pain worse with movement and abduction - radiates down arms - degenerative joint disease noted in XR 8/7/17 - pain not improved with RICE therapy and steroid injection - MRI needed for ortho referral; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.
PAIN; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; IBUPROPHEN; The patient received medication other than joint injections(s) or oral analgesics.

Patient experiencing increased, debilitating pain in left shoulder due to rotator cuff tear. Need MRI to refer to orthopedist.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Patient fell and landed on shoulder 3 weeks ago, she's had an injection, anti-inflammatory meds, and decrease in range of motion.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Patient fell over a week ago and braced his fall with arm and heard a popping sound. He has had pain and decreased range of motion.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Patient has shoulder and neck pain; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient has significant history of prior cervical surgery due to disc rupture. He has had discectomy. At this time he does not have any weakness in his hand or paresthesias. This could be likely bursitis. Discussed with the patient and I have explained to; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Patient has torn rotator cuff in the past and never had surgery. She is having lots of pain now and very limited ROM.; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks. Patient has tried medicine and exercise, which has not helped. He still has painful ROM.; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Patient is still having pain after trials of oral medicine and at home exercise. He is having painful ROM has failed other treatment.; The patient received oral analgesics.

patient is taking medication, abnormal xray; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks. Patient was seen in clinic on 12/07/17 complaining of right shoulder pain; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.
POSSIBLE ROTATOR CUFF INJURY OR TEAR; This study is being ordered for trauma or injury.; Additionally, he presents with history of shoulder pain. He complains of right shoulder pain. The location of the pain is inferior. It radiates to the arm. The pain initially started 5 months ago. There was no obvious precipitating injury. He describes there has been treatment or conservative therapy.; PAIN IN BILATERAL SHOULDERS, RIGHT IS WORSE, PAIN RADIATES TO ARMS.; PT HAS HAD ANTIINFLAMMATORY MEDICATIONS, STEROID DOSE PACK, HOME EXERCISE.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

PT FELL IN AUGUST AND HAS CONTINUED PAIN OF SHOULDER.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Pt has had chronic pain 3-4 years no prior imaging.; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Pain has gotten worse; Naproxen; The patient received medication other than joint injections(s) or oral analgesics.

Pt presented at the beginning of September with c/o left shoulder pain and decreased ROM. He has since failed conservative therapy. He has worsening symptoms and now has no ability to lift his arm to full flexion or abduction. Concern for Rotator Cuff Tear; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Right shoulder; weakness, tingling, catching/locking, popping/clicking; buckling; instability; radiation down arm; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.

Requesting a arthrogram Left Shoulder w/MRI w/contrast - results of left shoulder xray:&lt;\#x0D;&lt;\#x0D;IMPRESSSION: Mild degenerative arthritis of both AC joints. There is &lt;\#x0D;irregularity of the greater tuberosity on the right suggestive of &lt;\#x0D;rotator cuff pathology. Bo; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Patient has a previous history of rotator cuff tear and new onset of pain.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Patient has been having pain in right shoulder with Paresthesia, decreased ROM and Pain with Flexion and abduction and extension.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Patient presents with right shoulder pain and states that it has been hurting for past 5 months, we have no clinical records of that time frame.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; pt has suspected shoulder impingement that may require surgical intervention. denies trauma.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; shoulder joint dislocation with decreased range of motion, tenderness and pain. Swelling up back of shoulder to left side of neck.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Symptomatic; Right shoulder: She exhibits decreased range of motion, pain and decreased strength. Arm pain: Location: Shoulder, Shoulder location: R shoulder, Pain details: Quality: Aching, Radiates to: Does not radiate, Severity: Moderate, Onset q.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; trauma, deep constant throbbing pain that is moderate for 7 days, weakness and swelling.

The requested study is a Shoulder MRI; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.

The requested study is a Shoulder MRI; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; Left shoulder pain "like a charlie horse", not constant but lingers for a long time; rash on both sides of neck above collar bones for 2 weeks.

1
| General/Family Practice | Disapproval | 73221 MRI JOINT OF UPPER EXTREMIT Y | Radiology Services Denied | Not Medically Necessary | The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; muscular shoulder pain, located near shoulder blade.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; PT states she has had the pain for the past year off and on. PT states it has become progressively worst. PT states 2 months ago she went to the ER and had a steriod injection and steriod pack and that helped for a little while but then the symptoms came.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; right shoulder pain with numbness in rue - history of cva - Physical therapy will not work with shoulder due to pain -.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; rt shoulder pain that he has limited rom as well as pain He has had this off and on for months and has had increased pain over last few weeks.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; see attached.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; Shoulder impingement post clavicular fracture.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; There are no documented findings of crepitus.; There are no documented findings of swelling.; The ordering physician is not an orthopedist.; The patient is NOT experiencing joint locking or instability.; The patient does not have a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Additionally, she presents with history of shoulder pain. She complains of right shoulder pain. The location of the pain is deep. The pain initially started 4 months ago. There was no obvious precipitating injury. She describes it as moderate in seve.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; left shoulder pain.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; There are no documented findings of crepitus.; There are no documented findings of swelling.; The ordering physician is not an orthopedist.; The patient is NOT experiencing joint locking or instability.; The patient does not have a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.

Yes, this is a request for CT Angiography of the lower extremity.

"There is a history (within the last six weeks) of significant trauma, dislocation, or injury to the ankle; There is a history of new onset of severe pain in the ankle within the last two weeks; There is not a suspected tarsal coalition.; Noted +1 edema b/l to ankles and radiating up to mid shin, left ankle worse than right;&amp;#x0D; TTP in achilles tendons but with ROM intact;&amp;#x0D; She states she just bought new running shoes and went walking in them at Craighead park for a few miles on Thursday. She ; This is a request for a bilateral ankle MRI.

The patient has not had a recent bone scan.; This is a request for a foot MRI.; The study is being ordered for suspected fracture.; They did not have 2 normal xrays at least 3 weeks apart that did not show a fracture.

This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; It is not known if the ordering physician is an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; There is no symptom of locking, Instability, Swelling, Redness, Limited range of motion or pain.

The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.

The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; patient had been doing home treatment for a couple months with no relief; pain medications; The patient received medication other than joint injections(s) or oral analgesics.
This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This study is being ordered for a neurological disorder.; 7/31/17; There has been treatment or conservative therapy.; buckling of knees, severe lower back pain radiating down legs; meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for Neurological Disease.; 09/28/2017; There has been treatment or conservative therapy.; Decreased mobility. Tenderness. Pain and swelling.; R/O Dvt with ultra sound, Pain medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; It is not known if there has been any treatment or conservative therapy.; Abnormal x ray, mild scoliosis, mild degenerative changes, chronic pain, stiffness, painful to bear weight; pain medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 3 months ago; There has been treatment or conservative therapy.; abnormal x ray, mild scoliosis, mild degenerative changes, chronic pain, stiffness, painful to bear weight; pain medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for trauma or injury.; 06/09/2017; There has been treatment or conservative therapy.; foot and ankle pain; exercises , boot , pain meds and anti inflammatory medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for trauma or injury.; 10/08/2016; There has been treatment or conservative therapy.; joint pain and muscle pain; PT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Radiology Services Denied

Not Medically Necessary

8/28/2017; There has been treatment or conservative therapy.; throbbing sharp pain numbness tingling weakness locking popping/clicking; xray pt meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

9/15/17; There has been treatment or conservative therapy.; burning, throbbing, sharp pain, swelling, tingling, unstable; Medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

3/8/17; There has been treatment or conservative therapy.; burning, sharp, deep worsening weakness, numbness, swelling, tingling; Medication, had abi of L foot; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for acute pain.

This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; The patient has been treated with anti-inflammatory medication for at least 6 weeks.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This study is being ordered for trauma or injury.; 09/27; There has been treatment or conservative therapy.; pain; cannot raise arm; throbbing sharp pain; ankle swelling; pt; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Age 15- jumped off roof and injured left ankle. Played soccer as child and had multiple injuries. In his 20's he did a lot of running and had multiple injuries. Basketball injury in mid 20's when he had severe sprain. Has had recent conservative treatment; This is a request for an Ankle MRI.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury. 1

Given Naproxen x 10 days, pain has not improved. Patient has rest, ice, and elevated as well.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.; No, the member do not experience a painful popping, snapping, or giving away of the knee.

Has rt knee pain for years and last year mri showed a torn menicus; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks. 1

Given Naproxen x 10 days, pain has not improved. Patient has rest, ice, and elevated as well.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.; No, the member do not experience a painful popping, snapping, or giving away of the knee.

Continuing pain in left knee.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks. 1

Continuing pain in left knee.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks. 1

Has rt knee pain for years and last year mri showed a torn menicus; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks. 1

Given Naproxen x 10 days, pain has not improved. Patient has rest, ice, and elevated as well.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.; No, the member do not experience a painful popping, snapping, or giving away of the knee.

Has rt knee pain for years and last year mri showed a torn menicus; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks. 1

Continuing pain in left knee.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks. 1

Continuing pain in left knee.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks. 1

Given Naproxen x 10 days, pain has not improved. Patient has rest, ice, and elevated as well.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.; No, the member do not experience a painful popping, snapping, or giving away of the knee.

Has rt knee pain for years and last year mri showed a torn menicus; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks. 1

Given Naproxen x 10 days, pain has not improved. Patient has rest, ice, and elevated as well.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.; No, the member do not experience a painful popping, snapping, or giving away of the knee.

Has rt knee pain for years and last year mri showed a torn menicus; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has not directed conservative treatment for the past 6 weeks. 1
having pain in right knee for 6 weeks. Examination right knee-mild effustion or erythema, not ecchymosis present; alignment normal; palpation lateral joint line tenderness present; wounds no surgical wounds are appreciated; ROM full flexion and extension; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury, old injury, chronic pain or a mass.

Knee keeps popping in/out; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Knee pain Right knee xray shows significant degenerative changes. Pt has an ACL repair in past. Knee gives out on him for no reason causing him to fall; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; Ibuprofen 800mg 1 tab every 8 hrs started on 09/05/2017; The patient received medication other than joint injections(s) or oral analgesics.

Knee pain/ back pain for 6yrs; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Ridicopathy; There has been treatment or conservative therapy.; back/right knee pain; Describe treatment/ conservative therapy here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDS specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

LEFT KNEE PAIN, PATIENT STATES HAS GONE TO PT 4 DIFFERENT TIMES, BUT STILL HAVING LEFT KNEE PAIN, tenderness of the medial joint line; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; It is not known if the physician has directed conservative treatment for the past 6 weeks. Location: right knee., Duration: 2 days., Timing: constant., Intensity: 10 on a scale of 10., Quality: sharp, aching, throbbing., Symptom(s) Began: suddenly after falling at work yesterday about 4 feet and patient reports his leg buckled under him., Sympto; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

MRIs are to be done to determine treatment path.; This study is being ordered for Inflammatory/ Infectious Disease.; Unknown.&amp;#x0D; Months-years; There has been treatment or conservative therapy.; Patient has chronic/bilateral knee pain and stiffness that does not improve with NSAIDs.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDS specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Patient had a normal x-ray.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Patient was given a packet of different types of stretches that will help strengthen her knee. After six weeks there was no improvement.; Meloxicam 7.5mg; The patient received medication other than joint injection(s) or oral analgesics.

Patient had ACL repair 12/2009. Patient twisted knee and heard pop and now is having issue bearing weight and the knee is giving away. Knee has moderate tenderness along lateral aspect and varus stress increases the pain.; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days

Patient has had a tender mass on left foot.; This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; The patient has been treated with anti-inflammatory medication for at least 6 weeks.

PATIENT HAS BEEN EXPERIENCING PAIN THAT HAS BEEN GETTING WORSE OVER THE COURSE OF A MONTH. NOTHING IS SEEMING TO HELP. HE IS LOSING RANGE OF MOTION AND AN MRI IS NEEDED TO DIAGNOSE AND TREAT; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

Patient has had recent trauma and injury to left knee and left ankle. during examination the left knee and ankle are noticeable swollen and painful when rotating patient cannot bear weight on left leg; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient has knee pain that has been going on for 3 weeks with no relief. No injury occurred just started hurting. Pain is rated a 9/10; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

PATIENT HAS KNEE PAIN THAT HAS LASTED 10 DAYS WITHOUT IMPROVEMENT. PATIENT WAS STANDING IN THE KITCHEN AND WHEN SHE TURNED HER KNEE POPPED AND SHE HAS HAD KNEE PAIN SINCE; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Patient has left knee pain x 2 weeks and swelling; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.
patient has right knee pain; This is a request for a Knee MRI; The study is requested for knee pain.; The pain is described as chronic; It is not known if the physician has directed conservative treatment for the past 6 weeks.

