This is a request for a diagnostic CT.; There has not been recent trauma or other injury to the neck.; It is unknown if there is suspicion of known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.; Yes this is a request for a Diagnostic CT

70490 CT NECK SOFT TISSUES, LARYNX, THYROID ETC. NO CONTRAST

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT
Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; August 10, 2017; There has been treatment or conservative therapy.; Pain in both ears; Ear fullness; Chronic ear infections; Chronic sinus problem; Headaches; Neck pain; Sinus pressure; Sore throat; Shortness of breath; Swollen lymph nodes; Decadron injection; Prescribed Mucinex; Prescribed Flonase; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does not have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; This headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are no recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
none given.; This study is being ordered for a neurological disorder.; There has been treatment or conservative therapy.; Headaches&hellip;numbness and tingling of arms; back pain; blurred vision; agitation; Pt has been given blood pressure medications to see if that is what is causing pt.'s headaches. Even when her blood pressure is under control the pt still is suffering from migraines. Pt also has been given muscle relaxers and pain medication for both her; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Recent seizure causing neurologic SX's; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

Since accident has had HA's, blurred vision, memory changes-forgetting things and can only remember flashes of his accident. Will forward clinical once note signed. MRI needed for eval.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is present associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.4

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient's life (within the last 3 months).4

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has been a change in seizure pattern or a new seizure.

unknown; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

None; This study is being ordered for trauma or injury.; 10/04/2017; There has been treatment or conservative therapy.; Left neck pain and should pain. Low back pain; Physical Therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, the patient did not have a recent course of supervised physical Therapy.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.
unknown; This study is being ordered for trauma or injury.; 09/29/2010; There has been treatment or conservative therapy.; Pain in the neck, upper and low back pain; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

unknown; This study is being ordered for trauma or injury.; 11-7-2017; There has been treatment or conservative therapy.; Numbness and tingling in arms, with pain, paratessis of the skin, pain in left arm and neck, degenerative disc disease and spurring, left hand weakness with difficulty making fists in the hand; Meds, Treatment and xray that indicate he needs MRI; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

unknown; This study is being ordered for trauma or injury.; 09/29/2010; There has been treatment or conservative therapy.; Pain in the neck, upper and low back pain; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

unknown; This study is being ordered for trauma or injury.; 09/29/2010; There has been treatment or conservative therapy.; Pain in the neck, upper and low back pain; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

unknown; This study is being ordered for trauma or injury.; 09/29/2010; There has been treatment or conservative therapy.; Pain in the neck, upper and low back pain; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain.; The patient has acute or chronic back pain.; The patient has none of the above.

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain.; The patient has acute or chronic back pain.; The patient has new or changing neurologic signs or symptoms.; The patient has a new foot drop.

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain.; The patient has acute or chronic back pain.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain.; The patient has acute or chronic back pain.; This procedure is being requested for Neurologic deficits.

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection.
The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s) unknown; This study is being ordered for trauma or injury.; 09/29/20107; There has been treatment or conservative therapy.; Pain in the neck, upper and low back pain; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

worst shooting pain and numbness to legs; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT.

Other symptoms and signs involving the musculoskeletal system; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT.

This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury. There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or joint infection.; This is a request for a Diagnostic CT.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT.

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, & Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT

Unknown; This study is being ordered for Inflammatory/ Infectious Disease.; 10/19/2017; There has not been any treatment or conservative therapy.; Coughing, HZ of tuberculosis, HX of cocaine abuse, tobacco use disorder, high blood pressure; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT
This study is being ordered for a metastatic disease. There are 2 exams being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

- CT Upper quad pain radiating to back; had surgery to remove breast.
- CT study of the previously approved abdomen and pelvis showed retroperitoneal lymph nodes; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for an abdomen-pelvis CT combination; A urinalysis has been completed; This is a request for a Diagnostic CT.

- The reason for the study is renal calculi, kidney or ureteral stone; This study is not being requested for abdominal and/or pelvic pain; The study is not requested for hematuria; The results of the urinalysis were abnormal; The urinalysis was positive for hematuria/blood; Yes this is a request for a Diagnostic CT.

- This is a request for an abdomen-pelvis CT combination; A urinalysis has been completed; This study is being requested for abdominal and/or pelvic pain; It is not known if the urinalysis results were normal or abnormal; The study is being ordered for chronic pain; This is the first visit for this complaint; It is unknown if the patient had an Amylase or Lipase lab test; Yes this is a request for a Diagnostic CT.

- Yes this is a request for a Diagnostic CT.

- Yes this is a request for a Diagnostic CT.
This is a request for an abdomen-pelvis CT combination. A urinalysis has been completed. This study is being requested for abdominal and/or pelvic pain. The results of the urinalysis were abnormal. The urinalysis was positive for hematuria/blood. The study is being ordered for chronic pain. This is the first visit for this complaint. The patient did not have a amylase or lipase lab test. Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination. A urinalysis has been completed. This study is being requested for abdominal and/or pelvic pain. The results of the urinalysis were abnormal. The urinalysis was positive for hematuria/blood. The study is being ordered for chronic pain. This is the first visit for this complaint. The patient had an amylase lab test. The results of the lab test were normal. Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination. A urinalysis has been completed. This study is being requested for abdominal and/or pelvic pain. The results of the urinalysis were normal. The study is being ordered for chronic pain. This is the first visit for this complaint. The patient had an amylase lab test. The results of the lab test were unknown. Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination. A urinalysis has been completed. This study is being requested for abdominal and/or pelvic pain. The results of the urinalysis were abnormal. The study is being ordered for chronic pain. This is the first visit for this complaint. The patient had an amylase lab test. The results of the lab test were normal. Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination. A urinalysis has been completed. This study is being requested for abdominal and/or pelvic pain. The reason for the study is known tumor. This study is not being requested for abdominal and/or pelvic pain. The study is not requested for hematuria. Yes this is a request for a Diagnostic CT.
This is a request for an abdomen-pelvis CT combination.; The reason for the study is organ enlargement.; There is ultrasound or plain film evidence of an abdominal organ enlargement.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; It is not known if this study is being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; &lt;Enter Additional Clinical Information&gt;.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is organ enlargement.; There is ultrasound or plain film evidence of an abdominal organ enlargement.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; It is not known if this study is being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient had an amylase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A kidney abnormality was found on a previous CT, MRI or Ultrasound.; It is unknown if the patient has a renal cyst or tumor.

This could relate to focal nodular hyperplasia. This does not have typical hemangioma features. MRI with dynamic imaging recommended.

This study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; “Patient is not clinically obese, nor has an emphysematous chest configuration.”; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has not been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; This study is being requested for Lung Cancer.; This is NOT a Medicare member.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has abnormal heart sounds.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is for follow up of a known murmur.

This is a request for a Low Dose CT for Lung Cancer Screening.; It is unknown if this patient has had a Low Dose CT for Lung Cancer Screening in the past 11 months.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.
This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

No info given.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/7/2017; There has not been any treatment or conservative therapy.; Dysphagia, sore throat, abscess; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

She has severe sudden headaches. Cause dizziness, pain, blurred vision.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

She states that she continues to have headaches; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.

This is a request for a brain/head CT.; Known or suspected TIA (stroke) with documented new or changing neurologic signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.

This is a request for a brain/head CT.;; None of the above best describes the reason that I have requested this test.; None of the above best describes the reason that I have requested this test.

This is a request for a brain/head CT.; The patient has the worst headache of patient's life with onset in the past 5 days; Headache best describes the reason that I have requested this test.; This is NOT a Medicare member.

; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT.

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been less than 14 days since onset; Yes this is a request for a Diagnostic CT.

</table>
The requested study is a Shoulder MRI; Study being ordered due to non-acute or chronic pain; The patient has not completed and failed a course of conservative treatment of at least 4 weeks; No info given.

This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks; The patient does not have an abnormal plain film study of the joint; The patient has not been treated with and failed a course of four weeks of supervised physical therapy; The patient has a documented limitation of their range of motion; The patient has not experienced pain for greater than six weeks; The patient has been treated with anti-inflammatory medication in conjunction with this complaint; This study is not being ordered by an operating surgeon for pre-operative planning.

This study is a request for a Knee MRI; The patient has not had recent plain films of the knee; The ordering physician is not an orthopedist; There is suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

Pain noted for one month, crepitus noted; This is a request for a Knee MRI; The patient has not had recent plain films of the knee; The ordering physician is not an orthopedist; There is suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

The Pt had x-ray, showed pt has calcification of tip of Fibia. Fibula broken at ankle as well; This is a request for an Ankle MRI; Surgery or arthroscopy is not scheduled in the next 4 weeks; The study is requested for ankle pain; There is a suspicion of tendon or ligament injury.

This is a request for a foot MRI; There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot; There is a suspected tarsal coalition.

This is a request for a lower extremity MRI; This is not a pulsatile mass; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI;" There is not a suspicion of an infection; The patient is not taking antibiotics; This is a study for a fracture which does not show healing (non-union fracture); This is not a pre-operative study for planned surgery.

Describe primary symptoms here - or Type In Unknown If No Info Given; One of the studies being ordered is NOT A Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; &lt;Enter Additional Clinical Information&gt;

Lumbar pain and weakness in extremities.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. MRI of the LUMBAR, CERVICAL AND LEFT SHOULDER to further evaluate the patient’s persistent pain and symptoms and to rule out disc herniation. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; November 2014; There has been treatment or conservative therapy.; Pain in the neck, left shoulder, and lower back. WORSENING BACK, SHOULDER AND NECK PAIN. Reports muscle pain, muscle cramp, muscle twitches, muscle wasting, muscle weakness, muscle pain or tenderness, loss of muscle bulk, neck pain, shoulder pain, back pain; Patient has tried braces, physical therapy, and pain medications.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

She continues with severe headaches up the back of her head as well as numbness and tingling down both arms to fingertips. CESI and rhizotomy had helped in the past, but she is so frazzled right now that she feels her headache pain is debilitating. Imagi; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms; The patient does have new or symptoms of bladder or bowel dysfunction.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient has had back pain for over 4 weeks; The patient has seen the doctor more than once for these symptoms; The physician has directed conservative treatment for the past 6 weeks; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; Pre-Operative Evaluation; No, the last Cervical spine MRI was not performed within the past two weeks.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits; Yes, the patient demonstrate neurological deficits; yes, there is a documented evidence of extremity weakness on physical examination; yes, there is a documented evidence of extremity weakness on physical examination.

UNKNOWN; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 1973; There has been treatment or conservative therapy; neck back pain; meds physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; UNKNOWN; There has been treatment or conservative therapy; NECK BACK PAIN; MEDS PHYS THER; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for cervical spine MRI; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; This patient does have new or changing neurologic signs or symptoms; The patient does have new or symptoms of bladder or bowel dysfunction.
This is a request for a thoracic spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

Current Medication:
- gabapentin 100 mg capsule 1 tab TID for 30 Days
- magnesium oxide 400 mg capsule 1 Every night at bedtime
- clonazepam 1mg by mouth 2-4 times daily
- Neurontin 300 mg caps

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

09/28/2015: There has been treatment or conservative therapy.; Complain of severe pain nonresponding to conservative therapy (include bed rest, activity modifications, NSAIDs and opioid medication therapy). The patient describes the pattern of pain as constant with intermittent flare ups.

Professional caregivers seen in the past for pain include Primary Care Physician, Pain Medicine Physician and Orthopedist. The following tests have been done in the past to evaluate pain condition: X-Rays and MRI Scan, CAT Scan and EMG Test. He has tr; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.;

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The patient is experiencing or presenting symptoms of bowel or bladder dysfunction.

The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.
This is a request for a thoracic spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physitized has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; UNKNOWN; There has been treatment or conservative therapy.; NECK BACK PAIN; MEDS PHYS THER; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain.; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; right leg.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

&lIt; Enter answer here - or Type In Unknown If No Info Given. &gt;: The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain.; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; right leg.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is reflex abnormality; The patient does not have new signs or symptoms of bladder or bowel dysfunction; It is not known if the patient has a new foot drop; There is not x-ray evidence of a recent lumbar fracture; The study requested is a lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; She is unfortunately reporting increased left sided low back pain since the procedure that is fairly non-specific in nature, and without any concerning motor or sensory changes or systemic symptoms. It appears that a large portion of her left lumbar pain; The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/20/2013; There has been treatment or conservative therapy.; numbness tingling; medication Management; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

43-year-old female presents for follow up after undergoing a stage bilateral cooled ablation of L3-S1. Since the left sided procedure she is reporting increase pain in the left buttocks that may be related to irritation from the procedure, a trigger point; The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; It is not known if there is weakness or reflex abnormality; The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.
MRI of the LUMBAR, CERVICAL AND LEFT SHOULDER to further evaluate the patient's persistent pain and symptoms and to rule out disc herniation. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; November 2014; There has been treatment or conservative therapy.; Pain in the neck, left shoulder, and lower back. WORSENING BACK, SHOULDER AND NECK PAIN. Reports muscle pain, muscle cramp, muscle twitches, muscle wasting, muscle weakness, muscle pain or tenderness, loss of muscle bulk, neck pain, shoulder pain, back pain; Patient has tried braces, physical therapy, and pain medications.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

MRI to evaluate cause for pain. HER RADICULAR SYMPTOMS HAVE REMAIN NOT WELL CONTROLLED. She is having more pain. The patient reports GAIT DISTURBANCE. Reports LOSS OF STRENGTH. ROM of lumbar spine is noted to be Limited and Painful (Including extension, lateral flexion). Anterior lumbar flexion causes pain. The patient has failed conservative treatment (include activity modifications, physical/home exercise therapy, NSAIDs&x0D; and opioid medication therapy) &x0D; Patient was advised against prolonged bed rest and was also advised to maintain normal activities. From

PATIENT DONE PT AND NSAIDS FOR 6 WEEKS WITHOUT SIGNIFICANT IMPROVEMENT. Patient complains of pain in the neck pain and bilateral arm pain AND BACK PAIN. The patient has been experiencing this pain for the last several months. She reports onset of pain gra; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; There is weakness.; The patient reports gait disturbance. Reports loss of strength. ROM of lumbar spine is noted to be Limited and Painful (Including extension, lateral flexion). Anterior lumbar flexion causes pain. The patient has failed conservative treatment (include activity modifications, physical/home exercise therapy, NSAIDs&x0D; and opioid medication therapy) &x0D; Patient was advised against prolonged bed rest and was also advised to maintain normal activities. From

Patient tried physical therapy for 6 consecutive weeks with no improvement; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; There is weakness.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; The patient has failed conservative treatment (include activity modifications, physical/home exercise therapy, NSAIDs&x0D; and opioid medication therapy) &x0D; Patient was advised against prolonged bed rest and was also advised to maintain normal activities. From

Patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; The patient has failed conservative treatment (include activity modifications, physical/home exercise therapy, NSAIDs&x0D; and opioid medication therapy) &x0D; Patient was advised against prolonged bed rest and was also advised to maintain normal activities. From

The patient has failed conservative treatment (include activity modifications, physical/home exercise therapy, NSAIDs&x0D; and opioid medication therapy) &x0D; Patient was advised against prolonged bed rest and was also advised to maintain normal activities. From
possible pre-op/or possible epidural; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; There is weakness.; difficulty walking, standing up, balance; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

pt had PT without relief 6 weeks, would like to give pt injections; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness down both legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

r/o back and leg, radiculoophy; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; left leg weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Radiculopathy, lumbar region; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above She continues with severe headaches up the back of her head as well as numbness and tingling down both arms to fingertips. CESI and rhizotomy had helped in the past, but she is so frazzled right now that she feels her headache pain is debilitating. Imaging: One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The patient complains of pain in the LOWER BACK AND WHOLE BODY. The patient has been experiencing this pain for the last several months. She reports onset of pain gradually over time. The patient describes her pain as constant with intermittent flare ups; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Reports muscle pain, muscle cramp, muscle twitches, muscle weakness, neck pain, shoulder pain, back pain, joint pain, joint stiffness, morning stiffness and night cramps. Denies loss of muscle bulk, joint swelling, swollen joints and atrophy. The patient; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy? 12

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; the patient was treated with a facet joint injection.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x‐ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

Radiology Services Denied
Not Medically Necessary

Lumbar MRI without contrast performed 6/1/16 significant for mild degenerative disc disease from L3-S1, as well as mild bilateral lumbar spondylosis at L3-L4. There also appears to be mild spondylitic changes throughout L3-S1 due to the degenerative disc; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

None.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3yrs.; There has not been any treatment or conservative therapy.; Neck and back pain radiates to UE and LE, numbness and tingling.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

none.; This study is being ordered for a neurological disorder.; 09/07/2014; There has been treatment or conservative therapy.; gait issues entire spine pain slow reflexes numbness on the right side; TENS unit, PT pain management; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

This is a request for cervical spine MRI; Neurological deficits.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

**MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST**

Radiology Services Denied
Not Medically Necessary

This is a request for a thoracic spine MRI; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; There is weakness.; Muscle tone and strength weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

Radiating pain from the left side from the mid part of the thoracic spine all the way around under the breast line running in a T6 dermatome distribution.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/10/2017; There has been treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD's specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiulopathy documented on EMG or nerve conduction study.

This is a request for a thoracic spine MRI; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a thoracic spine MRI; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a thoracic spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Muscle tone and strength weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture. 1

Radiating pain from the left side from the mid part of the thoracic spine all the way around under the breast line running in a T6 dermatome distribution.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/10/2017; There has been treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD's specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiulopathy documented on EMG or nerve conduction study.

This is a request for a thoracic spine MRI; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

<Enter answer here - or Type In Unknown If No Info Given.>; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Anesthesiology Disapproval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary

&It; Enter answer here - or Type In Unknown If No Info Given. &It;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; straight leg test was positive; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Anesthesiology Disapproval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary

&It; Enter answer here - or Type In Unknown If No Info Given. &It;; This study is being ordered for trauma or injury.; 07/10/2017; There has been treatment or conservative therapy.; back pain radiating down leg left side; pain management; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Anesthesiology Disapproval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary

; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Unknown; Oxycodone, Ibuprofen

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs, muscle relaxers; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

; Discussed with patient since he is again conforming to treatment protocols that we will proceed with the scoliosis areas of the spine including an MRI of the lumbar spine and consider consultation with Dr. Bumpus due to spinal deformity with increasing ; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above
Enter answer here - or Type In Unknown

The patient complains of pain at lower back and hips and legs. The patient has been experiencing this pain for several years. She reports onset of pain gradual. Reports frequency of pain as constant. She describe; The study requested is a Lumbar Spine MRI.;

Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.;

The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Heat, home exercises, ice, massage for 6 weeks;

The patient has been treated with medication.;

other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.;

Heat, home exercises, ice, massage for 6 weeks;

Ms. Hampton is a 63 y.o. female who presents to the pain clinic with back pain which has been gradually worsening over time. The pain is described as aching and throbbing. Radiates: BLE, down the posterior legs to the knees. The pain is worsened by stand; The study requested is a Lumbar Spine MRI.;

Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; bilateral weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

None.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3yrs.; There has not been any treatment or conservative therapy.;

Neck and back pain radiates to UE and LE, numbness and tingling.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

none; The study requested is a Lumbar Spine MRI.;

Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; bilateral weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

none; This study is being ordered for a neurological disorder.;

09/07/2014; There has been treatment or conservative therapy.; gait issues entire spine pain slow reflexes numbness on the right side; TENS unit, PT pain management; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Pt had pelvis ultrasound which showed a cyst on her left ovary; Pt having back pain and pelvic pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

UNKOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; UNKOWN; There has been treatment or conservative therapy.; NECK AND BACK PAIN; MEDICATION AND PHYSICAL THERAPY;
UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; UNKNOWN; There has been treatment or conservative therapy.; BACK AND PELVIC PAIN; MEDS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

UNKNOWN; This study is being ordered for trauma or injury.; 11/27/17; There has been treatment or conservative therapy.; NECK AND BACK PAIN; MEDS PHYS THER; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

UNKNOWN; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Unknown; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

MRI of the LUMBAR, CERVICAL AND LEFT SHOULDER to further evaluate the patient’s persistent pain and symptoms and to rule out disc herniation. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; November 2014; There has been treatment or conservative therapy.; Pain in the neck, left shoulder, and lower back. WORSENING BACK, SHOULDER AND NECK PAIN. Reports muscle pain, muscle cramp, muscle twitches, muscle wasting, muscle weakness, muscle pain or tenderness, loss of muscle bulk, neck pain, shoulder pain, back pain ; Patient has tried braces, physical therapy, and pain medications.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Patient c/o of pain in right shoulder and burning after falling and injuring shoulder.

UNKNOWN; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

unknown; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

severe claudication of RT LE; pt has trouble walking due to swelling and pain; no pulses in RT foot at all.; This study is being ordered for Vascular Disease.; early 2017; There has been treatment or conservative therapy.; no pulses in RT foot; severe claudication, leg swelling &amp; cramping; abnormal ABI/arterial Doppler in late October; pt has severe claudication in RT LE, and no pulses in his RT foot.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for CT Angiography of the Abdomen and Pelvis.

Yes, this is a request for CT Angiography of the abdomen. Evaluate pulmonary nodule; This study is being ordered for Vascular Disease.; December 2015; There has not been any treatment or conservative therapy.; COPD, chronic bronchitis; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed within the past 10 months.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to tumor or mass.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is not a first follow up study for a post operative complication.; Pre-op or post op evaluation; redo EVS AAA repair done 8/2016; this is a 1 year f/u appointment.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT &lt;Enter answer here - or Type In Unknown If No Info Given.&gt;; This is a request for a CT scan for evaluation of coronary calcification.

This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT &lt;Enter answer here - or Type In Unknown If No Info Given.&gt;; This is a request for a Heart CT.

Yes this is a request for CT Angiography of the abdominal arteries.

The patient is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt;Enter date of initial onset here - or Type In Unknown If No Info Given&gt;; It is not known if there has been any treatment or conservative therapy.; &lt;Describe primary symptoms here - or Type In Unknown If No Info Given&gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Ms. Tharp is a 54y/o patient who was referred to EP by Dr. Rolleson d/t syncope/near syncope, possible HUT.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Ms. Black is a 45y/o patient who was referred to EP by Dr. Lendel for recurrent syncope/near syncope. She is currently wearing 20-day event monitor. Stress echo showed LVEF 50-55%, no ischemia at 71% max HR, ischemia at max HR can not be ruled out. Onset.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; It is not known if the member has known or suspected coronary artery disease.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for evaluation of the heart prior to non cardiac surgery.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.; This is NOT a Medicare member.; This study is being ordered for Vascular Disease.; There has not been any treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Mass.; It is unknown if there been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a cardiac mass.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient’s cardiac symptoms.

This is a request for Stress Echocardiogram.; None of the listed reasons for the study were selected; It is not known if the member has known or suspected coronary artery disease.

This is a request for Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.

For pre op clearance; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a tumor.

Cardiology Approval 70450 CT BRAIN, HEAD

I had the pleasure of seeing Mrs. Alarcon in consultation for Atrial fibrillation. As you know she is a pleasant 56 yr old female with a history of HTN, HL, atrial fibrillation. She was diagnosed at the onset of the year, with a flu like;

Cardiology Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for stroke or aneurysm.; This study is being ordered for screening for aneurysm or AVM.

None; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Cardiology Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; The patient has a new onset of a headhache within the past month; Headache best describes the reason that I have requested this test.

Cardiology Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."); This study is being requested for a headache.

Cardiology Approval 70450 CT BRAIN, HEAD

70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTR RAST

This study is being ordered for Vascular Disease.; 10/6/17; There has not been any treatment or conservative therapy.; Right leg Numbness, Falls, Short of breath, chest tightness, dizziness, Near syncope; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Cardiology Approval 70496 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTR RAST

70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTR RAST

This study is being ordered for Vascular Disease.; 10/6/17; There has not been any treatment or conservative therapy.; Right leg Numbness, Falls, Short of breath, chest tightness, dizziness, Near syncope; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
Cardiology Approval 70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST
This study is being ordered for Vascular Disease.; 10/2016; There has been treatment or conservative therapy.; Heart fluttering Pain Stenosis of Carotid Artery Dizziness; Medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
1

Cardiology Approval 70540 MRI ORBIT/FACE/NECK W/O DYE
"This is a request for orbit, face, or neck soft tissue MRI.239.8"; The study is ordered for pre-operative evaluation
1

Cardiology Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.
1

Cardiology Approval 71250 CT CHEST, THORAX
"The ordering physician is a surgeon, pulmonologist, or cardiologist.; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT
2

Cardiology Approval 71250 CT CHEST, THORAX
"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.; They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
1

Cardiology Approval 71250 CT CHEST, THORAX
Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT
1

Cardiology Approval 71250 CT CHEST, THORAX
Abnormal high BMI. Will start walking when well from pneumonia. One year follow up for Thoracic aortic aneurysm without rupture; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT
1

Cardiology Approval 71250 CT CHEST, THORAX
Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT
1

Cardiology Approval 71250 CT CHEST, THORAX
Aseending thoracic aortic aneurysm measuring 5 centimeters; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT
1

Cardiology Approval 71250 CT CHEST, THORAX
Ascending thoracic aeurysm; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST RAST

This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.
AF recently diagnosed, 3 weeks ago. on NST&lx0D; on eliquis, and Diltiazem. &lx0D; 60 yo with CAD, smoke 40 ppd quit 5 month ago ? COPD, HTN, HL.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has not been performed within the last month.; Yes, this is a request for a Chest CT Angiography.

descending aortic aneurysm follow up.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography.

descending thoracic aorta at 4.4 cm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography.

dilated aortic root at 4.5 cm diameter, coronary atherosclerotic disease, Total calcium score of 0. Exertional dyspnea following abnormal stress test showing global wall motion abnormality. on 9/25/17 admitted for LHC-1 Successful mid LAD drug-eluting ste; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

EVALUATION FOR CONGENITAL VENOUS ANOMALY OF PERSISTANT LEFT SIDED SVC; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

F/U THORACIC AORTIC ANEURYSM.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are no signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.

