presence of tenderness at specified tender points when pressure to the site is applied, symptoms present continuously for 10 years ago from MVA. pain going down both arms. cervical motion tenderness.; physical therapy,naproxen,otc anti-inflammotory meds

She saw the chiropractor yesterday. She states that he thinks she has some cervical disc issues. She has disc disease. She has had surgery on her lumbar spine in 2007. She got a massage earlier today. Massage therapist also felt like she had some color. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12-27-16; There has been treatment or conservative therapy.; pain in lower back that radiates down hip to legs and pain in mid-neck that goes down to both arms and makes them tingle; she has had chiropractic therapy from 2 different doctors and massage therapy.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; None of the above; pt is having numbness/tingling in neck, right arm, and right hand; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parasthesia diagnosed by a neurologist; No, the patient is not not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain it is not known if the patient demonstrate neurological deficits.; Neck pain exacerbated by hypertension.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; patient is having pain in neck.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; having pain in neck radiating g down to right arm, severe pain, cannot turn head left or right , and numbness and tingling in right hand.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; NECK PAIN IS NEW ONSET IN THE LAST 4-6 WEEK. PT HAS TRIED TENS UNIT AND HEATING PAD FOR RELIEF WITH NO IMPROVEMENT. PAIN IS RADIATING DOWN HIS BACK AND LEFT SHOULDER.
<p>| Disapproval | 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST | Radiology Services Denied Not Medically Necessary | This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Pt has intractable neck pain w/ osteoarthritis changes, severe pain between C2 and C4 that is getting worse and radiating down both arms, weakness in both arms. | 1 |

Shortness of breath.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.
Disapproval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
Radiology Services Denied Not Medically Necessary

Patient has syncope and collapse; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Disapproval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
Radiology Services Denied Not Medically Necessary

Patient is having chest pains; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Disapproval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
Radiology Services Denied Not Medically Necessary

Pt c/o substernal chest pain intermittently for over 10 days. Hx of tobacco use.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

Disapproval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
Radiology Services Denied Not Medically Necessary

Pt has had episodes of palpitations and being more recently lasting as long as 12 hours and happening more frequently; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Disapproval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
Radiology Services Denied Not Medically Necessary

the Pt has sharp pain in right hes radiating around to back 15 min per episode occurring at least once a week; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know

Disapproval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
Radiology Services Denied Not Medically Necessary

Pt c/o substernal chest pain intermittently for over 10 days. Hx of tobacco use.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

This a request for an echocardiogram; This is a request for a Transthoracic Echocardiogram; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease; It is unknown if there been a change in clinical status since the last echocardiogram; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.

This is a request for a Stress Echocardiogram; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease

This request is for a Low Dose CT for Lung Cancer Screening; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months; The patient is 54 years old or younger; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer; Patients who are NOT between the ages of 55 and 81 years of age do not meet the criteria for lung cancer screening.

PT had Low Dose CT Lung Screening On 08/24/16. Impression Lung Rads #3, Highest Coded Nodule in Left Lower Lobe Measuring 4 To 5mm. 
1) Lung Rads Category 5 Negative No Significant Incidental Findings Are Found. 
2) Dose CT For Lung Cancer Screening In The Past 11 Months; The Patient Is NOT Presenting With Pulmonary Signs Or Symptoms Of Lung Cancer Nor Are There Other Diagnostic Test Suggestive Of Lung Cancer.

Pt is current smoker, last 30 years, smokes 1 - 1/2 packs per day; has a persistent cough for several weeks. MDO insists they want the low dose CT for lung cancer screening rather than the regular Chest CT; This request is for a Low Dose CT for Lung Cancer Screening; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.
Disapproval

G0297 Low dose CT scan (LDCT) for lung cancer screening
Radiology Services Denied Not Medically Necessary

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

unknown; This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; It is unknown when or if the patient quit smoking.

Approval

70480 CT ORBIT,EYE SOCKET, SELLA TURCICA, POSTERIOR FOSSA,EAR ETC.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2017; There has not been any treatment or conservative therapy.;

70490 CT NECK SOFT TISSUES,LARYNX,THYROID ETC. NO CONTRAST

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2017; There has not been any treatment or conservative therapy.;

70544 Mr angiography head w/o dye

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/03/2015; It is not known if there has been any treatment or conservative therapy.;

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/03/2015; It is not known if there has been any treatment or conservative therapy.;

71550 MRI CHEST

This study is NOT being ordered for a Work-up for Suspicious Mass, Known Tumor, Known or Suspected Inflammatory Disease, etc...; This is a request for a chest MRI.

Patient has pacemaker so a MRI can’t be done.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/16/2016; There has been treatment or conservative therapy.; Dull sharp pain. Radiating bilaterally to hips and thighs. Back pain anterior and lateral, from a fall. Groin and sacral pain.; Medication. PT.
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.
The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter answer here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Enter answer here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.;

Lumber radiating through hips and buttocks. complains of knotting.; Physical therapy none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;

onset started in 2004; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/2016; There has been treatment or conservative therapy.; pierced radiating sharp shoot pain, tightness in neck radiating to shoulder and upper extremity; physical therapy

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

Patient has pacemaker so a MRI can’t be done.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/16/2016; There has been treatment or conservative therapy.; Dull sharp pain.

Radiating bilaterally to hips and thighs. Back pain anterior and lateral, from a fall. Groin and sacral pain.; Medication. PT.

This is a request for a Pelvis MRI.; The request is for suspicion of joint or bone infection.

Approval 70450 CT BRAIN, HEAD

- This study is being ordered for Vascular Disease.; November of 2016; There has been treatment or conservative therapy.; right sided weakness, dizziness, numbness in fingers, pain in legs, confusion; medication. Patient also had bypass

Approval 70450 CT BRAIN, HEAD

- Left leg weakness with burning pain. Left lower extremity weakness and hyperreflexia.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications none; This study is being ordered for trauma or injury.; 11/26/2016; There has been treatment or conservative therapy.; headaches and pain; physical therapy, tlo brace and medication

Approval 70450 CT BRAIN, HEAD

- Patient has h/o brain bleed related to MVA on Jan 6, 2017. He also has been having vertigo since his MVA. A CT of the brain is being requested to evaluate the brain bleed.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

Approval 70450 CT BRAIN, HEAD

- Patient is post-op from his craniotomy for removal of abscess.; This is a request for a brain/head CT.; There is not a suspected or known brain tumor.; The patient currently does not have cancer.; This is not a evaluation for a bone tumor or abnormality of the skull.; This study is being requested for known or suspected brain tumor, mass or cancer.

Approval 70450 CT BRAIN, HEAD

- Patient recently underwent Right retrosigmoid craniotomy with microvasular decompression on 2/7/17. This is a post-op follow-up.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications

Approval 70450 CT BRAIN, HEAD

- Patient states headaches are becoming more frequent in the past year and describes the pain as 8/10 in intensity and the episodes are occurring more frequently and becoming more intense. Patient report having 1-2 headaches per week.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a congenital abnormality.; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniostenosis).; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Approval 70450 CT BRAIN, HEAD

- Patient with a history of cerebral aneurysm, complete carotid artery occlusion, having TIA like symptoms.; This study is being ordered for Vascular Disease.; april 2015; There has been treatment or conservative therapy.; TlAs, difficulty expressing herself, trouble with speech; blood thinners
This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for a previous stroke or aneurysm.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for a previous stroke or aneurysm.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for infection or inflammation.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This is a request for a brain/head CT.; The study is being requested for Hydrocephalus or congenital abnormality.

UNKnown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; UNKnown; It is not known if there has been any treatment or conservative therapy.
Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Approval 70554 Functional MRI Brain
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Approval 71250 CT CHEST, THORAX
A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.

Approval 71550 MRI CHEST
This study is being ordered for follow-up to trauma.; "The ordering physician is a surgeon, pulmonologist, or cardiologist."

Approval 72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; neck pain radiating to L shoulder, arm feels heavy, back pain radiating to back of r leg and burning in r foot, pt has a pacemaker so cannot have mri's; PT, meds

Approval 72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST
This study is being ordered for trauma or injury.; There has been treatment or conservative therapy.;

Approval 72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST
This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Approval 72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.;

Approval 72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST
Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.
Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

abnormal findings on MRI, and surgery planning; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

Access osteocytes.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

bilateral arm and leg numbness and tingling; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/07/2015; There has been treatment or conservative therapy.; neck, mid, and low back pain; surgery and physical therapy, home exercise, anti inflammatory, muscle relaxers, and pain meds

Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

Evaluation of occipital condyle fracture; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

FAX; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

FOLLOW UP TO MVA, ENSURING FUSION HAS TAKEN; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

Increased neck pain. Shooting pain.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

MRI of the cervical spine demonstrates a disk herniation at C3-C4 with moderate canal stenosis. The largest disk herniation is seen at C5-C6 with severe canal stenosis and bilateral neuroforaminal narrowing. There is also a disk herniation at C6-C7 resu;

Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Approval  72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

NECK PAIN, INTERMITTENT SHOULDER AND LEFT ARM PAIN, CERVICAL INJECTIONS BUT PAIN COMING BACK IMD.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

HIS CARE WAS TRANSFERRED FROM WISCONSIN TO ARKANSAS AND WE NEED SCANS TO ESTABLISH CARE FOLLOW UP; This study is being ordered for Congenital Anomaly.; 03/21/2010; There has been treatment or conservative therapy.; HAS A TETHERED SPINAL CORD, NEUROGENIC BLADDER AND BOWEL, HE HAS WEAKNESS IN HIS LEGS, HAS LEAKAGE BETWEEN CATHETERIZATIONS; LIPOMYELOMENINGOCELE REPAIR 2012 IN CHINA

History of intradural extramedullary spinal cord neoplasm. Back pain, right buttock/hip pain that radiates to right lower extremity and creates sharp stabbing pain in right posterior calf.; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.

Long history of back pain and headache. Unfortunately, was involved in an MVA several months ago and her back pain has worsened. MRI of the T-spine revealed a multi-focal spinal cord syrinx worse at the uppermost border of the images at C5/6. I don’t have; This study is being ordered for a neurological disorder.; 11/01/2016; There has been treatment or conservative therapy.; Headache, posterior neck pain, middle back pain, low back pain; Pain medication, physical therapy

Marked weakness of right arm; This is a request for cervical spine MRI; Pre-Operative Evaluation; Surgery is not scheduled within the next 4 weeks.

neck and back pain radiation to the extremities; This is a request for cervical spine MRI; Pre-Operative Evaluation; Surgery is not scheduled within the next 4 weeks.

none; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; 4 out of 5 motor strength.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

None; This is a request for cervical spine MRI; Pre-Operative Evaluation; Surgery is not scheduled within the next 4 weeks.

None; This study is being ordered for a neurological disorder.; 10/16/2016; There has been treatment or conservative therapy.; Weakness in rt leg neck and shoulder pain

S/P lumbar fusion; Rx medication PT x 6 weeks
None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Disc protrusion neck pain left leg pain shoulder and buttock pain LBP; MRI chiropractic care

Paige is here with her mother. She just had her MRI scans done of her brain, cervical, thoracic and lumbar spine. They are anxious to know the results. Subjectively she is unchanged with a host of symptoms that could be a Chiari - related, but also could be a neurological disorder.; This study is being ordered for a neurological disorder.; 2/15/16; There has been treatment or conservative therapy.; Pleasant young lady with history of headaches and mid neck pain as well as postural dizziness and occassional vertigo. Occasional white spots in vision. Ears hurt some times. No tinnitus. Valsalva ? increase headaches. Denies any other symptoms but is "c"; Ativan 1 mg tablet &<x0D; &<x0D; Take 1 tablet(s) PO 30 minutes prior to procedure &<x0D; 05/26/16 prescribed Anthony Capocelli, MD &<x0D; &<x0D; ibuprofen &<x0D; 05/03/16 entered Tana Nowlin &<x0D; &<x0D; Imitrex 25 mg tablet &<x0D; &<x0D; Take one tab po at onset of HA - may take another tab

pain in the back and the neck; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; November 1 2016; There has been treatment or conservative therapy.; back pain / neck pain / etc; physical therapy anti inflamroty / home exercises

Patient complains of neck pain that is chronic but over the last year she has developed right arm pain with N/T and difficulty grasping objects. She has signs of myelopathy on exam. I am concerned about cervical cord compression and we will obtain an MRI.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; Positive Hoffmann's sign on the right. No Hoffmann's sign on the left.

PATIENT HAS HAD A EMG/NCV STUDY AND WAS DETERMINED THAT CERVICAL IMAGING WAS NEEDED.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; PATIENT IS HAVING WEAKNESS IN BILATERAL ARMS WITH PAIN AND TINGLING.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
PATIENT IS ALMOST A YEAR FROM HER CERVICAL FUSION AND IS HAVING INCREASING NECK PAIN WITH SWALLOWING ISSUES AND A BURNING TINGLING FEELING IN BILATERAL HANDS.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

PHYSICAL THERAPY, DECREASED RANGE OF MOTION, BILATERAL GRIP IS REDUCED 4 OUT OF 5; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/24/2016; There has been treatment or conservative therapy.; SEVERE NECK AND THORACIC PAIN RADIATING INTO SHOULDER INTO THORACIC SPINE, HAND AND ARM WEAKNESS; MUSCLE RELAXERS, ANTI-INFLAMMATORY, MEDICATIONS, STERIOD INJECTIONS

Pt coming for follow up of neurofibromatosis; The patient is not presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; Known Tumor with or without metastasis; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.; The last Cervical Spine MRI was performed within the past 10 months.

pt was hit on the head on 1/1/16 by truck railing that has aggravated his condition.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; 4 out of 5

R/O GRE; This study is being ordered for a neurological disorder.; 02/2016; There has been treatment or conservative therapy.; Numbness in neck, right upper extremity weak, and weakness right hand.; Insets and chiro

REQUESTING MRI'S TO REVIEW TO TALK SURGERY.; This study is being ordered for a neurological disorder.; 12/2015; There has been treatment or conservative therapy.; He complains of neck pain that radiates to the bilateral shoulders, bilateral scapula right greater than left. He reports that he has pain that goes down both arms to the elbows right worse than left. He reports bilateral hand numbness involving the first; PATIENT HAS TRIED PHYSICAL THERAPY AND INJECTIONS WHICH HE STATES DID NOT HELP.
REQUESTING STUDY FOR EVALUATION OF INJECTIONS OR SURGERY; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; PATIENT IS HAVING WEAKNESS IN BILATERAL ARMS WITH DECREASED WEAKNESS IN THE FOURTH AND FIFTH DIGITS OF THE LEFT HAND.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Rule out any neurological disorders/disc herniation’s or fractures.; This study is being ordered for a neurological disorder.; Several years ago; There has been treatment or conservative therapy.; Neck pain with headaches radiates into the left shoulder/scapular area. &##x0D; tailbone/low back pain- pain becomes worse and sharp before onset of headaches.; Physical therapy/Massage Therapy and Medicines

stiff 6 months status post extensive anterior cervical disectomy and fusion we will get MRI scan return to clinic continues have numb hands; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Cont w some neck pain, bilateral hand and fingertip numbness persist. Dr Evans told her to f/u up with Dr. Knox. &##x0D; Associated Symptoms: &##x0D; Associated symptoms include numbness. Issue is not related to a known injury. Relationship to injury: This condition ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.
The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.

The patient is experiencing some difficulty with gait and multiple falls. She describes subjective weakness in her legs, however with testing the patient has good strength in all muscle groups. Her gait appears to be shuffling. She also had a positive Rom; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/01/2016; There has been treatment or conservative therapy.; Gait Disturbance; Physical Therapy and at home exercises

The patient is not presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The last spine MRI was performed more than 6 months ago.; Known Tumor with or without metastasis

The patient is presenting new symptoms.; It is not known if the study is for follow up or staging.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; Known Tumor with or without metastasis

The patient is presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; Known Tumor with or without metastasis

The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.
The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.
The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is not being ordered prior to arthroscopic surgery.; "This study is being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."
The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?
The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.
The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy
This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.
This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture); This is a pre-operative study for planned surgery.
Patient had a lumbar epidural steroid injection on 11/23/2016. Since this injection, which made the pain worse, he has been having right hip pain. He expresses pain with external rotation of the hip and had positive Patrick's sign on exam.; This is a requests for a hip MRI.; The hip pain is not due to a recent injury, old injury, Chronic Hip Pain or a Mass.; The request is for hip pain.

This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroids therapy (Prednisone or Cortisone); The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroids therapy (Prednisone or Cortisone); The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.

This is a request for CT Angiography of the Abdomen and Pelvis. This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is not a first follow up study for a post operative complication.; Pre-op or post op evaluation; Patient with continued abdominal pain status post VP shunt placement.; Yes this is a request for a Diagnostic CT.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for MRS.

This is a request for trauma or injury.; There has not been any treatment or conservative therapy.;

Cervical MRI showed mild degenerative changes with straightening of the cervical spine, with mild foraminal stenosis at multiple levels. There is hyperintense signal on sagittal T2 suspicious for possible spinal cord syrinx however this is not seen on the; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; She has noted decreased range of motion in her neck. States it "locks up". Occasionally pain with radiate into her shoulders if she turns or sleeps wrong. She experiences pain into her 3rd, 4th and 5th digits on the left.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Cervical Spine: Appearance: Normal. Tenderness: ROM: Full. Upper Extremity Motor Testing: Strength examination: wrist strength was normal bilaterally, forearm strength was normal bilaterally. elbow strength was normal bilaterally. shoulder strength was normal bilaterally. shoulder strength was no; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; Right arm pain/paresthesia; Issues started about 3+ week(s) ago.; Reason for Visit: Here for f/u p right forearm MRI obtained. Reasonable 40 year-old female who was seen originally on December 22, 2016 for lumbar and leg issues. Patient states that on February; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

FOR TREATMENT EVALUATION; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/2/2015; There has not been any treatment or conservative therapy.; 2 NODULES IN HIS EXTREMITIES, HEADACHES, HISTORY OF FINE MOTOR WEAKNESS; neck pain, into left shoulder; numbness all the way down right arm into fingers.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

numbness; This is a request for cervical spine MRI; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

Radiology Services Denied Not Medically Necessary

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Approval  70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Abnormalities of the eye; Metallic implants such as Pacemakers, ICD (cardioverter/defibrillator), vascular clips, prosthesis or joint replacement is the reason why an MRI is not being considered

Approval  70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications
1. "*ha &\#xD; The patient returns for his headaches. I have not seen him for a year and a half. He never did get the CT brain scan done that I had ordered previously (he has a pacemaker). He has tried propranolol as a preventative which has not been helpful; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.;"; This study is being requested for a headache.

- Convulsions, unspecified convulsion type; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for new onset of seizures or newly identified change in seizure activity or pattern.

- CT of Head is required by radiologist before scheduled Lumbar Puncture can be done; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

- f/u aneurysm; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.;"; This study is being requested for a headache.

- known aneurysm checking the size of aneurysm.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications

- Patient has diffuse limb pain. Muscle and tension discomfort at rest and worse with ambulation. Lower extremity numbness. Patient has worsening gait instability with hyperreflexia, twitch, numbness, and pain. We are looking for a central process such as d; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Multiple Sclerosis; Metallic implants such as Pacemakers, ICD (cardioverter/defibrillator), vascular clips, prosthesis or joint replacement is the reason why an MRI is not being considered

- R/O CVA,IMBALANCE,FALLS,PINS/NEEDLES SENSATION IN FEET,FEET BURNING,TREMORS,DIZZINESS,LOW BACK PAIN,VOICE CHANGED,ATAXIA; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.
This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.; Yes this is a request for a Diagnostic CT

Patient had an MRI Brain, the impression was there may be mixed acute and chronic sinusitis changes in the ethmoid air cells left-sided sphenoid sinus and left maxillary antrum. Prominent changes in the left side of the sphenoid sinus are seen with fluid; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset; Yes this is a request for a Diagnostic CT

Pt with trigeminal neuralgia, facial pain. Pt has had a normal MRI Brain. Referred to specialist who needs CT of Face in order to treat pt.; "This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, osteomyelitis.fct"; This is not a preoperative or recent postoperative evaluation.

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.; Yes this is a request for a Diagnostic CT

This study is being requested for a headache.

This patient has a history of strokes, and also seizure disorder. The patient has had an increase in seizure activity and symptoms, but was accompanied with his twitching to the left side of his face and left arm; This is a request for a brain/head CT.; This study is requested for a new onset of seizures or newly identified change in seizure activity or pattern.

This study is being requested for a headache.

This is a request for a brain/head CT.; This study is being requested for a history of stroke, (CVA) known or follow-up.

This study is being requested for a headache.

This is a request for a brain/head CT.; This study is being requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This study is being requested for a headache.

This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This study is being requested for a headache.
This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT &lt; Enter answer here - or Type In Unknown if No Info Given. &gt;; This study is being ordered for a neurological disorder.; UNKNOWN; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown if No Info Given &gt;

1. *ha &x0D; The patient presents with a history of headaches. She says that several months ago she started having some shooting pains emanating from the occipital region on the right anteriorly. She subsequently over the last 3-4 weeks has developed incr; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).
1. The patient presents with a history of headaches. She says that she has had headaches for over 10 years. She moved from Wisconsin to Arkansas in 2015. She previously qualified for Botox for chronic migraine which she was receiving in Wisconsin; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

1. The patient presents with a history of recurring headaches. She says that she has had these for several years now. She denies any head trauma or any recent fevers or chills. She has tried a number of preventative medications including amitriptilene This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

1. The patient returns for her headaches. Despite being on nortriptyline her headaches have worsened. She says that the pain is more intense and throbbing. Her prior MRI brain order was declined by her insurance company for an unclear reason. This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
1. Dizziness; Onset was 5 years ago. It occurs occasionally. The patient describes it as (an) spinning. Associated symptoms include nausea and vomiting. Additional information: Lasts up to a week at a time, had neg MR IAC's other than vascular loops; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vertigo.; It is unknown why this study is being ordered.

1. Head injury; Risk factors include alcohol use. Additional information: Mercy springfield records in EMR. Reviewed those notes. C/O frontal HA where there is a laceration. Has some cognitive.; Dizziness; Additional information: PT helped s; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

1. Migraine; Pertinent negatives include nausea, phonophobia and photophobia. Additional information: Ocular migraines, had 2 in January. More cognitive issues, no preventatives at this time. Had bad HA with last 2 spells. Lasted longer. On MG, Co; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

38y/o man with reports of persistent headaches, parasthesias, extremity pain, and numbness/tingling in lower abdomen and testicles. MRI L-spine was unremarkable. Demyelinating lesions, cervical radiculopathy or myelopathy are possible, though he has no.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

5 month history of memory loss, multiple sensory complaints, lack of motivation and headaches.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
5 year history of daily migraine. Nausea, vomiting, dizziness, aura, phonophobia, photophobia. Tried Topamax, fioricet, imitrex, Depakote. No prior imaging. Family history of migraines and brain cancer; This request is for a Brain MRI; The study is being requested for evaluation of a headache; The patient has a chronic or recurring headache.