Patient is not able to walk, patient is a previous orthopedic patient (has had knee surgery on both knees in the recent past). Patient is needing imaging to evaluate the damage done by the accident.; This study is being ordered for trauma or injury.; 11-22-17; There has been treatment or conservative therapy.; Right and left knee joint line tenderness, swelling, instability in both knee joints, patient is guarding her knees (using crutches); Rest, Pain medication, crutches. Non-weight bearing.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Patient presents with left knee pain. Pain worsening over last 3 months. Knee pops, and has limited to no mobility. Has done stretching, rest, ice, and NSAIDS for pain.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass. Patient to be evaluated for knee pain. The affected area is the right knee. This is a follow-up visit for knee pain. For follow up: Her symptoms are stable since last visit. The injury occurred 5 days ago. No associated symptoms are reported. Patien; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Patient’s knee pain has NOT subsided with any treatment and her numbness and tingling in her back has gotten worse due to her inability to walk correctly due to this knee injury.; This study is being ordered for trauma or injury.; 02/02/2017; There has been treatment or conservative therapy.; Pain radiating from the back into the legs as well as weakness in the legs. Patient also has pain on her left knee from a fall injury.; Patient has tried physical therapy, home therapy as well as NSAID’s and narcotic medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Possible soft tissue mass above knee; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass. Possible tears, horse fell on pt; This study is being ordered for trauma or injury.; 9/13/17; There has been treatment or conservative therapy.; numbness, swelling and pain to the leg; immobilization, pain medication.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Pt had surgery on other knee, chronic knee problems.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.; Yes, the member experience a painful popping, snapping, or giving away of the knee. Pt has had previous surgery; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT  
Radiology Services Denied Not Medically Necessary

This study is being ordered for trauma or injury.; 2010; There has been treatment or conservative therapy.; chronic back pain; injections w/it no relief; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for trauma or injury.; Several years ago; There has been treatment or conservative therapy.; Pain; Medications, xray; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is a requests for a hip MRI.; The member has not failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; It is not known if there has been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 weeks ago.; There has not been any treatment or conservative therapy.; Knee pain.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.
This is a request for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.

unknown; This is a request for a hip MRI; The member has not failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient did not give specific date of onset. Complains of pain happening for "years"; It is not known if there has been any treatment or conservative therapy.; Pain in Low back and hips with decreased ROM. History of OA; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD's specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
General/Family Practice  Disapproval  73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT  Radiology Services Denied  Not Medically Necessary

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; unknown; It is not known if there has been any treatment or conservative therapy; low back pain and hip pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

"I got crushed with a forklift in 2014, cut my abdominal wall in half" and "I have an appt with Dr John Cone 10-1-2017 @ UAMS" that is wanting this done before his appt.; This is a request for an Abdomen CT.; This study is being ordered for trauma.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Yes this is a request for a Diagnostic CT

General/Family Practice  Disapproval  74150 CT ABDOMEN WITHOUT CONTRAST  Radiology Services Denied  Not Medically Necessary

"Enter answer here - or Type In Unknown If No Info Given."; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT

General/Family Practice  Disapproval  74150 CT ABDOMEN WITHOUT CONTRAST  Radiology Services Denied  Not Medically Necessary

"Enter answer here - or Type In Unknown If No Info Given."; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non- ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

General/Family Practice  Disapproval  74150 CT ABDOMEN WITHOUT CONTRAST  Radiology Services Denied  Not Medically Necessary

"Enter answer here - or Type In Unknown If No Info Given."; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is no evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT

Abdominal pain ongoing for close to year, cramping/aching, movement exacerbates pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &RxOD; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &RxOD; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Abdominal pain radiating through to back; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn’s disease, Abscess, Ulcerative Colitis, Acute Non- ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; It is not known if there are findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

Amanda was seen a month ago for some epigastric discomfort. I felt she had a gastritis and gave her samples of Dexilant. Lab work was negative. I also felt most of her symptoms were stress related. I recommended trying something to help with her anxiety. This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &RxOD; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &RxOD; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Bloating and pain, patient is worried it might be the liver or gallbladder, denies nausea or vomiting, RUQ pain intermittent; muscle relaxers not helping the stabbing pain; eating worsens the pain; has not had any imaging done related to abdomen.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &RxOD; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &RxOD; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT
Hernia of anterior abdominal wall, pain is uncomfortable, feeling bloated, located on epigastric and becoming generalized. No nausea/vomiting. Appetite is decreased. Not related to food.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &RxOD; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &RxOD; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT.

HPI Comments: 35 yo female presents f/u from last visit here on 7/28/17. Today, reports LLQ pain. Describes this as being intermittent over the past 3 years after having her gallbladder removed. Denies any hernia, constipation or dysuria. &RxOD; Diabetes. Cur; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Yes this is a request for a Diagnostic CT.

Patient has had abdominal pain for more than 6 months.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &RxOD; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &RxOD; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT.

PT HAS RUQ PAIN THAT IS STILL PRESENT, COMES AND GOES WITH CERTAIN FOODS, US WAS NEG, NOTHING SHE DOES SEEMS TO ALLEVIATE PAIN, HAS BELCHING.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &RxOD; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &RxOD; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT.

PT WAS INVOLVED IN AN MVA 11/24/17, WHERE HE WAS STANDING OUTSIDE OF A CAR THAT WAS STRUCK BY ANOTHER VEHICLE AND ABSORBED THE KINETIC ENERGY FROM THE IMPACT CAUSING THE PATIENT TO BE THROWN 10 FEET AWAY. HE HAS BEEN COMPLAINING OF ABDOMINAL PAIN SIN; This is a request for an Abdomen CT.; This study is being ordered for trauma.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Yes this is a request for a Diagnostic CT.

PATIENT WAS INVOLVED IN AN MVA 11/24/17, WHERE HE WAS STANDING OUTSIDE OF A CAR THAT WAS STRUCK BY ANOTHER VEHICLE AND ABSORBED THE KINETIC ENERGY FROM THE IMPACT CAUSING THE PATIENT TO BE THROWN 10 FEET AWAY. Not Medically Necessary

WILL FAX IN; This is a request for a CT scan for evaluation of coronary calcification.

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Yes, this is a request for CT Angiography of the abdominal arteries.

smoker, acute bronchitis; Limited or Follow up other than Sinus CT; Chest

low density lesion in upper pole left kidney, incompletely characterized 8 mm low density lesion in the posterior segment of the right hepatic lobe incompletely characterized without contract; Requestor has decided to proceed with the unlisted code.

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; It is not known if this is an individual who has known breast cancer in the contralateral (other) breast.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

PT HAS ENLARGE SWOLLEN RED BREAST FOR 3-4 WEEKS, ULTRASOUND WAS NEGATIVE; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

This is a request for a Bone Density Study.; This patient has not had a bone mineral density study within the past 23 months.; This is a bone density study in a patient with clinical risk of osteoporosis or osteopenia.

This is a request for a Bone Density Study.; Unknown if this patient had a bone mineral density study within the past 23 months.; This is a bone density study in a patient with clinical risk of osteoporosis or osteopenia.; The patient has not been on steroid therapy for more than 3 months.; This is not a repeat study due to a change in treatment or a change in symptoms of osteoporosis.

&it; Enter answer here - or Type in Unknown If No Info Given. &gt;; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.

&lt; Enter answer here - or Type in Unknown If No Info Given. &gt;; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.
General/Family Practice Disapproval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study Radiology Services Denied Not Medically Necessary
<&lt;Enter answer here - or Type In Unknown If No Info Given. &gt;: The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

shortness of breath, sleep apnea, family history of CAD, COPD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
Symptoms include chest pain and dyspnea. The pain is located in the left anterior chest and left lateral chest. The pain radiates to the left arm. The patient describes the pain as aching and pressure-like. Onset was sudden 3 week(s) ago. The symptoms occur; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

The patient is here for a follow up on her blood pressure medications. She has had CP and SOB along with dizziness. EKG was abnormal. patient not able to perform exercise stress test due to shortness of breath and dizziness.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.

The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; This is NOT a Medicare member.; The patient is 65 or older.; The patient does NOT have cardiac history with known myocardial infarction and/or cardiac intervention such as cardiac surgery/angioplasty(PCI); This is NOT for a preoperative evaluation of a non cardiac surgery involving general anesthesia; It is unknown if it has been greater than 5 years since cardiac testing has been performed. The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for evaluation of the heart prior to non cardiac surgery.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.
Patient: Myocardial perfusion imaging, tomographic (SPECT); single study

- Radiology Services Denied
- Not Medically Necessary

- The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.
- The patient has not had previous cardiac surgery or angioplasty.
- The patient has not had a recent non-nuclear stress test.
- The patient has not had a stress echocardiogram within the past eight weeks.
- This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).
- The patient does not have a physical limitation to exercise.
- This is NOT a Medicare member.
- The patient's age is between 45 and 64 years old.

Patient: Brain PET (POSITRON EMISSION TOMOGRAPHY)

- Radiology Services Denied
- Not Medically Necessary

- Memory loss of unknown cause;
- This is a request for a Metabolic Brain PET scan;
- This study is being ordered for dementia.

- Probable old infarction adjacent to the anterior horn of the left lateral ventricle. Follow-up MRI in 4-6 months is recommended.
- Mucous retention cyst of the right maxillary sinus;
- This is a request for a Metabolic Brain PET scan;
- This study is not being ordered for refractory seizures, dementia, Alzheimer's disease or Tumor/Cancer.

Patient: PET IMAGING FOR CT ATTENUATION WHOLE BODY

- Radiology Services Denied
- Not Medically Necessary

- This a request for a Tumor Imaging PET Scan;
- This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA;
- This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor;
- This is NOT a Medicare member.

Patient: Echocardiogram

- Radiology Services Denied
- Not Medically Necessary

- This a request for an echocardiogram;
- This is a request for a Transthoracic Echocardiogram;
- This study is being ordered for another reason;
- The reason for ordering this study is unknown.

Pt has PARKINSON'S DISEASE, memory loss, tremors; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

None; There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This request is for a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Initial staging; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
This is a request for a Thorax (Chest) CT.; Abnormal imaging test describes the reason for this request.; Yes this is a request for a Diagnostic CT

This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?

This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not known if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed within the past 10 months.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Cervical Cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.; This is NOT a Medicare member.

RESTAGING SCANS; There are 4 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD(s) specialty is Hematologist/Oncologist

Hematologist/Oncologist

Approval 70450 CT BRAIN, HEAD

Pt has known history of breast cancer, f/u scans; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

There are 2 exams being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is Hematologist/Oncologist.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

There are 3 exams being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is Hematologist/Oncologist.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT; Known or suspected inflammatory disease best describes the reason that I have requested this test.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT; The patient has a known brain tumor; Known or suspected tumor best describes the reason that I have requested this test; There are NO documented neurologic findings suggesting a primary brain tumor.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT; The patient has a known tumor outside the brain; Known or suspected tumor best describes the reason that I have requested this test.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT; The patient has a known tumor.; Known or suspected tumor best describes the reason that I have requested this test.; There are NO documented neurologic findings suggesting a primary brain tumor.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; The patient has a known tumor outside the brain.; This study is being requested for known or suspected brain tumor, mass or cancer.  
"This request is for orbit, sella, int. auditory canal, temporal bone, mastoid, CT.239.8";  
"There is not suspicion of bone infection, osteomyelitis, or inflammatory disease.ostct";  
"There is not a history of serious head or skull, trauma or injury.ostct";  
"There is suspicion of neoplasm, or metastasis.ostct"; Yes this is a request for a Diagnostic CT.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; The patient has a suspected brain tumor.; Known or suspected tumor best describes the reason that I have requested this test.; There are documented neurologic findings suggesting a primary brain tumor.; This is NOT a Medicare member.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; The patient has a suspected brain tumor.; Known or suspected tumor best describes the reason that I have requested this test.; There are NO documented neurologic findings suggesting a primary brain tumor.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.  
"This request is for orbit, sella, int. auditory canal, temporal bone, mastoid, CT.239.8";  
"There is not suspicion of bone infection, osteomyelitis, or inflammatory disease.ostct";  
"There is suspicion of neoplasm, or metastasis.ostct"; Yes this is a request for a Diagnostic CT.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; The patient has a suspected brain tumor.; Known or suspected tumor best describes the reason that I have requested this test.; There are documented neurologic findings suggesting a primary brain tumor.