Known dilated aortic root and thoracic aortic aneurysm. Pt has htn.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

Known thoracic aortic aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has not been performed within the last month.; Yes, this is a request for a Chest CT Angiography.
Mr. Caston returns to clinic today feeling well without cardiovascular complaints or angina pectoris. CTA last year showed growth in his dilated aortic root from 3.4cm in 2015 to 3.7cm in 2016. He has had good control of his blood pressure on current med.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow‐up to a previous angiogram or MR angiogram.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.

Mr. Roberts is here for cardiac clearance. He has known CAD s/p CABG, CVA, HTN, and murmur. He reports fatigue. If he walks 40-50 yards, his legs get tired and weak. He reports pain in his feet. He is out of his cholesterol medication. He denies chest pai; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has not been performed within the last month.; Yes, this is a request for a Chest CT Angiography.

Ms. Dreher is a 30 yo WF with a hx of vasovagal syncope, palpitations, PAF/AT and NSVT who presents for follow up. She was seen at AHH ED with c/o PAF with exercise and noted to have K 3.3. Continues on multaq. Discussed possible PVI with breakthrough AF.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has not been performed within the last month.; Yes, this is a request for a Chest CT Angiography.

Patient has A Known Aortic Aneurism; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

Pt has been experiencing right side hypersensitivity and now is experiencing low back pain across the entire back causing different sensations of warm feeling, sharp pain radiating to his LE. All of the pains he has been experiencing is from the waist down; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has not been performed within the last month.; Yes, this is a request for a Chest CT Angiography.
Referring Provider: Scott Beau MD

I had the pleasure of seeing Mr. Jones in consultation for pulmonary vein isolation. As you know he is a pleasant 61 yr old male with a history of GERD, OSA eval negative, HT; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has not been performed within the last month.; Yes, this is a request for a Chest CT Angiography.

This study is requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are signs or symptoms indicative of vascular insufficiency to the neck or arms.; Yes, this is a request for a Chest CT Angiography.

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

THORACIC AORTIC ANEURYSM SEEN ON ECHO.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

Thoracic Aortic Aneurysm with chest pain and sob.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

To f/u a pseudoaneurysm.; This study is being ordered for Vascular Disease.; 07/05/2016; There has been treatment or conservative therapy.; Edema with chest pain; Patient had serial ct scans to monitor the aneurysm. The aneurysm got too large and was repaired.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBC, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

To reassess the patient ascending aneurysm.; This study is not requested to evaluate suspected pulmonary embolus.; It is not known if this study will be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

unknown; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is a known or suspected coarctation of the aorta.; Yes, this is a request for a Chest CT Angiography.

follow-up on the aorta ectasia.; This is a request for a MR Angiogram of the chest or thorax
Cardiology Approval
72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST
The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI. The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

Cardiology Approval
72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

Cardiology Approval
72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST
There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.

Cardiology Approval
72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST
The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

Cardiology Approval
72192 CT PELVIS WITHOUT CONTRAST
This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

Cardiology Approval
73706 CT ANGIOGRAPHY LOWER EXTREMITY
Yes, this is a request for CT Angiography of the lower extremity.

Cardiology Approval
74150 CT ABDOMEN WITHOUT CONTRAST
This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; Which organ is enlarged? Other; Yes this is a request for a Diagnostic CT

Cardiology Approval
74150 CT ABDOMEN WITHOUT CONTRAST
HX OF LUNG NODULES, HX OF FATIGUE, HX OF HEART FAILURE, HX OF ANGINA.; This study is being ordered for Inflammatory/ Infectious Disease.; 11/20/2017; There has been treatment or conservative therapy.; CHEST PAIN, SOB AND FATIGUE.; MEDICATION; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Cardiology Approval
74150 CT ABDOMEN WITHOUT CONTRAST
This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT

Cardiology Approval
74150 CT ABDOMEN WITHOUT CONTRAST
This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Yes this is a request for a Diagnostic CT
This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT.; This study is being ordered for Vascular Disease.; 03/2016; There has been treatment or conservative therapy.; She reports her shortness of breath better We did again review in detail her most recent CT scan for evaluation and surveillance of her aneurysm last measured at 4.7 cm in June of this year. I will go ahead and request a 6 months follow-up CT scan of her c; n/a; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for CT Angiography of the Abdomen and Pelvis. To f/u a pseudoaneurysm.; This study is being ordered for Vascular Disease.; 07/05/2016; There has been treatment or conservative therapy.; Edema with chest pain; Patient had serial ct scans to monitor the aneurysm. The aneurysm got too large and was repaired.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Yes, this is a request for CT Angiography of the abdomen. 6 month Common Iliac Aneurysm Follow up; This is a request for an abdomen-pelvis CT combination.; The reason for the study is vascular disease.; There is known or suspicion of an abdominal aortic aneurysm.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT no additional.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/25/2016; There has been treatment or conservative therapy.; congestive heart failure, hypertension.; the patient has a LVAD inserted on 4/25/2017—to help his value of life. We are working him up for a heart transplant evaluation.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Pre-op evaluation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; congestive heart failure; ventricular disfunction; implant placed; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
This is a request for an abdomen-pelvis CT combination.; The reason for the study is pre-op or post op evaluation.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The requested studies are not being ordered for known or suspected aneurysms, hematoma, or blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; There is evidence of vascular abnormality seen on plain film and/or Ultrasound/ Doppler.; Vascular disease; Yes this is a request for a Diagnostic CT

This is a request for a MR Angiogram of the abdomen.

This is a request for a heart or cardiac MRI.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; This study is being ordered for Vascular Disease.; It is not known if there has been any treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for a Heart CT.

This is a request for Heart CT Congenital Studies.

This is a request for CTA Coronary Arteries.; The patient has had a stress echocardiogram; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.
This is a request for CTA Coronary Arteries.; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

Abnormal EKG; Essential hypertension; Family history of CAD; Chest pain; COPD.; This is a request for CTA Coronary Arteries.; The patient has had Myocardial Perfusion Imaging including SPECT (single photon Emission Computerized Tomography) or Thallium Scan.; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

Chest pain with exertion. She had a previous stress echo that showed suboptimal augmentation of the LV; This is a request for CTA Coronary Arteries.; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

Obese woman with SOB and Chest Pain.; This is a request for CTA Coronary Arteries.; A study not listed has be completed.; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member has known or suspected coronary artery disease.

plain treadmill test in office on 11/29 for 4 mins and chest pain while on the treadmill; This is a request for CTA Coronary Arteries.; A study not listed has be completed.; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member has known or suspected coronary artery disease.

The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; &lt;Additional Clinical Information&gt;; Yes, there is Chronic Chest Pain.
The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; No, patient does not have new onset congestive heart failure.; Last week she developed burning, epigastric. Radiated to lower left and right chest. Moderate. Lasted for several hours. Seen in ED and better with GI cocktail. No recurrence after that one day. Not worse with exertion.; Yes, there is Chronic Chest Pain.

The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; No, patient does not have new onset congestive heart failure.; Pt added on to clinic after having chest pain following her stress test. She is on flecainade therapy. She is having 3/10 chest pain in the office. She has not had any visualization of her coronary arteries. She comes in today for further evaluation.; Yes, there is Chronic Chest Pain.

The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; No, patient does not have new onset congestive heart failure.; PT is having SOB and syncope, unable to walk on treadmill for stress test; Yes, there is Chronic Chest Pain.

The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; No, patient does not have new onset congestive heart failure.; PT with systolic murmur experiencing increased SOB, chest pain and BLE swelling; Yes, there is Chronic Chest Pain.

The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; No, patient does not have new onset congestive heart failure.; recurrent cp and sob; Yes, there is Chronic Chest Pain.
The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; No, patient does not have new onset congestive heart failure.; see attached clinicals; Yes, there is Chronic Chest Pain.

The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; It is not known if patient has new onset congestive heart failure.; &lt;Additional Clinical Information&gt;; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; No, patient does not have new onset congestive heart failure.; &lt;Additional Clinical Information&gt;; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; No, patient does not have new onset congestive heart failure.; 59 y.o. Latin American male here for follow up for chest pain, dyspnea, hypertension, hypercholesterolemia. Patient reports episodes of precordial chest pain, described as a pressure, occurring across chest area, occurring at random times, more often in ; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; No, patient does not have new onset congestive heart failure.; Yes, there is Chronic Chest Pain.

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic.; No, patient does not have new onset congestive heart failure.; Chest pain on exertion; Yes, there is Chronic Chest Pain.
The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; None; Yes, there is Chronic Chest Pain. 1

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient has family hx of premature coronary artery disease; Yes, there is Chronic Chest Pain. 1

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient with family hx of premature coronary artery disease; Yes, there is Chronic Chest Pain. 1

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient with family hx of premature coronary artery disease; Yes, there is Chronic Chest Pain. 1

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient has family hx of premature coronary artery disease; Yes, there is Chronic Chest Pain. 1

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient with family hx of premature coronary artery disease; Yes, there is Chronic Chest Pain. 1

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Shortness of Breath, Shortness of Breath upon Exertion, Chest pain, OVER 50, DIABETES, HYPERTENSION.; Yes, there is Chronic Chest Pain. 1

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Shortness of Breath, Shortness of Breath upon Exertion, Chest pain, OVER 50, DIABETES, HYPERTENSION.; Yes, there is Chronic Chest Pain. 1

There is “Acute Chest Pain” or Angina.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; It is not known if patient has new onset congestive heart failure.; Recent onset of chest radiating into the arms and neck, cannot do treadmill due to Fibromyalgia and chronic back pain; No, there is no Chronic Chest Pain. 1
Cardiology Approval

75574 CT Angiography
Heart coronary arteries, CCTA

This is a request for CTA Coronary Arteries.; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

This is a request for CTA Coronary Arteries.; The patient has not had other testing done.; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

This is a request for CTA Coronary Arteries.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; It is not known if the study is requested for suspected or known coronary artery disease.; The member has known or suspected coronary artery disease.

This is a request for CTA Coronary Arteries.; The study is requested for evaluation of the heart prior to non cardiac surgery.

This is a request for CTA Coronary Arteries.; The study is requested for known or suspected valve disorders.

This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; Chest Pain

This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; CHEST PAIN WITH NORMAL STRESS TEST.

This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; SOB with rest and exertion.

This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for being evaluated prior to a cardiac surgical procedure.; &lt;Additional Clinical Information&gt; No, the examination is not for noninvasive coronary arterial mapping.

This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for being evaluated prior to a noncardiac surgical procedure.; &lt;Additional Clinical Information&gt;

This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterruptible cardiac imaging.; equivocal but low risk stress echo. patient had no exercise-induced chest pain but developed close to 1 mm ST depression in v5 v6 at peak exercise resolving less than 1 min into recovery. No segmental wall motion abnormalities noted in the post exercise i; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

#1 abnormal heart saver CT: He recently had a heart saver CT. This revealed a score of 723 in the LAD in 192 in the right coronary artery. At this time he remains active physically. He’s not having any symptoms of angina. His EKG does not have any ischemi; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient has had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

&It; CTA of coronary done April shows moderate disease in LAD ending up having heart cath. done showed single vessel disease of LAD still having chest pain left sided described as heaviness occurs with exertion radiates to left arm with tingling in left arm; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram; nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

&It; Enter answer here - or Type In Unknown If No Info Given. &gt; post op check up; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is not presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; It is not known if the patient is diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; It is not known if the patient has had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/5/2017; There has not been any treatment or conservative therapy.; chest pain, shortness of breath.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Angina (I20.9); Hypertension (I10); Hyperlipidemia (E78.5); Diabetes mellitus (E11.9); Shortness of breath (R06.00); Aortic murmur (I35.8); The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

It is not known if the patient is diabetic.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

It is not known if the patient is diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

The patient is not diabetic.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Cardiology Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre-op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms. The study is not requested for pre-op evaluation, cardiac mass, CHF, septal defects, or valve disorders. There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath. There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent. The member has known or suspected coronary artery disease.

1. The patient has 3 or more cardiac risk factors; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

2. The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

3. The patient has 2 cardiac risk factors; The study is not requested for pre-op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

4. The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre-op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent. The member has known or suspected coronary artery disease.; The BMI is 20 to 29
This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is not presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; It is not known if the patient had a stress echocardiogram since surgery.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a nuclear cardiology study since surgery.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram within the past eight weeks.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

This study is being ordered as a pre-operative evaluation.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

This study is being ordered as a pre-operative evaluation.; The patient has not had a recent stress echocardiogram.; The patient has not had a stress echocardiogram within the past eight weeks.; It is not known whether this evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
1 angina: He’s been having symptoms of dyspnea on exertion over the past few months. We does moderate activity gets markedly short of breath. He’s noticeable changes exercise tolerance as well. A few weeks ago when he was dragracing, he had an episode of ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; The patient is male.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

50-year-old white male who presents with the symptoms as described above. The symptoms certainly range in the possibilities between ischemic heart disease possible congestive heart failure and possible pulmonary in etiology. At this point I would like; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

A 58-year-old female with: 1. Intermittent palpitations.; 2. Intermittent chest pain.; 3. History of fibromyalgia and arthritis. Unable to exercise from musculoskeletal issues.; 4. Acute QT prolongation. ; 5. Dyslipidemia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39.
Myocardial perfusion imaging, tomographic (SPECT); single study

The study is being ordered for suspected CAD.;
The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.;
The patient has not had a recent non-nuclear stress test.;
The patient has had a recent abnormal EKG consistent with CAD.;
The patient has not had a recent stress echocardiogram.;
The patient has not had a stress echocardiogram within the past eight weeks.;
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient is male.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

ABN EKG; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.;

The patient’s age is between 45 and 64 years old. 1

Abnormal results of other cardio function study; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.;
The patient has not had a stress echocardiogram since surgery.;
The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.;
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Active chest pain; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has had Myocardial Perfusion Imaging including SPECT (single photon Emission Computerized Tomography) or Thallium Scan.;
The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.;
There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.;
The study is requested for suspected coronary artery disease.;
The member has known or suspected coronary artery disease.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

AFIB, HOLTER MONITOR SHOWS episodes of AF with a HR of 170's. There was a lot of artifact noted. 
Prior History: palpitations, syncope, CHA2DS2-VASC Score: heart failure or LV dysfunction (1 point); hypertension (1 point); CHA2DS2-VASC score total: 2
The study is being ordered for suspected CAD. The patient is presenting with symptoms of atypical chest pain and/or shortness of breath. The patient has not had previous cardiac surgery or angioplasty. The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Angina, Dyspnea on exertion, other CP, HTN; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Audra returns for f/u. Echo showed mild LVH and normal LV function. She has had no further severe episodes of LE edema. Today she is concerned about occasional brief episodes of a “pulling” discomfort in the left chest, lasts 5-10 minutes, at rest in the ; The study is being ordered for suspected CAD. The patient is presenting with symptoms of atypical chest pain and/or shortness of breath. The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

c/o retrosternal chest pain and bilateral arm pain and tingling for lst 3-4 months. Symptoms last for a few minutes and resolves on its own. Not always related to exertion. Also c/o palpitations, 1-2 times a week, resolves in 5-10 minutes. No syncope, orth; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.
Cardiology Approval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
CAD/Angina; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Cardiology Approval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
cardiac clearance; This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Cardiology Approval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
cardiomyopathy; In this patient we should check to see if there is any evidence of LV dysfunction. His there is any evidence of ischemia. Any evidence of valvular abnormalities. Any evidence of pulmonary hypertension. Her any evidence of dysrythmias. Winder; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Cardiology Approval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
Chest pain abnormal EKG palpitations; It is not known if the patient is diabetic.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Cardiology Approval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
chest pain on exertion and shortness of breath when walking; continues to have episodes of chest pain, palpitations, pt was able to walk on treadmill approx 4 minutes.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.
Chest pain sob was not able to walk on treadmill; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Symptoms: chest pain, numbness, shortness of breath, fatigue, palpitations; At this point, we'll go forward with a full noninvasive evaluation also look that these episodes of palpitations may be related to dysrhythmia and a 24-hour Holter monitoring. We'll do a T; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Chest pain, atypical. Fatigue, multifactorial, possibility of sleep apnea on there with history of snoring and significant tiredness. Recommend sleep study.

Symptoms: chest pain, heart racing, short of breathe, swelling in legs, palpitations; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.
Yogin Patel is a 60 y.o. male who presents for complaints of chest pain. Pertinent history: The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Georgia Thompson is a 59 y.o. female who presents for a follow up. C/o intermittent left sided chest pain that radiates into the left upper back.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Chest pain; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Chest pain; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Chest pain; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Chest pains shortness of breath; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

FAX; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

FAX; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

FOLLOW UP OF KNOWN CAD.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Get's dizzy and light headed if walks on treadmill; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.
He had a colonoscopy and after a GIB that required 4 units of PRBC's and they noticed a HR in the 30's. He wore a holter that showed some 2:1 AVB that could be Mobitz II type II block and is on an event monitor to differentiate between Wenkebach or True M; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

He reports he was seen at Dr. Bates office yesterday and was told his EKG was abnormal. He complains of substernal chest pressure over the past 2-3 months that occurs without regards to exertion. He states it occurs almost daily. He also reports SOB that.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Heart Murmur
hyperlipidemia
fibromyalgia
abnormal ECG
Hypercholesteremia
Family History of Coronary Artery Disease
Shortness of breath
Muscular and Joint Pain due to secondary fibromyalgia; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

heart murmur
Provided heart murmur: care instructions
essential hypertension
Provided high blood pressure: care instructions
Provided learning about high blood pressure
Type 2 diabetes mellitus without complications
Provided type 2 diabetes: care ins; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

hx chs and dyspnea on exertion; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
Hx of hypertension, left bundle branch block showing on EKG, having left sided chest pain radiating to right side of chest as well as back and top of arm. Pain is worse on exertion. Complaining of ongoing headaches and shortness of breathe. Mother died of; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old. impression:
1 coronary artery disease: She’s a few years out from intervention to the right coronary artery. Her last angiogram was year and a half ago. She’s been having some breakthrough angina from time to time. The episodes are short-lived. They can; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breathe.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39
inducible ischemia; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
intermittent chest pain, junctional tachycardia, heart palpitations; seen in ER on 11/17/17; Pt c/o of left sided chest pain radiating to left arm that "feels numb" onset 10 minutes prior to arrival to the ED. Pt states pain was initially sharp, now ju;

The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

It is not known if the patient is diabetic.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

It is not known if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has diabetes.; The patient is 65 or older.; The patient has a cardiac history with known myocardial infarction and/or cardiac intervention such as cardiac surgery/angioplasty (PCI); It has been greater than 2 years since the surgery/procedure or last cardiac imaging.
Mr. Askew is here today for cardiac evaluation. He has noticed the last couple of months that he has had some intermittent heart flutters. He also states that his bp has been running a little higher than normal for him lately and he has been having indigestion. The study is being ordered for suspected CAD.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient is male.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Mr. Sanders is a 39 year old male here to follow up after an abnormal Keep the Beat scan. He was noted to have a coronary artery calcium score of 21.6. He decided to do Keep the Beat after a few friends of his needed stents. He denies angina. He reports dy; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Mr. Wiedio is here for cardiac evaluation. He had some cp on Wednesday while at Disney World that was relieved by nitro. Pain was on left side and did not radiate but he was pale and very uncomfortable. BP was extremely high during this episode. He went to; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Mr. Foster comes in today to discuss concerns of chest pain that radiate into neck and chin area. Recently has had episodes of HTN upon resting at cardiac rehab. He had a couple episodes of this chest pain.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.
Mr. Scaife is self-referred after recent elevated coronary calcium screening. He notes severe fatigue during the last year, at rest and during exertion. He notes worsening dyspnea on exertion with some mild chest tightness when walking uphill during rec; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Mrs Fairfield is a 34 year old female referred for palpitations. She wore a Holter Monitor on 12/5/17 which showed 10,996 PVC in a 24 hour period including some Bigeminy. Her symptoms started about month ago. It got better after she wore her heart monitor; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

New patient admitted to Dewitt hospital complains of left sided chest pains, stabbing-dull around breast radiating down left arm.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

New patient Dr. Chambers with fatigue last 9 years, and concerned syncope episodes last 3 years, two episodes last one month, with exercise, dizzy and near syncope,..., no associated palpitations......episodes chest pains at rest, and exercise, precordial.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

None; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39 none; This study is being ordered for Vascular Disease.; 10/03/2017; There has not been any treatment or conservative therapy.; I48.91; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Not able to walk on treadmill due to broken ankle. family history of cardiac disease with early onset. chest pain with emotional upset; abnormal ekg. obesity: BMI 32.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

other chest pain&n; Janique L Self is a 30 y.o. female who presents to establish care. Pertinent history includes: family hx of CAD. Other past medical history is noted below. Complaints of recurrent sharp chest pain with radiation to back. Happens frequent.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

other chest pain, essential hypertension, mixed hyperlipidemia;&n; Karen J Woodall is a 56 y.o. female who presents to establish cardiac care. Referral by Dr. Bond for chest pain. Pertinent history includes: HTN, HL. Other past medical history is noted below. Complaints of intermittent chest pains over.; The patient is not diabetic.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

other chest pain, shortness of breath on exertion;&n; Brenda Ellis is a 43 y.o. female who presents to establish care. Pertinent history includes: obesity, tobacco abuse. Other past medical history is noted below. Complaints of intermittent chest pains over.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.
Cardiology Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Cardiology Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Palpitation, Tachycardia, HTN, Dyspnea; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient is male.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Cardiology Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient c/o chest pain and SOB while walking.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Cardiology Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient c/o chest pain and SOB while walking.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.
Patient cannot walk on treadmill due to shortness of breath. Patient is a smoker. Trace of TR on Echo; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; The study is requested for suspected coronary artery disease; The member has known or suspected coronary artery disease; The BMI is 20 to 29

Patient diabetic. Having chest pain and SOB. Unable to walk on TM due to diabetic neuropathy and DOE; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; The study is requested for suspected coronary artery disease; The member has known or suspected coronary artery disease; The BMI is 20 to 29

Patient had treadmill stress test which showed less than 4 METS; The patient has a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member; The patient’s age is between 45 and 64 years old

Patient has abnormal stress echo; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; The study is requested for suspected coronary artery disease; The member has known or suspected coronary artery disease; The BMI is 20 to 29

Patient has been having chest pain with typical and atypical features. Abnormal EKG, HTN, and Family History CAD; The patient is not diabetic; The patient has not had a recent exercise treadmill test that was positive; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member; The patient is less than 45 years old

Patient has BMI of 50. Can not walk on treadmill per surgery. and Obesity; The patient is not diabetic; The patient has not had a recent exercise treadmill test that was positive; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member; The patient is less than 45 years old

Patient has chest pain and palpitations along with shortness of breath. Chest pain is relieved with rest and shortness of breath can happen with or without exertion; The study is being ordered for suspected CAD; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath; The patient has not had previous cardiac surgery or angioplasty; The patient has not had a recent non-nuclear stress test; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise; This is NOT a Medicare member; The patient’s age is between 45 and 64 years old.
Patient has history of CAD and is needing DOT clearance for work; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Patient has poor exercise tolerance and recently had knee injury and is unable to walk on treadmill. She reports intermittent chest pain with radiation to jaw with associated SOB, occurring mostly at rest; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Patient having palpitations, dizziness and fatigue.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Patient is a 58 year old male who presents today as follow up patient for cardiac evaluation. PMH includes OA, OSA with use of CPAP, and CAD s/p remote PCI to OM x2 with DES in NC in 2009. Abdominal ultrasound on 1/22/2017 showed cholecystectomy and moder.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Patient is a known diabetic and has a long history of smoking. Has been having chest pain, dizziness, and SOB that is getting progressively worse and worse.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient originally scheduled and authorized for a stress echo for moderate CAD and dyspnea on exertion but he states he can not walk on treadmill due to "knees are bone on bone"; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

Cardiology Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient sob and chest pain. Attempted stress echo but unable to reach adequate heart rate; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Cardiology Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient unable to complete Rest Stress ECHO study due to not being able to reach targeted heart rate due to becoming short of breath.; Patient has complaint of decreased exercise tolerance and fatigue.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Cardiology Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient with recent hospital stay for new onset a-fib with rapid ventricular response; chest pain; and cardiomyopathy; and abnormal EKG with t wave abnormality; EF of 35%; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not known

Cardiology Approval

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient with chest discomfort; physical limitations to exercise.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

Cardiology Approval
Patient with complaint of chest pain and short of breath on exertion. Patient ECG was abnormal showing inferior T wave inversions. Patient's BMI is 35. Patient has strong family history of CAD in her mother. Patient has hypertension and hyperlipidemia.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Patient with complaint of chest pain while driving. Patient works as a lineman on power lines. Patients BMI is 30. Chest pain radiated to the left arm. Pain was improved when aspirin was administered.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Patient with history of coronary artery bypass with complaint of new chest pain, substernal in location and radiates to back. Patient is diabetic. Patient continues to be positive for tobacco abuse. Patient has COPD and cannot walk on treadmill.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre-op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29.