6 MONTH FOLLOW UP, VERTEBRAL ARTERY DISSECTION, ISCHEMIC STROKE, BALANCE PROBLEMS, LEFT INFERIOR CEREBELLAR INFARCT CAUSED BY A LEFT VERTEBRAL ARTERY DISSECTION; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

BAD MIGRAINES; This request is for a Brain MRI; The patient has a chronic or recurring headache.

BROTHER DECEASED WITH BRAIN CANCER, SISTER WITH MIGRAINES, Pleasant 26-year-old female with long-standing history of migraines. She is about 37 weeks pregnant and is due around the third week in March. Sunday she felt as if she was coming down with a cold; This request is for a Brain MRI; The study is being requested for evaluation of a headache; The patient has a chronic or recurring headache.

checking for new lesions; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; The patient has dizziness; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms; This study is being ordered for Multiple Sclerosis; The patient has new symptoms.

chronic migraine headaches, daily basis, speech difficulties from her headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache; The headache is described as chronic or recurring; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Clinical Information: History / Dx: Z82.49 Family history of aneurysm; History / Dx: Help visit she was talking inside a 10 can. He felt lightheaded. Positive dizziness. Hearing loss more in her right ear than the left; When she was talking with; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; This study is being ordered for an aneurysm; This study is being ordered as a screening for an aneurysm or AVM (arteriovenous malformation).
Compare to previous studies for progression of MS; This study is being ordered for Inflammatory/ Infectious Disease.; 02-2015; There has been treatment or conservative therapy.; pain, generalized weakness, confirmed MS; Rebif, Copaxone, and pulse steroids.

Demyelinating disease with both intracranial and spinal cord lesions. Repeat imaging in January showed reduced swelling of the spinal cord at the cervical thoracic junction. There was evidence of a new T11 lesion in the thoracic cord. NMO titer is pend; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; Pt. continues to have intense pain in right upper extremity which has been ongoing since his original exacerbation involving the cervical cord.; Pt. was given IV Solu-Medrol in hospital. He is currently on vitamin D, twice a day. He is currently on Dilantin and Keppra. Previously, took Neurontin, but was not able to tolerate.

Described having headaches 3-4 times a week and sometimes they can last for 3 days. She has nausea, photophobia, neck pain, and problems sleeping with her headaches. History of seizures, diabetes, and gastroparesis; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient does not have HIV or cancer.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

Description; Multiple sclerosis (G35).; This new tickling sensation in the lower abdomen could just be a dermatologic or even GI symptom, but with no visible rash or other GI symptoms, it is more likely a symptom of her MS. It could represent a new lower; This study is being ordered for a neurological disorder.; 04/09/2016; There has been treatment or conservative therapy.; PAINFUL TRUNK PARESTHESIAS,TICKLING SENSATION BELOW UMBILICUS,BILAT.; This new tickling sensation in the lower abdomen could just be a dermatologic or even GI symptom, but with no visible rash or other GI symptoms, it is more likely a symptom of her MS. ; Woman with MS diagnosed 1998 with left optic neuritis and abnormal MRI. I haven't been able to get CSF results, or any old records. Also follows with Dr. Archer in Little Rock. Didn't tolerate rebif. On Avonex and Ampyra for years.

EEG was normal, seizures started at age of 25, no history of head trauma or seizures.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; It is not known if there has been a previous Brain MRI completed.

seizures free til last week now seizures with confusion and forgetfulness; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The results of the previous brain MRI are unknown.

She has had seizures since she was 12 and now they are getting a lot worse. We are wanting the MRI to see why they are getting worse.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; It is not known if there has been a previous Brain MRI completed.

She has had seizures since she was 12 and now they are getting a lot worse. We are wanting the MRI to see why they are getting worse.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; It is not known if there has been a previous Brain MRI completed.

She is a 27-year-old young woman, mother of 3 with a history of memory issues and paranoia. As previously noted, she has issues processing information, becomes agitated easily is distrustful of individuals. Symptoms began a couple of years ago. At that; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.

She is having diplopia and left eye ptosis. She stated that her vision problems started in March. Also complained of occasional cramping and weakness in her legs along with shortness of breath. During my exam patient had difficulty looking up with her; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; She is having diplopia and left eye ptosis. During my exam patient had difficulty looking up with her left eye and the ptosis is greater on the left eye than the right.; It is not known if there has been any treatment or conservative therapy.; Diplopia and left eye ptosis. During my exam patient had difficulty looking up with her left eye and the ptosis is greater on the left eye than the right.

She is having very bad headaches which the pain feels like pressure in her neck and it is tight. Also she has facial numbness; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient does not have HIV or cancer.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.
She's been started on gabapentin 300 3 times a day. She's been on that for 2 weeks with no help. She's also been on Xanax 0.5 mg 3 times a day for anxiety. Also has tried Flexeril at some point in the past and is on Wellbutrin. She never had any fever. This study is being ordered for a neurological disorder. 1 month; There has been treatment or conservative therapy; ripping pain in her triceps. She also has weakness in the left upper extremity. She's had "ping" of pain throughout her body. Describes pain in her thoracic spine area under the breast or in the left or right flank. She has numbness episodes which move; patient has had cervical spine fusion. It was thought that this was the root of her symptoms. She has also been on a medication.

Short term memory loss. Patient stated she has had problems with her short term memory for a while but it has gotten worse recently. Stated she will sometimes zone out in the middle of a conversation with someone and stare off into space. Complained of; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

SINCE THIS IS A DOUBLE STUDY, IT WILL AUTOMATICALLY GO TO REVIEW. WE WILL JUST FAX NOTES.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; SINCE THIS IS A DOUBLE STUDY, IT WILL AUTOMATICALLY GO TO REVIEW. WE WILL JUST FAX NOTES.; There has been treatment or conservative therapy.; SINCE THIS IS A DOUBLE STUDY, IT WILL AUTOMATICALLY GO TO REVIEW. WE WILL JUST FAX NOTES.; SINCE THIS IS A DOUBLE STUDY, IT WILL AUTOMATICALLY GO TO REVIEW. WE WILL JUST FAX NOTES.; Stated headache hurts when she lays down and when she's standing up. Also complained of tinnitus and dizziness as well.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

Tension headaches, memory difficulty, depression and dementia; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

The headaches began approximately 3 years ago and are characterized by a dull aching and throbbing and a pulsating pain that starts in the bitemporal area then radiates to the whole head The pain tends to be 8/10 in intensity and the episodes are occurring; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
The patient clearly has symptoms consistent with a closed head injury. She has never had an MRI, according to her. This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; It is not known if there are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head occurred more than 1 week ago.

The patient is a 54-year-old man who comes in with memory loss and periods of uncontrolled shaking. He was having great difficulty with short-term memory. He has COPD and emphysema; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures.; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

The patient presents with a history of headaches which began in 2013 when he had a mountain bike accident. He said that he flipped over on his bike and hit his head in the right frontal area. He says he was somewhat dazed afterwards and then began having headaches. This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Think patient has optic neuritis. She has problems with blurred vision and seeing “floaters” in front of her right eye. She also has headaches.; This study is being ordered for a neurological disorder.; Symptoms start in 2008; There has been treatment or conservative therapy.; Patient explained that she has problems with blurred vision and seeing “floaters” in front of her right eye.; Patient is taking gabapentin 300mg TID, Folic acid, Vitamin b12, Celexa 40 mg daily, Tramadol 50mg PRN, and hydrocodone 10mg BID.
this is a double study for ambetter and will automatically go to review. will just fax notes.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; this is a double study for ambetter and will automatically go to review. will just fax notes.; There has been treatment or conservative therapy.; this is a double study for ambetter and will automatically go to review. will just fax notes.; this is a double study for ambetter and will automatically go to review. will just fax notes.

this is a double study requested which means automatic review. will just fax notes.; This study is being ordered for Congenital Anomaly.; 2003; There has been treatment or conservative therapy.; History / Dx: Man with left temporal AVM discovered in 2003, presenting with a seizure, now status post coiling. Stable on follow-up at UAMS. Continues with occasional seizures every couple of years, either staring spells, nonsense speech, or rare GTC; History / Dx: Man with left temporal AVM discovered in 2003, presenting with a seizure, now status post coiling. Stable on follow-up at UAMS. Continues with occasional seizures every couple of years, either staring spells, nonsense speech, or rare GTC

This is a follow-up MRI to compare to one done 12/15/16.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; It is not known if there are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; It is not known if there a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient’s life (within the last 3 months).

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has undergone treatment for multiple sclerosis.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was abnormal.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; It is not known if there are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There is a family history (parent, sibling, or child of the patient) of AVM (arteriovenous malformation).
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There a family history (parent, sibling or child of the patient) of AVM arteriovenous malformation.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient’s visual acuity.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for trauma or injury.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient's visual acuity.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for infection or inflammation. (1)

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for Multiple Sclerosis.; The patient is taking Tysabri (Natalizumab). (9)

This request is for a Brain MRI; This study is being ordered as a 12 month annual follow up.; This is a routine follow up. (9)

This request is for a Brain MRI; This study is being ordered for Parkinson's disease.; This study is being ordered for a new diagnosis of Parkinson's. (1)

This request is for a Brain MRI; This study is being ordered for Parkinson's disease.; This study is being ordered for a new patient to this office. (2)

This request is for a Brain MRI; This study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has been a change in seizure pattern or a new seizure. (22)

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months. (2)

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months. (1)
To evaluate for intracranial abnormality.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Tremor dystonia syndrome upper right extremity.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.

The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

tremors increased and worsening; internal tremors; anxiety and not feeling well; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

UNKNOWN; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing fatigue or malaise.
unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.

unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The study is being ordered for a neurological disorder.; 02/23/2017; There has been treatment or conservative therapy.; Syncope and dizziness; EEG.

Unknown; This request is for a Brain MRI; The study is being ordered for a neurological disorder.; August 2016; There has been treatment or conservative therapy.; Blurred vision, short term memory loss, headache, neck pain, stiffness, lower extremity weakness; Medications

unknown; This study is being ordered for a neurological disorder.; for about 6 years; There has been treatment or conservative therapy.; Pt has MS and symptoms are getting worse; medications

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; sensory loss chronic fatigue, tremor in right hand, instability, debilitating pelvic pain found in November.

We want to rule out benign or malignant mass of the neck that may possibly be causing his discomfort. Malignant mass in the neck in the area of the lymph node may indicate metastasis which may contribute to the worsening of the headaches.; This study is being ordered for a neurological disorder.; November 2016; There has been treatment or conservative therapy.; Severe headaches aggravated by stress, light, and odors. Also, note a swelling to the Lt lateral cervical chain area which he expressed concern about. At times he reports difficulty swallowing.; OTC and Rx pain medications, activity modification, and therapy (physical).

will just fax notes; This study is being ordered for trauma or injury.; 01/08/2015 FIRST OFFICE VISIT; There has been treatment or conservative therapy.; will just fax notes; will just fax notes.
Approval 71250 CT CHEST, THORAX

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

Myasthenia gravis evaluation; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

r/o sarcoidosis; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

; This study is being ordered for a neurological disorder.; Right arm pain/numbness/weakness, C8 and T1 distributions over the past 2-3 weeks.; There has been treatment or conservative therapy.; Numbness/tingling/weakness at C8-T1; She tried a wrist splint which made it worse. Has been to physical therapy over the past week without relief, physical therapist mentioned concerns of thoracic outlet syndrome.

Approval 71550 MRI CHEST

None; This study is being ordered for follow-up to trauma.; "The ordering physician is not a surgeon, pulmonologist, or cardiologist."; It is not known if there is radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; This is a request for a chest MRI.

Approval 71550 MRI CHEST

R/O ca; This study is NOT being ordered for a Work-up for Suspicious Mass, Known Tumor, Known or Suspected Inflammatory Disease, etc...; This is a request for a chest MRI.

Approval 71550 MRI CHEST

The patient presents with a history of having had an ATV accident while vacationing in Mexico in May 2016. Apparently she was air fax back to the US were was discovered that she had a number of broken ribs and a partially collapsed lung. She noticed aft; This study is being ordered for follow-up to trauma.; "The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; This is a request for a chest MRI.

Approval 71550 MRI CHEST

This is a request for a chest MRI.

Approval 71550 MRI CHEST

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Abnormal gait.

Approval 72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Abnormal gait.
The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Radiculopathy documented on EMG or nerve conduction study.

The patient is a 76-year-old woman who comes in with pain. The patient is a very poor historian. I believe that her chief complaint is that she has pain in her left hand intermittently about four to five times a day. It is a shocking pain which starts in; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI. This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to follow-up surgery or fracture within the last 6 months.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; There is a reason why the patient cannot have a Cervical Spine MRI.

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; There has been a supervised trial of conservative management for at least 6 weeks.; "The caller indicated that the patient is not experiencing or presenting symptoms of Abnormal Gait, Lower Extremity Weakness, Asymmetric Reflexes, Cauda Equina Syndrome, Bowel or Bladder Dysfunction, New Foot Drop, or Radiculopathy."; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.; Yes this is a request for a Diagnostic CT

There has been treatment or conservative therapy.; Patient is having gate disturbance,
migraine, and nausea; Medication pain in his back, moving heavy objects and something popped in his back.; This study
is being ordered for trauma or injury.; 2015; There has not been any treatment or
conservative therapy.; clasp-knife spasticity

Patient has pain, burning, and numbness in her arms and hands. Stated "I cant do
anything because my hands are so numb and burning." EMG on 07/08/2016 showed
evidence of sensory neuropathy.; This is a request for cervical spine MRI; It is not
known if there is laboratory evidence of osteomyelitis.; Known or Suspected Multiple
Sclerosis, Infection or abscess; It is not known if there is laboratory or x-ray evidence
of meningitis.; It is not known if there is laboratory or x-ray evidence of a paraspinal
abscess.; It is not known if there is laboratory or x-ray evidence of an infected disc,
septic arthritis, or "discitis".

Patient is experiencing new intractable posterior headache with cough and sneeze
also has neck pain with paresthesias in extremities.; This study is being ordered for a
neurological disorder.; 12/20/2016; There has not been any treatment or conservative
therapy.; Intractable posterior headache and extremity numbness also neck pain.
Patient is having distal limb sensory changes with numbness, tingling, and diffuse
weakness and fatigue, with diffuse pain and gait instability. Patient also has vertigo.
Patient also has had an MRI of Brain that was normal.; This is a request for cervical
spine MRI; There is no laboratory or x-ray evidence of osteomyelitis.; Known or
Suspected Multiple Sclerosis, Infection or abscess; There is not laboratory or x-ray
evidence of meningitis.; There is not laboratory or x-ray evidence of a paraspinal
abscess.; There is not laboratory or x-ray evidence of an infected disc, septic arthritis,
or "discitis".

Patient is having muscle atrophy and weakness. Patient stated his symptoms have
been going on for about a year and a half. Stated that "my hands are so weak I cant
hold a pen or write." Complained of numbness in his hands and neck pain. Described
the n; This study is being ordered for something other than: known trauma or injury,
metastatic disease, a neurological disorder, inflammatory or infectious disease,
congenital anomaly, or vascular disease.; Patient is having muscle atrophy and
weakness. Patient stated his symptoms have been going on for about a year and a
half. Stated that "my hands are so weak I cant hold a pen or write." Complained of
numbness in his hands and neck pain. Described the n; There has not been any
treatment or conservative therapy.; Muscle atrophy and weakness and numbness and
neck pain and hand weakness
possible Multiple sclerosis; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt is a 41/F with a 1.5 year history of paresthesias involving the L arm and leg, as well as the L scalp. Exam shows patchy sensory loss over b/l upper and lower ext. no spinal level. No APD on exam, no papilledema noted. History is concerning for possible Multiple sclerosis; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture. 1

dr with pain in the neck and lower back that is affecting her daily living, pt dropping items, pt unable to sleep, pt with difficulty concentrating, difficulty caring for herself.; This study is being ordered for a neurological disorder.; several years; There has been treatment or conservative therapy.; per neurologic exam: pt has weakness in biceps, triceps, shoulder abduction, decreased sensation in bilateral upper extremities; Physical therapy, message therapy, chiropractic care and multiple medications including gabapentin, Lyrica, NSAIDs, Cymbalta and trazodone. 1

r/o demyelinating disease; This study is being ordered for a neurological disorder.; 10/2016; There has been treatment or conservative therapy.; weakness of both arms and legs, pain in eyes, ringing in ears, muscle spasms, constant headaches, neck and back pain, dizziness, problems swallowing; medications 2

R/o MS; This study is being ordered for a neurological disorder.; 12/13/16; There has been treatment or conservative therapy.; Numbness of extremities Mild hyporelexia 1

Neck pain; PT Advil Norco 1

R/O:CVA,MS; This study is being ordered for a neurological disorder.; 12/11/2016; There has been treatment or conservative therapy.; weakness, pain on left side of body severe, variable jolts of neuropathic pain all over, tremors left upper limb; trezolam, oxycodone-acetaminophen, gabapentin, nortriptline, oxycontin, jardiance, clon 1
Radiculopathy, cervical region (M54.12); She is having more neck problems and more tingling of her hands and arms. She is losing her grip as well. She has known cervical spinal stenosis at C5/6 in 2012 so she definitely needs a repeat MRI of her C-sp; This study is being ordered for a neurological disorder.; Severity level is moderate-severe. The problem is worsening. It occurs persistently. Location of pain is lower back. There is no radiation of pain. The patient describes the pain as an ache and discomforting. Context: herniated disc 2011.; There has been treatment or conservative therapy.; Back pain; Severity level is moderate-severe. The problem is worsening. It occurs persistently. Location of pain is lower back. There is no radiation of pain. The patient describes the pain as an ache and discomforting.

Reportedly in the past, he has had events of generalized convulsion and unresponsiveness with whole-body stiffening formulated as epileptic in nature. There might also be associated head movement from side to side. Reportedly he has been "shocked" For car; This study is being ordered for a neurological disorder.; February 2017; There has not been any treatment or conservative therapy.; tremors all over the body with inability to move his legs.

Rule Out ALS; This study is being ordered for a neurological disorder.; 2016; There has not been any treatment or conservative therapy.; problem speaking.

Severe neck pain, hand weakness, lower extremity weakness, myalgia, rule out myelopathy; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Hand weakness, lower extremity weakness, severe neck pain lumbar pain; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
She's been started on gabapentin 300 3 times a day. She's been on that for 2 weeks with no help. She's also been on Xanax 0.5 mg 3 times a day for anxiety. Also has tried Flexeril at some point in the past and is on Wellbutrin. She never had any fever. This study is being ordered for a neurological disorder.; 1 month; There has been treatment or conservative therapy.; ripping pain in her triceps. She also has weakness in the left upper extremity. She's had "ping" of pain throughout her body. Describes pain in her thoracic spine area under the breast or in the left or right flank.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.

checking for bulging disk or spurs; This study is being ordered for a neurological disorder.; unknown; It is not known if there has been any treatment or conservative therapy.; right leg numbness, pain in thoracic area all the way up to neck, hurts when she stands up

Compare to previous studies for progression of MS; This study is being ordered for Inflammatory/ Infectious Disease.; 02-2015; There has been treatment or conservative therapy.; pain, generalized weakness, confirmed MS; Rebif, Copaxone, and pulse steroids.

Demyelinating disease with both intracranial and spinal cord lesions. Repeat imaging in January showed reduced swelling of the spinal cord at the cervical thoracic junction. There was evidence of a new T11 lesion in the thoracic cord. NMO titer is pend; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; 02-2015; There has been treatment or conservative therapy.; pain, generalized weakness, confirmed MS; Rebif, Copaxone, and pulse steroids.

Pt. continues to have intense pain in right upper extremity which has been ongoing since his original exacerbation involving the cervical cord.; Pt. was given IV Solu-Medrol in hospital. He is currently on vitamin D, twice a day. He is currently on Dilantin and Keppra. Previously, took Neurontin, but was not able to tolerate.

History / Dx:  M54.9 Spinal pain; History / Dx:  severe spinal pain. It’s been going on for more than 10 years but has gotten worse especially over the past 1 year. The pain is extremely debilitating. It hurts to get out of bed. She really cannot do; This study is being ordered for a neurological disorder.; 11/30/2016; There has been treatment or conservative therapy.; Worsening severe spinal pain noted, severe intractable scoliosis, sensory disturbance legs, history of depression, dizziness, unsteadiness, positive joint pain, cervical, thoracic and lumbar pain; Medications: // tylenol-codeine no 3, 01/30/2017 gabapentin, // xanax, // seroquel, // tylenol, 12/07/2014 klonopin, 07/16/2014 ibuprofen, 07/03/2014 tramadol hcl, 07/03/2014 prednisone

Mr. Allan R White is a 23 y.o. male with a strong family history of Huntington Disease, suspected to have the condition. ALS is also suspected, but he doesn’t quite have the signs of severe peripheral neuropathy or upper motor neuron signs. There is a pa; This study is being ordered for a neurological disorder.; 08/08/2016; There has not been any treatment or conservative therapy.; falling, hand pain/dropping items, balance problems, swallowing difficulty, speech problems and choking. Pain in his back, moving heavy objects and something popped in his back.; This study is being ordered for trauma or injury.; 2015; There has not been any treatment or conservative therapy.; clasp-knife spasticity
possible multiple sclerosis; This is a request for a thoracic spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt is a 41/F with a 1.5 year history of paresthesias involving the L arm and leg, as well as the L scalp. Exam shows patchy sensory loss over b/l upper and lower ext. no spinal level. No APD on exam, no papilledema noted. History is concerning for possible multiple sclerosis; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

r/o demyelinating disease; This study is being ordered for a neurological disorder.; 10/2016; There has been treatment or conservative therapy.; weakness of both arms and legs, pain in eyes, ringing in ears, muscle spasms, constant headaches, neck and back pain, dizziness, problems swallowing; medications

R/O: MS, SYRINGE; This study is being ordered for a neurological disorder.; 02/15/2017; There has been treatment or conservative therapy.; gabapentin

Reportedly in the past, he has had events of generalized convulsion and unresponsiveness with whole-body stiffening formulated as epileptic in nature. There might also be associated head movement from side to side. Reportedly he has been "shocked" For car; This study is being ordered for a neurological disorder.; February 2017; There has not been any treatment or conservative therapy.; tremors all over the body with inability to move his legs

rule Out ALS; This study is being ordered for a neurological disorder.; 2016; There has not been any treatment or conservative therapy.; problem speaking

SEVERE BACK PAIN, SEVERE NECK PAIN, RULE OUT MYELOPATHY, DROPPING THINGS, LOW EXTREMITY WEAKNESS, FIBROMYALGIA, MYALGIA, FAILED PHYSICAL THERAPY, HAND WEAKNESS; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; SEVERE BACK PAIN, SEVERE NECK PAIN, DROPPING THINGS, LOW EXT. WEAKNESS, RULE OUT MYELOPATHY, FIBROMYALGIA, HAND WEAKNESS, FAILED PHYSICAL THERAPY; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.
She’s been started on gabapentin 300 3 times a day. She’s been on that for 2 weeks with no help. She’s also been on Xanax 0.5 mg 3 times a day for anxiety. Also has tried Flexeril at some point in the past and is on Wellbutrin. She never had any before; This study is being ordered for a neurological disorder; 1 month; There has been treatment or conservative therapy; ripping pain in her triceps. She also has weakness in the left upper extremity. She’s had “ping” of pain throughout her body. Describes pain in her thoracic spine area under the breast or in the left or right flank. She has numbness episodes which move; patient has had cervical spine fusion. It was thought that this was the root of her symptoms. she has also been on a medication.