Hematologist/Oncologist Approval 70450 CT BRAIN, HEAD

This is a request for a brain/head CT.; The patient has a suspected brain tumor.; Known or suspected tumor best describes the reason that I have requested this test.; There are documented neurologic findings suggesting a primary brain tumor.

Hematologist/Oncologist Approval 70480 CT ORBIT,EYE SOCKET, SELLA TURCICA, POSTERIOR FOSSA, EAR ETC.

“This request is for orbit, sella, int. auditory canal, temporal bone, mastoid, CT.239.8”;  
“There is not a history of serious head or skull, trauma or injury.ostct”;  
“There is not a suspicion of bone infection, osteomyelitis, or inflammatory disease.ostct”; Yes this is a request for a Diagnostic CT.

Hematologist/Oncologist Approval 70486 CT SINUS, FACE, JAW, MANDIBLE, MAXILLOFACIAL NO CONTRAST

“This request is for face, jaw, mandible CT.239.8”;  
“There is not a history of serious facial bone or skull, trauma or injury.ostct”; Yes this is a request for a Diagnostic CT.

Hematologist/Oncologist Approval 70486 CT SINUS, FACE, JAW, MANDIBLE, MAXILLOFACIAL NO CONTRAST

“This request is for face, jaw, mandible CT.239.8”;  
“There is not a history of serious facial bone or skull, trauma or injury.ostct”;  
“There is not a suspicion of neoplasm, tumor or metastasis.ostct”;  
“There is not a suspicion of bone infection, osteomyelitis,ostct” This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT.

Hematologist/Oncologist Approval 70486 CT SINUS, FACE, JAW, MANDIBLE, MAXILLOFACIAL NO CONTRAST

“This request is for face, jaw, mandible CT.239.8”;  
“There is not a history of serious facial bone or skull, trauma or injury.ostct”;  
“There is not a suspicion of neoplasm, tumor or metastasis.ostct”; Yes this is a request for a Diagnostic CT.

Hematologist/Oncologist Approval 70486 CT SINUS, FACE, JAW, MANDIBLE, MAXILLOFACIAL NO CONTRAST

pt has CLL and an CXR on 10/24 revealed possible pneumonia. Pt c/o fever, chills, congestion, cough, sob; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist

This is a request for a Sinus CT.; This study is being ordered for a known or suspected tumor.; Yes this is a request for a Diagnostic CT

Positive for fatigue, some weight loss but positive for occasional dizziness off and on; Dizziness request MRI brain with and without contrast to rule out metastatic disease.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.

Positive for fatigue, some weight loss but positive for occasional dizziness off and on; Dizziness request MRI brain with and without contrast to rule out metastatic disease.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.

PT with history of MS and chronic Leukocytosis, joint pain, headache, dizziness, weakness, and leg swelling; peripheral neuropathy and headaches.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

PT under active treatment for lung cancer, checking for of diseases reposes to treatment.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

TESTAGING LUNG CANCER; There are 4 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist

TESTAGING METASTATIC NSCLC; There are 4 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist

Testicular cancer and checking for METS-patient has been known to have dizziness and headaches; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist

There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient has known cancer.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.
Hematologist/Oncologist Approval

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).

Hematologist/Oncologist Approval

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.

Hematologist/Oncologist Approval

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has been a change in seizure pattern or a new seizure.

Hematologist/Oncologist Approval

70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has NOT been a change in seizure pattern or a new seizure.; This is a new patient.

Hematologist/Oncologist Approval

71250 CT CHEST, THORAX

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

Hematologist/Oncologist Approval

71250 CT CHEST, THORAX

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist 493

Hematologist/Oncologist Approval 71250 CT CHEST, THORAX

There is radiologic evidence of non‐resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT 1

Hematologist/Oncologist Approval 71250 CT CHEST, THORAX

Tonsillectomy of the left neck.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. 1

Hematologist/Oncologist Approval 71250 CT CHEST, THORAX

Unexplained weight loss describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT 1

Hematologist/Oncologist Approval 71250 CT CHEST, THORAX

Unknown; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. 1

Hematologist/Oncologist Approval 72150 CT CHEST, THORAX

275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONT RAST

ASSESS PE; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography. 1
There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist

This study is being ordered for a known tumor.; The ordering physician is an oncologist, surgeon, pulmonologist, or cardiologist.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; This is a request for a chest MRI.

There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is suspicion of lumbar spine neoplasm, tumor or metastasis.; Yes this is a request for a Diagnostic CT.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain.; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient is presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; Known Tumor with or without metastasis
There are 2 exams being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist

There are 3 exams being ordered; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; There is no evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis

This is a request for cervical spine MRI; There is evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis

This study is being ordered for a metastatic disease.; There are 3 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Pt suffers with mass on the T Spine with a history Ewing sarcoma; Lumbar S weakness in legs with a neuro defect.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.;"; The study is being ordered due to known tumor with or without metastasis.

There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist
There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist.

This is a request for a thoracic spine MRI.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.

This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The study is being ordered due to known tumor with or without metastasis.

The study requested is a Lumbar Spine MRI.; There is no evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.

The study requested is a Lumbar Spine MRI.; Low back pain, uncomplicated, looking for compression fractures, on long term steroid use.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Known or suspected tumor with or without metastasis.

Hematologist/Oncologist Approval
73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT
There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist.

Hematologist/Oncologist Approval
73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT
This is a request for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

Hematologist/Oncologist Approval
73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

Hematologist/Oncologist Approval
74150 CT ABDOMEN WITHOUT CONTRAST
; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Hematologist/Oncologist Approval
74150 CT ABDOMEN WITHOUT CONTRAST
This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &Rx0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &Rx0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT.

Hematologist/Oncologist Approval
74150 CT ABDOMEN WITHOUT CONTRAST
DIFFUSE LARGE B CELL LYMPHOMA WITH SLIGHT ENLARGEMENT OF MESENTERIC LYMPH NODE AND ADDITIONAL LYMPH NODES ALSO IDENTIFIED IF EHT MESENTER.
PT HAS COMPLETED 6 CYCLES OF EPOCH-R.; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.; Yes this is a request for a Diagnostic CT.

There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist.

There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist.
This is a request for an abdomen-pelvis CT combination; A urinalysis has been completed; This study is being requested for abdominal and/or pelvic pain; The results of the urinalysis were normal; The study is being ordered for chronic pain; This is the first visit for this complaint; It is unknown if the patient had an Amylase or Lipase lab test; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; A urinalysis has not been completed; This study is being requested for abdominal and/or pelvic pain; It is not known if the pain is acute or chronic; This is the first visit for this complaint; It is unknown if the patient had an Amylase or Lipase lab test; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; It is not known if a urinalysis has been completed; This study is being requested for abdominal and/or pelvic pain; It is not known if the pain is acute or chronic; This is the first visit for this complaint; It is unknown if the patient had an Amylase or Lipase lab test; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; The hematuria is due to tumor or mass; This study is not being requested for abdominal and/or pelvic pain; The study is requested for hematuria; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; The reason for the study is known tumor; This study is being ordered for staging; This study is not being requested for abdominal and/or pelvic pain; The study is not requested for hematuria; The patient is female; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; The reason for the study is known tumor; This study is being ordered for follow-up; The patient is presenting new symptoms; This study is not being requested for abdominal and/or pelvic pain; The study is not requested for hematuria; The patient is female; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; The reason for the study is none of the listed reasons; It is not know if this study is being requested for abdominal and/or pelvic pain; The study is not requested for hematuria; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination; The study is not being requested for abdominal and/or pelvic pain; The study is not requested for hematuria; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT 1

This is a request for an abdomen-pelvis CT combination.; The reason for the study is pre-op or post op evaluation.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT 2

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; It is not known if the patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT 1

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; The study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT 2

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT 1

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; The study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT 2

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other; Yes this is a request for a Diagnostic CT 1

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT 1

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; indeterminate CT abd/pel done on 11/13/2016; physician is requesting follow up; Yes this is a request for a Diagnostic CT 1
This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; Yes this is a request for a Diagnostic CT

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.;

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.; The patient has completed chemotherapy. This scan is being done prior to Stem Cell Transplant.

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.; Restaging post chemotherapy, prior to Stem Cell Transplant.

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.;

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.)."; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.; TOXIC CHEMO
This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has not been initiated or completed.; Chemotherapy is planned.; Breast Cancer, right axilla node palpated. ; premenopausal; invasive ductal carcinoma, ER/PR positive, HER-2 pending; 5 cm right breast cancer; will start neoadjuvant chemotherapy with ddAC x 4, Taxol weekly x 12, surgery, followed by (+/-) radiation.

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has not been initiated or completed.; Chemotherapy is planned.; Cisplatin, cytoxin, Adriamycin regimen. Need for Muga scan to evaluate prior to chemotherapy initiation of cardiotoxic drugs.

This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has not been initiated or completed.; Chemotherapy is planned.; Patient will start chemotherapy ASAP with the CHOP-R regimen (rituximab, cyclophosphamide, doxorubicin, vincristine and mesna). These drugs may cause cardiotoxicity and a muga scan is needed to evaluate cardiac function.

This is a request for a MUGA scan.; This study is being ordered for Suspected Cardiomyopathy/ Myocarditis.; The patient has not recently been diagnosed with and/or treated for congestive heart failure.; The patient is presenting new cardiac signs or symptoms.; The patient has not had a recent MI.; There are not documented clinical findings consistent with a valve disease.; There are documented clinical findings consistent with hypertension.; EXTREME SWELLING AND SOB
This is a request for a MUGA scan.; This study is being ordered for Suspected Cardiomyopathy/ Myocarditis.; The patient has not recently been diagnosed with and/or treated for congestive heart failure.; The patient is presenting new cardiac signs or symptoms.; The patient has not had a recent MI.; There are not documented clinical findings consistent with a valve disease.; There are no documented clinical findings consistent with hypertension.; There are no documented clinical findings consistent with a cardiac congenital abnormality.; Dyspnea on exertion, irregular heart beat, fatigue and hot flashes.; Cutaneous follicle center lymphoma, lymph nodes of head, face, and neck; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

MRI: SPINE/PELVIS DONE 08.17.17:
IN THE CERVICAL SPINE, NO NEW COLLAPSE COMPRESSION IS SEEN. NO DOMINANT BONY FOCAL LESION IS SEEN.
STABLE MULTILEVEL DEGENERATIVE CHANGES ARE SEEN WITH MILD GRADE 1 ANTEROLISTHESIS AT C4-CS AND CS-CS LEVELS AND MILD RETR.

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Hematologist/Oncologist.

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease? 1

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; There is no symptom of locking, Instability, Swelling, Redness, Limited range of motion or pain.; No, patient has not completed and failed a course of conservative treatment. 1

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This study is not for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; Yes, there is a is there an abdominal and pelvic or retroperitoneal or abdominal mass that has been confirmed.; Yes this is a request for a Diagnostic CT 1

Fever, eosinophilia and major skin eruptions have all healed since hospitalization in Feb 2017. She has been on a very slow taper of prednisone to a
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Neurological deficits; Dizziness, Osteoarthritis of cervical spine, unspecified spinal osteoarthritis complication status;&amp;x0D; Dizziness, Extremity weakness, Gait disturbance, Headache, Numbness in extremity, Tremors;&amp;x0D; Anxiety, Depression.She is tender over medial lateral epicondyl; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.;

This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; Yes, the patient is experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.
This study is being ordered for a neurological disorder.

It is not known if there has been any treatment or conservative therapy.

Describe primary symptoms here - or Type In Unknown If No Info Given.

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

Date of initial onset here - or Type In Unknown If No Info Given.

There has been treatment or conservative therapy.

Physical Therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Unknown - greater than 10 years ago.

Pain throughout the spine - particularly in the thoracic and lumbar areas; Patient has been using pharmacotherapy for many years. Currently, he is on a high dose of Methadone to help with the pain. Historically, other medications did not help as well; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Pre-vertebroplasty or kyphoplasty, lumbar spine; multiple myeloma, acute bilateral thoracic back pain; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

The patient has neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

This is a request for a thoracic spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of asymmetric reflexes.

Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness in buttocks area hurts when twisting; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &gt;; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
This study is being ordered for a neurological disorder; 2 years ago; There has been treatment or conservative therapy; chronic pain; injections, chiro, physical therapy, medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; Enter date of initial onset here - or Type In Unknown If No Info Given; There has been treatment or conservative therapy; Describe primary symptoms here - or Type In Unknown If No Info Given; Physical Therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 2/3/15; There has been treatment or conservative therapy; low back pain, abd pain, obese; medication PT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for trauma or injury; 5/2/17; There has been treatment or conservative therapy; chronic and persistant back and neck pain; pt; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is reflex abnormality; The patient does not have new signs or symptoms of bladder or bowel dysfunction; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture; SLR test positive left leg with pain radiating to left leg, Pain with full back extension and flexion, limited range of motion of spine, lumbar paraspinal tenderness, cross leg test positive left leg, pt had physical therapy with no relief

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has not seen the doctor more then once for these symptoms.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 6/29/2015; There has been treatment or conservative therapy; back pain neck pain numbness weakness; physical therapy. medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
INITIAL STAGING FOR MULTIPLE MYELOMA DIAGNOSED 11/2017; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology;

Low back pain radiating symptoms, zero benefit with chiropractor; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above;

Patient fell back in march in a hotel bathroom against the tub had pain after that has continued with conservative therapy and is getting worst.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/2017; There has been treatment or conservative therapy.; Patient is experiencing back pain, walking, pain with weight baring on the left hip, weakness left lower extremity, radiculopathy in the left leg.; PT and IBprohen, tramadole; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology;

Patient has radiculitis with mild acute irritation in the right sacral and upper lumbar paraspinals and the left upper and lower lumbar paraspinals.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Patient has radiculitis with mild acute irritation in the right sacral and upper lumbar paraspinals and the left upper and lower lumbar paraspinals.
Patient will be needing to go to a pain management specialist for evaluation and treatment; he will need a recent MRI to assess any worsening of his condition.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown - greater than 10 years ago; There has been treatment or conservative therapy.; Pain throughout the spine - particularly in the thoracic and lumbar areas.; Patient has been using pharmacotherapy for many years. Currently, he is on a high dose of Methadone to help with the pain. Historically, other medications did not help as well.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient with history of lumbar surgery. Symptoms: loss of sensation, weakness, decreased range of motion, limp, increasing low back pain, conservative treatment not helping.; Recent MRI of hip shows right-sided disc protrusion L4 - L5; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient with history of lumbar surgery. Symptoms: loss of sensation, weakness, decreased range of motion, limp, increasing low back pain, conservative treatment not helping.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pre-vertebroplasty or kyphoplasty, lumbar spine; multiple myeloma, acute bilateral thoracic back pain; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

See attached clinicals; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Lumbago; radiates to the left and right buttocks. pain worsens with back extension, twisting movements, and hip extension. The patient has been doing physical therapy and also taking ibuprofen which has made it worse.&amp;#x00A0; She also received a steroid injection; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

see attached office notes and reason for exam provided on previous screen; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; rt lower extremity power 4/5; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Neurological abnormalities; This procedure is being requested for Trauma or recent injury

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient was treated with an Epidural.

unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Lower extremity, weakness, and radiculopathy; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.;

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.;

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; The patient has a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion. 19

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; There is no documented findings of crepitus.; There are no documented findings of swelling.; The ordering physician is not an orthopedist.; The patient is experiencing joint locking or instability.; The patient does not have a documented limited range of motion on physical examination.; It is not known if there is documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to known/suspected joint infection.; The plain films were not normal.

The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has been treated with medication.; The patient received joint injection(s).

The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient received joint injection(s).

This is a request for an upper extremity joint MRI.; The patient does have a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.

This is a request for an upper extremity joint MRI.; The patient does have a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; There has has been documented weakness or partial loss of feeling in the upper extremity.; There has has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.

The patient has been treated with and failed a course of four weeks of supervised physical therapy.
This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT

This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; The patient has been treated with and failed a course of supervised physical therapy.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT

This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT

This is a request for an ankle CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; The patient had an abnormal plain film study of the ankle other than arthritis.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT

This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.; This is a request for a Leg CT.; Yes this is a request for a Diagnostic CT
Yes, this is a request for CT Angiography of the lower extremity.

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 07/2017; There has been treatment or conservative therapy.; pain and swelling; Injections etc; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days

Patient had a plain film xray of the right knee which showed joint effusion and degenerative changes. An MRI is requested to further evaluate and to determine the best course of treatment for this gentleman.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Patient began having right knee pain in March of 2017. He started oral steroids and over the counter anti-inflammatory medication as well as increasing his physical activity as tolerated. He was reevaluated in May of 2017 and October 2017. He has indic; The patient received oral analgesics.

RESTAGING; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.

This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.

This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.
This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a foot MRI.; This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Locking

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicous Mass or Tumor; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT 1

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT 2

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT 4

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT 2

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT 1

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has been completed.; The results of the contrast/barium x-ray were normal.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT 1

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT 1
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has been completed.; The results of the contrast/barium x-ray were normal.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed a Kidney/Renal cyst(s); Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has been completed.; The results of the contrast/barium x-ray were normal.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; The patient had an amylase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had a lipase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT

Urine showed moderate amount of blood. Pain in supra pubic area with increased frequency of urination. Pain and burning on urination. Left sided CVA pain. Off and on vomiting.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

will fax clinical if need; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

&It; Enter answer here - or Type In Unknown If No Info Given. &gt; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6 weeks; There has been treatment or conservative therapy.; abdominal pain, pelvic mass, Vascular abnormality; Unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
There is a 13-mm area of decreased density in a subcapsular location in the left lobe of the liver, likely representing a hemangioma. Consider followup CT of the abdomen or followup MRI of the liver to confirm the expected diagnosis as other hepatic lesion. This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis. The patient has previous abnormal imaging including a CT, MRI or Ultrasound. A liver abnormality was found on a previous CT, MRI or Ultrasound. It is unknown if there is suspicion of metastasis. This request is for an Abdomen MRI. This study is being ordered for Known Tumor. The patient is not presenting new symptoms. The patient has had 3 or fewer follow-up abdomen MRIs. This study is being ordered for follow-up. The patient is not undergoing active treatment for cancer. "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon.". PATIENT HAD CT THAT SHOWS A NODULE AND CYST, RADIOLOGIST RECOMMENDED A MRI. This request is for an Abdomen MRI. This study is being ordered for Known Tumor. The patient is presenting new symptoms. This study is being ordered for follow-up. The patient is not undergoing active treatment for cancer. "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon.". &lt;Enter answer here or Type In Unknown If No Info Given.&gt; 1

This request is for an Abdomen MRI. This study is being ordered for organ enlargement. There is an ultrasound or plain film evidence of an abdominal organ enlargement. Patient has a history of sarcoidosis, and had a CT scan of the abdomen. It showed her to have and enlarges spleen. 1

This request is for an Abdomen MRI. This study is being ordered for organ enlargement. There is an ultrasound or plain film evidence of an abdominal organ enlargement. 1

This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis. "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.". "The patient has had an abdominal ultrasound, CT, or MR study.". Enter answer here or Type In Unknown if No Patient came in concerning generalized abdominal pain. This is located primarily in the right upper quadrant, right lower quadrant, and epigastric region. There is some radiation to the periumbilical region. 4

This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis. "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.". "The patient has had an abdominal ultrasound, CT, or MR study.". PATIENT HAD CT DONE, RADIOLOGIST RECOMMENDED A MRI TO CHARACTERIZE THE LIVER MASS. 1

This request is for an Abdomen MRI. This study is being ordered for suspicious mass or suspected tumor/metastasis. "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.". "The patient has had an abdominal ultrasound, CT, or MR study.". Pt has a gallbladder mass. 1
| Internal Medicine Approval | 74181 MRI ABDOMEN | This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has not had an abdominal ultrasound, CT, or MR study.;"; Patient had a recent chest CTA to rule out pulmonary embolism which revealed a pancreatic lesion.  |
| Internal Medicine Approval | 74181 MRI ABDOMEN | This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has an abdominal ultrasound, CT, or MR study.;"; HER PET/CT SCAND ON 12/18/17 SHOWED THE KNOWN LT BREAST CA AND LT AXILLARY LYMPHADENOPATHY BUT ALSO AN INDETERMINATE RT ADRNAL NODULE. MRI OF ABD RECOMMENDED BY RADIOLOGIST.  |
| Internal Medicine Approval | 74181 MRI ABDOMEN | This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Mild diffuse fatty infiltration of the liver.&lt;sup&gt;2&lt;/sup&gt; 2. A 2.1 cm very vague rounded enhancing lesion in the lateral&lt;sup&gt;2&lt;/sup;&gt; segment, left lobe of liver and 1.6 cm similar appearing lesion&lt;sup&gt;2&lt;/sup;&gt; identified in the posterior segment, right lobe of liver (segment 7).&lt;sup&gt;2&lt;/sup;&gt; These les |
| Internal Medicine Approval | 74181 MRI ABDOMEN | This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Patient had Abdominal US done and needs follow up MRI for hepatic steatosis. |
| Internal Medicine Approval | 74185 MRA, MRI ANGIOGRAPHY ABDOMEN WITH/WITHOUT CONTRAST | This is a request for a MR Angiogram of the abdomen. |
| Internal Medicine Approval | 75557 Cardiac MRI Morph & structure w/o contrast | This is a request for a heart or cardiac MRI. Patients blood work shows moderate to high risk for plaque in arteries; This is a request for a CT scan for evaluation of coronary calcification. |
| Internal Medicine Approval | 75571 Coronary Artery Calcium Score, EBCT | This is a request for a CT scan for evaluation of coronary calcification. |
| Internal Medicine Approval | 75574 CT Angiography Heart coronary arteries, CCTA | This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterruptible cardiac imaging.; Patient had an abnormal echo with EF 25-30% and wall motion abnormalities: mid to distal anteroseptal, inferior, inferolateral wall are akinetic, apical wall is dyskinetic. Compensatory hyperkinesis of the basal walls.; No, this patient does not have equivocal or uninterpretable stress test (exercise, perfusion, or stress echo). |
| Internal Medicine Approval | 75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING | Yes, this is a request for CT Angiography of the abdominal arteries. This study is being ordered for a known or suspected tumor.; "The ordering physician is an oncologist, ophthalmologist, otolaryngologist (ENT specialist), or maxillo-facial surgeon."; This is a request for a limited Sinus CT.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children). |
| Internal Medicine Approval | 76380 CT FOLLOW-UP OR LIMITED STUDY ANY AREA 77058 MRI breast,without and/or with contrast material(s);unilateral | This is a request for Breast MRI.; This study is being ordered for a known breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient’s further management. |
| Internal Medicine Approval | 77058 MRI breast,without and/or with contrast material(s);unilateral 77058 MRI breast,without and/or with contrast material(s);unilateral 77058 MRI breast,without and/or with contrast material(s);unilateral 77058 MRI breast,without and/or with contrast material(s);unilateral | This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; No, there are no anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk. This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children). This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; Yes, this is an individual who has known breast cancer in the contralateral (other) breast. This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; Yes, this is an individual who has known breast cancer in the contralateral (other) breast. This is a request for Breast MRI.; This study is being ordered for suspected implant rupture.; Yes, this study is being ordered to evaluate a suspected silicone implant rupture. |
This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; Yes, there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

INITIAL STAGING FOR MULTIPLE MYELOMA; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

RESTAGING AFTER CHEMO; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

RESTAGING; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Restaging; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Mrs. Buerer is 44yo G3P3 s/p TAH/BSO lady (not working) with significant history of HTN, HLD, fibromyalgia and artificial menopause, followed by Jarrod Jerry DPN, referred for evaluation of chest discomfort and hypertension. She reports progressive symptom; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Patient was unable to complete stress echo due to severe anxiety.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

pt had TIA, LVH.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

Smoker for 30 years; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

78451 Myocardial perfusion imaging, tomographic (SPECT); single study

The patient is diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.
The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have diabetes.; This is NOT a Medicare member.; The patient is 65 or older.

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous myocardial infarction.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.
The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

This 59 year old male presents for fatigue. 