Patient with symptoms of chest discomfort that are nondescript in nature. The patient's discomforts are likely not related to angina but he does have elevated risk factors
We'll continue to do her risk analysis in the form of a Framingham risk score.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Patient with symptoms of chest discomfort that are nondescript in nature. The patient's discomforts are likely not related to angina but he does have elevated risk factors;&We'll continue to do her risk analysis in the form of a Framingham risk score.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Precordial chest pain, Abnormal EKG & hxOD; Essential Hypertension & hxOD; Family history of early coronary artery disease & hxOD; Morbid obesity; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Precordial chest pain, Dyspnea & hxOD; Abnormal EKG & hxOD; Dyspnea on exertion & hxOD; Essential hypertension & hxOD; Family history of coronary artery disease & hxOD; Morbid obesity; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Precordial chest pain, Dyspnea, Dyspnea on exertion, Abnormal EKG, Essential Hypertension, Family History of coronary artery disease; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Precordial chest pain, Dyspnea, Dyspnea on exertion, Abnormal EKG, Essential Hypertension, Family History of coronary artery disease; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Precordial chest pain, Dyspnea, Dyspnea on exertion, Abnormal EKG, Essential Hypertension, Family History of coronary artery disease; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Precordial chest pain.
Dyspnea.
Dyspnea on exertion.
Abnormal EKG.
Borderline diabetes.
Hypercholesterolemia.
Hypertriglyceridemia.
Family history of coronary artery disease.
Cardiac murmur; It is not known if the patient is diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Precordial pain; David Aaron Pate is a 50 y.o. Caucasian male who presents for evaluation of chest pain Onset was 30 years ago, with waxing and waning course since that time. The patient admits to chest discomfort that is intermittent, with radiation to; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Prediabetes; Essential (primary) Hypertension; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Premature atrial contractions, premature ventricular contractions, sinus tachycardia seen on cardiac event monitor, atherosclerosis of native coronary artery of native heart without angina pectoris, HTN (hypertension), benign, mixed hyperlipidemia; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient is male.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
Pressure like chest pain and palpitations since last week; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. This is NOT a Medicare member.; The patient is less than 45 years old. previous heart catheterization; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. This is NOT a Medicare member.; The patient's age is between 45 and 64 years old. Problem List/Impression: 1. Chest pain R07.9; Plan: Nuclear Medicine Stress Test to evaluate for ischemia if insurance with approve.&amp;x0D; &amp;x0D; 2. Shortness of breath R06.02&amp;x0D; Plan: ECHO to evaluate LVEF and valvular abnormalities.&amp;x0D; &amp;x0D; 3. Palpitations R; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29.

Problem List/Impression: 1. Chest pain R07.9&amp;x0D; Plan: Nuclear stress test to evaluate for ischemia&amp;x0D; &amp;x0D; 2. Dyspnea on exertion R06.09&amp;x0D; Plan: 2D Echo to evaluate LV function and for valvular abnormalities&amp;x0D; &amp;x0D; 3. Palpitations R00.2&amp;x0D; Plan: 30 day; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.;

Pt had treadmill stress test on 11/28/17, was not able to achieve the target heart rate.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.;

Pt has BMI S1, abnormal EKG; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. This is NOT a Medicare member.; The patient is less than 45 years old.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study
Pt has decrease in ejection fraction, has sob with exertion, anginal equivalent. Pending knee surgery.; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient is male.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study
Pt has history of COPD. Echo revealed severe MAC, History of hyperlipidemia; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study
pt has hx of anemic, new onset chest pain for 6 mo, L sided pain feels like pins and needles, occurs 3-4x a week, also has increase of shortness of breath as well as dizziness on exertion; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study
pt having chest pain at rest and on exertion and hypertension, not a smoker. no hx of cad. strong family history of premature CAD. echocardiogram to evaluate LV function. treadmill nuclear stress test to rule out reversible ischemia.&amp;#x0D;&amp;#x0D; pt reports pain t; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study
PT HAVING CP, WITH WEAKNESS, PT HAS A DILATED CARDIOMYOPATHY WITH MODERATE Mitral Annular Calcification; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study
pt having severe sob and chest pain that runs through her back with running uphill. hx of htn, no hx of cad. has fm hx of dm and heart dz. her mom had first MI at age 34, sister has CAD at age 49; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.
Pt is a known smoker, has known family history of CAD and has been having SSCP that is worse with activity as well as dizziness, SOB, and palpitations; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Pt is a known smoker, is having worsening chest pain and SOB; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Pt presented to ER w/chest pain, abdominal pain, dyspnea and nausea, hx of hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Pt reports SOB with minimal activity, occasionally associated with chest tightness. Rest relieves. Reports frequent HA's with dizziness. Pt has experienced chest pain with exertion.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

Pt w/abnormal EKG, chest pain and palpitations; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

R06.02, R53.83. Strong family history of CAD.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

**Reason for Appointment**

1. Abnormal ECG & Referral Dr Burleson cardiac investigation and abnormal ECG...discussed diet and tests. & Vital Signs & Referral Dr Burleson;

**HR 64 /min, BP 130/83 mm Hg, Ht 6 ft 3 in, W;** The study is being ordered for suspected CAD.; The patient is presenting with atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

**Reason for Appointment**

1. AF & Referral Dr Burleson;

**History of Present Illness**

Ms Williams is a 57 yo AAF with a hx of PAF in 2/2017, HTN, DM, HLD and CVA 6/18-6/22 at SVI and started on eliquis who was self referred due to worsening cough worse at ni; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

**Reason for Appointment**

1. CAD & History of Present Illness & HPI: 56 y.o. female with h/o DM, HTN, HLD, GERD, CAD s/p NSTEMI treated with PCI of MLCx with Resolute (4/21/2017) LVEDP 20mmHg and LVEF 55% here for late 3 month f/u appt. & HPI: ; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

**Reason for Appointment**

1. Chest Pain & HPI: Mrs. White presents today to establish care. She states that two weeks ago she was awakened from her sleep with chest pressure. She went to the ER at CHI and was gi; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has a history of hypertensive heart disease.; There is a change in the patient’s cardiac symptoms.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has high blood pressure.
This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has a history of hypertensive heart disease.; There is a change in the patient’s cardiac symptoms.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected left ventricular disease.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.

This is a request for an echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; Known or suspected valve disease.

This is a request for an echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is an evaluation of new or changing symptoms of valve disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected valve disease.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.
This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has shortness of breath; Known or suspected Congestive Heart Failure.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.;

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a pericardial disease.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Embolism.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; It is unknown if this request is for initial evaluation of a murmur.; This is a request for follow up of a known murmur.
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; The murmur is NOT grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; It is unknown what type of cardiac valve conditions apply to this patient.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual re-evaluation of artificial heart valves.; It has been at least 12 months since the last echocardiogram was performed.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 10 - 11 months since the last echocardiogram.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 12 - 23 months or more since the last echocardiogram.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of artificial heart valves.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is NOT for prolapsed mitral valve, suspected valve disease, new or changing symptoms of valve disease, annual review of known valve disease, initial evaluation of artificial heart valves or annual re-eval of artificial heart valves.
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status. 1

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for initial diagnosis of congenital heart disease. 1

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; It has been at least 24 months since the last echocardiogram was performed. 1

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of heart failure. 1

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure. 1

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has NOT been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure. 2

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has NOT been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure. 2

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure. 23

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease. 12

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease. 25

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of a recent myocardial infarction (heart attack). 7

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient’s cardiac symptoms. 47

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is NOT a change in the patient’s cardiac symptoms.; It has been at least 24 months since the last echocardiogram was performed. 3

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is NOT a change in the patient’s cardiac symptoms.; It has NOT been at least 24 months since the last echocardiogram was performed. 1
This is a request for an echocardiogram; This is a request for a Transthoracic Echocardiogram; This study is being ordered for Evaluation of Pulmonary Hypertension.

We will do a stress echo full study to further evaluate his symptoms; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; UNKNOWN; It is not known if there has been any treatment or conservative therapy; Shortness of breath.; Chest pressure.; Fatigue.; Abnormal EKG; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This a request for an echocardiogram; This is a request for a Transesophageal Echocardiogram; This study is being requested after a completed NON diagnostic transthoracic echocardiogram.

This a request for an echocardiogram; This is a request for a Transesophageal Echocardiogram; This study is being requested for diagnosis and management of infective endocarditis.

This a request for an echocardiogram; This is a request for a Transesophageal Echocardiogram; This study is being requested for evaluation of atrial fibrillation or flutter to determine the presence or absence of left atrial thrombus or evaluate for radiofrequency ablation procedure.

This a request for an echocardiogram; This is a request for a Transesophageal Echocardiogram; This study is being requested for evaluation of suspected acute aortic pathology such as aneurysm or dissection.

This a request for an echocardiogram; This is a request for a Transesophageal Echocardiogram; This study is being requested for pre-operative evaluation of mitral valve regurgitation.

This a request for an echocardiogram; This is a request for a Transthoracic Echocardiogram; This study is being ordered for Evaluation of Pulmonary Hypertension.

We will do a stress echo full study to further evaluate his symptoms; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; UNKNOWN; It is not known if there has been any treatment or conservative therapy; Shortness of breath.; Chest pressure.; Fatigue.; Abnormal EKG; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

He is here for a routine follow up visit. He denies any angina, shortness of breath, orthopnea, or PND. Saw Dr. Thihalolipavan during a period of NSR, elected for conservative therapy. If No Info Given.; This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is not experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease. 1

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/12/2017; There has not been any treatment or conservative therapy.; Pt has chest pain and shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology 1

Patient with known CAD for follow up stress after PCI/Stent to check re-stenosis; This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is not experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease. 1

Patient with known CAD for follow up stress after PCI/Stent to check for restenosis.; This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is not experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease. 1

This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease. 5

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; It is not known if the member has known or suspected coronary artery disease. 9

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease. 2
This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; To evaluate a suspected cardiac mass.; The member does not have known or suspected coronary artery disease.

This is a request for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

Ms. Cook is here today for check up. She states that she has been feeling ok except has a knot to left buttock that has been there for about 2 weeks. She has life vest on today but states that she has not been wearing it regularly. She denies any fires fro; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Ms. McCurrie is here for a follow up visit. Yesterday she didn't feel well. Then she started to go to the grocery store and had blurry vision. She could not tell the difference between hay bales and fence. Her left eye was worse than the right eye. Her se; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Ms. Story presents today with newly diagnosed HTN, with initially poor response to amlodipine therapy and improved BP on losartan but with associated headache. ROS is ow negative.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.
Cardiology Disapproval 70450 CT BRAIN, HEAD Radiology Services Denied Not Medically Necessary This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.

Cardiology Disapproval 70486 CT SINUS, FACE,JAW,MANDIBLE,MA XILLOFACIAL NO CONTRAST Radiology Services Denied Not Medically Necessary This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset; Yes this is a request for a Diagnostic CT

Cardiology Disapproval 70490 CT NECK SOFT TISSUES,LARYNX,THYROID ETC. NO CONTRAST Radiology Services Denied Not Medically Necessary This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT

Cardiology Disapproval 70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST Radiology Services Denied Not Medically Necessary Yes, this is a request for CT Angiography of the brain.

Cardiology Disapproval 70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST Radiology Services Denied Not Medically Necessary Yes, this is a request for CT Angiography of the Neck.

Cardiology Disapproval 71250 CT CHEST, THORAX Radiology Services Denied Not Medically Necessary Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT

Cardiology Disapproval 71250 CT CHEST, THORAX Radiology Services Denied Not Medically Necessary Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT

Cardiology Disapproval 71250 CT CHEST, THORAX Radiology Services Denied Not Medically Necessary Chest pain describes the reason for this request.; An abnormal finding on physical examination led to the suspicion of infection.; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema); Yes this is a request for a Diagnostic CT

Cardiology Disapproval 71250 CT CHEST, THORAX Radiology Services Denied Not Medically Necessary HX OF LUNG NODULES, HX OF FATIGUE, HX OF HEART FAILURE, HX OF ANGINA.; This study is being ordered for Inflammatory/ Infectious Disease.; 11/20/2017; There has been treatment or conservative therapy.; CHEST PAIN, SOB AND FATIGUE; MEDICATION; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Cardiology Disapproval 71250 CT CHEST, THORAX Radiology Services Denied Not Medically Necessary unknown; This study is being ordered for Vascular Disease.; 6/2017; It is not known if there has been any treatment or conservative therapy.; chest pain, shortness of breath, fatigue; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for a heart or cardiac MRI

This is a request for a CT scan for evaluation of coronary calcification.

This is a request for a Heart CT.

CHEST PAIN AND SHORTNESS OF BREATH; This is a request for CTA Coronary Arteries.; The patient has had a stress echocardiogram; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease. It is not known if patient has any conditions like diabetes, age over 50 etc.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Angina/Chest Pain, Quality: pressure, Context: exertional; at rest, Associated Symptoms: palpitations, Shortness of Breath upon Exertion; Yes, there is Chronic Chest Pain. This is a request for CTA Coronary Arteries.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease

This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Normal stress test with continued chest pain.

This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for being evaluated prior to a noncardiac surgical procedure.; MULTIPLE CORONARY DISEASE RISK FACTORS, CHANGES ON EKG, EJECTION FRACTION OF 45%, HAVING HIP SURY AND NEEDS THIS PRIOR TO THE SURGERY

This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.; Patient with complaint of chest pain, exertional and nonexertional. Patient has elevated blood pressure, hyperlipidemia, and a known 40% LAD lesion found on previous CTA coronaries June 2014. Patient has a BMI of 34, intolerant of statins, family history

This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Normal stress test with continued chest pain.

For the past 6 months she c/o substernal pain. Pressure. Moderate. Lasts 5-10 minutes. Associated with SOB. Worse with exertion. Stable since onset. Pt has back problems; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

Having angina, left precordial, last few weeks, with exercise, radiating left arm, with fatigue, and feet and hands cold „dyspnea daily activities. Patient cannot walk on a treadmill and also has an abnormal ekg.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

He had a CT scan in June that showed microhemorrhages and atrophy of the brain. &RxD; He has also been diagnosed with a chronic demyelinating disease; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

L arm pain, diabetes mellitus, hypertension, severely elevated triglycerides, positive family history, abnormal ekg; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

Mr Rogers is a 61 year old male referred for palpitations. It feels like his heart is racing. This started about a month ago. It does not happen every night. He does not notice it during the day. It has gotten better since starting Hydroxyzine. It lasts a; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39
Mr. Bradford comes in for follow up last seen October 2016. This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). The patient has not had other testing done to evaluate new or changing symptoms. The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders. There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath. There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent. The member has known or suspected coronary artery disease. The BMI is 30 to 39

HISTORY OF PRESENT ILLNESS: Ms. Emerson had 5 minutes of chest pain. It was relatively typical anginal chest pain. There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent. The member has known or suspected coronary artery disease. The BMI is 20 to 29

None; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders. There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath. The study is requested for congestive heart failure. There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath. The study is requested for suspected coronary artery disease. The member has known or suspected coronary artery disease. The BMI is 20 to 29

None; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). The patient has not had other testing done to evaluate new or changing symptoms. The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders. There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath. The study is requested for suspected coronary artery disease. The member has known or suspected coronary artery disease. The BMI is 30 to 39

None; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). The patient has not had other testing done to evaluate new or changing symptoms. The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders. There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath. There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent. The member has known or suspected coronary artery disease. The BMI is 20 to 29
Myocardial perfusion imaging, tomographic (SPECT); single study

PAST HISTORY

Past Medical Illnesses: venous insufficiency, HTN, CP, ABN EKG; Cardiovascular Illnesses: ABN EKG, HTN, CP; Infectious Diseases: no history of infectious diseases; Surgical Procedures: fem-pop bypass, vein stripping.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/17/2017; There has not been any medical treatment or conservative therapy.; Pt has CP, HTN, dyspnea on exertion and first degree AV block from EKG; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient cannot exercise due to dyspnea. Patient’s insurance does not authorize myocardial perfusion imaging study using pharmacological stimulation. We are obtaining a two-dimensional echocardiographic Doppler study and it quality of acoustic window then; This is a request for Myocardial Perfusion Imaging [Nuclear Cardiology Study]. Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.

PATIENT HAS BEEN HAVING INCREASING CHEST PAIN AND SHORTNESS OF BREATH; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/17/2017; There has not been any medical treatment or conservative therapy.; INCREASING CHEST PAIN AND SHORTNESS OF BREATH; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient has history of hypertension, hyperlipidemia. 10 year CV risk assessment score is significantly high at 25%. Presents with complaints of dyspnea on exertion-possible anginal equivalent.; This study is being ordered for Vascular Disease.; Patient has history of hypertension, hyperlipidemia. 10 year CV risk assessment score is significantly high at 25%. Present on 11/13/2017 for new patient evaluation with complaints of dyspnea on exertion-possible anginal equivalent.; It is not known if there has been any treatment or conservative therapy.; Dyspnea on exertion&x003B; Angina equivalent; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Patient is having cad/angina, htn, hyperlipidemia, HTN, she is eight years out from intervention.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

Patient to be evaluated for suspected coronary artery disease due to chest pain associated with dyspnea on exertion and valvular heart disease due to edema and cardiac murmur.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient seen by cardiology with complaint of chest pain, dyspnea on exertion, hyperlipidemia, edema, and cardiac murmur. EKG showed normal sinus rhythm with some lateral ST changes and possible old anteroseptal infarct. Patient has decreased exercise tol; There has not been any treatment or conservative therapy.; chest pain, palpitations, cardiac murmur, edema, hyperlipidemia, dyspnea, nicotine dependence; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Patient with chest pain, dyspnea on exertion.&#x0D; Risk factors include hypertension, hyperlipidemia, tobacco use 40+ years, strong family history of CAD, father and uncles history of MI;&#x0D; ECG shows non-specific repolarization abnormalities at baseline.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient reports intermittent chest pain and dyspnea on exertion, onset 4-5 months ago; There has not been any treatment or conservative therapy.; Angina Dypnea on exertion; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Patient with Exertional chest pain that radiates to the neck and arm is relieved with rest. Family history of CAD with heart attack in brother and father. Also has complaint of palpitations and edema.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

Pressure like chest pain 2 weeks ago. Exertional dyspnea.&#x0D; Electrocardiogram abnormal;&#x0D; Obesity;&#x0D; Tobacco use; Shortness of breath; Angina; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39
Pressure like chest pain and exertional dyspnea for 4-6 weeks. Family History: Father: CAD, CABG, ICD, CHF & hxD; # Angina (120.9); # Hypertension (I10); # Shortness of breath (R06.0); # Tobacco use (Z72.0); This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

Problem List/Impression: 1. Chest pain R07.9; Plan : Nuclear stress test to evaluate for ischemia & hxD; 2. Shortness of breath R06.02 & hxD; Plan : 2D Echo to evaluate LV function and for valvular abnormalities & hxD; 3. Palpitations R00.2 & hxD; Plan : ECG ; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

pt had fall, l arm apin, cp, dizziness, hx of stomach tumor, spinal sx, do non walking & hxD; lexiscan stress test; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

Pt has been having problems lately with DOE and tachycardia on exertion, has a history of post op afib but is now off the amiodarone. He doesn't know if this is atrial fibrillation or now. It is relieved with rest. When; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29

pt has had some indigestion like cp, no arm or neck pain, cp is variable duration, no n/v, unpredictable, hx of ablation. Cardiology: chest pain. Respiratory: shortness of bre; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.
pt has syncope and cannot get on a treadmill; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). The patient has not had other testing done to evaluate new or changing symptoms; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath; The study is requested for suspected coronary artery disease; The member has known or suspected coronary artery disease; The BMI is 20 to 29

Pt needs test to obtain clearance from DOT for his job; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent; The member has known or suspected coronary artery disease.

R/O CAD; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; Enter date of initial onset here - or Type In Unknown If No Info Given &gt; There has not been any treatment or conservative therapy; Chest pain, and SOB; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

r/o CAD; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; few weeks ago; progressively getting worse; There has not been any treatment or conservative therapy; chest pain and shortness of breath progressively getting worse over the last few weeks; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

r/o CAD; This study is being ordered for Vascular Disease; 10/09/2017; There has not been any treatment or conservative therapy; shortness of breath, chest pain with activity; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
Cardiology Disapproval  

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Reason for Appointment 
1. NSVT  
2. History of Present Illness  
3. HPI:  
Ms. Skinner is a 63 yo WF with a hx of AF/AFI, ICD (DOI 6/8/15) and HTN who presents for follow up with NSVT noted on device check. C/o angina, palpitations, dizziness a; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39  

See previous.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.

See previous; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39 

stent; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has had Myocardial Perfusion Imaging including SPECT (single photon Emission Computerized Tomography) or Thallium Scan.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.

submaximal exercise stress; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.
Supraventricular Tachycardia & Dizziness; Cerebral Infarction Due To Thrombosis Of Unspecified Precerebral Artery; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.

CARDIOLOGY Disapproval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study Radiology Services Denied Not Medically Necessary SYNCOPE, CHEST PAINS, SOB, PALPS, DIZZINESS, FATIGUE.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; PT HAS SYNCOPE, WITH CHEST PAINS, SHORTNESS OF BREATH, FATIGUE, PALPS AND DIZZINESS; There has not been any treatment or conservative therapy.; One of the studies being ordered is NOT A Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

CARDIOLOGY Disapproval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study Radiology Services Denied Not Medically Necessary The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have diabetes.; This is NOT a Medicare member.; The patient is 65 or older.

CARDIOLOGY Disapproval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study Radiology Services Denied Not Medically Necessary The patient presents the cardiology office for evaluation regarding intermittent episodes of chest pain characterized as tightness in nature with radiation to her bilateral arms over the past several months. The patient has a known history of COPD/respir; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29.

CARDIOLOGY Disapproval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study Radiology Services Denied Not Medically Necessary The Pt had spell where he coded 6 months ago, now has syncope, hypertension, dyspnea on exertion, high blood pressure. Pt ahs history of renal failure. Pt states feels like heart is going to pound out of chest.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know.

CARDIOLOGY Disapproval 78451 Myocardial perfusion imaging, tomographic (SPECT); single study Radiology Services Denied Not Medically Necessary This is a 62 -year-old gentleman with history of coronary artery disease, previous percutaneous transluminal coronary angioplasty stent to the right coronary artery, 20% circumflex lesion, hypertension, hyperlipidemia who returns to clinic with complaint.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29.
This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent; The member has known or suspected coronary artery disease; The BMI is 40 or greater

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; It is not known if the member has known or suspected coronary artery disease.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; It is not known if the study is requested for suspected or known coronary artery disease; The member has known or suspected coronary artery disease.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; The member does not have known or suspected coronary artery disease.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is requested for evaluation of the heart prior to non cardiac surgery.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is requested for known or suspected cardiac septal defect.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is requested for known or suspected coronary artery disease.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; The study is requested for suspected coronary artery disease; The member has known or suspected coronary artery disease; The BMI is 30 to 39

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; The study is requested for suspected coronary artery disease; The member has known or suspected coronary artery disease; The BMI is 30 to 39

Type 2 diabetes mellitus without complications; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; The study is requested for suspected coronary artery disease; The member has known or suspected coronary artery disease; The BMI is 30 to 39

unknown; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; The study is requested for suspected coronary artery disease; The member has known or suspected coronary artery disease; The BMI is 20 to 29 unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 09/13/2017; There has not been any treatment or conservative therapy; patient is having chest pain and shortness of breath on exertion, dizziness, fatigue and chest pain weak patient up during the night; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Unknown; This study is being ordered for Vascular Disease; 6/2017; It is not known if there has been any treatment or conservative therapy; chest pain, shortness of breath, fatigue; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Unknown; This study is being ordered for Vascular Disease; unknown; There has not been any treatment or conservative therapy; chest pain, shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

will FAX xclinical; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders; The study is requested for suspected coronary artery disease; This study is being ordered for Congestive Heart Failure; The patient has been diagnosed with and/or treated for congestive heart failure; The patient has not had a previous MUGA scan; The patient is not presenting any new cardiac signs or symptoms; currently in cardiac rehab and progressing at an expected pace. He is still having some pleuritic type pain but no typical anginal type CP. His SOB / DOE has improved.