The patient does have neurological deficits.; It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient has had increasing pain which began around his navel and then spread around to his back bilaterally. It then spread down to his knees. He feels like he is sunburned. It hurts for anything to touch these areas at all. It hurts to have his pa; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of asymmetric reflexes.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

Approval

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does not have any neurological deficits.; The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; LUMBAR RADICULOPATHY, SOMEONE JUMPED ON PTS BACK AND HADSEN HISHERNIATED DISC, WORSENING SEVERE MID BACK, PAIN MANAGEMENT, PHYSICAL THERAPY IS MAKING HIS CONDITION WORSE.

these are repeat images so that we can ensure the patient is recovering as according to normal standards.; This study is being ordered for a neurological disorder.; July 2016; There has been treatment or conservative therapy.; sudden onset of LE weakness, loss of bladder control, tremor; patient was treated acutely in the hospital, physical therapy has been done as well as medication management.

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

This is a request for a thoracic spine MRI.; It is not known if there is evidence or tumor or metastasis on bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.; Found mass on MRI without contrast.

This is a request for a thoracic spine MRI.; Neurological deficits.; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; Diminished sensation from right T4 through right T12.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

1
This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; left hemiparesis, weak bilaterally, upper and lower; give away, positive tremors left upper limb, left side of body; severe pain, interferes with daily activities, variable jolts of neuropathic pain all over body, feels like getting Tased + squeezing thoraco-abdomi; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; Patient continues to have significant back pain and leg pain with weakness in his legs. He was seen by Dr. Phillips who recommended patient continue physical therapy for conditioning and strengthening in his legs since he may have component of neuropathy; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; she can't stand up from a squat. Subjectively reduced light touch in the toes and along the thoracic spine.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of asymmetric reflexes.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of bowel or bladder dysfunction.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; WEAKNESS OF LOWER EXTREMITY, ARM AND LEG WEAKNESS, ABNORMAL BRAIN MRI, VISUAL DISTURBANCE, HEADACHES, WHITE MATTER CHANGES, R/O MS, MYELOPATHY; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; Worsening numbness in her chest, arms, legs, and extremities that also occurs in her abdomen and face. The patient continues to complain primarily of chest parenthesis. She also has intermittent pain in the upper back. Tingling, weakness, and numbness in; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.
This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to Neurological deficits.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

This is a request for a thoracic spine MRI.; There is laboratory or x-ray evidence of osteomyelitis.; Known or Suspected Infection or abscess

unknown.; This is a request for a thoracic spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; MS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

unknown.; This is a request for a thoracic spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; previous MRI t spine from 9/13/2012 showed a disc bugle at t4-t5 need new mri for comparison; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

unknown; This study is being ordered for a neurological disorder.; for about 6 years; There has been treatment or conservative therapy.; Pt has MS and symptoms are getting worse; medications

Reportedly in the past, he has had events of generalized convulsion and unresponsiveness with whole-body stiffening formulated as epileptic in nature. There might also be associated head movement from side to side. Reportedly he has been "shocked" For car; This study is being ordered for a neurological disorder.; February 2017; There has not been any treatment or conservative therapy.; tremors all over the body with inability to move his legs.

SEVERE LOW BACK PAIN, SEVERE NECK PAIN, DROPPING THINGS, WEAKNESS LOW EXTREMITY, R/O MYELOPATHY, OVER 6 WEEKS PHYSICAL THERAPY WHICH FAILED; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; SEVERE LOW BACK PAIN, SEVERE NECK PAIN, DROPPING THINGS, LOW EXTREMITY WEAKNESS, RULE OUT MYELOPATHY, FIBROMYALGIA, MYALGIA; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.

The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s).
unknown; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; pt had a TP injection and now has gait problems; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; EMG evaluation of the L2-S2 myotomes shows a chronic denervation; pattern as can be seen in stenosis or DJD of the L/s spine.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

unknown; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient ankle and extension of toes , sensor distally of all four extremity.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

unknown; This study is being ordered for a neurological disorder.; for about 6 years; There has been treatment or conservative therapy.; Pt has MS and symptoms are getting worse; medications

He has had an EMG and NCV done by Dr. Chesser on 09/07/19 which showed what is most likely a left sciatic nerve injury. The EMG suggested a possible radiculopathy as well, but an MRI of the lumbar spine done on 09/12/16 was negative for nerve root compromise; This study is being ordered for a neurological disorder.; Since about 2015; There has been treatment or conservative therapy.; Burning sensation in the femoral artery distribution on the left as well as numbness in his who left leg from the knee down.; Gabapentin 8000 mg p.o. t.i.d.

PT HAS PAIN IN THIGH WITH NUMBNESS AND TINGLING BILATERAL ANTERIOR THIGHS WITH WEAKNESS AND SOME CRAMPING; TO ASSESS FOR FEMORAL NERVE COMPRESSION OR ENHANCEMENT; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

This is a request for a Pelvis MRI.; The request is for suspicion of joint or bone infection.

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?
The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

Unknown; This study is being ordered for trauma or injury.; Oct 2016; There has been treatment or conservative therapy.; Pain in neck and tremor in upper extremity; Medications

He has had an EMG and NCV done by Dr. Chesser on 09/07/19 which showed what is most likely a left sciatic nerve injury. Approval 74176 CT ABD & PELVIS W/O CONTRAST
This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.; Abnormal pap smear; hx of cancer; 6mos f/u; Yes this is a request for a Diagnostic CT

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; There is not a known tumor.; There is not a known abdominal infection.; patient has clinical endometriosis and has had blood in the stool during her menstrual cycle—possibly need a colonoscopy
This is a request for Breast MRI. This study is being ordered as a screening examination for known family history of breast cancer. There are NOT benign lesions in the breast associated with an increased cancer risk. There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).1

This is a request for Breast MRI. This study is being ordered for known breast lesions. There are NOT benign lesions in the breast associated with an increased cancer risk.1

This is a request for Breast MRI. This study is being ordered as a screening examination for known family history of breast cancer. It is not known if this is an individual who has known breast cancer in the contralateral (other) breast. It is unknown if there are benign lesions in the breast associated with an increased cancer risk. There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).4

This is a request for Breast MRI. This study is being ordered as a screening examination for known family history of breast cancer. No, this is not an individual who has known breast cancer in the contralateral (other) breast. No, this is not a confirmed breast cancer. No, this patient does not have axillary node adenocarcinoma. No, there are no anatomic factors (deformity or extreme density) that make a simple mammogram impossible. It is unknown if there are benign lesions in the breast associated with an increased cancer risk. There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).1

Abnormal mammogram; This is a request for Breast MRI. This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.1
Life time Risk=26.9% using the Tyrer Kusik Risk Model. Patient’s mother was diagnosed with breast cancer at the age of 60; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; No, there are no anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

Patient’s mother was diagnosed with breast cancer at age 56 and again at age 57. Deceased at age 58. Patient has an estimated lifetime risk of 21.8%; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

PT also had a breast cancer risk assessment.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; It is unknown if there is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

Patient’s mother was diagnosed with breast cancer at age 56 and again at age 57. Deceased at age 58. Patient has an estimated lifetime risk of 21.8%; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

PT had lesions in breast only identified on Breast MRI. MRI biopsy was performed and pathology was benign. 6 month follow up MRI is recommended to document stability of lesion.; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.

sis diagnosed at 49 and maternal aunt age of 60 for breast cancer, risk assessment 21.3%; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This patient has bilateral papilledema. We need to rule out a mass or lesion.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head occurred more than 1 week ago.

Evaluate prior to Botox injection; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; October 2016; There has not been any treatment or conservative therapy.; Patient has esotropia with right more than left

EVALUATION; This study is being ordered for Congenital Anomaly.; MAY 2015; There has not been any treatment or conservative therapy.; MIGRAINE, DIFFERENCE BETWEEN EYES

hx of thyroid cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Mild Papilledema OS greater than OD-suspect mild Pseudotumor Cerebri due to adapalene gel 0.1 % for acne treatment. Has gained 12 lbs in past 6 mos.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

n/a; This study is being ordered for a neurological disorder.; 03/24/2017; There has not been any treatment or conservative therapy.; blurry vision in right eye, eye pain behind right eye, sharp pain, vision has gotten worse in past two weeks, high blood pressure, tingling in right hand.

none; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
Patient has bilateral optic atrophy and bi-temporal vfd; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient has bilateral optic atrophy and bi-temporal vfd; It is not known if there has been any treatment or conservative therapy.; Patient has bilateral optic atrophy and bi-temporal vfd

r/o Chiasmal mass lesion; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

recent onset of double vision also with large esotropia needs MRI to evaluate for changes/cause; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.

The Pt has headache, right eye pupil is dialated, sluggish, trouble comprehending. Pt had head trauma. Pt is sensitive to light; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has fatigue or malaise; It is unknown why this study is being ordered.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient does not have a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; The doctor notes on exam that the patient has delirium or acute altered mental status.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.
This request is for a Brain MRI; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The study is NOT being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis);; There are not recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; Surgery is not planned within the next 4 weeks.; An operation for shunt placement (for brain fluid drainage) is being considered or a non-metalic shunt is not functioning correctly.; The patient has a congenital abnormality.

unknown; This study is being ordered for Congenital Anomaly.; since birth; There has not been any treatment or conservative therapy.; abnormal pupil

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/13/2017; There has not been any treatment or conservative therapy.; double vision; ha;

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

"The ordering physician IS an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.; Yes this is a request for a Diagnostic CT

"Enter answer here - or Type In Unknown If No Info Given. "; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Birth; There has not been any treatment or conservative therapy.; Unequal pupils

This is a request for a Stress Echocardiogram.; To evaluate the heart prior to non-cardiac surgery.; It is not known if the member has known or suspected coronary artery disease.

Patient has severe and persistent neck pain radiating into both upper extremities. Bilateral hand numbness and tingling. Range of motion in fingers, wrists, elbows and shoulders are guarded and extremely painful. Gentle motion of her neck is very painful; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; This patient does not have new or changing neurologic signs or symptoms; The patient has NOT had back pain for over 4 weeks.

Patient has very limited motion of the shoulder. Has history of cervical spine stenosis with past surgical intervention. Cannot tell if it is possibly all rotator cuff or all nerve impingement without MRI scans; This study is being ordered for a neurological disorder.; 8/11/2015; There has been treatment or conservative therapy.; Severe pain in neck and shoulder. Numbness in the arm, hands, fingers and weakness in the whole body; Physical therapy, medications and injections

PRE-OPERATIVE FOR SCOLIOSIS; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2016; There has been treatment or conservative therapy.; PROGRESSIVELY WORSEN SPINAL CURVATURE; BRACING

r/o stenosis, disc disease; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/1/2013; There has been treatment or conservative therapy.; Pain and radiculogy, numbness and tingling, unable to sit stand or walk; medication and physical therapy

Right paramuscular tenderness of the cervical spine. Weakness with right upper extremity. Intermittent radiculopathy right upper extremity. Painful neck ROM. Trapezius tenderness to palpation.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Right paramuscular tenderness of the cervical spine. Weakness with right upper extremity. Intermittent radiculopathy right upper extremity. Painful neck ROM. Trapezius tenderness to palpation.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Severe pain in the lower back, middle back and neck with radiculopathy to the hips, thighs, knees and shoulders. Numbness in the right leg and right pain; This study is being ordered for a neurological disorder.; 1/1/15; There has been treatment or conservative therapy.; Severe pain in the lower back, middle back and neck with radiculopathy to thighs, hips, knees and shoulders. Patient also has numbness in the right leg and right pain; Pt has failed physical therapy and steroid injections
Severity of the problem is incapacitating. Patient has decreased mobility, decreased range of motion, hand clumsiness and spasms. Cervical films show severe stenosis of the foramen. She is losing function. She has C6 radicular pattern and is totally inc; This is a request for cervical spine MRI; Pre-Operative Evaluation; Surgery is not scheduled within the next 4 weeks.

She is having new neck pain and numbness in L hand SF. She underwent an ACDF C5-6 by Dr. McCarthy in Jan 2016. She did well after surgery but now has this new neck pain and numbness for the last 2 months. She feels tingling in L hand SF when she turns her; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

some advanced osteoarthritic changes about C5-7. She's tender about the neck and clinical exam. She also has some radicular symptoms down the left upper extremity with numbness appreciated in the index and long finger. She's been symptomatic for a year. S; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; some advanced osteoarthritic changes about C5-7. She's tender about the neck and clinical exam. She also has some radicular symptoms down the left upper extremity with numbness appreciated in the index and long finger. She's been symptomatic for a year. S; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

This study is being ordered for trauma or injury.; Enter date of initial onset here - or Type In Unknown If No Info Given; It is not known if the patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Enter answer here - or Type In Unknown If No Info Given. This study is being ordered for trauma or injury.; Enter date of initial onset here - or Type In Unknown If No Info Given; It is not known if the patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.
The study requested is a Lumbar Spine MRI. Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; INCREASED RADICULOPATHY AND WEAKNESS IN THE LEFT LOWER EXTREMITY, PHYSICAL THERAPY HAS NOT IMPROVED SYMPTOMS, EMG/Nerve root impingement.

The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.

The patient does have new or changing neurologic signs or symptoms; There is weakness; symptoms include, Weakness in bilateral legs, decreased mobility, gait disturbance, spasms, tingling in bilateral legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.

The patient does have new or changing neurologic signs or symptoms; There is weakness; tender midline right low back with tingling right lateral thigh with numbness; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction; It is not known if the patient has a new foot drop; It is not known if there is x-ray evidence of a lumbar recent fracture.

The patient does have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more then once for these symptoms; The physician has directed conservative treatment for the past 6 weeks; The patient has not completed 6 weeks of physical therapy; The patient has been treated with medication; The patient was treated with oral analgesics; The patient has not completed 6 weeks or more of Chiropractic care; The physician has not directed a home exercise program for at least 6 weeks.

The study requested is a Lumbar Spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms; It is not known if there is weakness or reflex abnormality; The patient does not have new signs or symptoms of bladder or bowel dysfunction; It is not known if the patient has a new foot drop; There is not x-ray evidence of a recent lumbar fracture.
The study requested is a Lumbar Spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Lumbar spine no focal deficits but she does have a mildly positive straight leg raise test on the left.

The study requested is a Lumbar Spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Location of the weakness and numbness is in the right lumbar area and right leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; tenderness of the spinous process at L 5, tenderness of the transverse process on the right at L 5, tenderness of the sacrum, tenderness of the coccyx, tenderness of the sciatic notch, tenderness of the ischial tuberosity, tenderness of the SI joint.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

This study is being ordered for a neurological disorder.; 12/2016; There has been treatment or conservative therapy.; persistent pain in the upper, middle and lower back with radiculopathy to bilateral legs. symptoms include numbness in legs and hands weakness in the legs and back; nonsteroidal anti-inflammatory medication, life style modifications, Spinal therapy

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Needs MRI to make sure she has no Spondylolithes she does cheer and pom. She has back pain and has had activity modification and medication Ibuprofen for 2 months; There has been treatment or conservative therapy.; Back pain worsens with activity; Ibuprofen 2 months, activity modification
03-27-17; 30-year-old white female in today for her right leg and back. Last Thursday, March 23 she had onset of posterior hip thigh and leg pain. This subsequently intensified and is there constantly. She describes tingling sensation in same distribution; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Attaching clinicals.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

Enter answer here - or Type In Unknown if Bernardino is doing great from his posterior cervical laminectomy and fusion. The reason he actually first came to me was his severe spinal stenosis with neurogenic claudication and grade 2 spondylolisthesis at L4; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Evaluate newly diagnosed progression, preoperative; This study is being ordered for Congenital Anomaly.; &lt; Enter date of initial onset here - or Type In Unknown if No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; Not growing appropriately

EVALUATION; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/2016; There has not been any treatment or conservative therapy.; SCOLIOSIS THAT IS PROGRESSING, CHIARI MALFORMATION,

He would also like to discuss his low back. He has had many years of right low back pain. Pain is worse when rising from a seated position and taking his first few steps. This pain radiates into his bilateral legs with the right being most notable. Pain r; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Muscle Strength: Normal EHL on the right, very slight weakness on the left Hip; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.
Lumbar radiculopathy in the setting of degenerative lumbar scoliosis; This study is being ordered for trauma or injury.; 01/10/2017; It is not known if there has been any treatment or conservative therapy.; Lumbar scoliosis Lumbar spondylosis with radiculopathy

Lumbar spine Exam; Deformity: no gibbous or rib hump deformity; Palpation: mild pain over L5-S1 left SI joint. No paraspinal muscle tenderness; Skin: intact; Soft tissue triggers: no triggers points are palpate; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

LUMBAR SPINE: tenderness to palpation over the bilateral lower lumbar facet joints and on palpation of bilateral greater trochanter(s). Hip abduction gluteus medius 4/5. L5 Motor Strength on the Left: Great toe extension extensor hallucis longus 5/5 an; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.

Neurological System: POSITIVE. Reflexes: Right patellar reflex normal, medial hamstrings normal, and achilles reflex normal and Left patellar reflex normal, achilles reflex normal, and medial hamstrings normal. Special Tests on the Right: Straight leg ra; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Neurological System: Reflexes Right patellar reflex normal, medial hamstrings normal, and achilles reflex normal and Left patellar reflex normal, achilles reflex normal, and medial hamstrings normal. Special Tests on the Right: Straight leg raise test pos; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

New x-rays were made of the lumbar spine today. She does have multilevel spondylosis but no alignment abnormalities except what one might call a hyperlordotic spine. I have told her that her foot pain may very easily be blamed on a radiculopathy in her ; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for None of the above.

He was swinging really hard and it sounds like he may have been in the fight. He has pain whenever he swings hard and b; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.
Impression:
1. Left acromioclavicular DJD;
2. Possible Left shoulder rotator cuff tear;
3. Possible left biceps tendinosis;
4. Palpable tenderness;
5. Tenderness over her left acromioclavicular joint and anterior subacromial bursal space;
6. Reflexes:
7. N;
The requested study is a Shoulder MRI; The pain is described as chronic; The request is for shoulder pain;
The physician has not directed conservative treatment for the past 6 weeks.

Left biceps tendon proximal rupture; 2. Left rotator cuff tear, possible; The requested study is a Shoulder MRI; The pain is from a recent injury; Surgery or arthrosopy is not scheduled in the next 4 weeks; The request is for shoulder pain;
There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

LEFT shoulder pain since March 2015. Pt has pain at night. The pain is described as achy pain that is constant and 7 out of 10 in severity. The pain is worse with overhead activity and reaching behind and better with rest and medications. Patient complain;
The requested study is a Shoulder MRI; The study is not requested for any of the standard indications for Knee MRI; It is not known if the study is requested for shoulder pain.

It shoulder pain w crepitance for 8 mths; The requested study is a Shoulder MRI; The pain is described as chronic; The request is for shoulder pain; The physician has directed conservative treatment for the past 6 weeks; The patient has not completed 6 weeks of physical therapy; The patient has been treated with medication; The patient has not completed 6 weeks or more of Chiropractic care; The physician has not directed a home exercise program for at least 6 weeks; The patient received oral analgesics.

need to rule out fracture; This study is being ordered for trauma or injury; dec 3, 2016; There has not been any treatment or conservative therapy; tenderness, swelling, limited range of motion

none; The requested study is a Shoulder MRI; The pain is described as chronic; The request is for shoulder pain; The physician has directed conservative treatment for the past 6 weeks; The patient has not completed 6 weeks of physical therapy; The patient has been treated with medication; The patient has not completed 6 weeks or more of Chiropractic care; The physician has not directed a home exercise program for at least 6 weeks; The patient received oral analgesics.

none; The requested study is a Shoulder MRI; The pain is from a recent injury; Surgery or arthrosopy is not scheduled in the next 4 weeks; The request is for shoulder pain; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.
None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; No clinicals available

Past history is significant for arthroscopic rotator cuff repair by Dr. Tucker in 2012 on the left shoulder. The patient has not gotten good results from that procedure. He is also diabetic. Physical Exam; Well-developed, well-nourished male is in no; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; This 57-year-old male seen for a second opinion regarding bilateral shoulder pain. He is right hand dominant male with bilateral shoulder pain for more than three to four years. Symptoms are now worse on the right. Pain is sharp and severe with elevation ; There has been treatment or conservative therapy.; Is well-developed, well-nourished male is in no acute distress. Inspection of the left shoulder reveals well healed puncture scars from previous arthroscopy. Palpation reveals tenderness at the anterior joint line and greater tuberosity. Active range of m; Gabapentin; Surgical History; Cervical Spine Surgery 

Patient fell from standing height on December 8, 2016. He can not raise arm up . Patient complains of severe pain in right shoulder radiating down to his elbow. He has a positive drop arm test, pain and weakness with supraspinatus testing positive for app; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear. 

Patient has been treated by family physician for 3 months prior to being referred for orthopedic consult. Treatment included oral analgesics, anti-inflammatory medications, and at home exercise. Patient has pain with raising arm overhead. MRI ordered to r; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.
Patient has little to no use of her right upper extremity. The right shoulder surgery did not help and she continues to have right shoulder pain and neck pain with numbness and weakness of the right upper extremity. She has had an injection and NSAIDS. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient's initial onset with shoulder and neck pain was on 08/10/2016.; There has been treatment or conservative therapy.; Right shoulder stiffness, decrease range of motion, and pain. The pain radiates into her neck and she has right upper extremity numbness and weakness; Patient has had right shoulder A&A with biceps tenotomy and debridement on 8/23/16.

Patient has tender subacromial region, Positive impingement, spasms to the right trapezial region and increased pain in the right shoulder.; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.