History of Present Illness:
1. Fatigue
He has increasing fatigue and DOE. He is not having any chest pain. He is compliant with his BIPAP. He falls asleep frequently during the day. He has increasing fatigue and DOE. He is not having any chest pain. He is compliant with his BIPAP. He falls asleep frequently during the day.
2. Abnormal ec; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient has a physical limitation to exercise.; The patient is male.; This is NOT a Medicare member.; The patient's age is 65 or older.

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient has diabetes.; This is NOT a Medicare member.; The patient is 65 or older.
This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has had a recent abnormal EKG consistent with CAD.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient is female.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has a recent abnormal EKG consistent with CAD.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

Staging prior to starting chemotherapy; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Staging prior to starting chemotherapy; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is not a change in cardiac signs or symptoms (shortness of breath, etc.).".; The patient will be undergoing more chemotherapy.; The last MUGA scan was performed more than 3 months ago.; TOXIC CHEMO POSSIBLY CHANGE CHEMO

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Breast Cancer.; This is for evaluation of axillary lymph nodes.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; 1 PET Scans has already been performed on this patient for this cancer.; This is NOT a Medicare member.
This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was NOT identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being requested for Lung Cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made.); This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made.); This study is being requested for Lymphoma or Myeloma.; 1 PET Scans has already been performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Thyroid Cancer.; The patient did NOT have a thyroidectomy and radiiodine ablation.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.; This is NOT a Medicare member.
This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; The patient does NOT have Thyroid or Brain cancer.; 1 PET Scans has already been performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 1 PET Scans has already been performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.
This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has an enlarged heart;

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.

This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.

This request is for a Low Dose CT for Lung Cancer Screening.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening.; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.
This is a request for MRCP; There is a reason why the patient cannot have an ERCP; The patient has not undergone an unsuccessful ERCP; The patient does not have an altered biliary tract anatomy that precludes ERCP; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.

This is a request for MRCP; There is a reason why the patient cannot have an ERCP; The patient has not undergone an unsuccessful ERCP; The patient has an altered biliary tract anatomy that precludes ERCP; This is a request for a brain/head CT; The study is NOT being requested for evaluation of a headache; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

Initial staging for Multiple Myeloma; This study is being ordered for metastatic disease.

70540 MRI ORBIT/FACE/NECK W/O DYE
Radiology Services Denied Not Medically Necessary
PATIENT HAS CHRONIC PAIN IN HER NECK AND SHOULDERS WITH THE PAIN TRAVELING DOWN THE BACK. PATIENT REPORTS THAT THE PAIN HAS GOTTEN PROGRESSIVELY WORSE IN THE LAST 3 MONTHS PREVENTING HER FROM PERFORMING HER DAILY ACTIVITIES; This study is being ordered for a neurological disorder.

70540 MRI ORBIT/FACE/NECK W/O DYE
Radiology Services Denied Not Medically Necessary
This is a new problem. Episode onset: for at least the past month. The problem occurs constantly. The problem has been gradually worsening. The pain is present in the occipital region and midline (posterior neck). The quality of the pain is described as a; "This is a request for orbit, face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection, cancer, mass, tumor, pre or post-operative evaluation

70544 Mr angiography head w/o dye
Radiology Services Denied Not Medically Necessary
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 1/2017; There has been treatment or conservative therapy.; headaches; physical; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
PATIENT IS UNABLE TO WORK OR DRIVE DUE TO CURRENT SYMPTOMS, INCLUDING MEMORY LOSS, VISUAL DISTURBANCE, AND EXTREME ANXIETY AND DEPRESSION DUE TO CURRENT MEDICAL CONDITION; This study is being ordered for a neurological disorder.; HAS BEEN GOING ON FOR 3 MONTHS, ABOUT JUNE 15; There has been treatment or conservative therapy.; MEMORY LOSS, FEELING IN FOG, VISUAL DISTURBANCE, COGNITIVE IMPAIRMENT, ANTIBIOTICS, WAS SENT TO ENT TO RULE OUT SINUS DISEASE. WAS PUT OFF WORK FOR REST.; One of the studies being ordered is NOT A Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Recurrent headaches happening daily with fine tremor in bilateral hands needing evaluation of brain; This study is being ordered for a neurological disorder.; Unknown for date of onset but initial visit for tremor started 9/12/2017; There has been treatment or conservative therapy.; daily headache with fine tremor in bilateral hands; Corgard; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient has fatigue or malaise; It is unknown why this study is being ordered.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing vertigo.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1/15/17; There has been treatment or conservative therapy.; headaches; physical; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does not have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. c/o chronic headaches - daily /severe/ present greater than 6 mos.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does not have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.}

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does not have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. c/o chronic headaches - daily /severe/ present greater than 6 mos.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does not have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. c/o chronic headaches - daily /severe/ present greater than 6 mos.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
Internal Medicine Disapproval

**Explanation:**

- **Internal Medicine Disapproval:**
  - 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST: Radiology Services Denied
  - Not Medically Necessary

- **Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology:**
  - This study is being ordered for something other than: known trauma or injury, metastatic disease, neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.
  - Date of initial onset:
    - 7/10/17
    - 3/15/17
    - 6/20/17

- **Reasons for Discontinuation:**
  - Pain
    - INFEDS, NORCO, MOVIC
  - Patient has severe pain in neck for over a year, lumbar pain is a 7 out of a 10. Has had no injury or trauma.
    - Had anti-inflammatory meds, muscle relaxers.
  - The patient does have new or changing neurologic signs or symptoms.
    - Neurological deficits
    - Patient has weakness.
    - PATIENT IS HAVING NUMBNESS AND TINGLING IN R. ARM, WEAKNESS IN GRIP.
    - There is not x-ray evidence of a recent cervical spine fracture.

- **Notes:**
  - The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

Radiology Services Denied

Not Medically Necessary

This study is being ordered for a neurological disorder.; 07/25/2017; There has been treatment or conservative therapy.; Difficulty initiating sleep, Dizziness, Extremity weakness, Gait disturbance, Headache, Numbness in extremity, Paresthesia, Shaking, Tremors.&amp;#x00A0;Anxiety, Depression, Difficulty concentrating, Feeling down, depressed or hopeless.&amp;#x00A0;Activity limitation., Arthrr; Medications: 09/21/2017 GABAPENTIN, 08/22/2017 METAXALONE, 08/22/2017 TRAMADOL HCL, 05/23/2017 CELECOXIB&amp;#x00A0;DAILY NSAID, TRAMADOL AT HOME FOR MORE SEVERE PAIN.

PATIENT TO INVESTIGATE LOW IMPACT FORMS OF REGULAR EXERCISE WHICH SHOULD NOT PARTICIPATE IN,; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if this patient had six weeks of Chiropractic care related to this episode.; Pt involved in MVA 04/30/17 and has had increased pain in his neck and low back with numbness in both legs, more so in left leg. Pt was seeing Dr. Raben for pain management, however, Dr. Raben passed away in May. Pt was referred to Optimal Pain and Wellne

Patient came in on 9/5/2017 with back pain and is still having back pain 09/29/2017; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has not seen the doctor more then once for these symptoms.

Patient reports old injury to back several years ago; has had increased pain of LE bilaterally. Has tried OTC meds as well as prescription meds with no improvement.; The study requested is a Lumbar Spine MRI.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has been treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.

Patient was initially evaluated in the emergency room on 11/15/2017. She was involved in a motor vehicle crash. Shortly after the accident, she developed neck pain and bilateral hip pain. She has been treated with muscle relaxers, steroid injection, oral; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; The patient has no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient was lifting weight 4 weeks ago and hurt his back and has been taking muscle relaxers and steroids and none of this is helping; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient has weakness, numbness tingling and loss of balance combined with falls, difficulty standing and walking; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Left leg weakness and pain radiating from his back to his knee and ankle; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Interventional Radiologists Approval 70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST

possibility of right M1 occlusion; This study is being ordered for a neurological disorder.; August 2017; There has been treatment or conservative therapy.; Weakness, dizziness, numbness; Cerebral Arteriogram, 4 Vessel; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology diagnosed with hht; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/19/2017; There has not been any treatment or conservative therapy.; STRONG FAM HX OF HHT, HEPATITIS, visible telangiectasia’s; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Interventional Radiologists Approval 70544 Mr angiography head w/o dye

Suspected CNS VZV Vasculitis with predominant involvement of Left MCA and ACA&nKB; H/O Left MCA strokes.; This study is being ordered for a neurological disorder.; 07/2017; There has been treatment or conservative therapy.; This is a follow up to surgery. Patient still has gait, speech and memory difficulties.; Cerebral intervention studies, cerebral arteriogram, medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Interventional Radiologists Approval 70544 Mr angiography head w/o dye

There is an immediate family history of aneurysm.; This is a request for a Brain MRA. diagnosed with hht; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/19/2017; There has not been any treatment or conservative therapy.; STRONG FAM HX OF HHT, HEPATITIS, visible telangiectasia’s; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Interventional Radiologists Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

Suspected CNS VZV Vasculitis with predominant involvement of Left MCA and ACA&nKB; H/O Left MCA strokes.; This study is being ordered for a neurological disorder.; 07/2017; There has been treatment or conservative therapy.; This is a follow up to surgery. Patient still has gait, speech and memory difficulties.; Cerebral intervention studies, cerebral arteriogram, medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Interventional Radiologists Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

diagnosed with hht; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/19/2017; There has not been any treatment or conservative therapy.; STRONG FAM HX OF HHT, HEPATITIS, visible telangiectasia’s; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Interventional Radiologists Approval 71250 CT CHEST, THORAX 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.
Interventional Radiologists  Approval  72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; &lt;Enter Additional Clinical Information&gt;; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam. The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

Interventional Radiologists  Approval  72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

Interventional Radiologists  Approval  72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

Interventional Radiologists  Approval  74150 CT ABDOMEN WITHOUT CONTRAST

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &lt;ND: Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &lt;ND: Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Interventional Radiologists  Disapproval  72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST

Radiology Services Denied Not Medically Necessary

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; &lt;Enter Additional Clinical Information&gt;; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

Nephrology  Approval  70544 Mr angiography head w/o dye

There is an immediate family history of aneurysm.; This is a request for a Brain MRA. There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

Nephrology  Approval  70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

There is an immediate family history of aneurysm.; This is a request for a Brain MRA. There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

Nephrology  Approval  71250 CT CHEST, THORAX

There is an immediate family history of aneurysm.; This is a request for a Brain MRA. There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

Nephrology  Approval  70544 Mr angiography head w/o dye

There is an immediate family history of aneurysm.; This is a request for a Brain MRA. There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

Nephrology  Approval  70544 Mr angiography head w/o dye

There is an immediate family history of aneurysm.; This is a request for a Brain MRA. There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.
Abnormal imaging test describes the reason for this request. This is a request for a Chest CT. Yes this is a request for a Diagnostic CT

Chest pain describes the reason for this request. An abnormal finding on physical examination led to the suspicion of infection. This is a request for a Chest CT. This study is being requested for known or suspected infection (pneumonia, abscess, empyema). This is a request for a Diagnostic CT

This is a request for a lumbar spine CT. The patient has a history of severe low back trauma or lumbar injury. Yes this is a request for a Diagnostic CT

This is a request for a cervical spine MRI. It is not known if there is laboratory evidence of osteomyelitis. Known or Suspected Multiple Sclerosis, Infection or abscess; There is not laboratory or x-ray evidence of meningitis; It is not known if there is laboratory or x-ray evidence of a paraspinal abscess; It is not known if there is laboratory or x-ray evidence of an infected disc, septic arthritis, or “discitis”.

This is a request for CT Angiography of the Abdomen and Pelvis.

Yes, this is a request for CT Angiography of the abdomen. Patient has Chronic Kidney Disease. This is a request for an abdomen-pelvis CT combination. A urinalysis has been completed. This study is being requested for abdominal and/or pelvic pain. The results of the urinalysis were abnormal. It is not known if the urinalysis was positive for bilirubin, ketones, nitrites, hematuria/blood, glucose or protein. The study is being ordered for chronic pain. This is the first visit for this complaint. It is unknown if the patient had an Amylase or Lipase lab test. Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination. A urinalysis has not been completed. This study is being requested for abdominal and/or pelvic pain. The patient did not have a amylase or lipase lab test. Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination. The reason for the study is known tumor. This study is not being requested for abdominal and/or pelvic pain. The study is not requested for hematuria. Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination. The reason for the study is organ enlargement. There is ultrasound or plain film evidence of an abdominal organ enlargement. It is not known if this study is being requested for abdominal and/or pelvic pain. The study is not requested for hematuria. Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination. The reason for the study is pre-op or post op evaluation. This study is not being requested for abdominal and/or pelvic pain. The study is not requested for hematuria. Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; It is not known if this study is being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT

MRI Abdomen on 10-8 while inpatient at hospital. Mass found on his R-Kidney that was causing hemorrhage of right kidney. This is follow-up for comparison to see if further treatment is required.; This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient is NOT presenting new signs or symptoms.; The patient did NOT have chemotherapy, radiation therapy or surgery in the last 3 months.; They had an Abdomen MRI in the last 10 months.