This is a request for a MUGA scan; This study is being ordered for Known Cardiomyopathy/ Myocarditis; There are EKG findings consistent with cardiomyopathy or myocarditis;

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder; ABOUT 12 YEARS; There has not been any treatment or conservative therapy; PALPITATIONS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

- The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

- One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
- The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; about a week ago; There has not been any treatment or conservative therapy.; patient is having burning in chest, shortness of breath on extrusion , hypertension , patient has a heart murmur , a seizure disorder , unable to walk with out being short of breath , Hyperlipidemia , and syncope; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for Vascular Disease.; 8/19/17; There has not been any treatment or conservative therapy.; chest pain and shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; It is not known if there has been any treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has not been any treatment or conservative therapy.; chest pain and shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

abnormal ekg revealing accelerated junctional rhythm rate 93; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has not been any treatment or conservative therapy.; chest pain and shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
Carrie L Jordan is a 45 y.o. female who presents today as a new patient, referred by Dr. James Gardner for CHF. Pertinent history includes: HTN. Other past medical history is noted below. Complains of chest pressure over last 3-4 weeks. Also noticed exert; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Complains of chest pressure over last 3-4 weeks; It is not known if there has been any treatment or conservative therapy.; chest pressure, shortness of breath on exertion, bilateral pedal edema, essential hypertension; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Karen Seigrist is a 64 y.o. female who presents for follow up. Pertinent history includes: CAD, HTN, HL. Other past medical history is noted below. Had an episode of chest pain about 2 weeks ago, resolved with SL NTG. Felt tired for couple of day and ever; hydroCHLORothiazide (MICROZIDE) 12.5 mg capsule TAKE 2 CAPSULES BY MOUTH EVERY DAY; fenofibrate (LOFIBRA) 160 mg Tablet Take 1 Tablet (160 mg) by mouth daily; HYDROcodone-acetaminophen (NORCO) 10-325 mg Tablet Take 1 Tablet by mouth every 4 hours as need; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

PATIENT HAS BEEN HAVING INCREASING CHEST PAIN AND SHORTNESS OF BREATH; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; INCREASING CHEST PAIN AND SHORTNESS OF BREATH; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Patient has history of hypertension, hyperlipidemia. 10 year CV risk assessment score is significantly high at 25%. Presents with complaints of dyspnea on exertion-possible anginal equivalent; This study is being ordered for Vascular Disease; Patient has history of hypertension, hyperlipidemia. 10 year CV risk assessment score is significantly high at 25. Present on 11/13/2017 for new patient evaluation with complaints of dyspnea on exertion-possible anginal equivalent; It is not known if there has been any treatment or conservative therapy; Dyspnea on exertion & Angina equivalent; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBC, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient to be evaluated for suspected coronary artery disease due to chest pain associated with dyspnea on exertion and valvular heart disease due to edema and cardiac murmur; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; patient seen by cardiology with complaint of chest pain, dyspnea on exertion, hyperlipidemia, edema, and cardiac murmur. EKG showed normal sinus rhythm with some lateral ST changes and possible old anteroseptal infarct. Patient has decreased exercise tol; There has not been any treatment or conservative therapy; chest pain, palpitations, cardiac murmur, edema, hyperlipidemia, dyspnea, nicotine dependence; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient with chest pain, dyspnea on exertion. Risk factors include hypertension, hyperlipidemia, tobacco user 40+ years, strong family history of CAD, father and uncles history of MI; ECG shows non-specific repolarization abnormalities at baseline; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; Patient reports intermittent chest pain and dyspnea on exertion, onset 4-5 months ago; There has not been any treatment or conservative therapy; Angina; Dyspnea on exertion; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

r/o CAD; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; few weeks ago; progressively getting worse; There has not been any treatment or conservative therapy; chest pain and shortness of breath progressively getting worse over the last few weeks; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST

This is a request for a thoracic spine CT.; There is no reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; Unknown.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

Neurosurgeon also requested imaging for pre-op evaluation.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/02/2017; There has been treatment or conservative therapy.; Severe neck and mid back pain with radiating pain down his left arm. Limited range of motion; Chiropractic care, physical therapy, medication management.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

Reason: OSTEOARTHRITIS OF SPINE WITH RADICULOPATHY, CERVICAL REGION &#x0D;
Determine cause of pain and symptoms; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in left hand,narrowing of severe C5 C6, DISC SPACE NARROWING AND FORAMINAL NARROWING.ACTIVE ROM-DESCRIPTION: ACTIVE PAINFUL RANGE OF MOTION.&#x0D; Duration of Symptoms: Start: 07/26/2017 &amp;#x0D;&amp;#x0D; Physical Exam Findings: Left neck. Occurs frequently. Pain lev; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrates neurological deficits.; No, there is not a documented evidence of recent development of unilateral muscle wasting.

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient has new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.; Yes, there are documented clinical findings of Multiple sclerosis.

This is a request for cervical spine MRI; Neurological deficits; Has sluggish reflex in right side. reflex is 1+; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness.; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing or presenting new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, this patient had a recent course of supervised physical therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient has a recent course of supervised physical therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Pt suffers with back pain.

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; Surgical consult; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; April 2011; There has been treatment or conservative therapy.; Chronic pain increasing pain; Spinal injections medication management physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurologic deficits.; Yes, there is a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; Yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

70490 CT NECK SOFT TISSUES, LARYNX, THYROID ETC. NO CONTRAST

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT.

70544 Mr angiography head w/o dye

There is an immediate family history of aneurysm.; This is a request for a Brain MRA. &lt;Enter answer here - or Type In Unknown If No Info Given. &gt; This is a request for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

Emergency Medicine

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

pt had abnormal ct in er for headache and needs follow up MRI.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The study is being requested for evaluation of a headache.; The patient has failed a course of anti-inflammatory medication or steroids.; There has been a supervised trial of conservative management for at least 6 weeks.; The patient has demonstrated no neurological deficits.; No, the patient did not have a recent course of supervised physical Therapy.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has been given a diagnosis of a chronic or recurrent headache.; The headache is associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has been given a diagnosis of a chronic or recurrent headache.; The headache is associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has been given a diagnosis of a chronic or recurrent headache.; The headache is associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has been given a diagnosis of a chronic or recurrent headache.; The headache is associated with exertion, or a mental status change.

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

71250 CT CHEST, THORAX

Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT.

71250 CT CHEST, THORAX

Chest pain describes the reason for this request.; An abnormal imaging (xray) finding led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema); Yes this is a request for a Diagnostic CT.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.
This is a request for cervical spine MRI; "The patient has not been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; This is a continuation or recurrence of symptoms related to a previous surgery or fracture.; Follow-up to Surgery or Fracture within the last 6 months; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; Yes, the patient is experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Patient is wanting MRI brain done of his pituitary. He was; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Patient has a benign neoplasm pituitary tumor; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

PCSO, Elevated Prolactin levels.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Pituitary hormone that control the testes was low and a hormone called prolactin which may affect the testosterone was mildly high. Due to this I would like to order MRI of pituitary gland without and with contrast to make sure there is no pituitary patho; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo; It is unknown why this study is being ordered.
This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are not physical findings or laboratory values indicating abnormal pituitary hormone levels.; There has been a previous Brain MRI completed.; The brain MRI was abnormal.; This is NOT a Medicare member.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.; This is NOT a Medicare member.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Abnormal Imaging, Hep C, Cirrhosis, Hepatoma Surveillance; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Abnormal ultrasound revealed indeterminate complex cystic structure in LUQ between spleen and left kidney. Recommending triple phase CT abdomen be performed for further eval.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Cirrhosis of liver, Abnormal Liver Tests Duration: present for 1-5 year severity: AST:73; ALT:56, History of Hepatitis; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

EPIGASTRIC PAIN WITH TENDERNESS, ABNORMAL LFTS, PPIS NOT HELPING. EGD NORMAL, HAS HAD PAIN THAT IS SHARP AND INTERMITTENT FOR SEVERAL MONTHS.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Has large non reducable incisional hernia. Has already been repaired once. Having pain for last week along with weight loss. Status post liver transplant.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Pancreatic Cyst on EUS, Nausea and vomiting; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT
| Patient had an abnormal CT can and we would like to look closer to her pancreas; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Yes this is a request for a Diagnostic CT | 1 |
| patient has a lesion in the liver; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT | 1 |
| Pt is not feeling well, no improvement.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new lab results or other imaging studies including doppler or x‐ray (plain film) findings.; Yes this is a request for a Diagnostic CT | 1 |
| Severe chronic abdominal pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT | 1 |
| This is a request for an Abdomen CT.; This study is being ordered as a pre‐op or post op evaluation.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Yes this is a request for a Diagnostic CT | 1 |
| This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate‐specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.; Yes this is a request for a Diagnostic CT | 2 |
| This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT | 8 |
| This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Yes this is a request for a Diagnostic CT | 1 |
This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for another reason besides kidney/Urinary stone. Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x0D; Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of unexplained abdominal pain in patient over 75 years of age.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT

Unknown.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new lab results or other imaging studies including doppler or x-ray (plain film) findings.; Yes this is a request for a Diagnostic CT

This is a request for CT Angiography of the Abdomen and Pelvis.

Yes, this is a request for CT Angiography of the abdomen.

Acute abdominal pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT.

Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

adenocarcinoma of cecum; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Courtney Shannon is a 25 year old female referred by Dr. Randy Walker. She is here today with a several year history of crampy left-sided abdominal pain and diarrhea. The patient says that she had a CAT scan about a year ago that showed an ad; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT.
Courtney Whitaker is a 29 year old female referred by Dr. Russell Mayo. The patient underwent a hysterectomy in August of 2017 and then presented to a local emergency room in September of 2017 with worsening abdominal pain and severe constipation. The patient is female; It is not known if a pelvic exam was performed; Yes this is a request for a Diagnostic CT Hematuria; This study is being ordered for Inflammatory/ Infectious Disease.; 12/6/17; There has been treatment or conservative therapy.; Blood in urine and abdominal pain, anemia.; Antibiotics; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology. Hx abnormal CT, abdominal pain recurring; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT. Ms Davis is a 29 y/o F who is in GI clinic for evaluation of abdominal pain x 1 year. It is located in lower abdomen- mainly on the right side. It is constant with intermittent worsening, sharp in character with cramping / burning feeling in between. She.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT patient has e-unexplained weight loss; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. Patient has lost a good amount of weight in the past year, and we would like to do a CT scan to see if we can find out the reason.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT. Pt. is still having continuing abdominal pain since 2016.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT rectal cancer; This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This is a request for evaluation of prostate cancer.; There is not a PSA greater than 10.; There is not a Gleason Score (sum) 7 or greater.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is male.; The patient did not have a prior Abdomen/Pelvis CT.; Yes this is a request for a Diagnostic CT.
This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; It is unknown if there has been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; It is not known if the patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; The patient has Ulcerative Colitis.; Yes this is a request for a Diagnostic CT

&It; Enter answer here - or Type In Unknown If No Info Given. &gt; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 4 or 5 months ago; it is not known if there has been any treatment or conservative therapy.; The pt has right upper quadrant pain, findings on the ultrasound recommended that she have these procedures for further eval.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Dec 22 2017; There has not been any treatment or conservative therapy.; Nausea Diarrhea Abdominal Pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Cystic lesion of pancreas; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

FAX; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Patient c/o abdominal pain with elevated LFT’s and abnormal ultrasound revealing gallstones and dilated common bile duct.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

PATIENT IS COMPLAINING OF ABDOMINAL CRAMPING, WEIGHT LOSS, AND DYSPHAGIA. ALSO HAS AN ELEVATED CA 19-9; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Patient ultrasound showed intrahepatic bile ducts mildly prominent and further evaluate abdominal pain.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

pt had ERCP; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

pt seen for EGD on 12/22/17 pt states that she is having RUQ pain and had not had evaluation for it - Dr Jones ordered an US of the abd that showed a contracted gallbladder with stone, common bile duct dilation to 12mm with suggestion of a 6mm stone in th; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.
Pt suffers with inflammatory bowel disease.; This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will not be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.; "The patient is not an infant or young child, and not an adult who is debilitated or uncooperative in such a manner that ERCP is unsafe or cannot be performed."

The patient does not have acute pancreatitis.

pt underwent an ERCP on 10-10-17 with clearing of common bile duct stone removed. However, one stone was not able to be retrieved it had moved up to the bifurcation. We chose to observe since a sphincterotomy was made large enough to hopefully let that st; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.

unknown; This study is being ordered for a neurological disorder.; 01/01/2008; There has been treatment or conservative therapy.; abd pain; nausea and vomiting; pancreatitis; multi ercp; meds.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/05/2017; There has not been any treatment or conservative therapy.; nausea, vomiting, upper pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

&It; Enter answer here - or Type in Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

daily headaches. headaches at top of head. pain dull and aching. double vision, nausea and vomiting. history of brain injury and CVA from motor vehicle accident.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

follow-up from Med Express for possible Thrush. I treated her on 12/13/17 with Nystatin. Then 3 days later she went to NW for severe headache. She got rx for Duke's mouthwash. Toradol tab for her HA.BfxK0D; When she was in Med Express, the MD scraped her palate; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

had a headache since auto accident about a week ago; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

had migraine 4 times in past month or so and loss of vision each time; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Headache x about 4 weeks. Worse the last 2-3 weeks. Patient with dizziness, confusion. Feels like his brain is not connecting with his feet.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

headache; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.
headaches almost daily, family hx of aneurysm; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

history of head trauma&h00D; increasing frequency of headaches&h00D; headaches not responding to treatment; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

history of migraine headache not responding to prophylactic treatment; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

mental status; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Neurologic: Gait and Station: able to tandem walk, toe walk and regular, unable to heel walk. Cranial Nerves: grossly intact. Sensation: grossly intact. Reflexes: DTRs 2+ bilaterally throughout. Coordination and Cerebellum: finger-to-nose intact; tremor w;

This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications

new on set left side facial paralysis; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.

New onset of seizures; This is a request for a brain/head CT.; This study is requested for a new onset of seizures or newly identified change in seizure activity or pattern. Patient had a recent fall on 12/18/2017 has a contusion to the scalp and has a long term use of being on a anticoagulant; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

patient has an injury resulting in paresthesia to arms; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. Patient has been seen at multiple visits for chronic headaches and dizziness. He has received toradol injections, meclizine, naproxen, flexeril all without benefit; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

PATIENT IS HAVING MIGRAINE HEADACHES. THE PATIENT HAS 2-3 MIGRAINES A WEEK, BUT THIS ONE HAS LASTED FOR 5 DAYS. THE PATIENT HAS MIGRAINE HEADACHE WITH NAUSEA, VOMITING, SENSITIVITY TO LIGHT AND SOUND AND IS UNABLE TO FUNCTION. PATIENT ALSO HAS TIGHTNESS T; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.

Patient is having migraines with nausea and vomiting; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.
Patient is only 43 years old and is experiencing chronic dizziness, vertigo, decreased visual activity, and sudden onset of headaches; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

Patient reports passing out a few days ago and woke up on the ground with a saw in his hand. Pt. got a headache last night and a sharp pain to his head. Pt. does have a knot to the back of his head.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is not known if the headache is described as a “thunderclap” or the worst headache of the patient’s life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.

Positive for dizziness, weakness, light-headedness and headaches Positive for blurred vision and visual disturbance. Positive for nausea. Negative for abdominal pain, constipation, diarrhea and vomiting; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

pt c/o constant headache for 5 days in frontal and retro orbital area. He describes pain as shooting. Recent head injury; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

Pt says are getting worse, no improvement.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Pt. c/o vision disturbance and has history of traumatic head injury; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications

pt's headaches have worsened recently and otc medication is no longer as effective, has had a headache that has been waking her up at night Sh ehah a headache most days.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

Pt's trunk of car came down on her head and now has severe headache, dizziness, and confusion; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

R/O jaw fracture; This study is being ordered for trauma or injury.; 10/22/2017; There has not been any treatment or conservative therapy.; pain, headaches, swollen lymph nodes; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

SEIZURES; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.
sudden onset HA with visible abscess to left jaw and facial area; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms. The accident occurred less than 1 hour ago. The fall occurred from a ladder. He fell from a height of 3 to 5 ft. He landed on dirt. The point of impact was the head (bilateral chest). The pain is present in the head (bilateral chest). The pain is moderate; This study is being ordered for trauma or injury.; 12/06/17; There has not been any treatment or conservative therapy.; The point of impact was the head (bilateral chest). The pain is present in the head (bilateral chest). The pain is moderate. He was ambulatory at the scene. There was no entrapment after the fall. There was no drug use involved in the accident. There was.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

The fatigue has been a problem for 1 1/2 weeks; The severity of the fatigue is moderate;

The character of the fatigue is feeling tired pt s/o at night when he sits down he feels the worst, muscles ache, overall feeling of tiredness.; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack) with onset of symptoms less than 48 hours ago.; It is unknown why an MRI is not being considered; This is NOT a Medicare member.

The study is to rule out TIA; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack) with onset of symptoms less than 48 hours ago.; Imaging is needed and availability of MRI would delay treatment is the reason an MRI is not being considered; This is NOT a Medicare member.; This is a request for a brain/head CT.; “There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.”; This study is being requested for a recent head trauma or injury.

This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test. This is NOT a Medicare member.

This is a request for a brain/head CT.; Known or suspected blood vessel abnormality (AVM, aneurysm) with documented new or changing signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.

This is a request for a brain/head CT.; Known or suspected infection best describes the reason that I have requested this test. This is NOT a Medicare member.

This is a request for a brain/head CT.; Known or suspected inflammatory disease best describes the reason that I have requested this test.

This is a request for a brain/head CT.; Known or suspected TIA (stroke) with documented new or changing neurologic signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.

This is a request for a brain/head CT.; New onset of seizures or newly identified change in seizure activity or pattern best describes the reason that I have requested this test.; None of the above best describes the reason that I have requested this test.
This is a request for a brain/head CT.; 'None of the above' best describes the reason that I have requested this test.; None of the above best describes the reason that I have requested this test.

This is a request for a brain/head CT.; 'None of the above' describes the headache's character.; Headache best describes the reason that I have requested this test.

This is a request for a brain/head CT.; Recent (in the past month) head trauma with neurologic symptoms/findings best describes the reason that I have requested this test.

This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.

This is a request for a brain/head CT.; The patient has a new onset of a headache within the past month; Headache best describes the reason that I have requested this test.

This is a request for a brain/head CT.; The patient has a suspected tumor outside the brain.; Known or suspected tumor best describes the reason that I have requested this test.

This is a request for a brain/head CT.; The patient has the worst headache of patient's life with onset in the past 5 days; Headache best describes the reason that I have requested this test.; This is NOT a Medicare member.

This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.

This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; The patient is NOT able to have a Brain MRI for evaluation of these symptoms.

This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The study is being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; The patient is NOT able to have a Brain MRI for evaluation of these symptoms.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.
This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for evaluation of known tumor.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is a recent onset of neurologic symptoms.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."

This is a request for a brain/head CT.; There is not a suspect or known brain tumor.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."

This is a request for a brain/head CT.; This study is being requested for evaluation of known tumor.

This is a request for a brain/head CT.; This study is being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."

Unknown; This is a request for a brain/head CT.; This study is being ordered for known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/27/17; There has been treatment or conservative therapy.; Patient has confusion; Patient has started taking antibiotics; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBC, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD's specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

worst headache of life. Not responding to medications, very unsteady-gait, exposed to viral meningitis, nausea, pain into neck increasing in intensity. &x0D; R/O: CVA/TIA; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

"This request is for orbit, sella, int. auditory canal, temporal bone, mastoid, CT. 239.8";

"There is suspicion of bone infection, cholesteatoma, or inflammatory disease. ostct"

"This request is for orbit, sella, int. auditory canal, temporal bone, mastoid, CT. 239.8";

"There is suspicion of bone infection, cholesteatoma, or inflammatory disease. ostct"; Yes this is a request for a Diagnostic CT.
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. It is not known if there has been any treatment or conservative therapy. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This request is for face, jaw, mandible CT.239.8; "There is a history of serious facial bone or skull, trauma or injury.fct"; Yes this is a request for a Diagnostic CT.

This request is for face, jaw, mandible CT.239.8; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT.

This request is for face, jaw, mandible CT.239.8; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is suspicion of bone infection, [osteomyelitis].fct"; This is not a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT.

This request is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT.

This request is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 06/29/17; There has been treatment or conservative therapy.; cyst, trouble swallowing, nasal congestion, nasal pressure; medications, and antibiotics; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This request is being ordered for trauma or injury.; 10/22/17; It is not known if there has been any treatment or conservative therapy.; facial bruising and pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Patient has been seen 6 times since initial onset and has never fully gotten relief; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; New patient to us, 2016 at least. Flare up over the last 2 weeks.; There has been treatment or conservative therapy.; headache and sinus pressure.&$\times$0D; New paresthesias., Zpak&$\times$0D; Prednisone&$\times$0D; Maxalt&$\times$0D; Albuterol&$\times$0D; Topomax&$\times$0D; Zithromax&$\times$0D; Clindamycin&$\times$0D; Nasal Steroid; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

CONCUSSION HEADACHE FEVER FORGETFULNESS WORSENSING, NOW WITH NAUSEA; This study is being ordered for trauma or injury.; 11/12/2017; There has been treatment or conservative therapy.; HEADACHE, SENSITIVE TO LIGHT AND SOUND, DELAYED RESPONSE. COLD CHILLS AND FEVER 101, FORGETFUL, FELT LIKE SHE WAS GOING TO BLACK OUT; VISIT TO ER FOR STITCHES AND OVER LEFT EYEBROW WAS HIT IN HEAD WITH A SHOVEL. STARTED CLINDAMYCIN 11/12/17; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient has been seen 6 times since initial onset and has never fully gotten relief; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 06/05/17; There has been treatment or conservative therapy.; Dizzy, Headaches, light headed, pressure; Medrol dose pack, decadron shot, augmentin, zyrtex D, cleocin, prednisone; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient has recurrent sinusitis; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis [4 or more acute episodes per year]; Yes this is a request for a Diagnostic CT.

R/O jaw fracture; This study is being ordered for trauma or injury.; 10/22/2017; There has not been any treatment or conservative therapy.; pain, headaches, swollen lymph nodes; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Recurrent pansinusitis; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for a known or suspected tumor.; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for pre-operative evaluation.; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient’s current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient’s current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been less than 14 days since onset; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient’s current rhinosinusitis symptoms are unknown.; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is immune-compromised.; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset; Yes this is a request for a Diagnostic CT

Face, arms & hands numbness & tingling a couple of time a day, drools on the right side of mouth.; This study is being ordered for a neurological disorder.; 2 months ago for the headaches unknown for the radiculopathy; There has been treatment or conservative therapy.; The pt has daily headaches.; Medicine for headache – Trimadol, tried PT but worst than pain.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Facial Paresthesia, smells something like amonia in her nose constantly; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; A metabolic work up was not done including urinalysis, electrolytes and complete blood count with results completed.; The patient is experiencing loss of smell.

Fainting and headaches.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).; FAX; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell’s palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.
General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST has headaches all of the time and they are making her sick; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST having consistent chronic headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST Head injury 2014, went to ER, CT report; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Headache with visual disturbance; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST INCREASING HEAD ACH E – EXCRUCIATING- WORRIED ABOUT INTARA CRANIAL NEOPLASM /CRERBRAL ANEURYSM; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST Headache with visual disturbance; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST left leg sensory and motor deficit and gait ataxia and generalized weakness; diff dx NPH vs MS vs CIDP; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has fatigue or malaise; It is unknown why this study is being ordered.