Patient is having sharp burning pain that is on going for 6 months and is progressively getting worse with popping she is unable to lay on side and has noticed some decreased strength to the shoulder. Patient has tried several different medicines; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.

POSITIVE CRANK TEST UPON CLINICAL EXAMINATON ALONG WITH, PREVIOUS HISTORY OF LABRAL REPAIR FOR SHOULDER DISLOCATION AND INSTABILITY.; This study is being ordered for trauma or injury.; 01/03/2017.; There has been treatment or conservative therapy.; DECREASED STRENGTH AND MOBILITY. INCREASED PAIN WITH ACTIVITY. CLICKING AND POPPING WITH EXTREME SWELLING.; conservative therapy CONSISTED OF REHAB FOR 2 MONTH (MUSCLE STIMULATION &amp; STRENGTHENING. STEROID MEDICATION PRESCRIBED FOLLOWED BY NSAIDS TO REDUCE PAIN AND INFLAMMATION.

pre surgical, several dislocations, checking to see what is torn inside; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.
pt c/o left shoulder pain for 3 months. No injury. c/o pain with all movements and the pain isn't getting any better. Pain is increasing even after ibuprofen for 6 weeks. X-rays looked good and were within normal limits. On exam pt has limited range. The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.

Pt injured his shoulder while lifting something. He felt a tearing sensation at that time. Crepitus is noted in the L shoulder and he is very weak on supraspinatus testing. Cannot raise arm. Impingement provocative maneuvers are extremely painful. The requested study is a Shoulder MRI.; The pain is from a recent injury.; It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Pt injured shoulder while lifting a stove into a vehicle and shoulder popped. The requested study is a Shoulder MRI.; The pain is from a recent injury.; It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Pt with left shoulder acute rotator cuff tear, profound loss of functioning activities of daily living.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Quality: worsening, weakness; numbness; tingling; radiation down arm. Previous PT: did not help. Previous Injections: helped temporarily. The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

r/o rotator cuff, pain with motion, no active motion, minor tenderness, fell in Dec 2016 and dislocated shoulder, numbness and tingling.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Recommend a MRI for impingement syndrome to R/O RCT.; The requested study is a Shoulder MRI.; The study is not requested for any of the standard indications for Knee MRI; It is not known if the study is requested for shoulder pain.
rheumatoid arthritis, r/o synovitis; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/09/2017; There has been treatment or conservative therapy.; pain in wrist; hydrocodone

Right shoulder pain after lifting a transmission onto a table where she felt a pop and felt a strain. She is able to dislocate the biceps with supraspinatus pain which is suspicious of an anterior supraspinatus tear. Her symptoms began after lifting the tr; The requested study is a Shoulder MRI.; The pain is from a recent injury.; It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Right shoulder pain and weakness. I talked to the patient about the injury she had. This was one month ago. She fell down some stairs landing on her shoulder. There is no fracture appreciated on x-rays. Her elbow range of motion is good. I recommended an; The requested study is a Shoulder MRI.; The pain is from a recent injury.; It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Right shoulder pain for 2 months. Positive pain at night. No numbness or tingling. She complains of not being able to hold things in space. The pain is made worse with heavy lifting and better with rest. The pain is described as an achy, dull pain that is; The requested study is a Shoulder MRI.; The pain is from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.

She has been given conservative treatment prior to her first visit with us on 12/13/16. Right shoulder pain for three months with no injury. She has limited range of motion and constant pain. She is unable to lay on the right side and has pain with physio; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.

Surgery or arthroscopy is scheduled in the next 4 weeks.; The member has surgery planned.; This request is for a wrist MRI.; The reason for the study is not for evaluation of wrist pain.

SUSPECTED BILATERAL ROTATOR CUFF TEAR; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/16/2016; There has been treatment or conservative therapy.; BILATERAL SHOULDER PAIN, PAIN AWAKENS PATIENT FROM SLEEP, TENDERNESS; INJECTIONS, PHYSICAL THERAPY, ANTI-INFLAMMATORY
taking meds for pain; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

The pain is aggravated by reaching, overhead activities, and lifting above shoulder height.; The requested study is a Shoulder MRI.; The study is not requested for any of the standard indications for Knee MRI; The study is not requested for shoulder pain.

The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.

The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.

The pain is from a known mass.; The diagnosis of Mass, Tumor, or Cancer has been established.; The study is requested for follow-up.; The study is not requested to detect residual cancer after a course of treatment has been completed.; The patient is presenting with unresolved or new symptoms; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.

The pain is from a known mass.; The diagnosis of Mass, Tumor, or Cancer has not been established.; The patient has had recent plain films, bone scan or ultrasound of the knee.; The imaging studies were abnormal.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.

The pain is from an old injury.; The member has failed a 4 week course of conservative management in the past 3 months.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.

The pain is from an old injury.; The member has failed a 4 week course of conservative management in the past 3 months.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.

The patient injured his right shoulder while throwing firewood 2 weeks ago. He describes a subluxation injury to the shoulder with a tearing sensation. There has been no change in the symptoms with rest and anti-inflammatory medication. Anti-inflammatory; The requested study is a Shoulder MRI.; The pain is from a recent injury.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.
The patient is a 34-year-old female who complains of chronic right wrist pain associated with periodic swelling and a mass. However today the patient reports no obvious presence of a mass but is still complaining of wrist pain. There is no history of injury; The pain is from a known mass; The diagnosis of Mass, Tumor, or Cancer has not been established; The patient has had recent plain films, bone scan or ultrasound of the knee; The imaging studies were not abnormal; This request is for a wrist MRI; This study is requested for evaluation of wrist pain.

The patient was originally seen in our office on 12-21-2016. A course of 6 weeks of physical therapy was started at that point. After completing 3 weeks of therapy she returned to see us on 1-16-2017 by recommendation of her therapist. She continues to h; The requested study is a Shoulder MRI; The pain is described as chronic; The request is for shoulder pain; The physician has directed conservative treatment for the past 6 weeks; The patient has not completed 6 weeks of physical therapy; The patient has been treated with medication; The patient has not completed 6 weeks or more of Chiropractic care; It is not known if the physician has directed a home exercise program for at least 6 weeks; The patient received oral analgesics.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.;"

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.
This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks; The patient does have an abnormal plain film study of the joint; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks; The patient does have an abnormal plain film study of the joint; The patient has not been treated with and failed a course of four weeks of supervised physical therapy; The patient does not have a documented limitation of their range of motion; The patient has experienced pain for greater than six weeks; The patient has been treated with anti-inflammatory medication in conjunction with this complaint; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks; The patient does have an abnormal plain film study of the joint; The patient has not been treated with and failed a course of four weeks of supervised physical therapy; The patient does not have a documented limitation of their range of motion; The patient has experienced pain for greater than six weeks; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks; The patient does have an abnormal plain film study of the joint; The patient has not been treated with and failed a course of four weeks of supervised physical therapy; The patient has a documented limitation of their range of motion; The patient has experienced pain for greater than six weeks; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.
This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.
This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.
This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.
This is a request for an upper extremity joint MRI; The patient does not have documented weakness or partial loss of feeling in the upper extremity; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks; The patient does not have an abnormal plain film study of the joint; The patient has not been treated with and failed a course of four weeks of supervised physical therapy; The patient does not have a documented limitation of their range of motion; The patient has experienced pain for greater than six weeks; The patient has been treated with anti-inflammatory medication in conjunction with this complaint; This study is being ordered by the operating surgeon for pre-operative planning.

This study is being ordered for a metastatic disease; There are 2 exams are being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering physician is a hematologist/oncologist; The diagnosis of cancer or tumor has been established; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.
73221 MRI JOINT OF UPPER EXTREMITY

Approval

- Traumatic dislocations recurrent; This study is being ordered for trauma or injury; first dislocation was in 1999 multiple dislocation since then last one was 2 weeks ago; There has been treatment or conservative therapy; recurrent dislocations, pain, locking, catching, numbness, popping, clicking, instability; physical therapy, also home exercise program, rest, ice, nsaid, bracing, sling
- Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; Unknown; There has been treatment or conservative therapy; The pain is described as dull, achy pain that is constant and 6 out of 10 in severity. &x0D; The pain is worse with overhead activity and reaching behind and better with wearing a sling. No injections up to this point. He has previously taken prednisone with; Seen a Chiropractor and NSAIDs
- X-ray performed yesterday were negative except showed a small spur on the left shoulder; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 2007; There has been treatment or conservative therapy; Worsening bilateral shoulder pain; Physical therapy, anti-inflammatory, steroid injections

73221 MRI JOINT OF UPPER EXTREMITY

Approval

- X-ray: 4 views RIGHT and LEFT shoulders with No Glenohumeral arthritis, Mild to moderate AC joint arthritis, and a Type 2 acromion. No obvious masses. No fractures or dislocations. 2 views of the cervical spine show a straitened C-Spine with loss of lord; This study is being ordered for a neurological disorder; unknown; There has been treatment or conservative therapy; BILATERAL shoulder pain. No specific injury. She states the RIGHT shoulder is more painful than the LEFT. Numbness and tingling is noted bilaterally; Therapy and injections, She is also taking Anti-inflammatories
- Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Lower Extremity CT; This is not a preoperative or recent postoperative evaluation; There is no suspicion of a lower extremity neoplasm, tumor or metastasis; There is no suspicion of lower extremity bone or joint infection; There is not a history of lower extremity joint or long bone trauma or injury; Yes this is a request for a Diagnostic CT

73700 CT LEG OR LOWER EXTREMITY

Approval

- Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Congenital Anomaly; 6/2016; There has been treatment or conservative therapy; pain with walking; braces
- Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury; 3/22/2017; There has not been any treatment or conservative therapy; pain, swelling, mild warmth also hard as a rock
&lt;Enter answer here - or Type In Unknown If No Info Given. &gt; This study is being ordered for trauma or injury.; September, 2014; There has been treatment or conservative therapy.; Patient has pain with internal rotation, limited range of motion and; Patient has had physical therapy, Medications. And anti inflammatory; This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT

This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT

1/29/17; There has been treatment or conservative therapy.; non weight bearing, can't walk on foot, can't move toes; been in a boot for 2 weeks, x-rays

Patient will benefit from subpalar joint fusion with a calcaneal malunion surgery; This study is being ordered for trauma or injury.; 1-13-17; There has been treatment or conservative therapy.; normal; walking boot

pt has screws in her face .....may have meniscus tear; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; This is a request for a Knee CT; Yes this is a request for a Diagnostic CT

This is a request for a Knee CT; Yes this is a request for a Diagnostic CT

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

**Approval**

This is a request for an Ankle MRI; Surgery or arthroscopy is not scheduled in the next 4 weeks; The study is requested for ankle pain; There is a suspicion of tendon or ligament injury.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; lifetime; There has been treatment or conservative therapy; low back pain, numbness and tingling, and that increases with walking. ROM and instability; PT, medications

This is a request for a foot MRI; The study is being ordered for suspected fracture; It is unknown if they had 2 normal xrays at least 3 weeks apart that did not show a fracture.

This is a request for a foot MRI; The study is being ordered forfoot pain; The study is being ordered for chronic pain; The patient has had foot pain for over 4 weeks; The patient has been treated with anti-inflammatory medication for at least 6 weeks.

This is a request for a Knee MRI; It is not known if patient had recent plain films of the knee; It is not known if the ordering physician is an orthopedist; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; There is no symptom of locking, Instability, Swelling, Redness, Limited range of motion or pain.

This is a request for a Knee MRI; It is not known if patient had recent plain films of the knee; The ordering physician is an orthopedist; Non-acute Chronic Pain; Pain greater than 3 days

This is a request for a Knee MRI; The study is requested for knee pain; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks; It is not known if the physician has completed 6 weeks of physical therapy?; The patient has been treated with medication; It is not known if the patient has completed 6 weeks or more of Chiropractic care; It is not known if the physician has directed a home exercise program for at least 6 weeks; The patient received oral analgesics.
Approval
73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; the pt is continuing to have pain; The patient received oral analgesics.

Approval
73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; the pt is still having pain; The patient received oral analgesics.

Approval
73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; The patient received oral analgesics.

Approval
73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

Approval
73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.

Approval
73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Approval
73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; It is not known if the physician has directed conservative treatment for the past 6 weeks.
This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; Steroid; Hydrocodone; Ibuprofen; The patient received medication other than joint injections(s) or oral analgesics.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; March of 2016; There has been treatment or conservative therapy.; Patient states that her knee occasionally swells. Patient points globally as the area which is most painful. She has tried bracing with minimal relief.

She has previously had an ACLR on 3/18/16 and a medial and lateral meniscectomy on 8/12/16.; Physical Therapy, Meloxicam, Voltaren Gel

This study is being ordered for trauma or injury.;; There has been treatment or conservative therapy.;

+ McMurrays, lateral and medial joint line tenderness, crepitance, r/o meniscal tear and loose bodies.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; pt still having knee pain w ambulation, nsaid not helping, + McMurrays, r/o meniscal tear; The patient received oral analgesics.

01-17-17; 44-year-old female with right thumb pain and right knee pain. She had a fall 2 months ago. She has had this joint pain ever since. We attempted to physical therapy and prescription medication. She also has bruising of both joints. This does not ; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.
3 view standing right foot and ankle x-ray was ordered, obtained, and interpreted. Findings reveal healed and consolidated hallux MTP joint arthrodesis with transfixed hardware crossing the dorsal hallux MTP joint which appears to be striker plate and sc; The patient has not had a recent bone scan.; This is a request for a foot MRI.; The study is being ordered for suspected fracture.; It is unknown if they had 2 normal xrays at least 3 weeks apart that did not show a fracture.

A right knee arthroscopy will be scheduled soon if the MRI reveals a medial and/or lateral meniscal tear and/or chondromalacia. Patient injured right knee on 09/2016 from a fall. She has seen her PCP and has been taking ibuprofen and resting her knee. Rig; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not know if surgery or arthroscope is scheduled in the next 4 weeks.

Aspirated 100cc of fluid off of his knee, pain; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscope is not scheduled in the next 4 weeks.

Assessment:
- Diagnosis:
  - Bilateral pes planus midfoot arthritis and remote possibility of metastatic cancer both ankles;
  - Right hip subtrochanteric metastatic breast cancer left acetabular metastatic cancer; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

BECAUSE XR SHOW A SUBCONDRL CYST IN THE MID TIBIA AREA, THE PHYSICIAN BELIEVES PT MAY HAVE AN ANTERIOR CRUCIATE LIGAMENT DEFICIENT LEFT KNEE WITH ARTHRITIS.HE IS STILL WEARING A KNEE SLEEVE AND USE OTC ANTI-INFLAMMATORIES FOR PERSISTENT PAIN.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; PATIENT HAS MODIFIED DAILY ACTIVITIES, AS IT CAUSES HIM SEVERE PAIN WHEN HE WALKS AND MOVES. HE HAS WORN KNEE BRACES, TAKES NAPROXEN.; The patient received oral analgesics.

Chronic Pain and injury recently made it acute.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscope is not scheduled in the next 4 weeks.
73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

DUE TO THE PATIENT'S LONG STANDING PAIN AND INCREASING SYMPTOMS, THE PHYSICIAN WOULD LIKE TO SEE IF SURGICAL INTERVENTION MIGHT BE NECESSARY.;

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;

PATIENT HAS HAD BILATERAL DJD FOR SOME TIME. HAS HAD NEARLY A YEAR OF CONSERVATIVE TX, WITH NO PAIN RELIEF. PHYSICIAN WANTS TO LOOK INTO POSSIBLE SURGICAL INTERVENTION.;

There has been treatment or conservative therapy.;

PAIN, RECURRENT EFFUSIONS, UNABLE TO STAND OR DO ACTIVITY FOR VERY LONG WITHOUT MORE PAIN, TENDERNESS ALONG THE MEDIAL SIDE; PATIENT HAS HAD INJECTIONS, MULTIPLE KNEE BRACES, ANTI INFLAMMATORIES AND ACTIVITY MODIFICATION, WITH NO RELIEF IN PAIN.

During the exam patient had a Positive McMurrays test.;

This is a request for a Knee MRI.;

The patient received oral analgesics.

Evaluate for ACL tear right knee due to trauma; This is a request for a Knee MRI.;

The study is requested for knee pain.;

The pain is from a recent injury.;

There is a suspicion of a meniscus, tendon, or ligament injury.;

Surgery or arthrosopy is not scheduled in the next 4 weeks.

Examination shows a very painful "POP" with McMurrays test. Effision is present. Pt is not able to put weight on the knee. decreased mobility; This is a request for a Knee MRI.;

The study is requested for knee pain.;

The pain is from a recent injury.;

There is a suspicion of a meniscus, tendon, or ligament injury.;

Surgery or arthrosopy is not scheduled in the next 4 weeks.
foot was run over by a truck; This study is being ordered for trauma or injury.; 1/29/17; There has been treatment or conservative therapy.; non weight bearing, can't walk on foot, can't move toes; been in a boot for 2 weeks, x-rays

Had an injury to the right knee and had a large traumatic effusion of the knee. She's had some catching and popping in the knee.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.

HISTORY OF PRESENT ILLNESS: Referred here today for an injury to her right knee. She did this several weeks ago after she jumped off a fence. She felt a pop at that time. She has had pain and instability since that time. She had no previous symptoms.&mdash; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.

HISTORY OF PRESENT ILLNESS: Referred here today for left knee pain and swelling. This is been bothering her for last couple of months. There has been no history of trauma. He complains of instability and pain.;&mdash; MUSCULOSKELETAL: Left knee shows an effusi; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

Horse fell on her while she was running barrels, causing her to hit her right knee on the saddle horn. DOI 02/07/17. Complains of pain, swelling, decrease ROM and inability to bear weight on right lower extremity. Looking for mmt.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Initial injury 2014, surgery was required but Clinicals are not available at this time. 4 weeks ago patient felt a pop in the knee and failed conservative treatment over last 4 weeks. Increased pain, popping and severe swelling.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.

knee pain after twisting injury; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.
knee pain and instability x 1 mth, joint line tenderness, positive mcmurray sign, r/o meniscal tear; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not know if surgery or arthrosopy is scheduled in the next 4 weeks.

knee pain x 1 mth. need mri to eval for avn or other bone marrow issues. also r/o meniscal tear and loose bodies; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not know if surgery or arthrosopy is scheduled in the next 4 weeks.

Left knee pain from trauma. I suspect this gentleman has a medial meniscus tear.; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; It is not known if the study is ordered prior to arthroscopic surgery.; It is not known if the study is for pre-operative planning.; The ordering physician is an orthopedist.; Pre-operative Evaluation; Pain greater than 3 days

LEFT KNEE PAIN, SWELLING, unable to bear weight, warm to touch, unable to fully extend left leg straight; This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had a recent bone scan.; The plain films were normal.; There are no documented physical or laboratory findings of a joint infection.; Known or Suspected Joint Infection

Left knee pain: The patient is a 43-year-old female who presents with recent onset of left knee pain. &GT; She knows prior swelling and pain in right knee that continuously resolved. She now complains of &GT; swelling and pain in left knee associated with clicking; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.

medial joint line pain, painful range of motion, positive McMurrys test, swelling.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthrosopy is not scheduled in the next 4 weeks.

Ms. Smith is a 27 year old female previously seen for pelvis and sacral trauma in 2013. She is here today for bilateral knee pain. &GT; &GT; &GT; &GT; &GT; She said she fell three years ago in heels and reinjured the left knee again in 2015. She was old that she has an ; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; It is not known if the physician has directed conservative treatment for the past 6 weeks.
Ms. Turner is a 36 year old female referred by Dr. Gil Johnson for evaluation of left knee pain which began when she was putting a box in the attic, stepped wrong and felt a popping sensation in the knee. The injury seemed to be in flexion and either varus; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

MVA in July 2016, pt still having knee pain and patellar pain w instability; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.

New patient seen with this MD, has had previous conservative care that has not provided relief, MD wants to r/o meniscus tear; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

None; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Patient attempted PT once but her knee locked up and was unable to complete PT. She reports mechanical symptoms over the course of the past week after feeling a pop and knee locking.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

Patient fell, Worsening and aching, discomfort, problem with moving walking, bruising, swelling, pain; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.
Patient had ACL repair done on the right new about three years ago. Her pain since surgery has never really gone away. After he ACL repair she had physical therapy for about two months postoperatively. She has a positive McMurry's test. This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks.

Patient has a liaison on the right bone, causalgia; This is a request for a foot MRI.; The study is not being ordered for foot pain, known dislocation, infection, suspected fracture, known fracture, pre op, post op or a known/palpated mass.

PATIENT HAS FAIRLY RAPID LOSS OF JOINT SPACE. SHE HAS HAD SEVERAL TYPES OF CONSERVATIVE TX, PHYSICIAN WANTS TO SEE IF THERE IS A TEAR; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02.08.2007; There has been treatment or conservative therapy.; SEVERE PAIN, MEDIAL AND LATERAL JOINT LINE TENDERNESS, EFFUSION, PAIN WITH WEIGHT BEARING.; PATIENT HAS HAD INJECTIONS, ANTI INFILMMATORIES, NSAIDS, AND CHANGE IN ACTIVITY.

Patient has left knee pain. She has aching and throbbing, mainly about the medial aspect of the knee. It is worse with weightbearing. She does report some mechanical symptoms with catching of the knee. She reports swelling which has been waxing and wan; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not know if surgery or arthroscope is scheduled in the next 4 weeks.

PATIENT IS VERY ACTIVE IN SPORTS AND HAS HAD 4 PREVIOUS SURGERIES. SHE IS HAVING SEVERE DISABLING PAIN AND HAS HAD YEARS OF CONSERVATIVE TX.; This study is being ordered for trauma or injury.; 2014; There has been treatment or conservative therapy.; SWELLING, MEDIAL AND LATERAL JOINT LINE TENDERNESS, SEVERE PAIN; PATIENT USES IBUPROFEN, HAS HAD CHANGE IN ACTIVITY WITH NO SUCCESS, HAS HAD SEVERAL KNEE SURGERIES AND P.T., NSAIDS,KNEE BRACES.