This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient is female.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/05/2017; There has not been any treatment or conservative therapy.; PT is having sharp pain in the thoracic area to the neck and extends into lower extremities . Tingling; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

&amp;lt;Enter answer here - or Type In Unknown If No Info Given. &amp;gt;; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT.
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT Pre kidney transplant evaluation; hx hypertension; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCt, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.

This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCt, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.

dizziness, memory loss, focal weakness, seizures, has shunt put in - make sure not off.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Found some masses on her skull, R/O any concerns they may have about them; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Patient was seen on 11/29/17 in our office. She complains of headaches. She has a history of shunt placement in 1993. Shunt was functioning well up until recently, after she claimed to have had a seizure. Associated symptoms include blurred vision, dizziness; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

The Pt has slurred speech, right facial droop, left arm weakness, dysphasia; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.

MRI shows 5 mm tonsillar herniation C/W Chiari. Studies not available for review/ only report. No CT/L/S; Medications & Rx OD; Flonase Allergy Relief 50 mcg/actuation nasal spray, suspension & Rx OD; Sprays 1 spray(s) every day by intranasal route. & Rx OD; 06/08/17 entered Tana Nowlin & Rx OD; lisinopril 10 mg tablet & Rx OD; Take 1 tablet(s) every day by oral route. & Rx OD; 06/08/1; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Follow up for frontal meningioma found on MRI brain 2/15/17 demonstrating 14 mm left paramidline anterior cranial fossa meningioma. 6 month follow up to evaluate for growth.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

For the headaches and numbness of the hand a decision was made to proceed with a consultation with Dr. Elizabeth Sullivan and an MRI of the Brain with and without contrast.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Here for 6 week f/u S/P SOD. Wound C/D/I flat Has some right trapezius weakness C/W accessory nerve dysfunction and incisional issues, neck stiffness. Otherwise neuro - intact. Refill meds and 6 weeks with MRI head neck cine flow. Has had issues with Lyme; This study is being ordered for a neurological disorder.; 12/27/16; There has been treatment or conservative therapy.; 48 year old female presents with long standing history of headaches SO and frontally exacerbated by Valsalva and getting worse. She pinpoints MVA in early 2000s as onset. She also c/o visual issues at tiems, tinnitus, dizziness at times as well as stutter; Here for 6 week f/u S/P SOD. Wound C/D/I flat Has some right trapezius weakness C/W accessory nerve dysfunction and incisional issues, neck stiffness. Otherwise neuro - intact. Refill meds and 6 weeks with MRI head neck cine flow. Has had issues with Lyme; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
I spoke with Ms. Ellis yesterday who states she continues to have the same pain she was having at her last post op visit back in October. She states her pain follows her teeth line and does not go up toward her eye as it did prior to the surgery but that;

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

MRI Brain w/wo contrast performed at Ouachita County on 9/27/2017; 13mm oval fluid intensity mass is noted in the pineal gland. There may be minimal enhancement of the cyst wall but there is no internal enhancement. No mass effect. No Obstructive hydroce; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Mrs. Harrison returns following an additional 3 1/2 months of continued chemotherapy for her metastatic breast cancer. History significant for left frontotemporal dural-based metastasis on 7/20/15, followed by whole brain radiation in 2016. Ms. Harrison's; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

Ms. Johnson's imaging demonstrates cerebellar tonsillar ectopia with symptoms consistent with either cervical radiculopathy or intermittent CSF flow obstruction. Symptoms include blurred vision, dizziness, eye pain, loss of balance, nausea, neck pain, num; This study is being ordered for a neurological disorder.; September 2017; There has not been any treatment or conservative therapy.; Symptoms include blurred vision, dizziness, eye pain, loss of balance, nausea, neck pain, numbness (right forearm, 4th and 5th fingers), tingling, visual change and vomiting; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

PATIENT IS HAVING A 2YEAR FOLLOW UP FOR PINEAL CYST; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The headache is not described as a "thunderclap" or the worst headache of the patient’s life.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is a new and sudden onset of headache (less than 1 week) not improved by pain medications.

patient is s/p corpectomy with fusion and having increase in low back pain.; This study is being ordered for trauma or injury.; 6/2017; There has been treatment or conservative therapy.; increasing low back pain, bladder incontinence.; pain medications, surgery; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Neurological Surgery Approval 72131 CT LUMBAR SPINE, LOW BACK

Patient with a history of kidney disease with pelvic and low back pain.; This study is being ordered for a neurological disorder.; 9/27/2017; There has been treatment or conservative therapy.; Low Back pain/pelvic pain; Exercise/pain meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Neurological Surgery Approval 72131 CT LUMBAR SPINE, LOW BACK

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.; Yes this is a request for a Diagnostic CT.

Neurological Surgery Approval 72131 CT LUMBAR SPINE, LOW BACK

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT.

Neurological Surgery Approval 72131 CT LUMBAR SPINE, LOW BACK

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT.

Neurological Surgery Approval 72131 CT LUMBAR SPINE, LOW BACK

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.; Yes this is a request for a Diagnostic CT.

Neurological Surgery Approval 72131 CT LUMBAR SPINE, LOW BACK

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT.

27 year old male presents with history of intermittent headaches and occasional episodes of deja vu, dizziness which have increased in frequency. He reports suboccipital headaches and pressure that are exacerbated by Valsalva on a daily basis ad can wake h; This study is being ordered for a neurological disorder.; Duration: 6 years; There has been treatment or conservative therapy.; Topamax 25 mg tablet; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Checking proximal spine for stenosis, patient has had prior neck injury with neck pain, radiation to the head.; This study is being ordered for a neurological disorder.; 12/15/2017; There has been treatment or conservative therapy.; Bilateral lower extremity pain and cramping.; Patient received and Epidural Steroid Injection on 11/28/2017; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Chiari I, IIH, dysautonomia. No hypromobility. For Dr grer and Dr. Doyle eval, T/L/S MRI and cine flow then followup; This study is being ordered for Congenital Anomaly.; Duration: date of onset: (06/2017); There has been treatment or conservative therapy.; 29 year old relatively well except maybe clumsy till June when she had sinus infection followed by severe SO headaches to right Some blurry vision. Headaches exacerbated by Valsalva. Some dizziness near syncope. Tinnitus. No incoordination but poor balance; Medications&x003D; butalbital 50 mg‐acetaminophen 325 mg‐codeine 30 mg cap; Take 1 capsule(s) every 4 hours by oral route.&x003D; Cymbalta 60 mg capsule, delayed release; Take 1 capsule(s) every da; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Chiari I. Completion studies and cine flow. May need dysautonomia eval. Follow up after.; This study is being ordered for a neurological disorder.; Duration: 3 years; There has been treatment or conservative therapy.; 27 yo son of a Chiari patient with Valsalva headaches, neck pain, visual issues, tinnitus, speech issues, brain fog, neck/back pain, balance issues. MRI shows 5 mm tonsillar herniation C/.W Chiari. Studies not available for review/ only report. No CT/L/S; Medications&x003D; Flonase Allergy Relief 50 mcg/actuation nasal spray,suspension;&x003D; Spray 1 spray(s) every day by intranasal route.&x003D; Lisinopril 10 mg tablet;&x003D; Take 1 tablet(s) every day by oral route.&x003D; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Chiari I. send for completions and cine flow and revisit. Could be a surgical candidate.; This study is being ordered for Congenital Anomaly.; Duration: date of onset: (2015); There has been treatment or conservative therapy.; 30 year old male works at Middleton heat an air. He has right SO headaches radiating to right eye and top of head exacerbated by bending. vALSAVA. hAS NOT RESPONDED TO A HOST OF HEADACHE INTERVENTIONS. Burning in legs and feet at times. No ear, swallow o; He was referred to us by Dr. David Brown.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

hep no relief; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ongoing 8 years worsening in the last year; There has been treatment or conservative therapy.; neck and mid back pain; numbness and pain bilateral arms; grip loss; pt; pain management; nsaid therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Here to follow up annually for syrinx. Studies show stable small hydromyelia T/L/S He reports similar but increased LE symptoms at this time, otherwise stable. Will obtain repeat studies in April to reeval. Continue current otherwise.; This study is being ordered for a neurological disorder.; Duration: 2 years; There has been treatment or conservative therapy.; 1. Syringomyelia - Mister Ellis presents today and describes a sharp knifelike pain after standing on a ladder and twisting while reaching for something. He reports his pain is worse at night and is in his lower back slightly to the right side. He rates h; Ativan 1 mg tablet&x0D; Take 1 tab po 30 mins prior to procedure and one time of procedure if needed&x0D; 12/05/16 prescribed Anthony Capocelli, MD&x0D; citalopram 40 mg tablet&x0D; start 12/02/2016&x0D; 12/02/16 filled Cynthia Richey&x0D; Dexilant 60 mg capsule, delayed rel; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.

Neck Pain &x0D; Pain location: L side (posterior)&x0D; Quality: Stabbing and stiffness&x0D; Stiffness is present: All day&x0D; Pain radiates to: L shoulder, L arm, L hand and L forearm&x0D; Pain severity: Moderate&x0D; Timing: Intermittent&x0D; Progression: Waxing and waning&x0D; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 2017; There has been treatment or conservative therapy.; Patient complains of onset of neck pain. She reports at first she had neck pain with shooting pain down inside of left arm with pinky/thumb finger numbness. This went away and went to a stabiing pain under her arm and now she is experiencing numbness to co; Ibuprofen&x0D; muscle relaxer; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
Neurological Surgery Approval

72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST

Neck pain left sided low back pain worse with activity. LLE Numbness/tingling right sided.

Cervicothoracic syrinx confirmed on previous imaging. This study is being ordered for a metastatic disease.

There are 3 exams being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

NEW ONSET BUT TRANSIENT NECK PAIN, DR WANT TO DO AN MRI OF THE ENTIRE SPINE FOR FOLLOW-UP; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

CHIARI 1 MALFORMATION; 1 EPISODE OF NECK PAIN WHICH LASTED 2 WEEKS;

There has not been any treatment or conservative therapy.

CHIARI 1 MALFORMATION; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient with history of hemangioblastoma of the brain status post resection.

This is a request for spine imaging to evaluate spread to spine.

Patient with new onset back pain;

This study is being ordered for a metastatic disease;

There are 3 exams being ordered;

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI;

The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient's back pain in interfering with his abilities to perform his daily ADL's without severe pain and use of pain medicine. It is very painful to sit, walk, ride in a car. It is also affecting his concentration, mood and sleep pattern;

This study is being ordered for trauma or injury;

11/2016; There has been treatment or conservative therapy;

Sharp shooting, and aching pains in mid and lower back. Also muscle weakness, numbness, and muscle spasms in back;

Injections with no relief, physical therapy, alternating heat and cold packs, acupuncture, bed rest and muscle stimulation;

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI;

The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Progressive myelopathy I cannot explain his symptoms from his previous studies will go ahead and get a cervical MRI scan redone and also thoracic MRI scan. Will also get him to be evaluated by Neurology for further consultation. We will plan to follow him;

This study is being ordered for a neurological disorder;

April 2017; There has been treatment or conservative therapy;

mid back and low back pain s/p cervical fusion.