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST left sided weakness; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing vertigo.
LOCATION IS PRIMARILY LEFT TEMPORAL. PAIN RADIATES TO THE LEFT TEMPORAL. FREQUENCY IS TYPICALLY EVERY FEW WEEKS. CHARACTERIZES AS SEVER, THROBBING, SHARP, AND KNIFE-LIKE.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).; Loss of hearing - left ear; failed hearing test, chronic headache all of a sudden; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

memory loss with history of stroke; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).; Migraine and tension headache. Patients is on Amitriptyline Hydrochloride, Sumatriptan Succinate, and Fioricet for her Migraines.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

migraines; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The MRI was done and it showed a brain nodule, radiology recommended and MRI to further characterize this lesion.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

n/a; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/19/2017; There has been treatment or conservative therapy.; right side weakness, dizziness, blurred vision; medication, Therapy at home; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

neck pain, blurred vision, headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
Neurosurgeon Dr. Armstrong recommended a head CT just to be sure there was not some kind of rare frontal lobe issue causing her bladder symptoms. She has intermittent urinary incontinence and a constant feeling of bladder fullness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

Patient had previous abnormal MRI and has continued to have headache and visual disturbance since the birth of her child.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Patient has been on medication but has been having more frequent headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Patient has a shunt in her head that has not been checked for years. She will need this MRI Brain before she can be seen by a Neurologist.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Patient has chronic hypertension, and is a candidate for CVA incident.; This study is being ordered for trauma or injury.; 9/19/2017; There has been treatment or conservative therapy.; Headache, dizziness, elevated blood pressure, nausea and vomiting; Patient was hospitalized for the possibility of a stroke.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
patient has elevated prolactin level, need to eval pituitary gland.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/anerysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

patient has memory loss; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/anerysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

patient has slightly slurred speech, answers questions appropriately with yes and no answers. Mental status change.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/anerysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Patient here c/o was in a car wreck saturday before last, and she did not go to the ER. but is c/o nose is num painful to breathe. having headaches. she does have a black eye to the left eye. stated that she did not go to ER due to she did not have pain; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; It is not known if there is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation) (parent, sibling, or child of the patient) of stroke, aneurysm, or AVM (arteriovenous malformation).

Patient hit in the head with a baseball, knocked her out and she was hospitalized with cerebral concussion; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).
Patient is experiencing positional tremors. When he moves his head or torso forward, his head and arms shake.; This request is for a Brain MRI; The study is not being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Patient is having visual changes along with headache and syncope; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

Patient presents with post MVA head trauma with retractable headache associated with nausea and vomiting.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.

Patient suffered a stroke on 11/4/2017; This study is being ordered for a neurological disorder.; 11/4/2017; There has been treatment or conservative therapy.; presented with migranes after being found unable to speak and RUE weakness, Left MCA ischemis stroke, appears embolic; 11/6/2017; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient suffered head injury which caused recurring migraine headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient with daily severe headaches. Top and back head. started in July.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).
Patient's mother has a history of migraines and Aneurysm; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Pt c/o bad migraines. pt states his migraines are getting worse. CHRONIC SEVERE HEADACHES; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Pt had abnormal MRI; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

pt had abnormal MRI; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.

PT IS NOW EXPERIENCING VISION LOSS IN RIGHT SIDE AND BELL'S PALSY ON THE LEFT SIDE OF HIS FACE NOW; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has Bell's Palsy.; It is unknown why this study is being ordered.

Pt presents with chronic headache with a sudden change in severity, associated with exertion, or a mental status change.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
Pt said that she had had headache and dizziness and pressure. She is having chest pains has hx of cad feelings are lasting 60-90 seconds and when they happen she can't speak. Looking for suspect TIA; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

Pt with history of recurrent headaches. Previously on amitriptyline with reasonable results. However, she was excessively drowsy and we changed her from amitriptyline to topamax. She hasn't tolerated the change well. She is c/o nausea and headaches. She i; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

r/o aneurysm ha; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

RS1 Chronic nonintractable headache, unspecified headache type,H93.8x2 Sensation of fullness in left ear
left ear feels cloggec, having headaches &dOd; Headaches and left ear has been clogged for 3 weeks, no pain, no sinus problems. No loss of hearing.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

Recent C-Spine MRI showed possible mass on the cerebellum; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient is experiencing fatigue or malaise.

recurring headache, nausea and dizziness; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Reoccurring severe headache. Stuttering and blurred vision Family history of brain cancer; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Requesting Cervical spine MRI, thoracic spine MRI, and brain MRI &dOd; for syrinx of the spinal cord, weakness.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
REQUESTING MRI D/T: Headache: The headache began days ago, and lasted days. The character of the pain is burning. Overall condition is stable. Patient states that on. The request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation) of stroke, aneurysm, or AVM (arteriovenous malformation).

She fell off her desk on 11-1-17 while trying to hang a picture. She landed on her back and hit her ribs and head. She went to the ER where she had a rib x-ray that was negative. A CT of her head showed a 14 mm calcified area in the right lateral ventricle. This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. She has numbness in the feet, vague tingling symptoms and pains in the hands etc. &x003; She has had this for a while. Apparently she has a family history of MS but not in her parents or siblings. She is very concerned about this.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; It is not known if there are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

She states this started at work when she was standing to help a customer at the bank. She had to sit down because she felt faint and had the HA. Since then, she has felt “faint” on a couple of other occasions; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.

Sudden Severe Migraine with Syncope; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient has a recent onset (within the last 3 months) of neurologic symptoms.

The Patient has headaches 2-3 times a week sometimes pulsating, sometimes dull ache across forehead. No vomiting but does have nausea, light/sound sensitivity, visual disturbances such as flashes of light.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
This is a request for an Internal Auditory Canal MRI.; There is a suspected Acoustic Neuroma or tumor of the inner or middle ear.

This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is not a suspected cholesteatoma of the ear.; The patient has not had a recent brain CT or MRI within the last 90 days.; There are neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures.; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or the worst headache of the patient’s life (within the last 3 months).

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has the inability to speak.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient has Bell’s Palsy.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.; This is NOT a Medicare member.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient’s visual acuity.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; request for evaluation of tumor; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient’s visual acuity.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for Parkinson's disease.; This study is being ordered for new neurological symptoms.; The neurologic symptoms include something other than worsening Parkinson symptoms, dizziness, vision changes, one sided arm or leg weakness, or the inability to speak.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has been a change in seizure pattern or a new seizure.
General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST trigeminal neuralgia, worsening headaches, & x0D; left side facial pain, neck pain, & x0D; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST trying to rule out tumor and brain mass, patient has personality change, memory loss & x0D; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache & x0D; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type & x0D; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects & x0D; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications & x0D; The tumor is not a pituitary tumor or pituitary adenoma.

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache & x0D; The headache is described as sudden and severe & x0D; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects & x0D; There is a new and sudden onset of a headache less than 1 week not improved by medications & x0D; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache & x0D; The headache is described as sudden and severe & x0D; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects & x0D; It is not known if there is a new and sudden onset of a headache less than 1 week not improved by medications & x0D; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation).

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache & x0D; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes & x0D; The patient does not have HIV or cancer & x0D; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST Unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache & x0D; The patient has a chronic or recurring headache.

General/Family Practice Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache & x0D; This headache is not described as sudden, severe or chronic recurring & x0D; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change & x0D; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects & x0D; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

The document contains several medical records and requests for diagnostic CT scans. Here is a brief summary of the information:

- **General/Family Practice Approval 71250 CT CHEST, THORAX**
  - Chest x-ray shows abnormal cluster right medial lung area.; There is evidence of a lung, mediastinal or chest mass noted within the last 30 days.; They had a previous chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT.

- **General/Family Practice Approval 71250 CT CHEST, THORAX**
  - Clinic notes will be faxed.; A Chest/Thorax CT is being ordered.; The study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT.

- **General/Family Practice Approval 71250 CT CHEST, THORAX**
  - Enter answer here - or Type In Unknown.
  - INDICATION: Chest wall mass.
  - COMPARISON: Chest 2 views 05/31/12.
  - TECHNIQUE: Serial ultrasound images of palpable mass in the right chest.
  - FINDINGS: Calcified mass with a large amount of shadowing.
  - There is evidence of a lung, mediastinal or chest mass noted within the last 30 days.; It is unknown if they had a previous chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT.

- **General/Family Practice Approval 71250 CT CHEST, THORAX**
  - Follow up on left lower lobe pulmonary nodule.; There is evidence of a lung, mediastinal or chest mass noted within the last 30 days.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT.
He went to the clinic for SOB and coughing up mucous in the morning. He says he is allergic to two different cholesterol medications but he cannot recall the names. He is congested in the mornings. He is still having some breathing problems. 

He recently; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is NOT a smoker nor do they have a history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT n/a; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/4/2017; There has been treatment or conservative therapy.; On previous ct, a bilateral pulmonary nodule was found and a mass cannot be excluded on right kidney.; Naproxen, moist heat, and easy stretching.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

NEW ONSET DIAGNOSIS OVARIAN CANCER; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. No, the patient was NOT seen by a specialist because of the traumatic injury.; Chest pain describes the reason for this request.; Abnormal imaging (xray) finding was noted on evaluation after the injury.; This is a request for a Chest CT.; This study is being requested for chest injury or trauma within the past 2 weeks.; Yes this is a request for a Diagnostic CT.

'None of the above' describes the reason for this request.; Abnormal imaging (xray) finding was relevant in the diagnosis or suspicion of inflammatory lung disease; This study is being requested for known or suspected inflammatory disease such as sarcoidosis, pneumoconiosis, asbestosis, silicosis; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT.

'None of the above' describes the reason for this request.; An abnormal imaging (xray) finding led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema); Yes this is a request for a Diagnostic CT.

'None of the above' describes the reason for this request.; 'None of the above' led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema); Yes this is a request for a Diagnostic CT.

'None of the above' describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT.
'None of the above' describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

General/Family Practice Approval 71250 CT CHEST, THORAX

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology 1

This study is being ordered for trauma or injury.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology 1
This study is being ordered for trauma or injury.; 07/01/2017; There has been treatment or conservative therapy.; Neck pain, x-rays show pelvic shift. Right iliac crest is elevated significantly than the left; Chiropractor for 6 weeks and x-rays; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for trauma or injury.; 10/30/2017; There has not been any treatment or conservative therapy.; Pain and unable to move; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for trauma or injury.; 11/17/2017; There has been treatment or conservative therapy.; numbness in legs, headache, neck pain; Medication, rest, walking, heat; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for trauma or injury.; 12/10/2016; There has been treatment or conservative therapy.; Medications.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for trauma or injury.; 12/22/2016; There has been treatment or conservative therapy.; Neck and low back pain, Pain 6 out of 10; Steroids, pain meds, back injection in PT now and is too painful to continue; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for trauma or injury.; 8/1/17; There has been treatment or conservative therapy.; Neck and low back pain, Pain 6 out of 10; Steroids, pain meds, back injection in PT now and is too painful to continue; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms; There is no weakness or reflex abnormality; The patient does not have new signs or symptoms of bladder or bowel dysfunction; There is not x-ray evidence of a recent cervical spine fracture.
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; has been seeing neurology Behrens and she thinks this is cervical muscle spasm contributing to the headaches; her left SCM is very tight; she is getting trigger point injections; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; n regard to the neck pain, Mr. Gregson denies any associated symptoms. Patient is requesting refills on his Methocarbamol, Norco, and Tramadol. Pt states that the medications helps to manage his pain. MUSCULOSKELETAL: Positive for limited ROM and pai; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been directed a home exercise program for at least 6 weeks.;

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms; The patient has NOT had back pain for over 4 weeks.

This study is being ordered for a neurological disorder.; 12/1/2016; There has been treatment or conservative therapy.; back pain with radiated numbness to right thigh, weight loss of 50 lbs, decreased mobility, numbness, tenderness, tingling, loss of sleep, history of seizures; physical therapy and pain medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for a neurological disorder.; Patient reported on 8-24-17 of Neck and Upper back pain. She has been going through physical therapy without success and has caused more pain. She admits to involuntary bowel movements. Medication has been ineffective; There has been treatment or conservative therapy.; Bulging cervical disc, neck pain, thoracic pain, numbness and tingling of hands, involuntary bowel movements, joint pain, significant tenderness over C-5 through T-10. Patient reports pain 8/10; Patient has been through 6/12 Physical Therapy visits and will receive her 7th visit today, 10-10-17, but therapy has caused her more pain instead of decreasing it.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Here today for follow up of acute on chronic neck and back pain. Xray of neck showed degenerative changes. Pt given rx of hydrocodone and soma with some relief. However, pain persists. It is at it’s worst in her low neck and between her shoulder blades. He; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The patient does have new or changing neurologic signs or symptoms.; There is History of degenerative disc disease to the c spine, with worsening neurological deficit of the right upper extremity. No improvement with 2 months of physical therapy. No improvement with 3-4 months of gabapentin, tramadol, soma, anti-inflammatory.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Diminished right sided grip strength. Unable to raise arm (right); The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; &lt;Enter Additional Clinical Information&gt;

None; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt is having left arm weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

numbness and tingling in arms bilaterally from the neck down; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Patient is having some increasing pain. She historically has had back pain resulting from a MVA. We are getting updated imaging to determine if she should continue pain management through pharmacologic therapy or if she is in need of more surgery. Addito; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient last had MRI in 2014 and needs updated one to see neurosurgeon. X-ray in chart, showed degenerative disc disease of cervical, thoracic and lumbar spine with osteophytes on spine. &lt;x0D; &lt;x0D; DX: M54.5 dorsalgia&lt;x0D; M54.2 cervicalgia&lt;x0D; M25.7 osteophyte on vert; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient suffered a stroke on 11/4/2017; This study is being ordered for a neurological disorder.; 11/4/2017; There has been treatment or conservative therapy.; presented with migrane after being found unable to speak and RUE weakness, Left MCA ischemic stroke, appears embolic; 11/6/2017; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
physical therapy completed x 5 weeks with no relief, Physical Therapist recommended an MRI to verify if a nerve is being impinged.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; left arm weakness/loss of grip strength; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Please see attached clinicals.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Has been seeing physician for lumbar and cervical spine pain since 12/31/2012; There has been treatment or conservative therapy.; Low back and cervical spine pain; Gabapentin since 12/31/2012. Parafon Forte since 04/23/2014. Mobic 01/12/2016. Was seeing a chiropractor in 2016 but got to be too painful (Per patient); One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Pt.'s loss of balance when he bends over is a new symptom.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; Decreased reflexes of bilateral upper extremities.

Radiating pain from neck to fingertips; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; finger numbness and pain , trouble gripping; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Radiculopathy, neuralgia, neuritis, cervicalgia; This study is being ordered for trauma or injury.;; There has been treatment or conservative therapy.; numbness and tingling radiating down arm, pain gradually worse, headache; pain medication, anti inflammatory medication, ice and heat therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Requesting Cervical spine MRI, thoracic spine MRI, and brain MRI & n00; for syrinx of the spinal cord, weakness.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

same as in other comment box; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; Patient has had cervical and right shoulder pain for years. It has worsened and is now radiating. He has some decreased deep tendon reflex of right elbow and decreased abduction of right shoulder.

CURRENT XRAYS SHOW SCOLIOSIS AND CONSERVATIVE TREATMENT IS NOT HELPING HER PAIN; This study is being ordered for Congenital Anomaly.; SHE HAS HAD SCOLIOSIS-CONGENTIAL DEFORMITY AND HAS BEEN HAVING BACK PAIN FOR YEARS. IT HAS BEEN AGGRAVATED SINCE 02/2017 AND WE ARE SENDING HER TO UAMS FOR TREATMENT AND THEY ARE NEEDING MRI WHICH HAS NOT BEEN DONE; There has been treatment or conservative therapy.; The patient is complaining of back pain. The patient states she has pain up her entire back from her neck. It burns and hurts. She is taking Tramadol with Gabapentin and it is not helping.&amp;#x003B; NECK AND BACK STIFF AND TENDER ON EXAMINATION; PATIENT HAS BEEN ON ORAL MEDICATION FOR OVER 9 MONTHS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

DOUBLE STUDY MEANS AUTOMATIC REVIEW. WILL JUST FAX NOTES.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/04/2017 FIRST OV FOR PROBLEM; There has been treatment or conservative therapy.; WILL JUST FAX NOTES; OTC/PHYSICAL THERAPY; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

He is unable to take a deep breath because it causes significant thoracic spine pain in the T4-5 area. With shallow breaths, lung were clear. Significant pain at T4-5 level. He has failed physical therapy and chiropractic care is not helping, and was told; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture. Here today for follow up of acute on chronic neck and back pain. Xray of neck showed degenerative changes. Pt given rx of hydrocodone and soma with some relief. However, pain persists. It is at it’s worst in her low neck and between her shoulder blades. He; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. 1

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling. 1

It is not known if there are documented findings of immune system suppression.; This is a request for a thoracic spine MRI.; It is not known if the patient is experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.; patient has alot of inflammations so need to rule out infection.
Patient continues to complain of back pain. Has appt. with Pain Specialist in November 2017; This study is being ordered for trauma or injury.; July 7, 2017; There has been treatment or conservative therapy.; Fell and hurt back, complaints of back pain; Physical Therapy x 6 weeks; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MR5, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Patient last had MRI in 2014 and needs updated one to see neurosurgeon. X-ray in chart, showed degenerative disc disease of cervical, thoracic and lumbar spine with osteophytes on spine. &x00d; &x00d; DX: M54.5 dorsalgia
M54.2 cervicalgia &x00d; M25.7 osteophyte on vert; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MR5, PET Scan, or Unlisted CT/MRI.

Requesting Cervical spine MRI, thoracic spine MRI, and brain MRI &x00d; for syrinx of the spinal cord, weakness.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MR5, PET Scan, or Unlisted CT/MRI.
The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Patient had an abnormal MRI c-spine in 2016 with Thoracic cord syrinx located at the T to 3 level centrally in the cord. We are looking to see if this has gotten worse or if there is evidence of Chiari Malformation. Patient is having a lot of pain in his r.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Pt's girlfriend stood on his back on 11/22/17. Pt was seen in the ER, negative xrays and given steroid shot and anti inflammatory medication. Pt continues to have pain with mild weakness to lower extremities.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; small focal region of abnormal signal involving the posterior right T12 vertebral body and the adjacent pedicle. Although this is an atypical location, this could reflect abnormal stress reaction in the pedicle but is indeterminate and postcontrast imagin.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of bowel or bladder dysfunction.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.
The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; unknown; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam. 1

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies. 2

The patient does not have any neurological deficits.; It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Pt had back surgery over 8 weeks ago, is tender. 1

The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease. 2

The patient does not have any neurological deficits.; The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; &lt;Enter Additional Clinical Information&gt; 1

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to known tumor with or without metastasis.; 1. Lobulated T1/T2 hypointense lesions within the left aspect of the T7 and T10 vertebrae for which neoplastic process including metastatic disease or myeloma cannot be excluded. Recommend postcontrast imaging. 1

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; "The patient is not being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.; Previous mass removed around spinal cord, recommended neurosurgery from general surgery for re-accumulation and continued neuropathic pain. Neurosurgery will not see her without an MRI. 1
The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; "The patient is not being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.; PT had MRI on 12/08/17 disc desication at L5/S1 with broad-based right parasentral disc protrusion and right lateral disc bulge facet hypertrophy causing narrowing of the right neuroforamen and compression of the right exiting nerve root with AP diamete

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; N/A

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

The patient is complaining of mid back pain. He denies saddle anesthesia and associated bowel or bladder dysfunction. Patient states pain level today on a scale of 0-10 is 6/10.; This study is being ordered for trauma or injury.; Around 2 months ago.&%KOD; Was seen in clinic on 11/2/17, 11/10/17, and 12/1/17. Has been doing physical therapy since first of November.; There has been treatment or conservative therapy.; Pain in mid to lower back that radiates down both legs with muscle spasms noted in thoracic region; Physical therapy since 11/7/17 and on going but patient says no relief in pain.&%KOD; Lidocaine patches, with Ibprofen (800 mg) twice daily since 11/2/17 and Mobic since 11/10/17; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.

There is loss of lumbar lordosis seen. There is no acute fracture. However, there is noted to be in the past a fracture of the superior endplate of T11 anteriorly more just anterior portion. No compression seen. In flat/supine position with pt lifting le; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.

This is a request for a thoracic spine MRI.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.
This is a request for a thoracic spine MRI.; "The patient has not been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; This is not a continuation or recurrence of symptoms related to a previous surgery or fracture.; "The caller indicated that there is not a known condition of: Tumor, Infection or Neurological deficits."; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.; &lt;Enter Additional Clinical Information&gt;

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a thoracic spine MRI.; Neurological deficits; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a thoracic spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

This is a request for a thoracic spine MRI.; Neurological deficits; The patient does not have new or changing neurologic signs or symptoms.; The patient does have a new foot drop. 1

This is a request for a thoracic spine MRI.; Neurological deficits; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a thoracic spine MRI.; Neurological deficits; The patient does not have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; degenerative changes noted on plain x-rays with osteophytes/upper back pain after mva in 2015 tx by chiropractor for nearly one year and no better; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of bowel or bladder dysfunction.
This is a request for a thoracic spine MRI; The study is being ordered due to Neurological deficits; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

This is a request for a thoracic spine MRI; There has been a supervised trial of conservative management for at least 6 weeks; The study is being ordered due to Neurological deficits; The patient is experiencing sensory abnormalities such as numbness or tingling; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

This is a request for a thoracic spine MRI; There has been a supervised trial of conservative management for at least 6 weeks; The study is being ordered due to Neurological deficits; The patient is experiencing sensory abnormalities such as numbness or tingling; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

This is a request for a thoracic spine MRI; There is evidence of tumor or metastasis on a bone scan or x-ray; The study is being ordered due to suspected tumor with or without metastasis.

This is a request for a thoracic spine MRI; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms; The patient does have a new foot drop.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; FIRST OV FOR PROBLEM 10/04/2017; There has been treatment or conservative therapy; WILL JUST SEND NOTES; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. 

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; It is not known if there is weakness or reflex abnormality; The patient does not have new signs or symptoms of bladder or bowel dysfunction; It is not known if the patient has a new foot drop; It is not known if there is x-ray evidence of a lumbar recent fracture.
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Decreased strength in left leg, pain in left leg.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; pain going down his leg and weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; RIGHT LEG MUSCLE 3/5; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; TINGLING IN LEGS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in right leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in the right leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; The patient has none of the above.; This procedure is being requested for Trauma or recent injury.

The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above.

The patient has acute or chronic back pain.; The patient has none of the above.

The patient has acute or chronic back pain.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for a neurological disorder.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; PAIN MEDICATION REFERRED TO NEURO FOR NECK PAIN AND HEADACHE; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
This study is being ordered for a neurological disorder. There has been treatment or conservative therapy.

There has been treatment or conservative therapy. Throat pain, low back pain, and numbness and tingling in all extremities; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is not Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

There has not been any treatment or conservative therapy. low back pain, and numbness and tingling in all extremities; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is not Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

There has been treatment or conservative therapy. arm, neck, and back pain with numbness and tingling in arm; insets, hydrocodone, pt.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is not Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

There has been treatment or conservative therapy. It is not known if there has been any treatment or conservative therapy.

There has been treatment or conservative therapy. Throat pain, low back pain, and numbness and tingling in all extremities; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is not Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

There has been treatment or conservative therapy. Throat pain, low back pain, and numbness and tingling in all extremities; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is not Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

There has been treatment or conservative therapy. Throat pain, low back pain, and numbness and tingling in all extremities; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is not Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

There has been treatment or conservative therapy. Throat pain, low back pain, and numbness and tingling in all extremities; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is not Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
This study is being ordered for trauma or injury; 7/01/2017; There has been treatment or conservative therapy; Neck pain, x-rays show pelvic shift. Right iliac crest is elevated significantly than the left; Chiropractor for 6 weeks and x-rays; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This study is being ordered for trauma or injury; 10/30/2017; There has not been any treatment or conservative therapy; Pain and unable to move; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This study is being ordered for trauma or injury; 12/22/2016; There has been treatment or conservative therapy; Neck and low back pain, Pain 6 out of 10; Steroids, pain meds, back injection in PT now and is too painful to continue; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This study is being ordered for trauma or injury; 8/28/2017; There has been treatment or conservative therapy; Throbbing sharp pain numbness tingling weakness locking popping/clicking; xray pt meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Reflexes asymmetric and DTRs abnormal.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; cannot stand for any length of time cannot sit for any length of time pain shoots from back down to legs and sciatic; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have back pain for over 4 weeks.; The patient has been seen the doctor more then once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has not been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.
General/Family Practice Approval

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

; The study requested is a Lumbar Spine MRI.; Neurological deficits; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; ; The patient has seen the doctor more then once for these symptoms.; ; It is not known if the physician has directed conservative treatment for the past 6 weeks.