Patient may or may not have been instructed on home therapy by PCP.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.
Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

Patient slipped in the bathroom on the rug and twisted his knee 5 days ago without his knee brace he feels his knee pop out of place and also feels weak; This is a request for a Knee MRI; The study is requested for knee pain; The pain is from a recent injury; There is a suspicion of a meniscus, tendon, or ligament injury; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

Patient states he was standing up from kneeling at work and had significant pain on 12/24/16. He is using crutches today. Patient states he has had previous scope surgery on this knee. The pain is described as a constant, sharp, achy pain which is 7/10 in; This is a request for a Knee MRI; The study is requested for knee pain; The pain is from a recent injury; There is a suspicion of a meniscus, tendon, or ligament injury; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

Patient states the pain is sharp, achy, and 7/10 in severity. The pain is worse with WB and better with rest. He is using crutches and a knee brace; This is a request for a Knee MRI; It is not known if patient had recent plain films of the knee; It is not known if the study is ordered prior to arthroscopic surgery; It is not known if the study is for pre-operative planning; The ordering physician is an orthopedist; Pre-operative Evaluation; Pain greater than 3 days

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

Patient tore ACL & Meniscus over a year ago; This is a request for a Knee MRI; The study is requested for knee pain; The pain is from an old injury; The physician has directed conservative treatment for the past 6 weeks; The patient has not completed 6 weeks of physical therapy; The patient has been treated with medication; It is not known if the patient has completed 6 weeks or more of Chiropractic care; It is not known if the physician has directed a home exercise program for at least 6 weeks; Aleve Ibuprofen; The patient received medication other than joint injections(s) or oral analgesics.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

Patient was told he had some torn ligaments in the right knee and it was treated with PT; This is a request for a Knee MRI; It is not known if patient had recent plain films of the knee; The ordering physician is an orthopedist; Non-acute Chronic Pain; Pain greater than 3 days
PATIENT'S PAIN IS INTERFERING WITH HER DAILY ACTIVITIES. ANY TYPE OF P.T OR CHIROPRACTIC VISITS WILL NOT HELP A MENISCAL TEAR. PT HAS HAD ANTI INFLAMMATORIES, ICE, REST AND HOME EXERCISES.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; PATIENT HAS HAD ACTIVITY MODIFICATION AND STRENGTHENING EXERCISES SINCE DECEMBER. SHE HAS ALSO TREATED WITH ICE AND REST. PHYSICIAN SUSPECTS A MENISCAL TEAR.; The patient received oral analgesics.

PHYSICIAN WANTS TO SEE IF PT WILL BE POSSIBLE CANDIDATE FOR KNEE SURGERY, HAS TRIED CONSERVATIVE TX FOR YEARS WITH NO FULL BENEFIT OF PAIN RELIEF.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03.11.2014; There has been treatment or conservative therapy.; KNEE PAIN, WORSE WITH BENDING AND BEARING WEIGHT, WEAKNESS WITH WALKING; PATIENT HAS HAD BILATERAL KNEE PAIN FOR YEARS, WEAKNESS WITH WALKING, DJD OF BOTH KNEES, PAIN WITH BENDING AND WEIGHT BEARING, HAS HAD INJECTIONS AND CONSERVATIVE TX OF MEDS, MODIFIED ACTIVITY

possible meniscal tear, joint line tenderness positive mcmurray test; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks. previous treatment with Dr Ogg. exam 3/23/17 suspect for chondral defect and medial meniscal tear. Pt has completed several weeks conservative treatment with another physician prior to being seen in our office. positive for pain, painful range of motion.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.
Pt caught himself as he was falling off of a roof 6 years ago, December 2012, and hurt his right knee. He went to an emergency room where they only took x-rays. No fractures were noted. They casted his leg for 6 weeks. Burt Pt states that his right knee:

- This is a request for a Knee MRI;
- The study is requested for knee pain;
- The pain is from an old injury;
- The physician has directed conservative treatment for the past 6 weeks;
- The patient has not completed 6 weeks of physical therapy;
- The patient has been treated with medication;
- The patient has not completed 6 weeks or more of Chiropractic care;
- The physician has directed a home exercise program for at least 6 weeks;
- The home treatment did include exercise, prescription medication and follow-up office visits;
- Pt has been seeing his primary care physician prior to seeing Dr. Powell, an orthopedic specialist.

Pt has modified his activities, taken over the counter and prescription pain medications and done stretching type home exercises. Pt. is not any better w:

- The patient received oral analgesics.

Pt fell and knee is swollen, painful, and it pops. Pt has positive McMurray's sign:

- This is a request for a Knee MRI;
- The study is requested for knee pain;
- The pain is from a recent injury;
- There is a suspicion of a meniscus, tendon, or ligament injury;
- Surgery or arthroscopy is not scheduled in the next 4 weeks.

Pt has a fracture:

- This is a request for a foot MRI;
- The study is being ordered for known fracture;
- The study is being ordered for routine follow up.

Pt mobility is limited by pain and "catching" in the right knee. Mild effusion present. McMurrys test is positive:

- This is a request for a Knee MRI;
- The study is requested for knee pain;
- The pain is from a recent injury;
- There is a suspicion of a meniscus, tendon, or ligament injury;
- Surgery or arthroscopy is not scheduled in the next 4 weeks.

R/O internal derangement vs. arthritis:

- This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease;
- 2002;
- There has been treatment or conservative therapy;
- Pain in knees with hip rotation, painful McMurray's, popping, can't stand for long periods;
- Medications recommend MRI LT ankle;
- This is a request for an Ankle MRI;
- The pain is from a recent injury;
- It is not know if surgery or arthroscopy is scheduled in the next 4 weeks;
- The member has a recent injury;
- It is not known if the study is requested for ankle pain.

Right knee pain after twisting injury, rule out meniscal tear:

- This is a request for a Knee MRI;
- The study is requested for knee pain;
- The pain is from a recent injury;
- There is a suspicion of a meniscus, tendon, or ligament injury;
- It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.
Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

Right knee: Has a well-healed scar over the anterior knee. Some mild swelling of the knee. General flex and extend the knee fully. He has some mild crepitus of the patellofemoral joint with range of motion. He has some mild tenderness along the medial joint; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/20/2015; There has been treatment or conservative therapy.; Right knee: Has a well-healed scar over the anterior knee. Some mild swelling of the knee. General flex and extend the knee fully. He has some mild crepitus of the patellofemoral joint with range of motion. He has some mild tenderness along the medial joint; Meloxicam&x0D; Physical therapy&x0D; &x0D; Since he is failed to improve and agrees to get an MRI of his knees and see if there is any evidence of meniscus tear that we can treated with an arthroscopic procedure. I will set this up and see him back after the MRI go o

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

rt knee pain for several mths, joint line tenderness, antalgic gate, dec ROM, r/o degenerative meniscal tear; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics. RT knee pain greater than 3 days. Patient had skiing accident. Swelling greater than 3days.; This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; It is not known if the study is ordered prior to arthroscopic surgery.; It is not known if the study is for pre-operative planning.; The ordering physician is an orthopedist.; Pre-operative Evaluation; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

RULE OUT MEDIAL MENISCUS TEAR.&x0D; SYMTOMS:DECREASED MOBILITY, JOINT INSTABILITY, JOINT TENDERNESS, LIMPING, NOCTURNAL AWAKENING, PAIN, NUMBNESS, SWELLING, TINGLING IN LEGS, STRENGTH IS LIMITED, LIMITED RANGE OF MOTION, AND WEAKNESS.&x0D; PREVIOUS SURGERY: LEFT KNEE; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.
SINCE PT HAS HAD CONSERVATIVE THERAPY FOR ONE YEAR AND PAIN HAS GOTTEN MORE SEVERE, PHYSICIAN WANTS TO GET IMAGING TO SEE IF THERE IS A TEAR, OR WHAT IS GOING ON.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; APPROXIMATELY ONE YEAR AGO, FEBRUARY 9, 2016; There has been treatment or conservative therapy.; SEVERE PAIN X 1 YEAR, BUCKLING, FEELS LIKE ITS GIVING WAY, MEDIAL JOINT LINE TENDERNESS, EQUISITELY TENDER ALONG THE MEDIAL JOINT LINE BILATERALLY. XR NORMAL.; INJECTIONS, ANTI INFLAMMATORIES, CHANGE IN ACTIVITY

surgery is not scheduled pt has locking, limited weight bearing, lateral meniscus tear; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

swelling (patellar bursitis), Bony Palpation Left: tenderness of the lateral patellar facet, the medial patellar facet, the medial joint line (marked), the lateral joint line (mild), and the medial tibial plateau. Soft Tissue Palpation Left: tenderness of; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

The patient had onset of knee pain after a bowling incident back in February. We treated her with NSAIDs. She has modified her physical activity. She is continuing to have pain. Her primary care physician has continued her on the meloxicam which has became; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

The patient has left knee pain for over 1 year that has not improved with rest, bracing or medication. Medication started meloxicam 15mg and oral steroids. He uses a cane to assist with ambulation. Physical exam shows Severe medial joint line tenderness t; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.
The patient is having left knee pain present for 1 month. There was no specific injury to her left knee. Since the onset, she reports the problem is getting worse. There has been no change in the symptoms with ice, rest, anti-inflammatory medication and m; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.

The patient is having left knee pain that has not improved with Tylenol or rest. On physical exam Global tenderness noted, Mild instability noted and McMurray test is positive. X-rays done on 2-15-2017 are negative.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.

The patient is having right knee pain, limping, clicking and popping after a fall on 12-7-16. There has been no change in the symptoms with ice, rest, anti-inflammatory medication (ibuprofen) and bracing. Icyhot does not improve symptoms. On exam, there i; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not know if surgery or arthrscopy is scheduled in the next 4 weeks.

The patient is having right knee pain, swelling, stiffness, limping and popping. She fell down stairs and landed on both knees September 2016. Her pain has worsened over the last month. There has been no change in the symptoms with heat or change in activ; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has not been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.
The patient reports recurrent mechanical symptoms of locking and catching in the knee. Patient did have a mild degree of swelling about the medial aspect of the knee. Right knee examination reveals tenderness to palpation about the medial joint line, n; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; anti-inflammatories; The patient received medication other than joint injections(s) or oral analgesics.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.;" There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.;" There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.;" There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.

This is a request for a foot MRI.; Surgery or other intervention is planned in the next 4 weeks.; The study is being ordered for infection.; There are physical exam findings, laboratory results, other imaging including bone scan or plain film confirming infection, inflammation and or aseptic necrosis.

This is a request for a foot MRI.; The study is being ordered for suspected fracture.; They had 2 normal xrays at least 3 weeks apart that did not show a fracture.; The patient has been treated with immobilization for at least 4 weeks.

This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; The patient has been treated with a protective boot for at least 6 weeks.

This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had recent plain films of the knee.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; ; Suspicious Mass or Suspected Tumor/ Metastasis

This is a request for a Knee MRI.; The patient has not had a recent bone scan.; The plain films were normal.; There are documented physical or laboratory findings of a joint infection.; 3 YEAR OLD WITH LEFT KNEE PAIN, INFUSION, WITH ELEVATED CRP, POSSIBLE OSTEOMYELITIS; Known or Suspected Joint Infection

This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had recent plain films of the knee.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; ; Suspicious Mass or Suspected Tumor/ Metastasis

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Locking

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Unknown; The patient has not had a recent bone scan.; This is a request for a foot MRI.; The study is being ordered for suspected fracture.; It is unknown if they had 2 normal xrays at least 3 weeks apart that did not show a fracture.

Unknown; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks.

Unspecified internal derangement of right knee (M23.91); The patient’s history and exam are c/w a probable meniscal tear; Recommend an MRI (right ) knee to rule out internal derangement due to failure of conservative management to include medication an; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; It is not known if the physician has directed conservative treatment for the past 6 weeks.
73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

Approval

X-ray: 4 view LEFT and RIGHT knee with minimal medial joint space narrowing on RT with mild medial joint space narrowing on LT. Posterior spur noted on RT knee as well.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Several years; There has been treatment or conservative therapy.; ; has done Knee Sleeves and aspercream, and Mobic

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT

Approval

Assessment: Diagnosis: Bilateral pes planus midfoot arthritis and remote possibility of metastatic cancer both ankles; Right hip subtrochanteric metastatic breast cancer left acetabular metastatic cancer; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered. PATIENT CONTINUES TO HAVE PERSISTENT PAIN AFTER INJECTIONS,NSAIDS AND ACTIVITY MODIFICATION. PHYSICIAN WANTS TO EVALUATE PAIN TO SEE IF SHE IS A CANDIDATE FOR OPERATIVE TREATMENT.; This study is being ordered for a neurological disorder.; 11.08.2016; There has been treatment or conservative therapy.; BILATERAL HIP PAIN INCREASED WITH LYING ON THE HIPS AND WALKING. MARKEDLY TENDER OVER BOTH GREATER TROCHANTERS,XR REVEAL SLIGHT DEGENERATIVE CHANGES.; PATIENT HAS BEEN ON MOBIC BUT HAD TO QUIT DUE TO BLOOD ISSUES, NOW TAKES CELEBREX.. HAS HAD STEROID INJECTIONS, MODIFIED ACTIVITY

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT

Approval

Patient has positive impingement sign, positive hip scouring and pain in posterior groin. Patient has limited ROM and elevated alpha angle. Further imaging is needed to assess articular surfaces.; This is a requests for a hip MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; The hip pain is due to a recent injury.; The request is for hip pain. Plain x-rays of her hips do show some abnormality in the anterior and lateral neck on both sides but perhaps worse on the left. I do not see any evidence for a fracture.; This study is being ordered for trauma or injury.; 10/15/2016; There has not been any treatment or conservative therapy.; Her left hip range of motion is painful and almost all directions.

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT

Approval

Pain with external rotation.; physical therapy, NSAIDS, change in activity level.
SYMPTOMS: DECREASED MOBILITY, JOINT INSTABILITY, JOINT TENDERNESS, LIMPING, PAIN, NUMBNESS, SWELLING, TINGLING IN LEG, AND WEAKNESS.

HIP XRAY - NEGATIVE.

TX - REST AND TRAMADOL; This is a request for a hip MRI.; The member has not failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

SYMPTOMS: JOINT STIFFNESS, JOINT TENDERNESS, WEAKNESS, PAIN, & FEVER.

PHYSICAL EXAM: LIMITED RANGE OF MOTION, MAX TENDERNESS RIGHT GLUTEAL, LIMITED STRENGTH, PAIN MOSTLY LATERAL, AND XRAY SHOWS JOINT SPACE NARROWING OF RIGHT HIP.

PATIENT HAS TRIED RX PAIN MED; This is a request for a hip MRI.; The member has not failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a request for a hip MRI.; The diagnosis of Mass, Tumor, or Cancer has been established.; The study is requested for follow-up.; The study is not requested to detect residual cancer after a course of treatment has been completed.; The patient is presenting with unresolved or new symptoms; The hip pain is due to a mass.; The request is for hip pain.

This is a request for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

Approval 73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT

This is a request for a hip MRI. This study is not being ordered in conjunction with a pelvic MRI. There is no history of significant trauma, dislocation, or injury to the hip. The patient has not been treated with anti-inflammatory medications in conjunction with this complaint. This is not for pre-operative planning. The patient does not have a documented limitation of their range of motion.

Approval 73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT

This is a request for a hip MRI. This study is not being ordered in conjunction with a pelvic MRI. There is no history of significant trauma, dislocation, or injury to the hip. The patient has not been treated with anti-inflammatory medications in conjunction with this complaint. This is not for pre-operative planning. The patient does not have a documented limitation of their range of motion.

Approval 73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT

This is a request for a hip MRI. This study is not being ordered in conjunction with a pelvic MRI. There is no history of significant trauma, dislocation, or injury to the hip. The patient has not been treated with anti-inflammatory medications in conjunction with this complaint. This is not for pre-operative planning. The patient does not have a documented limitation of their range of motion.

Approval 73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT

This is a request for a hip MRI. This study is not being ordered in conjunction with a pelvic MRI. There is no history of significant trauma, dislocation, or injury to the hip. The patient has not been treated with anti-inflammatory medications in conjunction with this complaint. This is not for pre-operative planning. The patient does not have a documented limitation of their range of motion.
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; several months ago; There has been treatment or conservative therapy.; Instability, catching in the hip, pain, arthritis on x-ray and bursitis; Injection to the hip and is not improving, also had activity modifications and over the counter medication for several months.

This is a request for a abdomen-pelvis CT combination.; The requested studies are being ordered for known or suspected aneurysms and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Vascular disease; Yes this is a request for a Diagnostic CT.
This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureter stone; Yes this is a request for a Diagnostic CT

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.

This study is being ordered for a neurological disorder.; 7/2014; There has been treatment or conservative therapy.; nerve root impingement, developing neurogenic, bladder dysfunction; Physical Therapy, medication, trigger point injections, lifestyle modification

Pt had a MRI but it didn’t show what the OP needs to see.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

- **(Enter answer here - or Type In Unknown if No Info Given.)**

- **This study is being ordered for trauma or injury:**

- **12/7/2016:** There has been treatment or conservative therapy; pain, limited range of motion in shoulder and hand; numbness in the hand and thumb x-ray showed changes at the AC joint wrist x-ray negative scapho; at home exercises

- **LEFT WRIST PAIN:**

- **ARTRHALGIA** - LEFT ULNA/RADIUS/WRIST; The pain is from a recent injury; Surgery or arthroscopy is not scheduled in the next 4 weeks; There is a suspicion of tendon or ligament injury; This request is for a wrist MRI; This study is requested for evaluation of wrist pain.

- **Patient had a fall and has increased pain swelling and is unable to raise her shoulder:**

- **The requested study is a Shoulder MRI:** The pain is from a recent injury; Surgery or arthroscopy is not scheduled in the next 4 weeks; The request is for shoulder pain;

- **Patient has very limited motion of the shoulder. Has history of cervical spine stenosis with past surgical intervention. Cannot tell if it is possibly all rotator cuff or all nerve impingement without MRI scans:** This study is being ordered for a neurological disorder.

- **8/11/2015:** There has been treatment or conservative therapy; severe pain in neck and shoulder; numbness in the arm, hands, fingers and weakness in the whole body; Physical therapy, medications and injections

- **Possible torn rotator cuff tear:** This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease;

- **3/2016:** There has been treatment or conservative therapy; Can’t reach above head Effected side pain while sleeping Weakness and tenderness in shoulder Snapping sounds when moving shoulder; Has had physical therapy, nsaids, and cortisone injections. Symptoms are worsening.

- **R/O fracture:** This study is being ordered for trauma or injury;

- **11/21/2016:** There has been treatment or conservative therapy; Sharp, throbbing, aching pain, aggravated by movement; Physical therapy

- **She fell at church landing with all of her weight on her outstretched right wrist and right knee. On physical exam of the right wrist, Moderate tenderness over the TFCC and pain with wrist flexion, extension, ulnar deviation. On physical exam of the right knee:** This study is being ordered for trauma or injury;

- **December 2016:** There has been treatment or conservative therapy; Pain, swelling and weakness in the right wrist.

- **Pain and limited range of motion with crepitus of the right knee:** Rest, bracing, anti-inflammatory medication (ibuprofen), and pain medication (hydrocodone).

DOROTHY SPENCER
03/16/2017
CASE SUMMARY: 58-year-old complains of right hip pain. She fell several years ago injuring her back and hip. She has had problems with both regions ever since. This has gone from an intermittent problem to one of constant; exercise and pain medication.

Patient states pain started in 2007. Recalls no injury. X-ray was preformed on 02/10/2017 showing cam lesions of femoral neck of right hip. Right hip exam showed deformity FAI cam type. Motion was abnormal. Rotation limited. Pain was elicited by motion.; This is a requests for a hip MRI.; It is not known if the member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

Plain x-rays of the hips were made before I saw him and he has mild degenerative changes but no significant narrowing or sclerosis or cyst formation.; X-rays of the lumbar spine were then made which do show narrowing and osteophyte formation at the L4-5 l; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; This patient is new to me. He is 59 years of age and has an architect with the Taggart firm. About 3 months ago he started to experience pain primarily behind the right hip and a little bit on the left as well that was very severe and related to activity; There has been treatment or conservative therapy.; piercing sharp throbbing pain in bilateral hips towards the buttock area.; patient has done physical therapy along with NSAIDS;

QUESTIONS FOR STRESS FRACTURE VS ABDUCTOR TEAR PAST FALL.; This is a requests for a hip MRI.; It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; The hip pain is due to a recent injury.; The request is for hip pain.
The physical exam reveals that he is well-developed and well-nourished and walks with a cane in his right hand. He has a Klenzak double upright spring-loaded brace on his left leg for dropfoot deformity. He does not have a Trendelenburg gait. He has no vision impairment. He is here about his right hip pain which is becoming progressively worse. He has had a number of injuries including falls and also being hit by an automobile on the right side; physical therapy for a long time without benefit.

This is a request for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI; There is no history of significant trauma, dislocation, or injury to the hip; There is no suspicion of AVN; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis; The patient has not used a cane or crutches for greater than four weeks; The patient has been treated with and failed a course of supervised physical therapy; The patient has a documented limitation of their range of motion.

This is a request for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI; There is no history of significant trauma, dislocation, or injury to the hip; There is no suspicion of AVN; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis; The patient has not used a cane or crutches for greater than four weeks; The patient has not been treated with and failed a course of supervised physical therapy; There is not a mass near the hip; The patient has been treated with anti-inflammatory medications in conjunction with this complaint; This is for pre-operative planning; The patient has a documented limitation of their range of motion.

This study is being ordered for Inflammatory/ Infectious Disease; 1/9/2017; There has been treatment or conservative therapy; pain on right side of back, groin pain; Mobic

This study is being ordered for follow-up to trauma.; This is a request for a Sinus CT.;
Yes this is a request for a Diagnostic CT
There is a suspicion of an infection or abscess.; This is a request for an Orbit MRI.;
There is not a history of orbit or face trauma or injury.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.

Unknown; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell’s palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

There is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT
This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.
; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;
continued pain in back and neck and shoulder with no improvement; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; June 30 2016; There has been treatment or conservative therapy.; neck pain&x0D; pain upper back&x0D; shoulder pain&x0D; pain in spine; physical therapy

continued pain in back and neck and shoulder with no improvement; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; June 30 2016; There has been treatment or conservative therapy.; neck pain&x0D; pain upper back&x0D; shoulder pain&x0D; pain in spine; physical therapy

&l; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.;

Pt had xray showing joint space abnormalities; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.;

The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.

The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.
Approval 73221 MRI JOINT OF UPPER EXTREMITY
The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

Approval 73700 CT LEG OR LOWER EXTREMITY
This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.