Weakness in the upper and lower extremities; Physical therapy, EMG/ and ESI's as well as surgery since May 2017;

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI;

The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST

Pt referred to Dr Raja for neurosurgical evaluation.; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Motor strength was as follows: Right upper extremity; deltoids 4-/5, biceps 4-/5, triceps 4-/5, grasp 4/5; Left upper extremity; deltoids 4-/5, biceps 4-/5, triceps 4-/5, grasp 4/5; Right lower extremity; hip flexors 4+/5, hip extensors 4+/5, knee flexors; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.

requesting MRI's for evaluation for conservative treat or surgery.; This study is being ordered for trauma or injury.; 01/23/2017 - MOTORCYCLE ACCIDENT; There has been treatment or conservative therapy.; limited range of motion of his right shoulder and has some weakness in his upper extremity.&RxOD; Increasing low back and mid back pain.; PATIENT HAS INJECTIONS AND PHYSICAL THERAPY.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD's specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

severe back pain with radiation to the hips and legs with some problems with constipation and some dysuria. He was recently imaged with an MRI scan of his lumbar spine that revealed an intrathecal mass at the L5 level with components that looked somewhat; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD's specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; 26 YEAR OLD MALE WITH MULTIPLE CONCUSSIONS IN PAST WITH ASSOCIATED CHRONIC HEADACHES HAD HEAD INJURY IN JULY WITH INCREASED HEADACHES RTO RIGHT SIDE OF HEAD THAT ARE NOT POSITIONAL. No VISUAL CHANGE. No TINNITUS. No OTO ISSUES XCELLENT IMBALANCE. O.b.b.issues.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Here to eval neck and Chiarri. Patient has cervical disc herniation times toward neck pain with radiculopathy. Low tonsils butto Chiarri. Will getcomelention studies for chariand schedule ACD. Reviewedin detail.&RxOD; ROS;&xOD; Patient reports trouble sleeping but re; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Here to follow up MRIs which show stable postop result with good flow and stable cervical surgery. Persistent but stable collapsed holocord syrinx. At this point she may have IH issues which I would like to workup to include eye eval and possible LP. Dis; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.
The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Pt's blood was elevated, advised to contact their family physician. old wis onset of so headache recently exacerbated by Valsalva as well as dizziness na syncope, gait issues, incoordination, palpitations. Ringing in ears. MRI with low tonsils.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does not have any neurological deficits.; It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.;

The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; It is not known how many follow-up thoracic spine MRIs the patient has had.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Patient has mid/low back pain radiating to her left leg with no specific dermatome distribution that started in mid August. She has tried NSAIDs and chiropractic care with no relief. Her MRI lumbar spine shows some degenerative changes but no significant.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

This is a request for a thoracic spine MRI.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.

This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.
This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with an Epidural.

This is a request for a thoracic spine MRI.; Follow‐up to Surgery or Fracture within the last 6 months; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

This is a request for a thoracic spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.

This is a request for a thoracic spine MRI.; Pre‐Operative Evaluation; Surgery is scheduled within the next 4 weeks.; No, the last Thoracic Spine MRI was not performed within the past two weeks.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of asymmetric reflexes.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

This is a request for a thoracic spine MRI.; There is laboratory or x‐ray evidence of osteomyelitis.; Known or Suspected Infection or abscess

This is a request for a thoracic spine MRI.; There is x‐ray or laboratory evidence of osteomyelitis.; The study is being ordered due to known or suspected infection or abscess.

This study is being ordered for staging.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.;" The study is being ordered due to known tumor with or without metastasis.

- **Chiari I, IIH, dysautonomia. No hypromobility. For Dr grer and Dr. Doyle eval, T/L/S MRI and cine flow then followup; This study is being ordered for Congenital Anomaly.**
- **Duration: date of onset: (06/2017); There has been treatment or conservative therapy.;**
  - 29 year old relatively well except maybe clumsy till June when she had sinus infection followed by severe SO headaches to right Some blurry vision. Headaches exacerbated by Valsalva. Some dizziness near syncope. Tinnitus. No incoordination but poor balance; Medications:
    - butalbital 50 mg
    - acetaminophen 325 mg
    - caffeine 40 mg
    - codeine 30 mg cap
    - Take 1 capsule(s) every 4 hours by oral route.
    - 10/12/17 entered Kathy Maxwell
    - lisinopril 10 mg tablet
    - Take 1 tablet(s) every day by oral route.
    - 06/08/17 entered Tana Nowlin
  - One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
- **Neurological: Positive for dizziness, tingling, weakness and numbness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.**
- **Neurological: Positive for dizziness, tingling, weakness and numbness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.**

- **Neurological: Positive for dizziness, tingling, weakness and numbness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.**
Neurological Surgery Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

Concerned spinal stenosis due to fusion L5-S1, post laminectomy; The study requested is a Lumbar Spine MRI; The patient has acute or chronic back pain; The patient has none of the above CT documents loosening screws at his superior inferior construct will send over for neurosurgical consultation for hardware removal will plan to follow-up postop. Patient was counseled in detail. &xOD; a 3 years out from L4-L5 S1 fusion; The study requested is a Lumbar Spine MRI; Pre-Operative Evaluation; It is not known when surgery is scheduled. Patient was counseled in detail. CT documents loosening screws at his superior inferior construct will send over for neurosurgical consultation for hardware removal will plan to follow-up postop. Patient was counseled in detail. &xOD; a 3 years out from L4-L5 S1 fusion; The study requested is a Lumbar Spine MRI; Pre-Operative Evaluation; It is not known when surgery is scheduled. HAD L4/S HEMILAMINECTOMY SURGERY ON 10/3/17. COULD BE RELATED TO THIS. &xOD; SHE IS HAVING FIXED SEVERE NUMBNESS AND PAIN BELOW THE KNEE SINCE SURGERY. OR THINKS IT MAY BE NEURITIS, BUT WANTS TO RULE OUT PERSISTENT COMPRESSION OR A NEW DISC HERNIATION. COULD; The study requested is a Lumbar Spine MRI; The patient has acute or chronic back pain; The patient has none of the above Here to follow up annually for syrinx. Studies show stable small hydromyelia T/L/S He reports similar but increased LE symptoms at this time, otherwise stable. Will obtain repeat studies in April to reeval. Continue curent otherwise.; This study is being ordered for a neurological disorder.; Duration: 2 years; There has been treatment or conservative therapy.; 1. Syringomyelia - Mister Ellis presents today and describes a sharp knife-like pain after standing on a ladder and twisting while reaching for something. He reports his pain is worse at night and is in his lower back slightly to the right side. He rates h; Ativan 1 mg tablet &xOD; Take 1 tab po 30 mins prior to procedure and one time of procedure if needed &xOD; 12/05/16 prescribed Anthony Capocelli, MD &xOD; citalopram 40 mg tablet &xOD; start 12/02/2016 filled Cynthia Richey &xOD; Delantal 60 mg capsule, delayed rel; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology Mild intermittent mechanical back pain without radicular symptoms and CT showing no obvious stenosis, spondylolisthesis, spondylosis, or fractures; The study requested is a Lumbar Spine MRI; The patient has acute or chronic back pain; The patient has none of the above Neck Pain &xOD; Pain location: L side (posterior) &xOD; Quality: Stabbing and stiffness &xOD; Stiffness is present: All day &xOD; Pain radiates to: L shoulder, L arm, L hand and L forearm &xOD; Pain severity: Moderate &xOD; Timing: Intermittent &xOD; Progression: Waxing and waning &xOD;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 2017; There has been treatment or conservative therapy.; Patient complains of onset of neck pain. She reports at first she had neck pain with shooting pain down inside of left arm with pinky/ring finger numbness. This went away and went to a stabbing pain under her arm and now she is experiencing numbness to co; Ibuprofen &xOD; muscle relaxer; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
Neurological Surgery Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

NEW ONSET BUT transient neck pain, or WANT TO DO AN MRI OF THE ENTIRE SPINE FOR FOLLOW-UP; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; CHIARI 1 MALFORMATION; 1 EPISODE OF NECK PAIN WHICH LASTED 2 WEEKS.; There has not been any treatment or conservative therapy.; CHIARI 1 MALFORMATION; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Neurological Surgery Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

Patient presents with worsening low back pain and now bowel/bladder dysfunction. Wanting to evaluate for tumor.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Neurological Surgery Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

Patient reports 7-8 years of low back pain radiating to his posterolateral right leg. He tried PT in the past with no relief. We will obtain an MRI for further evaluation. We did discuss spinal injections therapies as a possible treatment option depending; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; 1

Neurological Surgery Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

Patient has completed 6 weeks of PT.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. 1

Neurological Surgery Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

Patient is needing an eval for surgery. Last MRI is older than 6 months. Before we are able to refer patient to surgery the patient needs an updated MRI lumbar.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. 1

Neurological Surgery Approval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

Patient has completed 6 weeks of PT.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. 1

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

Patient with history of back surgery, 5/10/2017, L4/5 minimally invasive Laminotomy, return of back pain with RLE pain that shoots down back of leg to knee. She has tried nsaid/medrol dose pack for the symptoms with no relief. History of synovial cyst.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.

Patient with history of hemangioblastoma of the brain status post resection. This is a request for spine imaging to evaluate spread to spine. Patient with new onset back pain.; This study is being ordered for a metastatic disease.; There are 3 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient's back pain in interfering with his abilities to perform his daily ADL's without severe pain and use of pain medicine. It is very painful to sit, walk, ride in a car. It is also affecting his concentration, mood and sleep pattern.; This study is being ordered for trauma or injury.; 11/2016; There has been treatment or conservative therapy.; Sharp shooting, and aching pains in mid and lower back. Also muscle weakness, numbness, and muscle spasms in back.; Injections with no relief, physical therapy, alternating heat and cold packs, acupuncture, bed rest and muscle stimulation.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Positive Straight Leg Raise on the right, but negative Straight Leg Raise on the left. Multiple year history of low back and right leg pain starting at the right SI joint and extending into the L5 distribution. Most recent MRI was done July 18, 2016 and so; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Post OP and HAVE SEVERE LEG PAIN NUMBNESS AND BACK PAIN; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Prior Spinal Surgery was done, it could be a complication. He is still having severe pain in back and legs, and numbness in extremities. Unable to complete physical therapy. Dr. wants to make sure he is fusing correctly.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.

Pt had surgery June 27, 2017. Started PT on September 7, 2017 and continuing.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.
Pt with progressive back pain and right leg pain. Gabapentin does not help; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.

This study is being ordered for trauma or injury.; 01/23/2017 - MOTORCYCLE ACCIDENT; There has been treatment or conservative therapy.; limited range of motion of his right shoulder and has some weakness in his upper extremity.&xtOD; Increasing low back and mid back pain.; PATIENT HAS INJECTIONS AND PHYSICAL THERAPY.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Severe canal stenosis due at L3-4 and L4-5. Possible extruded disk at L3 seen on prior CT Scan; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above slow Gait; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. 1

Surgical planning;&xtOD; &xtOD; I think his biggest issue is his low back pain and left leg pain. I feel that this is from the left L5-S1 foram stenosis. A decision was made to proceed with an SNRB at L5-S1 on the left. A decision was also made to proceed with fur; The study requested is a Lumbar Spine MRI.; Pre-Operative Evaluation; It is not known when surgery is scheduled.

Severe back pain with radiation to the hips and legs with some problems with constipation and some dysuria. He was recently imaged with an MRI scan of his lumbar spine that revealed an intrathecal mass at the L5 level with components that looked somewhat; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Range of Motion in the Cervical Spine is full.
Range of Motion of the joints of the Upper Extremity is full without pain.
Range of Motion in the Lumbar Spine: Flexion: Reduced by 20-30% &xtOD; Extension: Reduced by 80-90; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; A decision was made to proceed with further diagnostic testing and to order an MRI and plain X-Rays of the Lumbar Spine to review prior to proceeding with the below injections.&xtOD; This 53 year old female presents with a shocking pain in the right occipital ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. 1

Severe back pain with radiation to the hips and legs with some problems with constipation and some dysuria. He was recently imaged with an MRI scan of his lumbar spine that revealed an intrathecal mass at the L5 level with components that looked somewhat; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The pain radiates to the left knee, left thigh, left foot, right foot, right knee and right thigh. The pain is of a severity of 8/10. The pain is severe. The symptoms are aggravated by position, standing, sitting and coughing (walking). Associated symptom: This study is being ordered for a neurological disorder; more than 1 year ago; There has been treatment or conservative therapy; The pain radiates to the left knee, left thigh, left foot, right foot, right knee and right thigh; analgesics, heat, muscle relaxant, physical therapy, NSAIDs and injection for the symptoms. The treatment provided no relief; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has seen the doctor more then once for these symptoms; The physician has directed conservative treatment for the past 6 weeks; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI; Follow-up to Surgery or Fracture within the last 6 months; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

The study requested is a Lumbar Spine MRI; It is unknown if the patient has acute or chronic back pain; This procedure is being requested for Follow-up to surgery or fracture within the last 6 months; The patient been seen by or the ordering physician is a neuro-specialist, orthopedist, or oncologist.