General/Family Practice Approval

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

General/Family Practice Approval

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; ; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

General/Family Practice Approval

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

; This study is being ordered for Inflammatory/ Infectious Disease.; patient has had problem since April. She did PT which resolved problem then, now having pain again.; There has been treatment or conservative therapy.; tenderness to R SI joint; Physical Therapy and Medrol dose pak; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; ; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

General/Family Practice Approval

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; 5 months per patient.; There has been treatment or conservative therapy.; Low back pain midline and chronic duration.; 12 Sessions of chiropractic therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; ; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

General/Family Practice Approval

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; Per patient approx. 3 years.; There has been treatment or conservative therapy.; Low back and neck pain with numbness and tingling of both lower extremities. Weakness in extremities on exam. Tingling in the left forearm when using upper extremities.; Gabapentin/Ibuprofen since 07/20/2017; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; ; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
53yr old female presents for follow up of low back pain has been on diclofenac for last 4 months, however has been off for the last 6 weeks due to chest pain and does c/o pain most days with burning to right lateral thigh. Continues to have pain in hands ; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; baclofen 10mg 3 times a day&bxd0; voltaren 1% gel 4 times a day. &bxd0; had been on diclofenac for last 4 months, however has been off for the last 6 weeks due to chest pain, has been approved to start taking again per cardiology. 

a bulging disc was found from a ct; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.

anxiety, constipation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/13/2012; There has been treatment or conservative therapy.; back pain; physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

ba Enter answer here - or Type In Unknown If No Info Give.; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; 

Back pain x 4 years. Weight lifting in jury injuring neck and back. Physical therapy increases his pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; Gabapentin 300MG BID&bxd0; Norco 7.5/325mg TID
broke clavicle by pulling pants up, having to use wheelchair d/t feeling like her muscles are pulled in her left leg, has trouble getting out of bed, and having whole body jerks, has lost function in her left leg and is very weak and having to use a wheel; This study is being ordered for trauma or injury.; 12/10/17; There has not been any treatment or conservative therapy.; chronic back pain, left clavicle break, loss of sensation in left leg.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Chief Complaint: Pt reports that since he had Lt knee surgery (with Dr Sidani) approx 3 days later he developed this lumbar region back pain. At first it was only radiating to his Rt side, but now radiates to both sides. Pt reports several falls, where he; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Chief Complaint: Pt reports that since he had Lt knee surgery (with Dr Sidani) approx 3 days later he developed this lumbar region back pain. At first it was only radiating to his Rt side, but now radiates to both sides. Pt reports several falls, where he; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Chronic pain even after physical therapy.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Subjective L sided weakness. In ER 2 weeks ago. Had EKG and pain shot at hospital. He's had physical therapy and not helping. Describes a "knot" in his back. He states that hes been having continued weakness in L side even with PT. His pain, especially in; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Complaints of back and hip pain. X-ray done, dictation to follow.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Greater than one year with LLE pain, tingling, and decreased strength; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Congenital anomaly. Ruling out spina bifida. Patient has xray showing evidence of spina bifida. Vascular insufficiency of bilateral extremities. Decreased capillary refill and leg swelling.; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for None of the above.
Conservative treatment for greater than 8 weeks. No Chiropractor or PT ordered due to unknown etiology of pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; Celebrex&amp;lt;#x003B; Tizanidine
Ibuprofen
Naproxen

**CONSERVATIVE TREATMENT HAS NOT WORKED; This study is being ordered for trauma or injury.**; 1 1/2 YEAR AGO HAS TRIED CONSERVATIVE TREATMENT; There has been treatment or conservative therapy.; crepitus, headache and neck stiffness; TREATED WITH CHIROPRACTIC, HEAT AND ICE, ROM EXERCISES; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

**CURRENT XRAYS SHOW SCOLIOSIS AND CONSERVATIVE TREATMENT IS NOT HELPING HER PAIN; This study is being ordered for Congenital Anomaly.**; SHE HAS HAD SCOLIOSIS-CONGENTIAL DEFORMITY AND HAS BEEN HAVING BACK PAIN FOR YEARS. IT HAS BEEN AGGRAVATED SINCE 02/2017 AND WE ARE SENDING HER TO UAMS FOR TREATMENT AND THEY ARE NEEDING MRI WHICH HAS NOT BEEN DONE; There has been treatment or conservative therapy.; The patient is complaining of back pain. The patient states she has pain up her entire back from her neck. It burns and hurts. She is taking Tramadol with Gabapentin and it is not helping.&amp;lt;#x003B; NECK AND BACK STIFF AND TENDER ON EXAMINATION; PATIENT HAS BEEN ON ORAL MEDICATION FOR OVER 9 MONTHS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Degenerative disc disease, lumbar region; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt. states she was doing PT for her back and therapist saw that it wasn't helped. &amp;lt;#x003B; BACK: BILATERAL Quadratus spasm which is very tender to even slight palpation most pronounced at the costal insertion, no costovertebral angle tenderness, no kyphosis.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Failed PT.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

FAX; The study requested is a Lumbar Spine MRI.; None of the above.; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more than once for these symptoms.

Feet get cold and painful. He had a normal NCV,EMG at the VA, 2 years ago. He had CT of lumbar spine: bulging disks, and spinal stenosis; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above 1

fell and having pain, weakness, and numbness off and on, along right buttock and travels down right leg and into foot.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above 1

felt like right leg fell asleep, could barely walk, stumbling around, went to St B er was checked for blood clot, leg is continuously tingling from knee down; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for None of the above 1

Findings were consistent with mild bilateral tibial H demyelination and moderate chronic axon loss in the Left AHB, suggestive of S1 radiculopathy.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Borderline slowing of BLE tibial H responses. EMG needle exam reveals small amplitude spontaneous activity in the left AHB. Paraspinals are difficult to examine with patient unable to relax for needle exam. These were findings with nerve conduction study. 1

Four views of the lumbar spine are performed.&amp;x0D; There is grade 2-3 anterior spondylolisthesis of L5 on S1 measuring&amp;x0D; 1.9 cm. There is mild spondylolisthesis at this level with mild arthritic&amp;x0D; change involving the apophyseal joints of the lower lumbar spine.&amp;x0D; The; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; trace weakness on left; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. 1

FURTHER DIAGNOSTIC EVALUATION ORDERED MRI L SPINE DUE TO WORSENING PAIN,NUMBNESS AND WEAKNESS.COMPARE TO PRIOR MRI 2015; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; sical Exam&amp;x0D; Exam&amp;x0D; Findings&amp;x0D; Details&amp;x0D; Chiro Spine - Lumbar&amp;x0D; Milgrim's is Positive bilaterally. Kemp's is Positive on the Right. Yoeman's is Positive on the Right. Straight leg raise is Positive on the Right.Ankle ROM - R&amp;x0D; Active ROM - Factors: nor; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. 1

had plain films and saw a chiro w/o any improvement; sharp pain bilateral legs; pain aggravated by walking sitting or working; weakness; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above 1
He reports a remote history of a back injury. In 2008 he states he had an MRI and a Springville Hospital which revealed lumbar degenerative disc disease. He actually used the words cauda equina syndrome and reported that he has had some bowel and bladder; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.

This study is being ordered for trauma or injury.; over 6 mos; There has been treatment or conservative therapy.; back pain numbness in fingers; Medication physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

hx of gluteal abscess. Now with increased back pain and elevated WBC; This study is being ordered for Inflammatory/ Infectious Disease.; 11/10/17 office visit; There has been treatment or conservative therapy.; back pain, elevated wbc; hx of gluteal abscess. Now with increased back pain and elevated WBC, was given rx for pain on 11/10/17; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Limited flexion lumbosacral spine, Limited extension lumbosacral spine, Limited rotation lumbosacral spine, Decreased strength, Positive Straight Leg Raising, abnormal straight leg raising test; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Limited flexion lumbosacral spine, Limited extension lumbosacral spine, Limited rotation lumbosacral spine, Decreased strength, Positive Straight Leg Raising, abnormal straight leg raising test

Limited flexion lumbosacral spine, Limited extension lumbosacral spine, Limited rotation lumbosacral spine, Decreased strength, Positive Straight Leg Raising, abnormal straight leg raising test; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Difficulty walking.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

LOWERING  BACK PAIN WITH RADIATING RADICULOPATHY; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pt has finished physical therapy and he has also failed steroids and medical therapy. Will need MRI as he is getting worse. Pain radiates down both hips. Severe lower back pain with sciatica. Noted that strength in right leg has decreased 3/5 compared;
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; He is slow to transfer from sitting to walking and gait is slow and careful. Strength of the right leg is decreased to 3/5 when compared to the left 5/5.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pt has lumbar radiculopathy and lower back pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.

Pt has to physically lift her right leg to move she has numbness from her knee down; This study is being ordered for Inflammatory/Infectious Disease.; 12/8/2016; There has been treatment or conservative therapy.; pt has increased pain, tingling in her right lower extremity, she is unable to lift her right leg; Rest, medication, steroid, Ice; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Pt has tried at home therapies, pain medication, ice, rest and heat without relief; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt has weakness in legs and back area; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pt suffers with neurogenic claudication, with numbness and tingling. PT for 2 months.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

PT WAS SEEN 10/10/17 FOR MIDLINE LOW LUMBAR PAIN WITH POSITIVE COCCYX TENDERNESS. DID XRAYS OF LUMBAR SPINE THAT SHOWED MILD DDD AT LUMBAR SPINE BUT SACRUM AND COCCYX WERE UNREMARKABLE IN APPEARANCE.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

PT with known annular tear to L5-S1, mild central disc protrusion 2nd to annular tear per MRI 2013, recurrent and chronic pain to low back with radiation rt lower extremity, c/o needle/pins to lower extremity; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above
Pt. c/o of worsening pain with strenuous activity; pain in upper legs described as a burning aching pain worse while resting after activity. Rates worst pain at 9.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; BACK: limited range of motion due to pain and muscle spasms of the lower lumbar spine, there is moderate tenderness over the SI joints bilaterally, there are no focal point tender areas. . RIGHT, L4 point tenderness with tapping causing shooting electric; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

pt. has an abnormal xray that suggests pt to have mri of lumbar. pt has back pain radiating down right leg and decreased popliteal reflex; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; decreased popliteal reflexes

Reduce reflex on left side, straight leg produces pain.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

See attached; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/09/2016; There has been treatment or conservative therapy.; pain unit, steroid pack and injections, physical therapy with chiropractor; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

She is not having pain in the right leg. She stands a lot and has to lift a lot at work. The pain is in her left SI joint area, buttocks and radiates down her left leg. No weakness in the leg. She also says her arms will tingle and go to sleep when she li; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above

The patient is complaining of mid back pain. He denies saddle anesthesia and associated bowel or bladder dysfunction. Patient states pain level today on a scale of 0-10 is 6/10.; This study is being ordered for trauma or injury.; Around 2 months ago.&amp;#039;D; Was seen in clinic on 11/2/17, 11/10/17, and 12/1/17. Has been doing physical therapy since first of November.; There has been treatment or conservative therapy.; Pain in mid to lower back that radiates down both legs with muscle spasms noted in thoracic region; Physical therapy since 11/7/17 and on going but patient says no relief in pain.&amp;#039;D; Lidocaine patches, with Ibprofen (800 mg) twice daily since 11/2/17 and Mobic since 11/10/17; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
The patient potentially needs another surgery but needs an update MRI in order to get in with the surgeon; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; pain of the cervical spine with radicuopathy and low back pain with radicuopathy, the patient has trouble walking and is using a cane; pt has been given muscle relaxers and anti inflammatories, he has completed Physical therapy, the patient has seen a spine dr and was given an injection in the spine which made him worse; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The patient has not completed 6 weeks of physical therapy.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient has had back pain for over 4 weeks.; The patient has been treated with medication.; The patient was treated with an Epidural.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient has not completed 6 weeks of physical therapy.; The patient has a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient does not have new or changing neurologic signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture. 

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; the patient was treated with a facet joint injection.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient was treated with an Epidural.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with oral analgesics.; The patient has completed 6 weeks or more of Chiropractic care.

The study requested is a Lumbar Spine MRI.; Follow-up to Surgery or Fracture within the last 6 months; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Neurological abnormalities; This procedure is being requested for Trauma or recent injury

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Symptoms or x-ray evidence of a recent fracture; This procedure is being requested for Trauma or recent injury

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Symptoms or x-ray evidence of a recent fracture; This procedure is being requested for Trauma or recent injury
The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Follow-up to surgery or fracture within the last 6 months; The patient been seen by or the ordering physician is a neuro-specialist, orthopedist, or oncologist.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s).

The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection.

The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s); The patient has Neurological deficit(s).

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s); The patient has Neurological deficit(s); The patient has Neurological deficit(s).

This all began with a fall on the snow on Jan 8, 2017. She was seen in the ER that day. Since then, he has tried anti-inflammatory medications, steroid injections, a chiro referral that resulted in still positive radiculopathy signs. She has also been seen; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is x-ray evidence of a recent lumbar fracture.

This all began with a fall on the snow on Jan 8, 2017. She was seen in the ER that day. Since then, he has tried anti-inflammatory medications, steroid injections, a chiro referral that resulted in still positive radiculopathy signs. She has also been seen; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is x-ray evidence of a recent lumbar fracture.

Tingling in the left side of the body and foot. LBP and LLE radiculopathy; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.

unable to dorsiflex to right foot; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above.
| General/Family Practice Approval | 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST | unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. |
| General/Family Practice Approval | 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST | 1 |
| General/Family Practice Approval | 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST | unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; leg weakness, low back weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. |
| General/Family Practice Approval | 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST | 1 |
| General/Family Practice Approval | 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST | Unknown; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above |
| General/Family Practice Approval | 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST | 1 |
| General/Family Practice Approval | 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST | Unknown; This study is being ordered for trauma or injury.; 11/11/2017; There has not been any treatment or conservative therapy.; acute lower thoracic pain and complaints of no sensation to posterior mid chest to mid thigh bilateral; One of the studies ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology |
| General/Family Practice Approval | 72191 CT ANGIOGRAPHY PELVIS | This is a request for a pelvis CT angiography. |
| General/Family Practice Approval | 72192 CT PELVIS WITHOUT CONTRAST | &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered because of a suspicious mass/ tumor.; "The patient has a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT |

*Note: The text is partially obscured in the image.*
Patient complains of diarrhea and right side groin, inguinal pain which has gotten worse over the past several weeks. has a history of right inguinal hernial repair about 15 years ago.; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

Patient had been working on his house and he was pulling on a counter when he felt a ripping pain in his groin. He had a Hernia repair 26 years ago and is afraid that it might be a torn hernia repair.; This study is being ordered as a follow-up to trauma.; There is NO laboratory or physical evidence of a pelvic bleed.; There are no physical or abnormal blood work consistent with peritonitis or pelvic abscess.; There is NO physical or radiological evidence of a pelvic fracture.; "The ordering physician is not a gastroenterologist, urologist, gynecologist, or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

Patient having left groin pain, severe. ultrasound was done and mass was seen need CT so patient can be referred to specialist.; This study is being ordered because of a suspicious mass/tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study.;" This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT

PT. COMPLAINS OF PAIN IN THE RIGHT TESTICLE AND PAIN IN THE RIGHT INGUINAL AREA. ON PHYSICAL EXAM, DR. MONFEE FOUND A RIGHT INGUINAL MASS WITH RETRACTED RIGHT TESTICLE. HE HAS A HISTORY OF A RIGHT INGUINAL HERNIA.; This study is being ordered because of a suspicous mass/tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study.;" This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT

R/O incarceration from incisional hernia; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

The Pt has had mass for several years, grown in size.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is NOT an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This study is not being ordered for initial staging.; The patient is presenting new signs (e.g. lab findings or imaging) or symptoms.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

The Pt has had mass for several years, grown in size.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is NOT an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This study is being ordered for initial staging.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT
This study is being ordered due to known or suspected vascular disease.; The ordering physician is not a surgeon or PCP who is ordering on behalf of a surgeon who has seen the patient.; There is NOT plain film, ultrasound or Doppler evidence of a vascular abnormality.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT.

WORSENING ABDOMEN PAIN WITH REBOUND TENDERNESS WITH ELEVATED TEMPERATURE.; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT.

<&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

<&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

<&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; MARCH 2017*; There has been treatment or conservative therapy.; FAX; STEM CELL INJECTION* RX* OTC* ICE/HEAT*; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

<&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Vascular Disease.; 1992; There has been treatment or conservative therapy.; compression, surgery; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

<&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.; This study is being ordered for Inflammatory/Infectious Disease.; patient has had problem since April. She did PT which resolved problem then, now having pain again.; There has been treatment or conservative therapy.; tenderness to R SI joint; Physical Therapy and Medrol dose pak; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;
Pt is needing to have a MRI Abdomin+Pelvis with contrast done. Pt has an abdominal mass.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

r/o IBS AND ADHENSION RELATED PAIN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; There has been treatment or conservative therapy.; right and left lower abdominal quadrant pain, intermittent abdominal pain from right to left which are chronic; medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The Pt had CT of ches 12/08/2017, central lobular emphysema. Indeterminate renal lobe mass lesion.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for a Pelvis MRI.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A tumor or mass was noted on previous imaging.; An abnormality was found in the ovary.; The study is being ordered for suspicion of tumor, mass, neoplasm, or metastatic disease.

This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury. This is a request for a Pelvis MRI.; The request is for suspicion of joint or bone infection.

This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?

ultrasound was inconclusive. know there is a "cyst" but can not tell from ultrasound if it is on the ovary or the uterus; This is a request for a Pelvis MRI.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; An abnormality was found in something other than the bladder, uterus or ovary.; The study is being ordered for suspicion of tumor, mass, neoplasm, or metastatic disease.

There is a history of upper extremity joint or long bone trauma or injury.; This is a request for an Arm CT Non Joint; Yes this is a request for a Diagnostic CT

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT
This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT. There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or joint infection.; Yes this is a request for a Diagnostic CT.

Yes, this is a request for CT Angiography of the upper extremity.

This study is being ordered for trauma or injury.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; Describe treatment / conservative therapy here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.
| General/Family Practice Approval | 73220 MRI UPPER EXTREMITY, NOT A JOINT | The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis. |

| General/Family Practice Approval | 73221 MRI JOINT OF UPPER EXTREMITY | Enter answer here - or Type In Unknown If No Info Given. | One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology |
General/Family Practice Approval 73221 MRI JOINT OF UPPER EXTREMITY

The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; Hydrocodone Flexural; The patient received medication other than joint injections(s) or oral analgesics.

General/Family Practice Approval 73221 MRI JOINT OF UPPER EXTREMITY

The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

General/Family Practice Approval 73221 MRI JOINT OF UPPER EXTREMITY

There is not a suspicion of fracture not adequately determined by x-ray.; The request is for shoulder pain.; There is not a suspicion of tendon, ligament, rotator cuff injury or labral tear.

General/Family Practice Approval 73221 MRI JOINT OF UPPER EXTREMITY

Abnormal x-ray.; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Home exercise for shoulder pain and did not improve. Done for over six weeks.; The patient received oral analgesics. Hip pain; This study is being ordered for trauma or injury.; over 6 mos.; There has been treatment or conservative therapy.; back pain numbness in fingers; Medication physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

General/Family Practice Approval 73221 MRI JOINT OF UPPER EXTREMITY

Limited range of motion due to pain and muscle spasms of lower lumbar spine. Moderate tenderness over the SI joints bilaterally. Left shoulder effusion moderate to large with crepitus an cracking over extremes of flexion and extension. Rotation is painful; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics. loss of range of motion, ib profren, heat and stretching.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.; The request is for shoulder pain.; There is not a suspicion of tendon, ligament, rotator cuff injury or labral tear.
may have reinsured it taking the roof off a truck two weeks ago. In severe pain now.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; August 1 2017; There has been treatment or conservative therapy.; pain, unable to sleep, no alleviated by any conservative measures for over 8 weeks. positive impingement maneuvers. positive cross arm test on both arms. xrays show acromioclavicular arthritis otherwise normal.; Physical therapy, steroid injections, Home exercise program and change in activity level and NSAIDS for over 8 weeks. not any better, worse severe pain now. suspected rotator cuff tears.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

None; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; Pt was given pain medications; The patient received medication other than joint injections(s) or oral analgesics.

NUMBNESS; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Patient presents with right shoulder pain for greater than 3 months. Unable to lift arm over head, has some tingling and numbness.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Persistent shoulder pain with no improvement with PT. Physical Therapist suggested MRI. Patient felt something pop and pain has been consistent since this.; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.

PT HAS COMPLETED 3 MONTHS OF CONSERVATIVE TREATMENT AND HAS NO IMPROVEMENT.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.; The request is for shoulder pain.; There is not a suspicion of tendon, ligament, rotator cuff injury or labral tear.

R/O Injury; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; PREDNISONE Tapper given; The patient received medication other than joint injections(s) or oral analgesics.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Looking for rotator cuff tear/cant lift above her head/heard popping sound when it happened 1

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; None 1

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; On-going pain for 6 weeks, cannot raise arm above 90 degrees and cannot reach behind her back, has tingling in fingers at times as well. feels like should re-positions itself and makes noises when moving. 1

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Patient has had a previous rotator cuff surgery to the left shoulder in the past , patient reported he was unloading bags of feed and felt something pop in his left shoulder, has experienced pain that will not go away. 1

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; PHYSICAL THERAPIST IS RECOMMENDING MRI, HAS A PARTIAL TEAR 1

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Prednisone since 10/30/2017 Tylenol , Aleve, decreased range of motion and pain shoulder x-ray on 11/9/2017 came back negative 1

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Pt has ATV accident a week ago, and he landed on shoulder; r/o rotator cuff tear; x-ray was unremarkable; suggested MRI. 1

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Patient suffered an injury on 10/21/2017. 1

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Pt suffered an injury on 10/21/2017. 1

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; R/O rotator cuff tear. 1

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Shoulder pain, stiffness, limited ROM 1
The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; unknown

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is experiencing joint locking or instability.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is NOT experiencing joint locking or instability.; The patient has a documented limited range of motion on physical examination.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were not normal.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The results of the plain films is not known.; It is not known if the patient is experiencing joint locking or instability.; The patient has a documented limited range of motion on physical examination.

The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).
The requested study is a Shoulder MRI.; The pain is described as chronic.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

The requested study is a Shoulder MRI.; The pain is described as chronic.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient recevied joint injection(s).

The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthrosopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient recevied joint injection(s).

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint. The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.
This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

unknown; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.  
unknown; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.  
unknown; This study is being ordered for Inflammatory/ Infectious Disease.; 08/10/2016; There has been treatment or conservative therapy.; chronic pain, c/o of buckling and trouble walking; nsaid, PT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology  
unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/26/2016 - first encounter, most recent 3/28/2017; There has been treatment or conservative therapy.; contusion of lower leg, other non-specified injuries, calf pain, spasm, rt. knee pain, morbid obesity, pain and joint.; pain management, 11/2016 pt. had a LS CT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
xray of left ankle notes soft tissue deformity; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; Tendon or ligament injury is not suspected.

X-rays today show bilateral osteochondral defects; Bilateral Pain Tried 8 wks Physical Therapy &iamsx; anti inflammatories are not helping;iamsx; has not had an MRI;iamsx; Patient feels unstable in both knees;iamsx; We will place him in a medial unloader and order bilateral M; This study is being ordered for trauma or injury.; 10/01/2017; There has been treatment or conservative therapy.; Bilateral Knee pain left greater than right feels unstable in his knees;iamsx; has had some associated swelling Bilaterally;iamsx; has tried Anti Inflammatories without improvement;iamsx; X-rays today show bilateral osteochondral defects; He has tried greater than 8 weeks of physical therapy without improvement; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

E/O aseptic necrosis; This study is being ordered for Inflammatory/ infectious disease.; 11/27/2017; There has been treatment or conservative therapy.; pain in bilateral hips, unable to walk for any length of time, previous abnormal x-rays; x-rays, medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Follow up from a CT scan done an MRI was recommended; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/07/2016; There has been treatment or conservative therapy.; Hip and back pain and osteitis; Pain Management and Tylenol; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Frontal view suggests some lucency at the lateral aspect of the left femoral head, an area of lytic change not excluded. Consider further evaluation with hip MRI.; This is a request for a hip MRI.; The member has not failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

Hard for patient to walk; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/2016; There has been treatment or conservative therapy.; Hip pain, neuropathy; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
This is a request for a hip MRI.; The diagnosis of Mass, Tumor, or Cancer has not been established.; The patient has had recent plain films, bone scan or ultrasound of the knee.; The imaging studies were abnormal.; The request is not for hip pain.