Approval 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT
- 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT
  - lytic bone lesion right ankle shown on xrays and recognized ankle pain with area.; This is a request for an Ankle MRI.; Surgery or arthroscopey is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.
- 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT
  - xrays show no abnormalities. patient has alot of ankle instability, injured ankle 1 year ago and reinjured about a month ago.; This is a request for an Ankle MRI.; Surgery or arthroscopey is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.
- 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT
  - x-rays were performed showing no acute osseous abnormalities. There is a painful palpable mass on medial left foot.; This is a request for a foot MRI.; The study is being ordered forfoot pain.; The study is being ordered for known or suspected septic arthritis or osteomyelitis.; The results of the plain film x-ray are unknown.
- 73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT
  - xrays were performed showing no acute osseous abnormalities. There is a painful palpable mass on medial left foot.; This is a request for a foot MRI.; The study is being ordered forfoot pain.; The study is being ordered for neumroma.; The patient has had foot pain for over 4 weeks.; The patient has been treated with anti-inflammatory medication for at least 6 weeks.
This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Abnormal X-ray

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Epigastric swelling, mass or lump; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made.); This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Cervical Cancer.

chronic / recurrent acute sinusitis; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient’s current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT
chronic sinusitis 37 year old female referred from Dr. Deere for chronic sinus infections. Pt reports she has had issues with sinus infections for most of her life. Her symptoms have increased in frequency and severity over the last 3-5 years. She gets a; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment

Enter answer here - or Type In Unknown; Relevant Physical Findings: - dns to left, no polyps, no infection; - head and neck exam benign; - no obvious source for episxtaxis seen; - Recurrent episxtaxis.; - Recurrent sinusitis.; - This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been less than 14 days since onset AND the patient improved, then worsened; Yes this is a request for a Diagnostic CT

For 2 years, he has had the sensation of right aural fullness, right facial pressure, postnasal drip, and neck discomfort. He has been told this was due to Eustachian tube dysfunction. Ear tubes were offered by another practice. Audiogram today shows a no; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)
Hx of sinus problems for decades, nasal congestion, facial pain, pressure; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been less than 14 days since onset AND the patient improved, then worsened.

I think she needs a CT scan of her sinuses without contrast to evaluate the maxillary sinus and this implant. Should this be normal, we would consider treating with amitriptyline for both migraine prophylaxis as well as trigeminal neuralgia. If this is in;

This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.

inverted papilloma right maxillary antrostomy; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)

Long history of nasal obstruction unresponsive to aggressive medical therapy including multiple rounds of antibiotics, steroid nasal spray and a histamine and decongestant.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks);

Yes this is a request for a Diagnostic CT

LOSS OF SMELL; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT

Low level nose bleed that is frequent. About 3 times a week. Hx of polyps, could not get an endoscope in his nose during exam, this CT is being ordered.; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT

mass in neck, neck pain on exam, mass in nasal cavity; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.
Patient has recurrent sinusitis for 10 years. Treated with antibiotics each time; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks).

Patient is experiencing nasal obstruction, sinus headaches with facial pressure.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT.

Patient with long h/o sinus problems. Has had 7 rounds of antibiotics in 2016. Last round of antibiotics given was started on 12/20/16. Patient suffering from post nasal drip and nasal congestion.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment.

Possible obstruction of the Choanae. Sinus xray 12/26/16 that showed bilateral ethmoid and maxillary sinusitis. Been on antibiotics from MDO. failed nasal spray, antihistamines, and steroids.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); 14 or more days since onset AND the patient failed a course of antibiotic treatment.

Pt has chronic sinusitis for several months; has tried 5 antibiotics and it hasn't helped; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT.
recurrent sinusitis, condition not improving with medications; This study is being
ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-
compromised.; The patient’s current rhinosinusitis symptoms are described as Chronic
Rhininosinusitis (episode is greater than 12 weeks)

Several months of serous otitis mid facial pain pressure congestion and nasal
structure and thought to be sinusitis. The patient has had multiple rounds of
antibiotics.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.;
The patient is NOT immune-compromised.; The patient’s current rhinosinusitis
symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks);

Yes this is a request for a Diagnostic CT

She does have occasional bilateral ringing tinnitus; She also has seasonal
allergies and has had some sinusitis. She has unsteadiness with standing up
from laying down; This study is being ordered for something other than: known
trauma or injury, metastatic disease, a neurological disorder, inflammatory or
infectious disease, congenital anomaly, or vascular disease.; pt has dizziness and
chronic sinusitis; There has been treatment or conservative therapy.; Patient cannot
clear ears with valsalva. She may have some difficulty with hearing. She does have
occasional bilateral ringing tinnitus and dizziness; She also has seasonal
allergies and has had some sinusitis; Patient reports bilateral otic fullness and dull
moderate otalgia for about 5 months. Patient cannot clear ears with valsalva. She may
have some difficulty with hearing. She does have occasional bilateral ringing tinnitus.
She has been treated with antbi

She has had about 10 episodes of sinusitis in the past year. Patient has been treated
with multiple courses of antibiotics including a Z-pak and Augmentin. She also uses
fionase. She has allergies that are worse with changes in the weather. She has not ha;
This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is
NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are
described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a
request for a Diagnostic CT

She was last jere on 03/14/16 with complaints of headaches, ear pressure and sinus
pressure along with tinnitus. She was to have MRI brain and referred to neurology. She
says she is still having the same symptoms and just finished doxycycline and a MDP. S;
This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is
NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are
described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a
request for a Diagnostic CT
Sunny M. Huynh is referred by Dr Roger Green. Her reason for this visit is eval sinuses. She describes the problem as moderate to severe. She describes the symptoms as pain and pressure in sinuses, f; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT 1

The patient has had 2-3 episodes of recurrent chronic sinusitis for several years. Symptoms improve temporarily with antibiotics but never completely resolve. He has a deviated nasal septum and hypertrophy of the nasal turbinates; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient’s current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT 1

The patient has had recurrent sinusitis for 20 years. She has had 10 rounds of antibiotics in the past 6 months. She c/o nasal congestion, watery eyes, green nasal discharge, stuffy ears, and sore throat. Physical examination showed tenderness to maxillary; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient’s current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT 1

This study is being ordered for a known or suspected tumor.; This is a request for a Sinus CT. 3

This study is being ordered for a known or suspected tumor.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT 12

This study is being ordered for osteomyelitis.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT 1

This study is being ordered for post-operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT 1

This study is being ordered for pre-operative evaluation.; This is a request for a Sinus CT. 6

This study is being ordered for pre-operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT 30

Treated with several rounds of antibiotics; steroids & Flonase. 4 or more times year. Continues to have headaches; facial pain & nasal drainage in spite of appropriate medical treatment.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year) tried antibiotics; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT unknown; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/1/2016; There has not been any treatment or conservative therapy.; referred for surgical consultation for mass growing x 1 year, no pain, no prior trauma face, trauma is to the legs &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for neck soft tissue CT.; The study is being ordered for something other than Trauma or other injury, Neck lump/mass, Known tumor or metastasis in the neck, suspicious infection/abcess or a pre-operative evaluation.; Yes this is a request for a Diagnostic CT &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist. ; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT
This is a request for neck soft tissue CT.; The patient has NOT been diagnosed with cancer.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was done.; Yes this is a request for a Diagnostic CT.

This study is being ordered for Inflammatory/ Infectious Disease.; Pt with over 4 week c/o right ear pain, radiating into neck with swollen sensation of the neck. She has been on abxs without improvement. Trying to rule out cholesteatoma or other occult problem. Anesthesia nose was anesthetized with Lidocaine spray, and d; There has been treatment or conservative therapy.; right ear pain, radiating into neck with swollen sensation of the neck.; The patient has been on antibiotics and steroids with no relief. The symptoms are worsening.

2 cm neck mass from past ct. History of ovarian cancer.; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has NOT been examined twice at least 30 days apart.; Yes this is a request for a Diagnostic CT.

Concerned about her airway, I will obtain a CT neck without contrast with fine cut of larynx/trachea; swollen supraglottis; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is NOT a palpable neck mass or lump.; Yes this is a request for a Diagnostic CT.

Evaluate lymph nodes. He is here today with mom and she says has had swollen lymph nodes under neck for the past 6 months. He says they are not tender. He says he had the flu in August and has not felt well since. He keeps fevers, fatigue, nasal congestion; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT.

He has Neck cancer; This is a request for neck soft tissue CT.; The study is being ordered for something other than Trauma or other injury, Neck lump/mass, Known tumor or metastasis in the neck, suspicious infection/abcess or a pre-operative evaluation.; Yes this is a request for a Diagnostic CT.
Large slowly enlarging left neck mass possible tail of parotid vs brachial cleft cyst vs adenopathy; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; It is unknown if a fine needle aspirate was done.; Yes this is a request for a Diagnostic CT

Lump or mass remains same after taking antibiotics; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT

Mass in neck, neck pain on exam, mass in nasal cavity; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

On examination, neck mass(es) is/are noted in 2-3 cm midline soft, compressible, moveable, nontender neck mass that elevates with swallow. 2-3 cm midline & soft, compressible, moveable, nontender neck mass that elevates with swallow; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT

Pt has a neck mass and cervical lymphadenopathy x yrs; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; It is not known if the neck mass has been examined twice at least 30 days apart.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; It is unknown if there is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT
This is a request for neck soft tissue CT.; The study is being ordered for Follow Up.; The patient has a known tumor or metastasis in the neck.; The patient completed a course of chemotherapy or radiation therapy within the past 90 days.; This is a request for neck soft tissue CT.; The study is being ordered for Follow Up.; The patient has a known tumor or metastasis in the neck.; They have not had a previous Neck CT in the last 10 months.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; There are NO new or changing symptoms in the neck.

This is a request for neck soft tissue CT.; The study is being ordered for Initial Staging.; The patient has a known tumor or metastasis in the neck.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; The study is being ordered for recent trauma or other injury.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; The study is being ordered for recent trauma or other injury to the neck.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is being ordered by an ENT specialist.

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.; This is being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3/15/2017; There has not been any treatment or conservative therapy.; vocal cord paralysis

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/2016; It is not known if there has been any treatment or conservative therapy.;

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years; There has not been any treatment or conservative therapy.; ringing in ears

R/O AVACULAR ANOMALY; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ONE MONTH AGO; There has not been any treatment or conservative therapy.; PATEINT HEARS HER HEART BEATING IN HER RIGHT EAR

Yes, this is a request for CT Angiography of the brain.

Yes, this is a request for CT Angiography of the brain.
R/O AVACULAR ANOMALY; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ONE MONTH AGO; There has not been any treatment or conservative therapy.; PATEINT HEARS HER HEART BEATING IN HER RIGHT EAR

Yes, this is a request for CT Angiography of the Neck.

"This is a request for orbit, face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of infection or abscess

"This is a request for orbit, face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of neoplasm, tumor or metastasis

"This is a request for orbit, face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass

; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.

PHYSICAL EXAMINATION: The patient has some facial asymmetry with movement. Minimal at rest and he does have few forehead wrinkles on the right. Wax in his left ear was removed under the microscope. Ears look normal. His audiogram today shows a mild-t; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

requested to bypass clinicals; "This is a request for orbit, face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection, cancer, mass, tumor, pre or post-operative evaluation

There is a suspicion of an infection or abscess.; This is a request for a Face MRI.; There is not a history of orbit or face trauma or injury.

There is not a suspicion of an infection or abscess.; This examination is being requested to evaluate lymphadenopathy or mass.; This is a request for a Face MRI.; There is not a history of orbit or face trauma or injury.

This is a request for a Face MRI.; There is a history of orbit or face trauma or injury.
Approval 70540 MRI ORBIT/FACE/NECK W/O DYE

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 70540 MRI ORBIT/FACE/NECK W/O DYE

UNCLEAR ORIGIN OF CORD WEAKNESS THOUGH MAY DATE BACK TO OPEN HEART SURGERY; "This is a request for orbit,face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection,cancer, mass, tumor, pre or post-operative evaluation.

Approval 70544 Mr angiography head w/o dye

Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Vascular Disease.; unknown; There has been treatment or conservative therapy.; vertigo, dizziness, unsteady; medications, ; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

Approval 70544 Mr angiography head w/o dye

There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

Approval 70544 Mr angiography head w/o dye

unknown; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

Approval 70547 Mr angiography neck w/o dye

The patient has had a recent MRI or CT for these symptoms.; This is a request for a Neck MR Angiography.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.
Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient had a normal audiogram.; The patient is experiencing hearing loss.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; The doctor does not note on exam that the patient has delirium or acute altered mental status.; The patient does not have a Brain CT showing abscess, brain infection, meningitis or encephalitis.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of tumor; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing vertigo.
Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient had a normal audiogram.; The patient is experiencing hearing loss.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vertigo.; It is unknown why this study is being ordered. Ear pain, dizziness, left neck pain, radiates from ear, frequent h/a’s more on left, ears popping, meds no relief, tinnitus.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Nasal Eval  The patient is a 23 year old female with a history of nasal obstruction and nasal deformity who underwent open functional septrhinoplasty with turbinate reduction on 2/17/16. Patient reports she intermittently has an odor in nose that at time; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; A metabolic work up was not done including urinalysis, electrolytes and complete blood count with results completed.; The patient is experiencing loss of smell.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

None; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
patient had CT that showed abnormalities; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Pt states she has migraines headaches but this time its different and she has had a constant headache for 2 weeks. Has weak sense of smell and taste.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Radiologist that read last MRI said due to abnormal MRI of the head it needs to be repeated in three months; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

recurrent sinusitis, causing insomnia, chronic burning sensation in the throat, antibiotics are not helping, decrease in hearing.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presentizing with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).
This is a request for an Internal Auditory Canal MRI.; There is a suspected Acoustic Neuroma or tumor of the inner or middle ear.

This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is a suspected cholesteatoma of the ear.; The patient has not had a recent brain CT or MRI within the last 90 days.; There are no neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.; This is a pre-operative evaluation for a known tumor of the middle or inner ear.

This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is not a suspected cholesteatoma of the ear.; The patient has had a recent brain CT or MRI within the last 90 days.; There are neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.; This is not a pre-operative evaluation for a known tumor of the middle or inner ear.

&lt;Enter answer here - or Type In Unknown If No Info Given.&gt; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing fatigue or malaise.

This study is being ordered for something other than: known trauma or injury.; There has been treatment or conservative therapy.; pain in back, spasms in throat from trauma, difficulty swallowing; medication; 3 MONTH FOLLOW UP; This study is being ordered for a neurological disorder.; 10/27/2016; There has been treatment or conservative therapy.; HEADACHES, CVA, HAD ACUTE ONSET OF HEADACHE, RIGHT SIDED NUMBNESS AND WEAKNESS.; IV STEROIDS, PT/OT
FOLLOW UP IN MEMBER WITH TIC DISORDER THAT HAS INCREASED, MRI BRAIN RECOMMENDED TO EVALUATE FOR BRAIN ABNORMALITY; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

MOTOR DELAYS, ABNORMALITIES IN TONE WITH MORE OF A HYPOTONIC PATTERN WITH SUPERIMPOSED BRISK REFLEXES NOTES, DIFFICULTY WITH ORAL MOTOR SKILLS, PARTICULARLY THE TEXTURES.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

MRI BRAIN - TO RULE OUT LESION, MRI RIGHT KNEE TO RULE OUT ANY CONSTRICTING BAND; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/13/2016; There has been treatment or conservative therapy.; ABNORMAL GAIT, LIMP, FALLING, RIGHT UPPER EXTREMITY POSTURING, RIGHT LOWER EXTREMITY ABNORMALITY; AFO, PHYSICAL THERAPY

None; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

PRE-OPERATIVE; This study is being ordered for a metastatic disease.; There are 5 or more exams are being ordered.
PROCEDURE(S): MRI C SPINE W/O; MRI cervical spine without contrast 3/13/2017

History: Neck pain. Comparison: None. Technique: Routine MRI imaging of the cervical spine was performed without contrast. Findings: The palatine tonsils are prominent. Mu; This study is being ordered for Congenital Anomaly.; 09/16/2016, SYRINGE WAS FOUND 03/13/17 MRI; There has not been any treatment or conservative therapy.; G95.0 Syrinx of spinal cord;

Sudden onset after vomiting 2 days in a row.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient’s life (within the last 3 months).
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient has undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis); The patient has a congenital abnormality.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was abnormal.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

Unknown; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy; leans head; PT "The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT
"There is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

"There is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT.

Pain is sharp.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/19/2017; There has not been any treatment or conservative therapy.; The Pt has left lower chest pain and left flank pain. Coughing makes pain worse.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a known tumor.; The ordering physician is an oncologist, surgeon, pulmonologist, or cardiologist.; The patient is not presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; This is a request for a chest MRI.; The patient has had 3 or fewer chest MRIs.

&amp; Enter answer here - or Type In Unknown If No Info Given. &amp;; This study is being ordered for trauma or injury.; 2/14/17; There has been treatment or conservative therapy.; Pain in back, spasms in throat from trauma, difficulty swallowing; medication.

PROCEDURE(S): MRI C SPINE W/O &amp;#x0D; &amp;#x0D; MRI cervical spine without contrast 3/13/2017 History: Neck pain. Comparison: None. He has dyspnea with ambulating under 50 feet, denies wheezing, cough, fever, hemoptysis, pleuritic pains or unexplained weight loss.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04-20-2016; There has been treatment or conservative therapy.; patient has copd&x0D; 6-7 mm nodule in the right upper lobe which had enlarged from 4 mm on prior exam, additional bilateral nodules measuring up to 6-7 mm&x0D; 18 mm thyroid lesion, small ill-defined lucent lesions throughout the thoracic spine; pulmonary function test&x0D; complete sleep study&x0D; cpap titration

HEMOPTYSIS, COUGH, COPD, ABNORMAL X-RAY, MILD ENLARGEMENT IN THE LEFT HILUM, WHEEZING; There is no radiologic evidence of mediastinal widening.; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT

Hilar adenopathy reported on CT urogram. Only part of the hilum is visible in study. Will need more information for diagnostic considerations. CT Scan of chest to evaluate nodes and lung parenchyma.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

impression dated 3/9/16 of last ct scan 3mm nodule in the left lung base follow up ct in one year recommended if any risk for lung cancer; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

MEDIASTINAL ADENOPATHY, PULMONARY INFILTRATE, SERIAL CT SCANS TO EVALUATE FOR CHANGE IN SIZE AND/OR SHAPE OF ENLARGED LYMPH NODES LOOKING FOR CONTINUED IMPROVEMENT, REDUCTION IN SIZE, LONG TERM DRUG THERAPY; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Minimal atelectasis. Small right upper lobe and lingular nodules are present, for which 6 month followup study is recommended. Mild fatty replacement changes in the liver are incidentally noted; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
Mister Ross tells me he developed a cough in September 2016. His wife apparently also developed a cough about the same time. He notes that his grandkids became ill. The patient continues to cough as does his wife. They neither smoke. Currently his co; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Moderate to severe emphysematous changes are seen throughout the lungs. In the left upper lobe posteriorly, there is a 7 mm subpleural nodule. In the left mid lower lung, there is a 1.1 cm central calcified nodule.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days.".; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

multiple pulmonary nodules, two non diagnostic biopsies, smoker; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; N/A; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.

Need follow up on RUL centrilobular nodules and groundglass opacities, pleural based nodular opacity RLL medially-2X1cm. subsegmental mucus plugging throughout RLL, subsegmental atelectasis in posterior lower lobes. Bilateral noncalcified pulm nodules up ; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Need to follow up on 8mm nodule in RUL. Focal atelectasis within the lingula. Dense nodule along the major fissure of the right lung measuring 5.5mm, scattered interstitial opacities within RML. Patient symptoms include cough and shortness of breath. Also; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

nodular densities throughout both lungs are stable to less pronounced. This suggests improving mycobacterial infection. There is a slightly larger cavitary nodule in the right upper lobe which measures 9 mm in size compared to 4 mm. This could represent ; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT
	nodule vs pneumonia; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
Noncalcified pulmonary nodule at the left lower lobe measuring up to 3.3 mm need imaging to check for stability assessment of this nodule and others found. Also need to follow up on centrilobular emphysematous changes; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Patient has COPD this study is to further evaluate the COPD; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Patient has dyspnea on exertion increased from baseline. Is having increased shortness of breathe and chronic cough lasting longer than 3 months. Decreased lung capacity from last testing. Need to follow up on lung condition as the shortness of breathe is; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

Patient has had cough for the last 4 months.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Patient needs follow up ct for pulmonary nodules last ct done on 3/11/16; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT
patient presents with multiple pulmonary nodules in all lung fields that have grown from previous chest x-ray to CT on 1/04/17. Repeat CT in March 2017 is to document stability and rule out the possibility of a malignant process, prior to any additional; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

PNEUMOTHORAX EVALUATION
CHEST X-RAY: PA and lateral chest x-ray dated 3-2-17 is reviewed and compared with of 2-23-17. The right sided pneumothorax is still present and does not appear to be any larger than on previous film. No pneumothorax is seen.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

pt had abnormal CT lung scan.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

pt has a lung nodule and complains of shortness of breath with a productive cough with green sputum.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

Pt has COPD; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

pt has lymphadenopathy; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

PULMONARY NODULES RIGHT LOWER LOBE MEASURING 7.6MM AND 6.6MM INCIDENTAL FINDING ON CT ABD 12/22/2016; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Disapproval 71250 CT CHEST, THORAX
Radiology Services Denied Not Medically Necessary
"The ordering physician IS an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.

Disapproval 71250 CT CHEST, THORAX
Radiology Services Denied Not Medically Necessary
"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Disapproval 71250 CT CHEST, THORAX
Radiology Services Denied Not Medically Necessary
<&Enter answer here - or Type In Unknown If No Info Given. &gt; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

Disapproval 71250 CT CHEST, THORAX
Radiology Services Denied Not Medically Necessary
<&Enter answer here - or Type In Unknown If No Info Given. &gt; Describe primary symptoms here - or Type In Unknown If No Info Given.&gt;; It is not known if there has been any treatment or conservative therapy.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

MRI left knee ordered to look for OCD and rule out MMT. Pt. States that he developed knee pain with a sudden onset. He has had pain for several years but it has increased significantly in the last week. He does recall an injury when a bull fell on his knee; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.

PT is new to our clinic. Seen in ER for ankle in December, after which he has rested, been on crutches, NSAIDS and activity mod. Presented 2/7/17 for eval of knee because pain and symptoms were worsening. Exam points to possible ACL vs other meniscal tea; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Limited range of motion

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known was medications were used in treatment.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did not include exercise, prescription medication and follow-up office visits.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.
Disapproval

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

Radiology Services
Denied Not Medically Necessary

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; physical therapy

Disapproval

73720 MRI LEG OR LOWER EXTREMIT Y, OTHER THAN JOINT

Radiology Services

Approval

70336 MRI TEMPROMANDIBULAR JOINT, TMJ, JAW JOINT

This is a request for a temporomandibular joint MRI.

Approval

70450 CT BRAIN, HEAD

This study is being ordered for trauma or injury.; May 2014; There has not been any treatment or conservative therapy.; Tingling both arms, pain in neck, physical therapy

Approval

70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; There is not a suspected or known brain tumor.; The patient currently does not have cancer.; This is a evaluation for a bone tumor or abnormality of the skull.; This study is being requested for known or suspected brain tumor, mass or cancer.

Approval

70450 CT BRAIN, HEAD

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval

70450 CT BRAIN, HEAD

70490 CT NECK SOFT TISSUES, LARYNX, THYROID ETC.

NO CONTRAST

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT

Approval

70490 CT NECK SOFT TISSUES, LARYNX, THYROID ETC.

NO CONTRAST

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.

