

Magellan Health Care
2018 Hip, Knee and Shoulder Surgery Authorization and CPT Code
Reference Guide

1. PROCEDURES WITHIN PROCEDURES

Does the ordering surgeon need a separate request for all hip, knee and shoulder procedures being performed during the same surgery on the same date of service?

No. Magellan Healthcare provides a list of Surgery categories to choose from and the Surgeon must select the most complex Surgery being performed as the Primary Surgery.

Example: Shoulder Rotator Cuff Repair

If the Surgeon is planning Shoulder Rotator Cuff Repair with claviclectomy the surgeon will select Shoulder Rotator Cuff Repair procedure. The Surgeon does not need to request a separate authorization for the claviclectomy. This is included in the Rotator Cuff Repair authorization.

Example: Knee Meniscectomy/Meniscal Repair/Meniscal Transplant

If the Surgeon is planning a Knee Meniscectomy with Synovectomy the surgeon will select Knee Meniscectomy/Meniscal Repair/Meniscal Transplant. The Surgeon does not need to request a separate authorization for the Synovectomy. This is included in the Knee Meniscectomy authorization.

2. MULTIPLE CPT CODES

Will the ordering Physician need to enter each CPT procedure code being performed the Surgery?

No. Magellan Healthcare will provide a list of surgery categories to choose from and the ordering physician must select the primary surgery (most invasive/complex) being performed.

Does a rotator cuff repair authorization include a labral repair procedure?

No. In the rare event that both a labral repair and a rotator cuff repair are being performed, two different authorizations will be required for the surgery. Initiate a prior authorization request for a rotator cuff and a separate authorization for a labral repair.

Are 2 authorizations required if bilateral surgery is requested?

If any joint surgery is to be performed bilaterally (modifier -50) on the same date of service, separate authorizations are required for each joint.

¹National Imaging Associates, Inc. is a subsidiary of Magellan Healthcare, Inc. 02022018

3. MULTIPLE SURGEONS/PRACTITIONERS:

Does the assistant surgeon need an authorization?

No. If there are two surgeons involved in a surgery case the authorization covers more than one professional billing for the service.

The following pages provides a summary of which CPT codes and procedures are associated with the *Primary Surgery* authorization