This is a request for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a request for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is a suspicion of AVN.

I would like to order an MRI of the bilateral hips to look for full-thickness cartilage loss. He does have a pincer and CAM type lesions which could be causing his bilateral hip pain.; This study is being ordered for trauma or injury.; 2002; There has been treatment or conservative therapy.; He describes the pain as sharp and stabbing located within the bilateral groin regions.; The pain radiates to the knee occasionally. Hurts worse with any type of physical activity and ambulation. It is relieved with rest.

He has tried multiple treatments which include self-directed physical therapy anti-inflammatory and Tylenol. None of; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

na; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; October 26 2017; There has been treatment or conservative therapy.; back pain with right sided sciatica.Degenerative disc and joint disease from L3 through S1 with grade 1&##x003A; anterolisthesis of L4 relative to L5 as a result.; Nsaids, steroids, physician directed exercises; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Enter answer here - or Type In Unknown If No Info Given. This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; It is not known if there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.; Yes this is a request for a Diagnostic CT

Enter answer here - or Type In Unknown If No Info Given. This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT

Enter answer here - or Type In Unknown If No Info Given. This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new lab results or other imaging studies including doppler or x-ray (plain film) findings.; Yes this is a request for a Diagnostic CT

Enter answer here - or Type In Unknown If No Info Given. This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT

Enter answer here - or Type In Unknown If No Info Given. This is a request for an Abdomen CT.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/2016; There has been treatment or conservative therapy.; FLANK PAIN ON RIGHT SIDE, COSTOCHONDRITIS IN STERNUM, ANTIFLAMMATORY MEDS.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Enter answer here - or Type In Unknown If No Info Given. This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT
This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6 months ago; There has not been any treatment or conservative therapy.; unexplained weight loss, down 53lbs without any diet changes or added exercise; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

43 year old male patient referred by Dr. Joseph Morgan for evaluation of a periumbilical abdominal mass/bulge. The patient first noticed the area a couple of months ago and it has continued to grow. It grows larger when going from lying flat to sitting up; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT

A 109 mm cyst on left kidney. 9mm nodule in right lobe of lung.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/7/2017; There has not been any treatment or conservative therapy.; Abnormal CT. Recommended follow up in 6 months.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Abdominal Pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT.

bloating constipation gas; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT.
Eddie is a 37 yo WM who presents to the clinic with c/o umbilical hernia that became large and painful on 11/24/17 when he was lifting tile. He was able to reduce it. UMBILICAL HERINA, PERIUMBILICAL ABD PAIN; This is a request for an Abdomen CT; This study is being ordered for trauma.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Yes this is a request for a Diagnostic CT Elevated liver lab results; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &\#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &\#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT 1

fluctuating uncontrollable blood pressure; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &\#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &\#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT 1

None; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT 1

Having RUQ &amp; LUQ pain ultrasound is within normal limits. Patient still having UQ pain. Needing to evaluate abdomen for possible mass.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient does not have new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.; Yes this is a request for a Diagnostic CT 1

MBR Is having spells of hyperglycemia with severe nausea, not diabetic.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &\#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &\#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT 1

None; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT 1

UMBILICAL HERINA, PERIUMBILICAL ABD PAIN; This is a request for an Abdomen CT; This study is being ordered for trauma.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Yes this is a request for a Diagnostic CT

Elevated liver lab results; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &\#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &\#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT 1

foreign object in abdomen seen on xray 10/10/2017; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &\#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &\#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT 1

Having RUQ &amp; LUQ pain ultrasound is within normal limits. Patient still having UQ pain. Needing to evaluate abdomen for possible mass.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient does not have new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.; Yes this is a request for a Diagnostic CT 1

MBR Is having spells of hyperglycemia with severe nausea, not diabetic.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &\#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &\#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT 1

None; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT 1
none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; Large Hernia with shortness of breadth.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Non-specific abdominal abnormality on ultrasound Pt having significant abdominal pain for several months now. Plain film Xray shows constipation. Ultrasound of Liver showed concern. Pt also has elevated Lipase and Hep A Indeterminant.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Patient had a liver Ultrasound. The results were abnormal appearance of the liver with fatty replacement and scattered hypoechoic lesions. Correlation with CT recommended.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &x; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Protrusion noted to right abdominal area next to umbilicus. Non-tender. Approx.2.5x1.5 in.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient does not have new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.; Yes this is a request for a Diagnostic CT

pt c/o of pain in right upper quadrant.; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

pt has not bowel movement in x2wks and can not pass gas. pt also having abdominal pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &x; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT
PT IS HAVING A LOT OF PAIN IN ABDOMEN. PT DOESN'T HAVE STONES BUT NEEDS TO BE RULED OUT AND PT HAS BEEN COMPLAINING ABOUT PAIN FOR THE LAST WEEK AND NO MEDICATION IS HELPING HE PAIN. THE PT ISN'T ABLE TO KEEP FOOD IN HER STOMACH; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; Which organ is enlarged? Don't know; Yes this is a request for a Diagnostic CT

Pt suffers with ongoing abdominal. Gall bladder ct and Ultrasound performed.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &x; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x; Known or suspected infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

Recently diagnosed with diverticulosis. Abdominal and lower back pain, having bloody stool; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn’s disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

severe weight loss greater than 20lbs, intractable nausea and vomiting uncontrolled w/meds; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is unknown if the patient has new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.; Yes this is a request for a Diagnostic CT

Significantly elevated liver enzymes with mildly low platelets - likely due to fatty liver disease - will have an MA set up an abdominal CT to further eval the liver and spleen.; This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are not being ordered for known or suspected aneurysms, hematoma, or blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; There is no evidence of vascular abnormality seen on plain film and/or Ultrasound/ Doppler.; There are no symptoms or findings to indicate the member has internal abdominal and or pelvic bleeding such as hematoma or hemorrhage.; Yes this is a request for a Diagnostic CT

There is no evidence of vascular abnormality seen on plain film and/or Ultrasound/ Doppler.; There are no symptoms or findings to indicate the member has internal abdominal and or pelvic bleeding such as hematoma or hemorrhage.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for post-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Yes this is a request for a Diagnostic CT
This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; No, this is not a request for follow up to a known tumor or abdominal cancer.; This study being ordered for initial staging of a known tumor other than prostate.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; Yes, there is a Is there an abdominal and pelvic or retroperitoneal or abdominal mass that has been confirmed.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; There is a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a diagnostic mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is a suspicion of an adrenal mass.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Yes this is a request for a Diagnostic CT
This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is a suspicion of an adrenal mass.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There is suspicion of renal mass.; The suspicion of a renal mass was suggested by an Ultrasound.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

Patient has a history of kidney stones, she is having flank pain, blood in urine and it is felt she has a kidney stone; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

Patient has a history of uterine cancer.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

Patient has extreme N/V, not able to hold anything down for ¾ days, Type 1 diabetic having glucose elevations.; This study is being ordered for Inflammatory/Infectious Disease.; 11/03/2017; There has been treatment or conservative therapy.; nausea, vomiting, RUQ Pain.; N/V Medication, Medication changes; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Patient has had a torsion surgery. There has been a prior orchiectomy.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT
PATIENT HAS HAD RLQ ABDOMINAL PAIN WITH REBOUND, GUARDING AND FEVER. LABS PENDING.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT;

patient has hx of testicular cancer pt has a painful mass on testicle and it is growing; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT

Patient is having abdominal pain with bright rectal bleeding, with guarding and crying with palpitations, patient has a history of cholecystectomy; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

Patient is in severe abdominal pain, complaints with vaginal bleeding. Patient has had HX of hysterectomy 10 years ago.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for ketones.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

Patient was in bed asleep and woke up with quadrant pain radiating into the back w/severe nausea and vomiting bile. White Blood cell count 16.8. R-sided tenderness and pain upon exam. Suspecting appendicitis; This is a request for an abdomen-pelvis CT combination.; This study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

Patient with bleeding out of mouth and nose with thrombocytopenia, decreased platelet count. Inconclusive abdominal ultrasound; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

General/Family Practice Approval 74176 CT ABD & PELVIS W/O CONTRAST

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

General/Family Practice Approval 74176 CT ABD & PELVIS W/O CONTRAST

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient did NOT have an abnormal abdominal Ultrasound, CT or MR study.; Yes this is a request for a Diagnostic CT

General/Family Practice Approval 74176 CT ABD & PELVIS W/O CONTRAST

This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is NOT requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; The pre-op evaluation is for planned or possible ventral hernia repair ordered by a surgeon.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT

General/Family Practice Approval 74176 CT ABD & PELVIS W/O CONTRAST

This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT

General/Family Practice Approval 74176 CT ABD & PELVIS W/O CONTRAST

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

General/Family Practice Approval 74176 CT ABD & PELVIS W/O CONTRAST

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Diabetic patient with gastroparesis.; Other; Yes this is a request for a Diagnostic CT

General/Family Practice Approval 74176 CT ABD & PELVIS W/O CONTRAST

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of inflammatory bowel disease.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn’s disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; &lt;Enter Additional Clinical Information&gt; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn’s disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Patient has acute onset of left lower quad pain and tenderness.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn’s disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; she has diarrhea, abdominal pain, fatigue and weight loss; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are NO findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; &lt;Enter Additional Clinical Information&gt; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are NO findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Adrenal Hemorrhage; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are NO findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient with Unintentional weight loss of 50 pounds over the last year. Loss of appetite. Complaints of nausea about 1 hour after eating. Denies blood in stool or black tarry stools. She denies vomiting. Patient states she has had some sharp abdomina; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Positive hemacult, fatty liver, and possible kidney stones; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; PT HAS BEEN TO THE EMERGENCY ROOM WITH CONSTANT ABDOMINAL PAIN; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Pt is having painful bowel movements and has a h/x of the right uterter, severe abdominal pain; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement; &lt;Enter Additional clinical information&gt;; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; &lt;Enter Additional Clinical Information&gt;; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; There has NOT been a recent (within the last 3 months) Abdomen and/or Pelvis CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; It is unknown if there has been a recent (within the last 3 months) Abdomen and/or Pelvis CT.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/25/2017; There has not been any treatment or conservative therapy.; abdominal pain , severe lumbar spine pain that radiates around to he abdomen; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 weeks ago; There has been treatment or conservative therapy.; present with a possible peri rectal abscess, Hemorrhoids present for two weeks, lots of pressure, worsening; sits baths, medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology very tender on bimanual exam and ttp of right upper quadrant, some pelvic tenderness as well, vomitting for 1 week; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT Weight loss.; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT Will fax in clinicals; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

<&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;&lt; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A kidney abnormality was found on a previous CT, MRI or Ultrasound.; It is unknown if the patient has a renal cyst or tumor.>

<&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;&lt; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology ; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is NO suspicion of metastasis.>

<&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;&lt; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/01/2017; There has been treatment or conservative therapy.; Abdominal pain, ovarian cyst.; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
12/6/17 Ultrasound result: Complex right kidney upper to midpole cystic lesion, stable in size. Pre and post contrast abdominal CT; renal protocol imaging is recommended for further characterization. This study is being ordered for suspicious mass or suspected tumor/malignancy. The patient had previous abnormal imaging including a CT, MRI, or Ultrasound. A kidney abnormality was found on a previous CT, MRI, or Ultrasound. The patient has a renal cyst.

2 masses in liver to be evaluated. This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/malignancy. The patient had previous abnormal imaging including a CT, MRI, or Ultrasound. A liver abnormality was found on a previous CT, MRI, or Ultrasound. It is unknown if there is suspicion of metastasis.

CT Abdomen Without Contrast performed on 10/19/2017 that showed there is a soft tissue nodule anterior to the left kidney measuring 18 mm that appears to be a nodule on the lateral inferior tip of the left adrenal gland. It appears too remote to be an ACC. This study is being ordered for a metastatic disease. There are 2 exams being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering MD's specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient with prior CT presented with bilateral renal cysts. This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/malignancy. The patient had previous abnormal imaging including a CT, MRI, or Ultrasound. A kidney abnormality was found on a previous CT, MRI, or Ultrasound. The patient has a renal cyst.

Pt is needing to have a MRI abdomen+pelvis with contrast done. Pt has an abdominal mass. One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
r/o IBS AND ADHENSION RELATED PAIN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years ago; There has been treatment or conservative therapy.; right and left lower abdominal quadrant pain, intermittent abdominal pain from right to left which are chronic; medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

The Pt had CT of ches 12/08/2017, central lobular emphysema. Indeterminate renal lobe mass lesion.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This request is for an Abdomen MRI.; This study is being ordered for hematuria.; The patient has painful hematuria.; It is unknown if the patient has had an IVP (intravenous pyelogram); &gt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; "There are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis."; &gt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; "There are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis."; unknown

This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; It is not known if there are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis.; "There are no active or clinical findings of Crohn's disease, ulcerative colitis, or diverticulitis.; "There is radiographical or ultrasound findings consistent with abnormal fluid collection, abdominal abscess, or ascites.";

This request is for an Abdomen MRI.; This study is being ordered for known or suspected vascular disease.; The ordering physician is not a surgeon.; There is no plain film or ultrasound evidence of vascular abnormality.; The patient is hypertensive and unresponsive to drug therapy.; unknown

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; &gt; Enter answer here - or Type In Unknown If No Info Given. &gt;
This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; It is not known if the patient is undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; Ms. Carol Welborn is a 57 year old woman here for initial evaluation of an Adrenal nodule, seen at the request of Dr. James Baker. &lt;entered data here or Type In Unknown If No Info Given.&gt; 1

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; &lt;Enter answer here or Type In Unknown If No Info Given. &gt; 1

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; PATIENT PRESENTS TO CLINIC WITH A PANCREATIC HEAD MASS SEEN ON ULTRA SOUND AND CT ABD/PELVIS. PATIENT HAS ABDOMINAL PAIN AND WEIGHT LOSS WITH INCREASE LIVER ENZYMES. 1

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; 1

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; abnormal ct showing 5 cm hyper dense area of the right liver; 2.3 cm indeterminate left adrenal nodule; 1

This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; 1

This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; &lt;entered data here or Type In Unknown If No Info Given. &gt; 1

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; 4

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; &lt;Enter answer here or Type In Unknown If No Info Given. &gt; 4

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Authorization was obtained for this procedure but patient postponed and auth expired. In May 2017 she had a CTA done for vascular disease and a left lobe liver mass was detected. Recommended MRI for further evaluation. Thank you! 1
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. "; "The patient has had an abdominal ultrasound, CT, or MR study."; CT showed mass on liver, radiologist recommends MRI for better study.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. "; "The patient has had an abdominal ultrasound, CT, or MR study."; follow up to suspicious mass.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. "; "The patient has had an abdominal ultrasound, CT, or MR study."; He had a CT of A/P this year and has a soft tissue mass. Monitoring. Checking back after 7 months.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. "; "The patient has had an abdominal ultrasound, CT, or MR study."; On going abdomen pain and low back pain. Adrenal masses found on CT.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. "; "The patient has had an abdominal ultrasound, CT, or MR study."; PATIENT HAD A CT ABD/PELVIS ON 10/10/17 THAT SHOWS A LEFT ADRENAL MASS THAT HAS INCREASED IN SIZE SINCE 3/4/16, IN WHICH A MRI ABDOMEN WAS RECOMMENDED. PATIENT INITIALLY PRESENTED TO CLINIC WITH ABD PAIN AND HEMATURIA.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. "; "The patient has had an abdominal ultrasound, CT, or MR study."; patient had a cta of the chest and it showed a hepatic lesion. radiologist recommended an mri abd for further evaluation.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. "; "The patient has had an abdominal ultrasound, CT, or MR study."; patient had a cta of the chest and it showed a hepatic lesion. radiologist recommended an mri abd for further evaluation.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. "; "The patient has had an abdominal ultrasound, CT, or MR study."; 3.1 cm adrenal nodule on the right side. needs MRI to rule out adrenal adenoma.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor. "; "The patient has had an abdominal ultrasound, CT, or MR study."; PATIENT PRESENTS TO CLINIC WITH INCREASED LIVER ENZYMES. ABDOMINAL U.S. AND CT ABD ARE INCONCLUSIVE FOR PANCREATIC MASS VS LIVER MASS.
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; Patient with abdominal pain was sent for CT abdomen/pelvis. Report shows nodule of RT adrenal gland, hypodense renal lesions bilaterally and heptomegaly. MRI abdomen recommended by radiologist for further assessment.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; PET CT PERFORMED AND MRI WAS SUGGESTED.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; Questionable mass to liver and kidney found on CT.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; Recommend nonemergent MRI without and with contrast and MRCP for further evaluation per radiologist with St. Bernards.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; The patient was treated in the Emergency room yesterday for abdominal pain. She has an abnormal CT Scan that showed a left adrenal mass. The Radiologist recommended an Abdominal MRI.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; Previous abnormal ultrasound.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; Enter answer here - or Type In Unknown If No Info Given. &lt;Enter answer here - or Type In Unknown If No Info Given. &gt;.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; CT report from 9-27-17 Recommends MRI due to Liver with few small hypervascular mass lesions, hemangiomas versus other masses. Moderate Hepatic steatosis.
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor / metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; pt had and CT abd and pelvis and they recommend a MRI or a CT abdomen with renal protocol to be able to review the mass on his lt kidney a little better and pt is allergic to the IV contrast and they are not wanting to do the CT contrast since he is outpa

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor / metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has had an abdominal ultrasound, CT, or MR study.;"; Recent abnormal MRI notes: A 1.2‐cm isodense mass posterior and lower pole of the right kidney does enhance following contrast infusion. The finding could represent a complicated cyst versus a solid mass related to neoplasm. The &RxDO; finding is small in size.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor / metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.;"; Patient had previous CT done in ER that showed liver mass

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor / metastasis.; The patient has previous abnormal imaging including a CT, MRI or Ultrasound.; A kidney abnormality was found on a previous CT, MRI or Ultrasound.; The patient has a tumor.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor / metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is suspicion of metastasis.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow‐up trauma, or a pre‐operative evaluation.; Diffuse increased echogenicity throughout the liver with poor penetrability with some areas of subcapsular triangular‐shaped sparing.

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow‐up trauma, or a pre‐operative evaluation.; &lt;Enter answer here - or Type In Unknown If No Info Given. &gt;

; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture. 1
Patient has nipple discharge and skin retraction of the left breast. She had a diagnostic mammogram and ultrasound on 11/8/17. She also has an aunt who has a history of breast cancer.; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

Patient’s lifetime risk=22.1% using the Tyrer-Cuzick model.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

Pt has very dense breast tissue and a family history of breast cancer in her aunt and 4 cousins, making her higher risk. Breast MRI is recommended.; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

Screening MRI is recommended annually, alternating between mammograms for high risk patients. She has a lifetime risk of 57%.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

The patient’s mother had bilateral breast cancer, and maternal aunt had breast cancer. Her maternal grandmother had ovarian cancer. Patient was BrCa tested and was negative. Bilateral breast MRI is recommended due to her family history as well as a life; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20.

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; Yes, the patient have a known mutation such as BRCA1, BRCA2, PTEN or TP53.; It is unknown if the patient has a lifetime risk score of greater than 20.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).
This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this patient does not have axillary node adenocarcinoma.; Yes, there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.  

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient’s further management.  

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; Yes, this is an individual who has known breast cancer in the contralateral (other) breast.  

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are benign lesions in the breast associated with an increased cancer risk.  

This is a request for a Bone Density Study.; This patient has not had a bone mineral density study within the past 23 months.; This is a bone density study in a patient with clinical risk of osteoporosis or osteopenia.  

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.  

It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.  

The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.
Myocardial perfusion imaging, tomographic (SPECT); single study

78451

- Enter answer here - or Type Unknown If No Info Given. &gt; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

64 yo female noted to have chest pain, unable to complete a stress test. Can’t walk long enough. Just failed to complete a stress test.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient’s age is between 45 and 64 years old.

Abnormal EKG test; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Abnormal EKG, abnormal regular stress test, high blood pressure, 3 diabetes, chronic smoker, chronic shortness of breath, and abnormal pulmonary test.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

dyspnea chest pain fatigue episodes getting worse and more frequent; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Family history of heart disease,mixed hyperlipidemia,severe obesity,obstructive sleep apnea,insulin diabetic, due to above multiple risk factors; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
It is not known if the patient is diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

Obesity & Hypothyroidism & Hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Patient with chest wall pain that at times radiates to left arm. Recently performed CTA to rule out pulmonary embolus.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.; The results of the previous nuclear cardiology study were not normal.

She has typical chest pain radiating to her arm, with shortness of breath, diaphoresis, hx of HTN and hyperlipidemia and strong family hx of heart dz. Is there some info they are missing?? Please retry. its very important.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
The patient is diabetic.; The patient is diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.; The patient is less than 45 years old. 1

The patient is diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

The patient is not diabetic.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old. 1

The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient is less than 45 years old.

The patient is diabetic.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a stress echocardiogram.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient is female.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old. 1

The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient is female.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old. 1

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old. 1

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old. 2

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is NOT for prolapsed mitral valve, suspected valve disease, new or changing symptoms of valve disease, annual review of known valve disease, initial evaluation of artificial heart valves or annual re-eval of artificial heart valves.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for a routine follow up of congenital heart disease.; It has been at least 24 months since the last echocardiogram was performed.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of a recent myocardial infarction (heart attack).

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.
Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2012; There has not been any treatment or conservative therapy.; Chest pain, shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; It is not known if the patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; The member has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; To evaluate a suspected cardiac mass.; The member does not have known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; To evaluate the heart prior to non-cardiac surgery.; The member does not have known or suspected coronary artery disease.

This request is for a Low Dose CT for Lung Cancer Screening.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening.; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; It is unknown if the patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.

Patient has COPD; This request is for a Low Dose CT for Lung Cancer Screening.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening.; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.
This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Patient had a EGD on 2/2/16 and a biopsy was taken from the duodenum and a hiatal hernia found. History of renal stones. OV on 10/2/17 patient has tenderness to RUQ and also just above right flank area. Nausea &x003D; US performed in ED on 10/1/17-negative; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Patient had gall bladder removed in 06/2017 and struggles with abdominal pain since.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

PATIENT HAS ELEVATED LIVER ENZYMES, ONGOING ABDOMINAL PAIN, AND NAUSEA.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

Patient is having abdominal pain, and Dyspepsia. Had an US and they suggested a MRCP; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; It is not known if patient requires evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.
This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.  

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.  

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient has an altered biliary tract anatomy that precludes ERCP.  

This is a request for a brain/head CT.; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.  

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.  

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; This study is being ordered for stroke or aneurysm.; This study is being ordered for a previous stroke or aneurysm.  

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.  

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.  

This is a request for a brain/head CT.; The study is being requested for None of the above.; This procedure is being requested for other indications.
The document contains various medical records related to CT scans. Here are the summaries:

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; One of the studies being ordered is NOT Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; CHRONIC HEADACHES, FRONTAL AND SINUS, HAS GREEN NASAL DISCHARGE. ALSO HAS HEADACHES ASSOCIATED WITH ALLERGIES. TAKES ALLEGRA, RUNNY NOSE, ITCHY WATERY EYES DESPITE MEDICATION. NEAR SYNCOPE UNEXPLAINED; It is not known if there has been any treatment or conservative therapy.; CHRONIC HEADACHES, FRONTAL AND SINUS, HAS GREEN NASAL DISCHARGE. ALSO HAS HEADACHES ASSOCIATED WITH ALLERGIES. TAKES ALLEGRA, RUNNY NOSE, ITCHY WATERY EYES DESPITE MEDICATION. NEAR SYNCOPE UNEXPLAINED; One of the studies being ordered is NOT Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; New patient to us, 2016 at least. Flare up over the last 2 weeks.; There has been treatment or conservative therapy.; headache and sinus pressure.; New paresthesias.; Zpak
Prednisone
Maxalt
Alburterol
Topomax
Zithromax
Clindamycin
Nasal Steroid; One of the studies being ordered is NOT Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

; This study is being ordered for Vascular Disease.; Unknown, last visit date 10/18/2017; There has not been any treatment or conservative therapy.; Weakness, falling, sweats; One of the studies being ordered is NOT Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

; This study is being ordered for trauma or injury. blurred vision and sensitivity to light pain into neck. pt states pain is constant. new pain, usually headaches are "mild"; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.
c/o memory loss; pt states that she went to Hardy with her children states when she got back home she walked in the door started getting nauseated, started crying, states that she did not remember that her father had died over 30 years ago, could not reca; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

constant pain; imitrex only helps sometimes; frontal headache pain; throbbing and pounding pain; recurring daily; pain worse with light and noise; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

egd, colonoscopy; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8-22-2017; There has been treatment or conservative therapy.; Nausea, diarrhea, fatigue, worsening headaches, neck pain; blood work, referred for muscle biopsy, medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

female presents with a f/u on migraines. Associated symptoms include dizziness, nausea and vomiting. Has a migraine that started yesterday. Describes dizziness as vertigo. Headache is located diffusely. Worse on the central back portion of her head. The o; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Having throbbing Pressure; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache. headache for 3 days, with vomiting, fatigue, weakness, blurred vision, meds not helping; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

left arm felt paralyzed along with right leg. had syncopal episodes.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; It is unknown if the patient is able to have a Brain MRI for evaluation of these symptoms.

migraines; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring. NA; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.