Approval

70490 CT NECK SOFT TISSUES, LARYNX, THYROID ETC.

NO CONTRAST

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT
unknown; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT

unknown; This is a request for neck soft tissue CT.; The patient has NOT been diagnosed with cancer.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was done.

"This is a request for orbit, face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass

This is a request for an Orbit MRI.; There is a history of orbit or face trauma or injury. The patient has had a recent MRI or CT for these symptoms.; This is a request for a Neck MR Angiography.

Pt has cancer, experiencing Migraines, needle core biopsy positive for carcinoma involves both breast, HX of cancer in family, Brain/Bone cancer in family; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist. This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.\n\nA Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

"The ordering physician IS an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient.\n\nA Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.; Yes this is a request for a Diagnostic CT"; There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.\n\nA Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

"There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

"Enter answer here - or Type In Unknown If No Info Given. &gt; There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

Impression: Pancreatic fistula
Low back pain and left lower extremity weakness
Plan: We will place him on 325 mg of sodium bicarbonate 3 times a day;
I've encouraged him to stay hydrated and to drink at least 6 8oz. glasses of water a day;
We have pla
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection.
This study is being ordered as pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

This study is being ordered as pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.

This study is being ordered as pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.

This study is being ordered as pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.

This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown. Patient relates time frame back to onset of pilonidal cyst excision on 10/5/16. Patient had evacuation of hematoma at this site on 10/21/16.; There has been treatment or conservative therapy.; c/o Pressure headache and swelling left buttock. Patient c/o a feeling of pressure/swelling to left buttock that gives him a headache. Reports these symptoms have been chronic. Requesting CT pelvis to rule out deep fluid collection and CT head to r/o a;

Patient has been on multiple different medications with no reported change in symptoms, including Arthrotect; Norco; Tramadol and Excedrin ES.

He has pain in his upper medial thigh. It radiates toward his perineum and right inside his scrotum. Had a very bad back riding accident where he was brought and bruise quite a bit on his lower abdomen and upper thighs bilaterally that happened last year ; This study is being ordered as pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT
IMPRESSION: The left ovary is enlarged compared to the right but does not contain any adnexal cyst. There is no evidence of adnexal free fluid. Findings are not radiographically consistent with ovarian torsion. This study is being ordered because of a suspicious mass/tumor. "The patient has had a pelvic ultrasound, barium, CT, or MR study." This is a request for a Pelvis CT. There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. Yes this is a request for a Diagnostic CT.

PALPABLE MASS FOUND ON EXAM 2/14/2017; The patient is not undergoing active treatment for cancer. This study is being ordered for known tumor, cancer, mass, or rule-out metastasis. "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient." This study is not being ordered for initial staging. The patient is presenting new signs (e.g. lab findings or imaging) or symptoms. This is a request for a Pelvis CT. Yes this is a request for a Diagnostic CT.

Patient reports a right hip mass that has been getting bigger. It measures 9 x 5 cm to right thigh. Patient states it is painful at times. He also needs a colonoscopy as he has never had one. Denies any problems with his colon. No family history of colon. This study is being ordered because of a suspicious mass/tumor. "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study." This is a request for a Pelvis CT. There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. Yes this is a request for a Diagnostic CT.

post-op eval; This study is being ordered for some other reason than the choices given. This is a request for a Pelvis CT. Yes this is a request for a Diagnostic CT.

right groin pain after inguinal hernia surgery; This study is being ordered as pre-operative evaluation. "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient." This is a request for a Pelvis CT. Yes this is a request for a Diagnostic CT.

The patient is in need of a Pelvic CT scan without contrast to evaluate for bilateral inguinal hernias. Due to body habitus these can not be palpated. He is having bilateral groin pain. We are needed to prove hernias before the surgeon will schedule for s; This study is being ordered as pre-operative evaluation. "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient." This is a request for a Pelvis CT. Yes this is a request for a Diagnostic CT.

right groin pain - pubic tubercle. probable medial quad injury. This is a request for a Pelvis MRI. The request is not for any of the listed indications.
This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a preoperative or recent postoperative evaluation.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is an orthopedist or rheumatologist.

TO ASSESS THE AMOUNT OF DISTAL RADIOULNAR JOINT INSTABILITY, POSSIBLE NEED FOR SURGERY; This study is being ordered for trauma or injury.; AUGUST 2016; There has been treatment or conservative therapy.; WRIST PAIN, INSTABILITY, PAIN WITH RANGE OF MOTION, INCREASED LAXITY; I &amp; D SURGERY, CAST FOR 6 WEEKS, SPLINT, OCCUPATIONAL THERAPY

Yes, this is a request for CT Angiography of the upper extremity.

The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is an orthopedist.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.
The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.

Fell in 12/2016; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; The patient has not had recent plain films of the shoulder.; The patient has not had a recent CT of the shoulder.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.
This is a request for an upper extremity joint MRI;

The patient does have documented weakness or partial loss of feeling in the upper extremity;

There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks;

The patient does have an abnormal plain film study of the joint;

The patient has not been treated with and failed a course of four weeks of supervised physical therapy;

The patient does not have a documented limitation of their range of motion;

The patient has experienced pain for greater than six weeks;

The patient has been treated with anti-inflammatory medication in conjunction with this complaint;

This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI;

The patient does have documented weakness or partial loss of feeling in the upper extremity;

There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks;

The patient does not have an abnormal plain film study of the joint;

The patient has been treated with and failed a course of four weeks of supervised physical therapy;

The patient does not have a documented limitation of their range of motion;

The patient has experienced pain for greater than six weeks;

The patient has been treated with anti-inflammatory medication in conjunction with this complaint;

This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI;

The patient does have documented weakness or partial loss of feeling in the upper extremity;

There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks;

The patient does not have an abnormal plain film study of the joint;

The patient has been treated with and failed a course of four weeks of supervised physical therapy;

The patient has a documented limitation of their range of motion;

The patient has experienced pain for greater than six weeks;

The patient has been treated with anti-inflammatory medication in conjunction with this complaint;

This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI;

The patient does not have documented weakness or partial loss of feeling in the upper extremity;

There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks;

The patient does have an abnormal plain film study of the joint;

This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI;

The patient does not have documented weakness or partial loss of feeling in the upper extremity;

There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks;

The patient does have an abnormal plain film study of the joint;

The patient has been treated with and failed a course of four weeks of supervised physical therapy.
This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.;
The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.;
The patient has a documented limitation of their range of motion.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.;
The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.;
The patient has experienced pain for greater than six weeks.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.;
The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.;
The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.
This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

This study is being ordered for Inflammatory/ Infectious Disease.; 2 WEEKS AGO; There has not been any treatment or conservative therapy.; open abcess large softball size or bigger, Hip replacement previous- see if tunnel before surgery

This is a preoperative or recent postoperative evaluation.; This is a request for a Leg CT.; Yes this is a request for a Diagnostic CT

This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture); This is not a pre-operative study for planned surgery.

Approval 77058 MRI breast, without and/or with contrast 1
initial staging; This is a request for Breast MRI; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

Pt has cancer, experiencing Migraines, needle core biopsy positive for carcinoma involves both breast, HX of cancer in family, Brain/Bone cancer in family; This study is being ordered for a metastatic disease; There are 3 exams are being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering physician is not a hematologist/oncologist.

THE PATIENT HAD A ABNORMAL MAMMOGRAM. SHE HAS A MASS . SHE HAS NIPPLE DISCHARGE. SHE ALSO HAS A FAMILY HISTORY OF BREAST CANCER. SHE NEEDS A MORE DETAILED IMAGE OF HER BREAST.; This is a request for Breast MRI; This study is being ordered for known breast lesions; No, this is not an individual who has known breast cancer in the contralateral (other) breast; No, this is not a confirmed breast cancer; No, this patient does not have axillary node adenocarcinoma; No, there are no anatomic factors (deformity or extreme density) that make a simple mammogram impossible; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

This is a request for Breast MRI; This study is being ordered as a screening examination following genetic testing for breast cancer; The patient has a lifetime risk score of greater than 20.

This is a request for Breast MRI; This study is being ordered as a screening examination for known family history of breast cancer; There are benign lesions in the breast associated with an increased cancer risk; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI; This study is being ordered as a screening examination for known family history of breast cancer; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI; This study is being ordered for a known history of breast cancer; No, this is not an individual who has known breast cancer in the contralateral (other) breast; Yes, this is a confirmed breast cancer; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.

This is a request for Breast MRI; This study is being ordered for a known history of breast cancer; Yes, this is an individual who has known breast cancer in the contralateral (other) breast.
This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this patient does not have axillary node adenocarcinoma.; Yes, there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are benign lesions in the breast associated with an increased cancer risk.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a diagnostic/lab test.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Colo-rectal Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Breast Cancer.; This is for evaluation of axillary lymph nodes.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new singns or symptoms.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Abnormal levels of other serum enzymes; This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; It is not known if patient requires evaluation for a congenital defect of the pancreatic or biliary tract.; It is not known if MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.; It is not known if patient has acute pancreatitis.; "The patient has neither a documented allergy to iodine-based contrast materials, or a general history of allergic responses."; It is not known if patient has acute pancreatitis.

Evaluate bile ducts for obstruction; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Patient underwent ERCP 12/2015. Per recent CT 12/16/16, there are two indeterminate calcifications in the right upper quadrant of the abdomen with a small indeterminate calcification in the right lower quadrant of the abdomen. These may be due to small ; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Pt. tested positive for Hepatitis A.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

R/O gall stones; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

The patient is needed an MRCP to evaluate if she still has a retained common duct stone. Her operation was 8/2016 and she was unable to have an ERCP at that time. Her symptoms resolved until today. She developed RUQ pain, just like after her lap chole.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.
Approval  S8037 mrcp

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient has an altered biliary tract anatomy that precludes ERCP.

To evaluate gallbladder for pre-operative procedure.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Disapproval 70450 CT BRAIN, HEAD

Radiology Services Denied Not Medically Necessary

Patient has been on multiple different medications with no reported change in symptoms, including Arthrotect; Norco; Tramadol and Excedrin ES.

Disapproval 70490 CT NECK SOFT TISSUES,LARYNX,THYROID ETC. NO CONTRAST

Radiology Services Denied Not Medically Necessary

unknown; This is a request for neck soft tissue CT.; The study is being ordered for something other than Trauma or other injury; Neck lump/mass; Known tumor or metastasis in the neck; Suspicious infection/abcess or a pre-operative evaluation.; Yes this is a request for a Diagnostic CT.

Disapproval 70540 MRI ORBIT/FACE/NECK W/O DYE

Radiology Services Denied Not Medically Necessary

Patient had evacuation of hematoma at this site on 10/21/16.; There has been treatment or conservative therapy.; c/o Pressure headache and swelling left buttock. Patient c/o a feeling of pressure/swelling to left buttock that gives him a headache. Reports these symptoms have been chronic. Requesting CT pelvis to rule out deep fluid collection and CT head to r/o a;

Disapproval 71250 CT CHEST, THORAX

Radiology Services Denied Not Medically Necessary

xray shows left lower lobe pulmonary mass; &x0D; elevated lipase and epigastric pain; This study is being ordered for something other than: known trauma or injury; metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; elevated lipase and epigastric pain; Info Given &x0D; elevated lipase and epigastric pain.
no clinically significant adenopathy on her physical exam or CT of her neck. Think the symptoms she is having in her neck and shoulder that goes out to her arm is probably a radiculopathy related to spinal problems will order a CT of her cervical spine; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

She has both motor and sensory deficit, and radiculopathy.; This study is being ordered for a neurological disorder.; 6-8 ... to raise right arm, and pain/tingling radiating from upper back to left anterior chest; NSAID’s, therapy, exercises

She has both motor and sensory deficit, and radiculopathy.; This study is being ordered for a neurological disorder.; 6-8 ... to raise right arm, and pain/tingling radiating from upper back to left anterior chest; NSAID’s, therapy, exercises

She has both motor and sensory deficit, and radiculopathy.; This study is being ordered for a neurological disorder.; 6-8 ... to raise right arm, and pain/tingling radiating from upper back to left anterior chest; NSAID’s, therapy, exercises

Impression: Pancreatic fistula
Low back pain and left lower extremity weakness
Plan: We will place him on 325 mg of sodium bicarbonate 3 times a day; I've encouraged him to stay hydrated and to drink at least 6 8oz. glasses of water a day; We have pla; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.

Approval 71250 CT CHEST, THORAX

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 71250 CT CHEST, THORAX

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

Approval 71550 MRI CHEST

This study is being ordered for a known tumor.; The ordering physician is an oncologist, surgeon, pulmonologist, or cardiologist.; The patient is not presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; This is a request for a chest MRI.; The patient has had 3 or fewer chest MRIs.

Approval 74150 CT ABDOMEN WITHOUT CONTRAST

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.; Yes this is a request for a Diagnostic CT.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 74176 CT ABD & PELVIS W/O CONTRAST

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

Approval 74181 MRI ABDOMEN

This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; “The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.”; UNKNOWN
This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient’s further management.

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; Yes, this is an individual who has known breast cancer in the contralateral (other) breast.

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are benign lesions in the breast associated with an increased cancer risk.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Melanoma.; This is for evaluation of regional lymph nodes.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Melanoma.; This is NOT for evaluation of regional lymph nodes.; This would be the first PET Scan performed on this patient for this cancer.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.
MISS HUTSON IS PREVIOUSLY A very healthy lady who perceives her current decrease in conditioning as severe dyspnea. There doesn't seem to be any physiologic impairment or defect. She may be in the future develop some mild abnormalities due to spinal injury; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

This is a request for a brain/head CT.; There is not a suspected or known brain tumor.; The patient currently has cancer.; There is a recurrence or metastasis.; This study is being requested for known or suspected brain tumor, mass or cancer.

"The ordering physician is a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

"The ordering physician is a surgeon, pulmonologist, or cardiologist."; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT

"There is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.

&lt;Enter answer here - or Type In Unknown If No Info Given. &gt;; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.

A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.;

Yes this is a request for a Diagnostic CT

A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary embolus.;

Faxing clinicals; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Follow up to surgery 9/4/2015; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.
Approval 71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

Aortic dz, non-traumatic, known or suspect; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is a known or suspected coarctation of the aorta.; Yes, this is a request for a Chest CT Angiography.

Approval 71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

Patient has a Thoracic Aneurysm; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.

Approval 71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

Pt is status post ascending aortic aneurysm repair we are checking him back post surgery checking for any endoleaks.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are no signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.

Approval 71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

Approval 71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.
Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has undergone treatment for multiple sclerosis.
Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.
Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a change in seizure pattern or a new seizure.
Approval 71250 CT CHEST, THORAX
"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.
"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT
Approval 71250 CT CHEST, THORAX
"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.
Approval 71250 CT CHEST, THORAX
"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
There is evidence of a lung, mediastinal or chest mass noted within the last 30 days. They had a previous Chest x-ray. A Chest/Thorax CT is being ordered. This study is being ordered for work-up for suspicious mass. Yes this is a request for a Diagnostic CT.

There is evidence of a lung, mediastinal or chest mass noted within the last 30 days. They had a previous Chest x-ray. A Chest/Thorax CT is being ordered. This study is being ordered for screening of lung cancer. It is unknown if the patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.

This study is being ordered for a metastatic disease. There are 2 exams are being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering physician is a hematologist/oncologist. The diagnosis of cancer or tumor has been established. Restaging of Cancer. Imaging studies have been performed on the member in the past 3 months.

"Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days." A Chest/Thorax CT is being ordered. This study is being ordered for work-up for suspicious mass.

"There is evidence of a lung, mediastinal or chest mass noted within the last 30 days." They had a previous Chest x-ray. A Chest/Thorax CT is being ordered. This study is being ordered for work-up for suspicious mass. Yes this is a request for a Diagnostic CT.

This study is being ordered for known tumor. Yes this is a request for a Diagnostic CT.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. 08/2012. There has not been any treatment or conservative therapy.

A Chest/Thorax CT is being ordered. This study is being ordered for known tumor. Yes this is a request for a Diagnostic CT.
A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.

A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

abnormal CXR, lateral right lung base that probably represents a large granuloma or pulmonary hamartoma.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Attaching clinicals; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

C/O very weak, fatigue, heat pounding and dry cough. Is having worsening SOB as well as mucous stools worsening over the last week. &lt;#x0D; Chest xray today showed probable improving multifocal pneumonia but some residual particularly right.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

EnX-ray suspicious for early pneumonia Right lower lobe. This may be a post-influenza pneumonia. Given his hx of asthma, I’m going to go ahead and treat with leviquin and steroids. He was advised to take it easy as his O2 at rest is 96. He will follow up if; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
Found 7mm nodule in LUL and 6mm nodule within lingula. Recommended 6 month follow up to review the stability of these nodules and make sure there are no new ones. Patient also has Interstitial lung disease that we need to follow up on as well.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Need follow up exam of nodules found on CT chest for lung screening done at HOG. The nodules vary in size and were subcentimeter and have abnormality. Patient has chronic cough and sputum production with nasal congestion and post nasal drip. Nodules locate; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Patient complaining of pain located in the region of the right posterior thoracic cage. States it has been going on for about a year. Stated he notices the pain worse in the mornings and feels like it is in his chest. Patient states coughing or taking deep breaths.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

Patient had decrease breath sounds; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.

Patient has a suspicious mass that showed up on her chest xray. She’s been having shortness of breath and cough. Patient is a long time smoker.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Patient has an abnormal CXR and needs further evaluation of spot on his lung; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Patient was found to have a lymph node on her chest xray done on 02/21/2017. Radiologist recommends repeat CT scan for lymphadenopathy seen on CT scan.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT
pt has a lung nodule that was found on an x-ray; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT 1

pt has several pulmonary nodules this is a followup; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT 1

RECURRENT PULMONARY EFFUSION; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT 1

Requesting three month follow up CT Chest as recommended by the Radiologist on CT Chest report done on 11-9-16. CT Chest was first done due to history of chronic bronchitis and weight loss.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT 1

There is no radiologic evidence of non-resolving pneumonia.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.;"; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection.;"; There is radiologic evidence of a lung abscess or empyema.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT 1

There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.;"; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT 1

There is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT 1

this is a 6 month follow up for a pulmonary nodule; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months. 1
Approval 71250 CT CHEST, THORAX

this is a 6 month followup pt has multiple lung nodules; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

Approval 71250 CT CHEST, THORAX

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 71250 CT CHEST, THORAX

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 71250 CT CHEST, THORAX

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 71250 CT CHEST, THORAX

unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Approval 71250 CT CHEST, THORAX

&lt; Enter answer here - or Type In Unknown If No Info Given. &gt; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is no other type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.
Approval 71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST
This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.
CTA chest which showed a 4.2cm ascending aortic aneurysm with kinking of the descending thoracic aorta just past the subclavian.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is a known or suspected coarctation of the aorta.; Yes, this is a request for a Chest CT Angiography.
Pt here for followup of atrial tachycardia and atrial flutter. She had a baseline electrophysiology study and was started on flecainade therapy. She has been feeling worse since she started the medication. No syncope. Has dizziness and headaches. She will; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has not been performed within the last month.; Yes, this is a request for a Chest CT Angiography.
This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.
; This study is being ordered for a neurological disorder.; 2013; There has been treatment or conservative therapy.; pain in the antecubital region on both arms. She mention the pain started suddenly from sleep towards the third week of January when she had he elbows flexed. The pain is a described as a sharp pain" similar to a wire being wrapped around the elbows and t; She intermittently has left C3-4 and C4-5 intra-articular facet injections along with physical therapy up until October 2016; RESTAGING/FOLLOW-UP AFTER CHEMO; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.
This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.
72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

Approval

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Radiculopathy documented on EMG or nerve conduction study.

1

72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST

Approval

The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.

1

72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST

Approval

This is a request for a thoracic spine CT.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist.".; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.; There is a reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT

1

72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST

Approval

failed conservative treatment for mid and lower back pain after 6 week course of physical therapy, home stretching, heat, muscle relaxants and pain meds; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/04/2016; There has been treatment or conservative therapy.; sharp and constant pain to mid and lower back with spasm. moderate pain with range of motion with tenderness to the thoracic and lumbar region; Physical therapy - eval and treat 2 times a week for 6 weeks. Heat, home stretching along with meloxicam and pain meds

1

72131 CT LUMBAR SPINE, LOW BACK

Approval

failed conservative treatment for mid and lower back pain after 6 week course of physical therapy, home stretching, heat, muscle relaxants and pain meds; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/04/2016; There has been treatment or conservative therapy.; sharp and constant pain to mid and lower back with spasm. moderate pain with range of motion with tenderness to the thoracic and lumbar region; Physical therapy - eval and treat 2 times a week for 6 weeks. Heat, home stretching along with meloxicam and pain meds

Patient fell off ladder in 4-4-2016, x-rays were negative for fracture of neck. Patient has had weakness with numbness and tingling ever since. He has been having trouble writing, holding on to objects; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; Patient fell off of ladder on 4-4-2016 has had weakness in upper extremities and pain in neck ever since, has been getting worse within the past month therapy, NSAIDS, activity modification has not helped, is affecting patients daily life activities; The patient does not have new signs or symptoms of bladder or bowel dysfunction; There is not x-ray evidence of a recent cervical spine fracture.
RESTAGING/FOLLOW-UP AFTER CHEMO; LAST CHEMO 1/12/17; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

See attached notes; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient complains of neck pain with bilateral upper extremity numbness and tingling. These symptoms have been present for several years but have recently worsened. He states that he has been seen by a neurologist and had an EMG of his arms in the past; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Neurological deficits; cervical radiculopathy with NCS concerning of cervical pathology, neck DDD, neck pain, numbness and tingling (in LUE); No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction; No, the patient is not experiencing new onset of parasthesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Neurological deficits; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; None of the above; &lt;Enter Additional Clinical Information&gt;; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parasthesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; &lt;Enter Additional Clinical Information&gt;; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.
Approval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
This is a request for cervical spine MRI; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

Approval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

Approval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Approval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

Approval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
UNKNOWN; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; FOR THE PAST 7 MONTHS PATIENT HAS BEEN EXHIBITING NUMBNESS AND WEAKNESS IN BOTH THE RIGHT AND LEFT UPPER EXTREMITIES. THE RIGHT ARM AND HAND SEEM TO BE THE WORST. PATIENT IS UNABLE TO RAISE RIGHT ARM MORE THAN 40 DEGREES. CHIROPRACTIC ALIGNMENT IS GOOD; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Approval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
xrays show some narrowing of the thoracic spine and previous Cervical spine surgery.; This study is being ordered for a neurological disorder.; chronic pain, unknown when it started . over a year ago.; There has been treatment or conservative therapy.; cervical pain with radiculopathy and thoracic pain with neurological symptoms.; physical therapy, change in activity level, pain medication, and aleve. ice and heat. All have failed.
Approval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
xrays were normal.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient has had weakness through the left upper extremity. Having a hard time gripping and lifting objects. She has had this problem for a year. Physical therapy has not helped, NSAIDS like Aleve and steroids like Prednisone have not helped. She is curre; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Approval 72146 MRI THORACIC SPINE CHEST SPINE_ UPPER BACK
&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;1

Approval 72146 MRI THORACIC SPINE CHEST SPINE_ UPPER BACK
abnormal thoracic spine x-ray 1/19/16. states spine pain is increasing.; This is a request for a thoracic spine MRI; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known was medications were used in treatment.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.