Patient is having headaches everyday.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; ”There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.”.; This study is being requested for a headache.

Patient states she is starting to forget simple things lately and is not able to get her words out at times. She states she has notice the symptoms has gotten worse in the last couple of months. She states she has been running red lights and running o; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Dementia/ Cognitive Impairment; It is unknown why an MRI is not being considered

pt c/o loss of sense of smell and taste that has been going on for longer than 2 weeks.; This study is being ordered for a neurological disorder.; pt didn't give exact date of onset. said that it has been going on for a while, longer than 2 weeks; There has not been any treatment or conservative therapy.; loss of sense of smell and taste; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. 1

Patient has confusion; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Pt has had a witnessed seizure and was sent to the er in Tennessee. new onset seizure.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Pt has had behavior changes with her headaches. They are severe and cause dizziness, vision disturbances and erratic behavior.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient has had a recent onset (within the last 4 weeks) of neurologic symptoms.

Pt reports sudden onset of headache unrelieved by OTC medications. Pt states that she became concerned when she began to experience dizziness. Unstable gait observed during encounter with patient.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.
Pt suffers with nausea, confusion, poor memory and sleeping a lot.; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.  

She continues to have problems with headaches; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient here for follow-up to recent visit to the ER for complications of a UTI. She was placed on antibiotics and notes her urinary symptoms are improving. She continues to have problems with headaches. She states they always start the same place which i; There has been treatment or conservative therapy.; headache; medicaton; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology  

This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.  

This is a request for a brain/head CT.; Known or suspected blood vessel abnormality (AVM, aneurysm) with documented new or changing signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.  

This is a request for a brain/head CT.; Known or suspected TIA (stroke) with documented new or changing neurologic signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.  

This is a request for a brain/head CT.; 'None of the above' best describes the reason that I have requested this test.; None of the above best describes the reason that I have requested this test.  

This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.  

This is a request for a brain/head CT.; The patient has a headache involving the back of the head and the patient is over 55 years old; Headache best describes the reason that I have requested this test.  

This is a request for a brain/head CT.; The patient has a history of cancer.; Headache best describes the reason that I have requested this test.  

This is a request for a brain/head CT.; The patient has a new onset of a headache within the past month; Headache best describes the reason that I have requested this test.  

This is a request for a brain/head CT.; The patient has a history of cancer.; Headache best describes the reason that I have requested this test.
This is a request for a brain/head CT.; The patient has a suspected brain tumor.; Known or suspected tumor best describes the reason that I have requested this test.; There are documented neurologic findings suggesting a primary brain tumor.; This is NOT a Medicare member.

This is a request for a brain/head CT.; The patient has a suspected brain tumor.; Known or suspected tumor best describes the reason that I have requested this test.; There are NO documented neurologic findings suggesting a primary brain tumor.

This is a request for a brain/head CT.; The patient has the worst headache of patient's life with onset in the past 5 days; Headache best describes the reason that I have requested this test.; This is NOT a Medicare member.

This is a request for a brain/head CT.; The type of tumor is unknown.; Known or suspected tumor best describes the reason that I have requested this test.

This is a request for a brain/head CT.; This study is being requested for Hydrocephalus or congenital abnormality.

This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

Trevor C Bice 32 y.o. male here today for Follow Up (4 week follow up) and Head Injury (Head injury 2 yrs ago was hit in the head having some head pain ); Patient here today with his wife to review lab results. His liver functions were elevated, he tells; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring. uncontrolled jerking; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications

unknown; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

unknown; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

unknown; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

unknown; This study is being ordered for Infectious Disease.; 10/04/2017; There has been treatment or conservative therapy.; headaches, neck pain, dizziness, ear pain, sinus pressure.; medications.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; CHRONIC HEADACHES, FRONTAL AND SINUS, HAS GREEN NASAL DISCHARGE. ALSO HAS HEADACHES ASSOCIATED WITH ALLERGIES. TAKES ALLEGRA, RUNNY NOSE, ITCHY WATERY EYES DESPITE MEDICATION. NEAR SYNCOPE UNEXPLAINED; It is not known if there has been any treatment or conservative therapy.; CHRONIC HEADACHES, FRONTAL AND SINUS, HAS GREEN NASAL DISCHARGE. ALSO HAS HEADACHES ASSOCIATED WITH ALLERGIES. TAKES ALLEGRA, RUNNY NOSE, ITCHY WATERY EYES DESPITE MEDICATION. NEAR SYNCOPE UNEXPLAINED; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

; This study is being ordered for Vascular Disease.; Unknown, last visit date 10/18/2017; There has not been any treatment or conservative therapy.; Weakness, falling, sweats; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT.

Dr. McClellan treated her for a sinus infection and in 1 weeks she wasn't any better so she went back and Dr. Sams took a sinus xray and she didn't have a sinus infection so he gave her a steroid injection. She has been dealing with this all summer. The p; "This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, osteomyelitis.fct"; This is not a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT.

; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

F/U mass on neck; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Maxillary sinus pressure right side has worsened. Unable to tolerate Bactrim. Has taken 3 doses of doxycycline. Earache has resolved. No fever.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 hrs in duration); Yes this is a request for a Diagnostic CT.; It has been less than 28 days since onset AND the patient improved, then worsened.
Patient here with her mother for evaluation of headaches. She states the headaches seem to be worsening. She has had occasional problems with headaches in the past but has been able to use over-the-counter medication for the discomfort.; This study is being ordered for a neurological disorder.; 10/30/17; There has been treatment or conservative therapy.; Patient here with her mother for evaluation of headaches. She states the headaches seem to be worsening. She has had occasional problems with headaches in the past but has been able to use over-the-counter medication for the discomfort.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient is having numbness on left side of her face, she cannot feel her cheek or left nasal area. Patient is also having coughing and congestion.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); Yes this is a request for a Diagnostic CT; It has been less than 28 days since onset.

Patient is having severe pain in her face an cheeks also swelling; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient is needing a CT max/Facial without contrast.

She continues to have problems with headaches; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient here for follow-up to recent visit to the ER for complications of a UTI. She was placed on antibiotics and notes her urinary symptoms are improving. She continues to have problems with headaches. She states they always start the same place which i;

The Patient is needing a CT max/Facial without contrast.

Patient very concerned that she may have cancer due to headaches and areas of swelling that she has noticed. I do appreciate mild swelling over left frontal sinus but am unable to palpate any ot; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; It is not known if there are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head occurred more than 1 week ago. 1

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; It is not known if there are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects. 1

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm.; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation). 1

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered. 1
abnormal findings on dx imaging of abdominal regions; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Chronic recurring headache for over two weeks; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Does have daily headaches since young teenager. Reports h/o injury to skull age 5 after running into a steel beam, denies after this incident.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

evaluate for ms; This study is being ordered for a neurological disorder.; 11/01/2017; There has not been any treatment or conservative therapy.; balance; vision problems r eye; look for ms; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCt, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology; experiencing dizziness / falling; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Family History of Parkinson's disease &xOD; Patient has started to notice on multiple occasions of several symptoms he has started to have. &xOD.; &xOD; Daily episodes of bright white worms in field of vision, tremors, twitching right thumb and drooling daily. These e; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for Parkinson's disease.; This study is being ordered for new neurological symptoms.; The neurologic symptoms include vision changes.

has daily headaches that are always there, These are usually in his forehead region Anything on his head putting pressure on it sets them off region, never goes away.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).
Headache for 2 weeks; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation). 1

Headache.; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered. 1

Headache; dizziness; cervical neck pain with associated arm pain; pt hx of falling from chair at home while sitting still.; This study is being ordered for a neurological disorder.; 11/21/2017 is the first clinic encounter for pt with these complaints.; There has not been any treatment or conservative therapy.; Headache with dizziness. Pt states room starts spinning while sitting in chair and falls from chair. Complaints of cervical neck pain radiating down both arms.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology 1

Headache; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have a sudden severe, chronic or recurring or a thunderclap headache. 1

Headaches are getting worse. He's had headaches for a while, they are behind his (L)eye, now they are worse, were getting worse for 2 months before he got hit in the head a couple of days ago. &lt;x0D; &lt;x0D; CHIEF COMPLAINT &lt;x0D; Headaches (as reported by Patient)&lt;x0D; Co; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache. 1

He's also had a frontal headache, which she's had off and on for years. He had a scan on his head years ago when he had the same type of headache, this was apparently negative.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation). 1
LARRYSSA presents with headache. She is unable to recall when it began. The pain is diffuse with no specific location. It does not radiate. She has had prior headaches similar to this one. She denies fever. There do not seem to be any factors that w; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Location: Respiratory, Duration: 3 weeks , Timing: Constant, Intensity: Moderate, Quality: facial pressure, bloody nasal drainage, feels like she has to sneeze all the time ., Symptom(s) Began: Spontaneous, Symptom(s) progressed: not improving, Context: C; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

MEMORY AND COGNITIVE CHANGES, FORGETFULNESS, NEW ONSET RECENT; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; It is not known if there a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

memory loss, left side the patient’s body is hurting; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

n/a; This study is being ordered for a neurological disorder.; 10/2/2017; There has not been any treatment or conservative therapy.; Migraine, numbness and tingling in upper extremities, nausea.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology new onset for two months of severe memory loss no trauma; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

no; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

None; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

patient c/o recurrent chronic migranes with no relieve with prescription medications (Elavil, Sumatriptan); This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
PATIENT C/O SUDDEN SEVERE HEADACHE TO BILATERAL TEMPORAL REGIONS WITH NAUSEA, VOMITING, AND PHOTOSENSITIVITY. PRESCRIBED MEDS HAVE NOT BEEN EFFECTIVE.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

Patient has been having blurred Vision bilaterally and eye pain, also diffuse Myalgias and bilateral upper and lower extremity paresthesia and weakness.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

Patient has been having headaches for the last couple of months that are now daily, and in the vertex. She gets nausea and photophobia. The headache has a pulsing quality and worse with activity. She does feel fatigued lately and she sometimes gets dizzy.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

Patient has dizziness and gettyness and neoplasm of kidney; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient has had a chronic headache everyday for 6 weeks. with out any relief; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient does not have HIV or cancer.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

Patient has syncopal episodes, Vision disturbance, memory loss, facial drooping , speech is also affected.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.

Patient has hematochezia, elevated liver studies, near syncope, and tremors; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient is here today with complaints of pain in the back of his head and neck that feels like pressure. He states that it he lays down the pain can be quite severe. He states that on average it happens about four times a week, but it is just a throbbing.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).
Patient presented with new onset severe headaches. Had cerebral cysts as a child, surgery done.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.

Patient reports syncope and dizziness with memory impairment.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.

Patient suffers from long periods of time with headaches on the right side of her head lasting two or more days that are sensitive to light and sound.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation). Patient with multiple ER visits for vertigo and loss of balance with no abnormal testing results. Patient has had medication trials that have failed and is still dealing with condition that affects her ability to function at her normal levels.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing vertigo.

Patient reports worsening of migraine headaches and they are occurring more frequently; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Patient reports worsening of migraine headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Radiology Services Denied Not Medically Necessary

Patient falls off a ladder 10/4/17 and felt something "pop" on the right side of his neck.
Records will be sent for review; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

Neck pain and left shoulder pain. Left trapezius muscle pain and spasm. H/O right tonsil cancer. No injury. No improvement with antinflammatories.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

Patient complains of neck pain. States it is aggravated by movement. He states the pain has been there for a long time and is getting worse. He denies injury. He rates pain 3/10. He states he can hear a grinding noise when he moves head/neck. He states re; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

Patient fell off of a ladder 10/4/17 and felt something "pop" on the right side of his neck. &lt;#0D;&amp;#0D; Records will be sent for review; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/2013; There has been treatment or conservative therapy.; Pt has low back pain . Upper and lower extremities pain; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

*This study is being ordered for trauma or injury.; pt injured her neck and shoulder in 2014; There has been treatment or conservative therapy.; pain in her neck that radiates down to her hand and shoulder; pt started PT this month and this doesn't seem to be helping, she has been giving or told to take ibuprofen OTC, One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/2013; There has been treatment or conservative therapy.; Pt has low back pain . **Explanation:**

- **General/Family Practice**, **Disapproval**: This is a request for a lumbar spine CT. The patient does not have a history of severe low back trauma or lumbar injury. This is not a preoperative or recent postoperative evaluation. This is not part of a myelogram or discogram. The patient is experiencing symptoms of radiculopathy for six weeks or more. **Yes this is a request for a Diagnostic CT.**
This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT

This patient needs to be evaluated for the pain and radiculopathy in the lumbar, cervical and thoracic area to see if steroidal injections or surgery are appropriate.; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; numbness and tingling in the lumbar area, severe pain and numbness in the cervical and thoracic area.; Patient has tried oral NSAID’s, analgesics as well as home physical therapy and physical therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; bil arms; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; Been going to Chiropractor for pain

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Document exam findings; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; limited ROM in both extremities; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; There is weakness.; Numbness in fingers.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This study is being ordered for a neurological disorder.; 11/30/2017; There has been any treatment or conservative therapy.; NUMBNESS, WEAKNESS IN UPPER EXTREMITIY, PAIN; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for trauma or injury; over a year; There has been treatment or conservative therapy; pain in lower back; pain Management physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is recent evidence of a thoracic spine fracture.

This study is being ordered for a neurological disorder.; There has been treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; It is not known if there has been any treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

There has been treatment or conservative therapy.; ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; pt has had acute pain and recently diagnosed with scoliosis; There has been treatment or conservative therapy.; ; pt has tried physical therapy and has seen chiropractor; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Pain; Pain Meds, Ice; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

There has not been any treatment or conservative therapy.; balance; vision problems r eye; look for ms; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is recent evidence of a thoracic spine fracture.

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; Severe pain.

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; none.

LUMBAR CERVICAL AND THORACIC PAIN; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

- This study is being ordered for trauma or injury.; Disapproval
- 09/30/2016; There has been treatment or conservative therapy.; low back pain radiating to thoracic spine; medications for 1 year, muscle relaxants; Disapproval
- One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

- None; This study is being ordered for trauma or injury.; Disapproval
- 11/10/17; There has been treatment or conservative therapy.; Numbness and Tingling in the scapular area; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

- None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Disapproval
- 9/10/2017; There has been treatment or conservative therapy.; Low BP and Neck Pain and all joints.; MEDS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

- None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Disapproval
- Unknown; There has been treatment or conservative therapy.; Pain that starts in neck and radiates to left upper extremity; Medications, Adjustments; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

- Onset of pain and decreased ROM was 3 weeks ago. He has tried to treat with oral medications and rest and the symptoms are worsening.; Disapproval
- 8/24/17; There has been treatment or conservative therapy.; Oral pain relieving medication and rest.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

- Pain is unrelieved with current medications, rest and conservative home treatments.; Disapproval
- Initial date of pain onset - 8/24/17; There has been treatment or conservative therapy.; Severe mid and low back pain; Oral pain relievers and steroids for pain and inflammation; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
Patient has pain and swelling; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/04/2017; There has been treatment or conservative therapy.; pain; meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient has pain and swelling; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient has pain and swelling; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient is here to f/u on ankylosing spondylitis. She takes Norco, Flexeril po qd, Baclofen po q hs, and Naproxin. Patient denies of any problems. He states that she is needing her Norco and Flexeril refilled. Pt is experiencing numbness in L fingers and ; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The patient does have neurological deficits.; It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; ; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; ; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; back pain, numbness and failed PT; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.
The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; ; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; Radiating pain chronic bilateral pain; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; Thoracic radiculopathy, BACK PAIN, muscle aches and cramps and arthralgias/joint pain and back pain (dec rom of thoracic and lumbar spine. patient has had 12 weeks of conservative therapy with me-consistent adjustments and medicine with no relief.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Chronic back pain has required injections with no improvement has failed physical therapy and NSAIDS; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Patient having numbness and tingling in lower extremities and sciatica pain.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Patient is experiencing pain and numbness radiating.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.
The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; back pain, shoulder pain, and chest and axilla pain; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; It is not known how many follow-up thoracic spine MRIs the patient has had.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The Chief Complaint is: Pt was here Tuesday, having same issue swelling and pain coming around to front, received shot, muscle relaxers didn't help, seen @ NEA ER BP was 169/96 in extreme pain w/ labored breathing.

The patient does not have any neurological deficits.; The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.;

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.;

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.;

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

This is a request for a thoracic spine MRI.; Follow-up to Surgery or Fracture within the last 6 months; There has been a recurrence of symptoms following surgery.; The surgery was less than 6 months ago.; The patient been not been seen by or is not the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; ; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; Patient became wheelchair bound in 2015, the cause was unexplained. She states that her legs became very weak and she has had to use a wheelchair for mobility since then. She denies ever having a thoracic MRI. Ordering to rule out suspected SCI.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.
This is a request for a thoracic spine MRI.; The study is being ordered due to Neur...; The patient is experiencing or presenting symptoms of bowel or bladder dysfunction.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neur...; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.

This patient is experiencing pain in the back with radiculopathy that is not controlled with medications or injections and needs to be evaluated for possible surgery.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This patient needs an MRI of her t-spine; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient has bilateral leg weakness and strength. Patient is very weak and is very ill appearing; patient went to the ER on 11/13/17 and has not improved any since that visit.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

This pt's pain has been going on from april 2017 with out relief from meds, home therapy.; This study is being ordered for trauma or injury.; according to our new charting system this patient has been having issue that start back in april of 2017; There has been treatment or conservative therapy.; sharp pain in his back on a scale of 5-7/10 on the pain scale; this pt was order some home therapy and nsaid as well as pain medication for pain control in april 2017; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Unknown.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; July 21,2017; There has been treatment or conservative therapy.; Neck pain, acute bilateral thoracic pain, and low back pain.; Medication management such as Ibuprofen 800mg and Tizanidine 4mg.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Unknown; This study is being ordered for a neurological disorder.; 10/20/2017; There has been treatment or conservative therapy.; Pain in mid back up to neck and down arm; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10 years; There has not been any treatment or conservative therapy.; knot on the right side of lower back, back pain, numbness, tingling on left. Cyst felt on right side on exam.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/2016; There has been treatment or conservative therapy.; Back pain, numbness and tingling in legs at times, difficulty lifting, difficulty standing or sitting for long periods of time; Supervised at home physical therapy, NSAIDs, muscle relaxers, decreased activity level; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Unknown; This study is being ordered for trauma or injury.; Around 11/13/17; There has been treatment or conservative therapy.; Back pain, slipped, thought she pulled a muscle on her back, x rays, t10 compression fracture; Hydrocodone, muscle relaxers.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

We have treated this pt with pain medication, anti inflammatory and still relief from anything that we have tried on her; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; upon xray we found a compression fx and some abnormal curvature in her back.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.
General/Family Practice Disapproval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.

Patient complains of low back pain. Reason for visit: This is a follow-up visit. Her symptoms are worse since last visit. This is a chronic problem, with essentially constant pain. She states that the current episode of pain started years ago. Patient; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient had a abnormal mri which indicated stenosis in the lumbar region from a extrusion of the disc.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Patient had a hard fall/injury at work; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; Tramadol

Patient had MRI of lumbar spine in 2016 that showed multiple degenerative disc. Pain has worsened since then and now radiates down bilateral legs.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient has weakness in bilateral legs at times.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient had MRI of lumbar spine oct 2012; showed right sided paracentral disk herniation at LS-sf level; showed mild disk bolding at l3 and l4 and moderate disk bolding at l4 and l5; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; radiation down to the right knee; latoraly; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient had PT; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.

Patient had MRI of the lumbar spine in 2014, which showed arthritis at L4/L5 with nerve impingement. Pt. had seen Dr. Blankenship and Dr. McCarthy and Dr. Seale and Dr. Brad Thoma; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above
Patient has been having low back pain since 5/14/2016 and radiologist recommends MRI; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.  

Patient has completed conservative treatment with no improvement pain worsening with difficulty getting out of bed and ambulating pain radiating down right leg into right foot and heel; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; difficulty getting up out of bed to stand worse in right leg and foot pain worsened over the past 3 days physical therapy over the past 12 weeks with no improvement steroid injections with no improvement; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.  

Patient has continued back pain, radiates into right hip. Her last MRI was 8/29/16 and the findings will be sent via fax. Patient reports her pain has worsened and has occasional numbness and tingling into right leg; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above  

Patient has had back pain for several years. Treated with oral steroids on 09/21/17. Patient states that steroids did not help and back pain is worse.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above  

Patient has had lower back pain for several months. Has tried steroids with no relief. Also x-ray shows no fracture.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above  

Patient has had back pain for several years. Has tried steroids with no relief. Also x-ray shows no fracture.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above  

Patient has had ongoing back pain. He has had an abnormal lumbar spine xray. Steroids have not helped; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.  

Patient has low back pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above  

Patient has pain and swelling.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Patient has pain and swelling; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

PATIENT HAS PROGRESSIVELY WORSENING BILATERAL LEG PAIN AND WEAKNESS, STIFFNESS AND RADICULOPATHY. THE PAIN IS SHARP STABBING CONSTANT PAIN. PATIENT ALSO HAS HAD AN LUMBAR SPINE XRAY THAT SHOWED ABNORMAL STRAIGHTENING AND L4/L5 ABNORMALITY. PATIENT HAS TR;

The study requested is a Lumbar Spine MRI.;

The patient does have new or changing neurologic signs or symptoms.; There is weakness.; BILATERAL LOWER EXTREMITY WEAKNESS.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The patient has tried and failed physical therapy for lower back pain, patient still complains of severe low back pain that radiates down left leg to left knee with numbness and tingling. Patient has taken prednisone along with anti-inflammatory for pain. PATIENT HAS HAVING INTENSE PAIN IN LOWER BACK - BROTHER PUSHER HER DOWN AND SHE WENT TO ER - GOT PAIN PILLS AND HELPED SLIGHTLY. OVER THE PAST 3 WEEKS PAIN IS NOT GETTING ANY BETTER; PATIENT HAS HAVING CHRONIC LOW BACK PAIN THAT IS UNBEARABLE.;

The patient does not have new or changing neurologic signs or symptoms.; There is weakness.; weakness on patient left leg, patient reports leg pain, numbness and tingling, also with weakness to area.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient having chronic low back pain.;

The patient has acute or chronic back pain.;

The patient has none of the above.

Patient hurt his back while moving furniture last week and the pain radiates from his lower back to his hip. He was given some steroid injection, NSAIDs and muscle relaxer with no improvement.;

The patient does not have a new foot drop.;

The patient has acute or chronic back pain.;

The patient has none of the above.

The patient is complaining of chronic low back pain that is unbearable.;

The study requested is a Lumbar Spine MRI.;

The patient has acute or chronic back pain.;

The patient has none of the above.
Patient is here to f/u on ankylosing spondylitis. She takes Norco, Flexeril po qd, Baclofen po q hs, and Naproxin. Patient denies of any problems. He states that she is needing her Norco and Flexeril refilled. PT is experiencing numbness in L fingers and ;

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient is in constant pain while sitting and standing needs needs further evaluation since ot meds and PT at home is not working; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient is having continued pain with sitting an standing. back has been hurting for about 6 wks with no resolve; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient may need to have surgery for different injection sights. We are going off of his MRI from 2014.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient has had epidural injections recently, patient was working out in the yard this weekend and has had worse weakness and increased back pain.

Patient has 10/10 pain scale.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient pain is radiating down to lower extremity. Reports tingling. Left lower extremity weakness. Gait is altered. Patient has decreased ROM and has been seen by chiropractor/physical therapy without improvement. Chiropractor completed xray.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Left lower extremity weakness/tingling; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient reports a burning pain in left leg and into foot started about 2 months ago. He reports a history of back surgery but reports his back is not hurting. Requesting MRI of back, it has been a long time since last MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; This procedure is being requested for None of the above

Patient seen in clinic on 11/29/17 with back pain radiating down leg. He stated that he was pushing a car uphill the day before. He returned to clinic on 12/04/17 with no improvement. Xray showed "no fracture or acute bony abnormality.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Patient states history of bulging lumbar disk and has surgery twice with Dr Decastro.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Patient states it is going into her legs. she is having increased falls causing other injuries.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient is experiencing numbness in L fingers and; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