Approval 72146 MRI THORACIC SPINE CHEST SPINE_ UPPER BACK
back pain cervical, thoracic and lumbar; This study is being ordered for a neurological disorder.; was seen in office 1-18-17 for back pain with weakness in both upper and lower extremities; There has been treatment or conservative therapy.; weakness in both upper and lower extremities; nsaid

Approval 72146 MRI THORACIC SPINE CHEST SPINE_ UPPER BACK
RESTAGING/FOLLOW-UP AFTER CHEMO;LAST CHEMO 1/12/17; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

Approval 72146 MRI THORACIC SPINE CHEST SPINE_ UPPER BACK
The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.
The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of asymmetric reflexes.

This is a request for a thoracic spine MRI.; There is x-ray or laboratory evidence of osteomyelitis.; The study is being ordered due to known or suspected infection or abscess.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Reoccurrence of cancer; Other tests such as laboratory or ultrasound or patient symptoms indicate that the cancer may be present or reoccurring.

Ice and heat. All have failed

&Enter answer here - or Type In Unknown If No Info Given. &gt; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Enter answer here - or Type In Unknown If No Info Given.; 

It is not known if there has been any treatment or conservative therapy.; Enter answer here - or Type In Unknown If No Info Given.; 

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; cont'd lumbar pain w/ radicular pain mostly to L buttock/L thigh; notes sl easing of pain per flexerl and steroid pack from 2 weeks ago - was intol of ultram (hallucin's); outwardly remains in pain; her SLTs today are approx 35-40 degrees bilaterally, wh; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015 - MRI of Hip at that time showed labral tear; 2015 - MRI of Lumbar spine showed lumbar spondylosis, most severe at L5-S1 where there is broad based central protrusion associated with annular tear.; There has been treatment or conservative therapy.; R Hip and Lumbar pain - decreased range of motion of R hip - lower back pain wakes her up at night and is radiating to RLE to knee and ankle level. Also has numbness in toes on R side.; Hip - anti-inflammatory; Lumbar spine - Physical therapy and chiropractic care.

This study is being ordered for a neurological disorder.; was seen in office 1-18-17 for back pain with weakness in both upper and lower extremities; There has been treatment or conservative therapy.; weakness in both upper and lower extremities; nsaid
bilateral lower back pain radiating down both legs for several months that is now worse and not remitting.
Pain right medial scapular border (tender there) with radiation down right posterior arm to elbow with numbness extending down to fingers right hand; The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; Positive for arthralgias, back pain, neck pain and neck stiffness. Neurological: Positive for numbness. bilateral lower back pain radiating down both legs for several months that is now worse and not remitting.
Pain right medial scapular border (tender there) The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.

Enter answer here - or Type In Unknown If No Info Given. Patient to be evaluated for muscle aches. Ms. Cook complains of pain all over, with no specific localization. The onset of pain occurred with no apparent trigger. She characterizes it as aching; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; Enter date of initial onset here - Patient to be evaluated for muscle aches. Ms. Cook complains of pain all over, with no specific localization. The onset of pain occurred with no apparent trigger. She characterizes it as aching and cramping. It is o; There has been treatment or conservative therapy;

Lumbar Spine: Inspection of the lumbar spine reveals normal lordosis with no obvious scoliosis or asymmetry noted. Palpation of the lumbar facet reveals hyperextension of lumbar spine as well as bilateral palpation of lumbar facets; reproduced back pain; The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; Neurological: Patient reports of headache. Weakness is reported by the patient. She denies having any trouble with memory. She finds no trouble while concentrating. She denies of excessive sedation. There is no gait disturbance; reported; The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.
Patient has documented three months physical therapy without improvement. Patient worsening.; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient is having increased pressure in the sacrum causing radiating pain and numbness down both lets into the knees making it hard for the patient to walk.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient has hx of ulcerative colitis. Patient c/o back pain since August with no improvement on medications.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; CT is being ordered to evaluate generalized abdominal pain with onset 1/23/17.; MRI is being ordered to evaluate low back pain with onset 8/11/2016.; There has been treatment or conservative therapy.; Pain in abdomen. Pain in low back.; No conservative tx for the CT.; Conservative tx for MRI: Robaxin, Hydrocodone.

Patient with back pain following lifting a 100 lb propane tank. Left leg went numb and now has sciatica down the left leg. Pain is worsening. he has parasthesias in the left leg Patient taking medrol dose pak with muscle relaxer and anti-inflammatory; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

RESTAGING/FOLLOW-UP AFTER CHEMO; LAST CHEMO 1/12/17; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT A Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Neurological deficits.; The patient has new or changing neurologic signs or symptoms.; The patient has a new foot drop.

The study requested is a Lumbar Spine MRI.; Neurological deficits.; The patient does not have new or changing neurologic signs or symptoms.; The patient has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Neurological deficits.; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

The requested study is a Shoulder MRI; The pain is described as chronic; The request is for shoulder pain; The physician has directed conservative treatment for the past 6 weeks; The patient has not completed 6 weeks of physical therapy; The patient has been treated with medication; The patient received joint injection(s). This study is being ordered for Known Tumor; The ordering physician is an oncologist or orthopedist; This study is being ordered for staging.

This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks; The patient does have an abnormal plain film study of the joint.

This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks; The patient does have an abnormal plain film study of the joint; The patient has not been treated with and failed a course of four weeks of supervised physical therapy; The patient has a documented limitation of their range of motion; The patient has experienced pain for greater than six weeks; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI; The patient does not have documented weakness or partial loss of feeling in the upper extremity; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks; The patient does have an abnormal plain film study of the joint; The patient has not been treated with and failed a course of four weeks of supervised physical therapy; The patient has not experienced pain for greater than six weeks; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint; This study is not being ordered by an operating surgeon for pre-operative planning; This study is being ordered for a metastatic disease; There are 2 exams are being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering physician is a hematologist/oncologist; The diagnosis of cancer or tumor has been established; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This is a request for a Lower Extremity CT; This is not a preoperative or recent postoperative evaluation; There is suspicion of a lower extremity neoplasm, tumor or metastasis.
73720 MRI LEG OR LOWER EXTREMIT Y , OTHER THAN JOINT

; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; Tendon or ligament injury is not suspected.

Brandon Smith 01/13/17
SUBJECTIVE: Brandon Smith returns to the clinic four months status post right ankle injection reporting that following the last visit and receiving an ankle injection that he received no therapeutic benefit whatsoever from it; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.

Knee pain, Pain in right leg, Thigh pain, Injury of thigh, Pain in right knee, Chronic pain syndrome, right knee pain is becoming unbearable, trauma, limited motion (right knee), and previous injuries, any weight bearing makes pain unbearable, limited am; This is a request for a Knee MRI.; The study is not requested for knee pain.; The study is not requested for any of the standard indications for Knee MRI

Knee womb not healing; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; There is no symptom of locking, Instability, Swelling, Redness, Limited range of motion or pain.; It is not known if patient has completed and failed a course of conservative treatment.

Left Knee--: &x0D; mild knee effusion, patellar tenderness, &x0D; lateral patellar tenderness, medial patellar tenderness, &x0D; quadriceps atrophy, synovitis, and tibial tubercle &x0D; tenderness. Left Knee Stability: Stable exam, Lachman negative, anterior &x0D; drawer negative; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

No info Given; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.
none; This is a request for a foot MRI.; It is not known if surgery is planned for in the next 4 weeks.; The study is being ordered for infection.; There are physical exam findings, laboratory results, other imaging including bone scan or plain film confirming infection, inflammation and or aseptic necrosis.

none; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Patient has had a reinjury of right knee with effusion after his right knee arthroscopy and partial; medial meniscectomy, abrasion chondroplasty patella and limited synovectomy that was preformed on 12-1-2016. A re-tear is highly suspected.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient does not have a documented limitation of their range of motion.

This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; The patient has been treated with a protective boot for at least 6 weeks.

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days
This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.  

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability  

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion  

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.  

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days  

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications  

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?  

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is scheduled in the next 4 weeks.  

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).  

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."
This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI.".; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is a study for a fracture which does not show healing (non-union fracture)..; This is a pre-operative study for planned surgery.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle.".; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle.".; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle.".; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle.".; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/30/2016; There has been treatment or conservative therapy.; popping stiffness pain Limited range of motion; Medications home exercise heat and ice
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015 - MRI of Hip at that time showed labral tear; 2015 - MRI of Lumbar spine showed lumbar spondylosis, most severe at L5-S1 where there is broad based central protrusion associated with annular tear.; There has been treatment or conservative therapy.; R Hip and Lumbar pain - decreased range of motion of R hip - lower back pain wakes her up at night and is radiating to RLE to knee and ankle level. Also has numbness in toes on R side.; Hip - anti-inflammatory care; Lumbar spine - Physical therapy and chiropractic care.

This is a request for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history within the last six months of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone); The patient does not have a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone); The patient has a documented limitation of their range of motion.
This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient does not have new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.; Yes this is a request for a Diagnostic CT 1

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT 1

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &amp;#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &amp;#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis.; Yes this is a request for a Diagnostic CT 1

Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &amp;#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &amp;#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis.; Yes this is a request for a Diagnostic CT 1

Epigastric Pain. Pt is having abdomen pain localized to the upper abdomen. CT is to rule out a mass.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &amp;#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &amp;#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis.; Yes this is a request for a Diagnostic CT 1
Patient has hx of ulcerative colitis. Patient c/o back pain since August with no improvement on medications.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; CT is being ordered to evaluate generalized abdominal pain with onset 1/23/17.; MRI is being ordered to evaluate low back pain with onset 8/11/2016.; There has been treatment or conservative therapy.; Pain in abdomen.; No conservative tx for the CT.; Conservative tx for MRI: Robaxin, Hydrocodone.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This is a request for CT Angiography of the Abdomen and Pelvis.

Yes, this is a request for CT Angiography of the abdomen.
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT
74176 CT ABD & PELVIS W/O CONTRAST

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed gall stones.; Yes this is a request for a Diagnostic CT.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/2012; There has not been any treatment or conservative therapy.

48-year-old Hispanic male presents today with reports that for the last 3 days she's had left middle to lower quadrant abdominal pain tenderness he currently takes excellent and taking pantoprazole as well on occasion gas relief medication reports frequent; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.

ACUTE RENAL FAILURE,KIDNEY INJURY,RECURRING,WORSENING PAIN,RADIATING PAIN TO BACK,NAUSEA RECENT,R/O:BILATERAL PLEURAL EFFUSIONS,KIDNEY STONES,RECENT HOSPITAL RELEASE,STAGE 3 RENAL FAILURE; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT.; Attaching clinicals; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.
C/O very weak, fatigue, heat pounding and dry cough. Is having worsening SOB as well as mucous stools worsening over the last week. Chest xray today showed Probable improving multifocal pneumonia but some residual particularly on right.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBTC, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

Dr Confer dictating: Tiffany Williams, DOB 06/01/1993: cystoscopy, right ureteral stent placement. She has a diagnosis for intrauterine pregnancy and right flank pain, hydronephrosis. She needs to be on the schedule for a CT scan and a cysto stent removal; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT; Hepatitis masses noted on ct dated 02/02/2016 and needing f/u imaging; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT.

ongoing painful urination and dysuria. UA abnormal. 1+blood and bacteria and TTNc crystals in urine. Pt treated for UTI in December 2016 and is still having the symptoms. tenderness in LLQ and CVA tenderness on exam; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT; Patient has had the microscopic hematuria pain since 2012.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.
Patient is having nausea/vomiting and RLQ pain and tenderness. The provider would like to rule out ovarian cysts vs appendicitis.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

Patient is post op laparoscopic cholecystectomy and is having left-sided abdominal pain. Need CT Scan to evaluate pseudocyst; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.

pt went to er and had xray done on abdominal series. report has suggestion of underlying hepatomegaly and need ct to properly diagnose; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.

RUQ pain for a week now, but has had off and on for 3-4 months, cannot even sit up straight. drinking soda makes it worse and eating anything makes her blow up.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT

The patient report's of crushing chest pain and left arm pain. Patient has a rising PSA as well. Patient has an inability to control his urination once the urge strikes him. Scan will be used to rule out bony metastasis. Also need to assess his lymph n; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for glucose.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the hematuria is not known.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT;

This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor;

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn’s disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Enter Additional Clinical Information;

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.

This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is being ordered for follow-up.; It is not known if the patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is female.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT;

This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is being ordered for staging.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is female.; Yes this is a request for a Diagnostic CT;

This is a request for an abdomen-pelvis CT combination.; The reason for the study is pre-op or post op evaluation.; The study is requested for post-op evaluation.; The study is requested as a first follow up study for a suspected or known post-op complication.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT;
This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; &lt;Enter Additional Clinical Information&gt;; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; abdominal pain; Yes this is a request for a Diagnostic CT.
This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; blood in stool possible colon cancer; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has been completed.; The results of the contrast/barium x-ray were normal.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.

To rule out appendicitis.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT.

unknown; This study is being requested for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have been performed on the member in the past 3 months.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; It is unknown if there is suspicion of metastasis.
This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.

This request is for an Abdomen MRI.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; Previous CT impression. Multiple bilateral renal enhancing masses essentially all increased in size versus remote prior. There is nodular increase size and lobulation of anterior l

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the pancreas during a previous CT, MRI or Ultrasound.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.;"

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.;"

This request is for an Abdomen MRI.; This study is being ordered for staging.; "The patient has had an abdominal ultrasound, CT, or MR study.;"; Liver mass, LUQ tenderness (mild), frequent diarrhea (the same time she had diarrhea.); severe vomiting and nausea on 3/14/2017 for 24 hours and went to the ER. also had headache, urinary loss of control (stress incontinence), was seen at the ER in Silao.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the pancreas during a previous CT, MRI or Ultrasound.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;2

This request is for a Fetal MRI.; It is unknown if an ultrasound of the mother been completed.

This a request for a Fetal MRI.; It is unknown if an ultrasound of the mother been completed.

This request is for a Cardiac MRI Morph & structure w/o contrast.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;2

This study is being ordered for a neurological disorder.; 12/09/2016; There has been treatment or conservative therapy.; unbalance issues fatigue; medication
Yes, this is a request for CT Angiography of the abdominal arteries.

Hx of breast cancer and abnormal mammogram. On 3-23-16 diag mammogram UNI Rt conclusion of test was lobulated hypoechoic 1 cm mass at the 9:00 position on the right breast is suggestive of an intrammary lymph node however is increased in size compared to ; This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; It is not known if this is an individual who has known breast cancer in the contralateral (other) breast.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; Yes, there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

This is a request for a Bone Density Study.; This patient has not had a bone mineral density study within the past 23 months.; This is a bone density study in a patient with clinical risk of osteoporosis or osteopenia.

RESTAGING/FOLLOW-UP AFTER CHEMO; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have been performed on the member in the past 3 months.
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; The study is requested for suspected coronary artery disease; The member has known or suspected coronary artery disease; The BMI is 20 to 29.

A 63-year-old pleasant lady with hypertension, dyslipidemia, tobacco use, and atherosclerotic heart disease status post remote myocardial infarction and subsequent PTCA and stenting left anterior descending artery. She presents now with symptoms suggest; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent; The member has known or suspected coronary artery disease.

Chest Pain- Patient reports heaviness. He reports exertional. He reports worse with activity. He reports shortness of breath and nausea. He reports pain level 3/10. He reports abrupt onset without warning. He reports relieved with sitting.&amp;#xD; radiates around; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.

has hypertension; obese; history of CAD; hyper lipedemia; had cabbage; had cath; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; The patient has had a cardiology study in the past 3 years.

Pt with recent hospital admission for hypoxic respiratory failure. Pt is unable to walk on treadmill due to her COPD. Pt has significant fatigue and snores at night. Physician is requesting cardiac workup at this time.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has diabetes.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.  
1

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration.".; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.  
1

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient’s age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.  
1

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors.; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater  
1

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Approval

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is requested for known or suspected valve disorders.  
2
This is for a nuclear TMST. patient with episodes of tachycardia; palpitations; sob 3-5 times weekly lasting several minutes; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.

This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; It is not known if there is a change in cardiac signs or symptoms.; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.;

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; The last MUGA scan was performed more than 3 months ago.;

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; The last MUGA scan was performed within the last 3 months.; RESTAGING AFTER CHEMO

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; The last MUGA scan was performed within the last 3 months.; RESTAGING AFTER CHEMO, LAST CHEMO 1/4/17; PATIENT HAS A KNOWN DIAGNOSIS OF MULTIPLE MYELOMA;

Radiology Services Denied Not Medically Necessary

; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction; There is not x-ray evidence of a recent cervical spine fracture; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more then once for these symptoms; It is not known if the physician has directed conservative treatment for the past 6 weeks; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; There has been treatment or conservative therapy; Pain; Pain management; Physical therapy; Bilateral arm pain with dysesthesias rule out herniated nucleus pulposus; Patient complains of pain with abduction of both arms and he complains of weakness; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms; There is no weakness or reflex abnormality; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction; There is not x-ray evidence of a recent cervical spine fracture; Evaluate for nerve impingement. Patient is a candidate for epidural steroid injection and surgery if required; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms; There is weakness; Patient complained of weakness in upper extremities; The patient does not have new signs or symptoms of bladder or bowel dysfunction; There is not x-ray evidence of a recent cervical spine fracture.
Disapproval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
Radiology Services Denied Not Medically Necessary

Increased pain; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Medical history is pertinent for back surgery; This study is being ordered for trauma or injury.; January 23, 2017; There has been treatment or conservative therapy.; low back pain, neck pain, interfering with work. Numbness in L upper arm, L forearm, L hand, numbness and tingling (BUE), muscle aches, arthralgias/joint pain, and back pain, last xR cervical spine DDD noted in 2016, neuropathy affecting BUE, Degeneration of thoracic intervertebral disc, Degeneration of lumbar intervertebral disc, Neck pain, Cervi; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness and tingling (BUE); It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if there is x-ray evidence of a recent cervical spine fracture.

Patient has been working outdoors cutting wood, and his pain has increased. Patient has been scheduled with orthopedic MD as well. Provider would like these images to better treat.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient established care with our office 10/2016. At that time patient c/o pain in left shoulder, pain in lumbar spine, pain in cervical spine. Patient has diagnoses of pain in left shoulder, cervicalgia, other cervical disc degeneration unspecified cervi; There has been treatment or conservative therapy.; Pain in left shoulder, neck, and lower back.; Patient has tried hydrocodone starting 10/21/2016, gabapentin starting 10/21/2016, and flexeril starting 10/21/2016.

Patient reports that the symptoms worsen with prolonged standing. He reports that the pain radiates to both legs. Patient reports having numbness/tingling sensations.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/25/2016; There has been treatment or conservative therapy.; Radiating pain and restricted mobility; Patient has been treated at VA for years with tramadol/NSAID’s/gabapentin/epidural injections/oxycodone.; Patient has tried hydrocodone starting 10/21/2016, gabapentin starting 10/21/2016, and flexeril starting 10/21/2016.

Reports hX of several cervical compression deformities without surgery. Prior medical treatment includes

A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.; Yes this is a request for a Diagnostic CT.; CT DATED 5/4/2016 Noncalcified pulmonary nodules identified in the lung bases. These are nonspecific, but most likely related to noncalcified granulomas. CT scan of the chest in 6 months is recommended.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass. Enter answer here - or Type In Unknown If1. Some "shoddy' lymphadenopathy in the mediastinum with no Pulmonary masses but some mild scarring and CO The largest node is 1.1 cm in the subcarinal area. These are indeterminate and at least should have interval; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; It is unknown if the patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT.  
Established patient here for followup from recent prostate cancer diagnosis. The patient had metastatic workup with CT scan abdomen and pelvis and bone scan. These were negative for any evidence for metastatic prostate cancer. It did show a small pulmonary; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.  
Followup renal cancer. Patient underwent partial left nephrectomy on 4/27/16. Exam being ordered for routine surveillance; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.
It is not known if there is radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Minimum pleural fissural thickening of the chest &amp; pt has fever &amp; chest pain &amp; heart size is borderline or slightly exaggerated.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

LUNG NODULE; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

LUNG NODULES AND KIDNEY CANCER; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

LUNG NODULES; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

Malignant neoplasm of descended left testis.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; It is unknown if imaging studies have been performed on the member in the past 3 months.

MALIGNANT NEOPLASM OF DESCENDED LEFT TESTIS; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; It is unknown if imaging studies have been performed on the member in the past 3 months.

MULTIPLE SMALL LUNG NODULES; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

patient had a renal US which revealed a solid mass in his left testis. also physical exam reveals a hard large mass involving the upper pole of his left testis. Theses findings are compatible with a primary germ cell tumor of the left testis.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

PATIENT HAS IN EMPYEMATOUS CHANGES IN SMALL NOGULE AND DENSITYS;
"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.";
They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.
| Approval | 71250 CT CHEST, THORAX | Patient has prostate cancer, staging; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist. |
| Approval | 71250 CT CHEST, THORAX | PROSTATE CANCER AND BONE METASTASIS; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT |
| Approval | 71250 CT CHEST, THORAX | Pt had left nephrectomy on 6/14/2016 for renal adenocarcinoma. Scans being done for routine surveillance; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist. |
| Approval | 71250 CT CHEST, THORAX | PT HAS LUNG NODULE FOUND ON CT ABD.PELVIS; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT |
| Approval | 71250 CT CHEST, THORAX | PULMONARY NODULES; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT |
| Approval | 71250 CT CHEST, THORAX | Routine surveillance for renal cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist. |
| Approval | 71250 CT CHEST, THORAX | Routine surveillance scan for renal cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist. |
| Approval | 71250 CT CHEST, THORAX | The patient was diagnosed with left renal cancer and underwent left nephrectomy on 3/29/2016. Exam being performed to evaluate for recurrence and metastatic disease; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist. |
the patient was diagnosed with prostate cancer on 3/20/2017. PSA 4.1, Gleason score 6. Scan is being done to determine treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.