The study requested is a Lumbar Spine MRI; It is unknown if the patient has acute or chronic back pain; This procedure is being requested for Known or suspected tumor with or without metastasis.

The study requested is a Lumbar Spine MRI; It is unknown if the patient has acute or chronic back pain; This procedure is being requested for Neurologic deficits.

The study requested is a Lumbar Spine MRI; It is unknown if the patient has acute or chronic back pain; This procedure is being requested for Pre-operative evaluation; The patient has not had a Lumbar Spine MRI performed within the past 2 weeks.

The study requested is a Lumbar Spine MRI; Pre-Operative Evaluation; No, the last Lumbar spine MRI was not performed within the past two weeks; Surgery is scheduled within the next 4 weeks.

The study requested is a Lumbar Spine MRI; The patient does NOT have acute or chronic back pain; This procedure is being requested for Follow-up to surgery or fracture within the last 6 months; The patient been seen by or the ordering physician is a neuro-specialist, orthopedist, or oncologist.

The study requested is a Lumbar Spine MRI; The patient does NOT have acute or chronic back pain; This procedure is being requested for Known or suspected tumor with or without metastasis.

The study requested is a Lumbar Spine MRI; The patient does NOT have acute or chronic back pain; This procedure is being requested for Neurologic deficits.

He denies any right leg pain. He complains of numbness and tingling in his left foot. He states that he completed a round of physical therapy with mild improvement; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not X-ray evidence of a recent lumbar fracture.; Continued pain with treatment; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient is still experiencing low back and hip pain with radicular symptoms, has exhausted almost all conservative measures with several rounds of PT and lumbar epidural steroid injections.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not X-ray evidence of a recent lumbar fracture.; 6 months out from severe motor vehicle accident with loss of consciousness with persistent neck and back pain. Noted to have minor fractures of the neck and back at that time. Continues to be plagued with severe neck and back pain. We will get involved.; This study is being ordered for trauma or injury.; Feb. 2017.; There has been treatment or conservative therapy.; Was dx with cervical fx, maybe some hairline fx in the low back.; Cont w neck pain to the right shoulder/scap/trap area. Has some days he cant even lift his arm. Right arm pain and numbness to the fingertips. Wakes up with his arm being dead asleep. Headache.; Cymbodronaprin, Gabapentin, Tramadol, Trazodone.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology. LBP Patient presents today stating that he has had a 6-8 month history of left low back and buttock pain extending into the posterior leg stopping in the calf. He notes numbness and tingling in the same area. He states his pain is a burning sensation with.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain.; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not X-ray evidence of a recent lumbar fracture.; Left lateral flexion was not restricted and was painful. Right lateral flexion was not restricted and was painful. Special Tests: positive Straight Leg Raise on the left and positive Contralateral Straight Leg Raise on the right. Ms. Humphrey called today about her pain she has been experiencing. She states her pain is to left lower back radiating to her hip and left posterior leg. She states the pain is only present when up walking or with certain positional movements while in bed.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above. |
Ms. Bryant complains of constant bilateral low back and upper hip pain. She describes the pain as a stabbing, electrical feeling that is a 10/10 on the pain scale. She also complains of some right leg pain but states that her back pain is worse. She denies; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

Patient returns to clinic with complaints of worsening low back pain. She reports onset a few months ago and reports worsening while doing any kind of housework. She reports rest helps some and is taking diclofenac that provides mild relief. She reports p.; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above

Patient’s main complaint is right leg pain with N/T in no specific dermatomal distribution for over 9 months. Her prior MRI is more then 9 months old and is of very poor quality. We will obtain a new MRI in a closed magnet for further review. If this is n; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.

Pt referred for neurosurgical evaluation. New MRI needed to assess possible need for surgery; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.
She states that in January 2017 she began having severe low back pain. She states that the pain has gotten so severe at times that it was difficult for her to get out of bed and ambulate. She denies any radiating leg pain but states that her legs "buckle; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Tenderness and spasm and decreased range of motion for neck and back.; This study is being ordered for a neurological disorder.; 2016; There has been treatment or conservative therapy.; Constant back pain, aching and burning radiating to left foot and left thigh. Worsening at night, leg pain, numbness, tingling and weakness. Neck pain radiates down left shoulder and left scapula, stiffness, numbness and weakness. Described as stabbing p; Physical therapy and muscle relaxants; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s) 2

Unknown; The study requested is a Lumbar Spine MRI.; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks. ; This study is being ordered for a neurological disorder.; 10/01/2017; There has not been any treatment or conservative therapy.; Sharp lbp; progressing into rt buttock and down into rt leg; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Bilateral hip pain.; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; &gt; Enter answer here - or Type In Unknown if No Info Given. &gt;
Patient has been diagnosed with peripheral neuropathy, Lumbar puncture has been ordered to rule out chronic inflammatory demyelinating polyneuropathy. The radiologist requires a CT of the head be done prior to the lumbar puncture; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.

This is a request for a brain/head CT.; Evaluation of known or suspected CSF (cerebrospinal fluid) leak best describes the reason that I have requested this test.; None of the above best describes the reason that I have requested this test.

This is a request for a brain/head CT.; 'None of the above' best describes the patient's tumor.; Known or suspected tumor best describes the reason that I have requested this test.

This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.

This is a request for a brain/head CT.; The patient has a known brain tumor.; Known or suspected tumor best describes the reason that I have requested this test.; There are documented neurologic findings suggesting a primary brain tumor.; This is NOT a Medicare member.

This is a request for a brain/head CT.; The patient has a suspected brain tumor.; Known or suspected tumor best describes the reason that I have requested this test.; There are documented neurologic findings suggesting a primary brain tumor.; This is NOT a Medicare member.

This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has one sided arm or leg weakness.; The patient has a recent onset (within the last 4 weeks) of neurologic symptoms.; The patient is NOT able to have a Brain MRI for evaluation of these symptoms.

This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.

This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness.";

This study is being requested for a headache.

This study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Type In Unknown If No Info Given. &gt; This study is being ordered for a neurological disorder.; &lt; Enter date of initial onset here - or - Type In Unknown If No Info Given &gt; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or - Type In Unknown If No Info Given &gt; Medication, and physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for a head and neck MR Angiogram.; The patient has a known
aneurysm.; This is a request for a Brain MRA.

Unknown; This study is being ordered for a neurological disorder.; 01/01/17; There
has been treatment or conservative therapy.; Unknown; Patient has had steroid
therapy. Currently on pain medication; One of the studies being ordered is NOT a
Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering
MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical
Oncology or Radiation Oncology unknown; This study is being ordered for a neurological disorder.; 10/24/2017; It is
not known if there has been any treatment or conservative therapy.; unknown; One
of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET
Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/17/2017; There has been treatment or conservative therapy.; headaches, extremity weakness, leg and body pain, migraines, numbness, dizziness.; medication.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Headaches; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

39-year-old gentleman presents with episodes of right facial numbness. He has had 2 spells that he describes as being the most severe. The most recent one was a couple of weeks ago. They lasted about an hour and about 30 minutes respectively. Right fa; This is a request for a Neck MR Angiography.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had an onset of neurologic symptoms within the last two weeks.; It is unknown if the patient had an ultrasound (doppler) of the neck or carotis arteries.; The patient does not have carotid (neck) artery surgery.

Headaches; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

syncopal episodes; There is NOT a family history of a brain aneurysm in the parent, brother, sister or child of the patient.; This is a request for a Brain and Neck MRA combination.; There has NOT been a recent (less than 2 week) neck or carotid artery ultrasound.

The patient has had a recent MRI or CT for these symptoms.; This is a request for a Neck MR Angiography.

The patient has not had a recent MRI or CT for these symptoms.; There has been a stroke or TIA within the past 2 weeks.; This is a request for a Neck MR Angiography.

The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This is a request for a Neck MR Angiography.

The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is not a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness.;" This is a request for a Neck MR Angiography.; The patient has not had an abnormal ultrasound of the neck.

This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient has a known aneurysm.
This is a request for a Neck MR Angiography.; The patient has a one-sided arm or leg weakness.; The patient has an onset of neurologic symptoms within the last two weeks.; The patient has NOT had an ultrasound (doppler) of the neck or carotid arteries.; The patient does not have carotid (neck) artery surgery.; unknown; This study is being ordered for a neurological disorder.; 10/24/2017; It is not known if there has been any treatment or conservative therapy.; unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

The patient presents with a history of recurring headaches for over 20 years. She says when the headaches are more severe they are associated with photo and phonophobia as well as nausea. She denies any recent head or neck trauma. She denies fevers or ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This 50 year old female presents with dizziness. Ms. Carroll is a 50 year old woman who comes to the clinic today for evaluation of dizziness. About 2 years ago she started working out and while she was running on a treadmill she began to feel dizzy and ; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient is experiencing dizziness.
This 57 year old female presents with pain and weakness. Ms. Brown returns to the clinic today for follow up on pain and weakness. She continues taking Tecfidera which she thinks is helping. She has recently ran out of days with physical therapy but cont; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; June 2015; There has been treatment or conservative therapy.; This 57 year old female presents with pain and weakness. Ms. Brown returns to the clinic today for follow up on pain and weakness. She continues taking Tecfidera which she thinks is helping. She has recently ran out of days with physical therapy but cont; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient's life (within the last 3 months).

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient has Bell's Palsy.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; A metabolic work up was done including urinalysis, electrolytes and complete blood count with results completed.; The lab results were abnormal.; The patient is experiencing loss of smell.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing dizziness.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; The patient has a congenital abnormality.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient has a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; This is NOT a Medicare member.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; It is not known if the patient has undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has undergone treatment for multiple sclerosis.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was abnormal.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (Transient ischemic attack).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient's visual acuity.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for infection or inflammation.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered as a 12 month annual follow up.; This is a routine follow up.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for Multiple Sclerosis.; This study is being ordered for Parkinson's disease.; This study is being ordered for new neurological symptoms.; The neurologic symptoms include something other than worsening Parkinson symptoms, dizziness, vision changes, one sided arm or leg weakness, or the inability to speak.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for Parkinson's disease.; This study is being ordered for new neurological symptoms.; The neurologic symptoms include something other than worsening Parkinson symptoms, dizziness, vision changes, one sided arm or leg weakness, or the inability to speak.

This request is for a Brain MRI; The study is being ordered for Multiple Sclerosis.; This study is being ordered as a 12 month annual follow up.; This is a routine follow up.

Cervical radicular pain, &Loading/SPOping/CRACKING GOING UP TO JAW/SHOULDERS.2. Neckpain &Loading/DOD; Onset: 5 years ago. Additional information: PCP ordered MR but not approved. Some radic pain down left arm. Has been; This is a request for cervical spine MRI; Neurological deficits; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.

Neurology Approval

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

Cervical radiculopathy and myelopathy.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Can demonstrate normal muscle force but cannot maintain this for more than fractions of a second.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Neurology Approval

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

Evaluate Multiple Sclerosis; This study is being ordered for a neurological disorder.; June 2016; There has been treatment or conservative therapy.; numbness and skin disturbance, balance issues, history of Multiple Sclerosis; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Neurology Approval

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

Evaluating progression of Multiple Sclerosis; This study is being ordered for a neurological disorder.; &Loading/Enter date of initial onset here - or Type In Unknown if No Info Given &gt;.; There has been treatment or conservative therapy.; dizziness, weakness, walking and balance problems; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
For: (M54.12) Radiculopathy, cervical region; 1. MRI cervical spine with and without contrast to assess.; 1. Will get the above testing first. If unrevealing, will consider CT injections.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; 49 year old man with recent treatment and remission for non-Hodgkin’s lymphoma with R-CHOP. PNCV/EMG today shows mild bilateral CTS but also shows some findings suggestive of cervical radiculopathy. Polyneuropathy is unlikely given his PNCV results.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

History of testicular cancer. Patient with complaints of increase numbness and tingling in his upper and lower extremity. Numbness and paresthesias began after treatment chemotherapy for testicular cancer but also has underlying history of cervical lumbar; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; Increased muscle weakness, cramping and muscle drawing.; This study is being ordered for a neurological disorder.; May, 2017; There has been treatment or conservative therapy.; Muscle weakness, right lower extremity drawing, pain/cramping, numbness and tingling; Tried Gabapentin, hydrocodone, Prednisone, and Tizanidine; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology;

injuries due to fall left unconscious.; This study is being ordered for trauma or injury.; feb 2017; There has not been any treatment or conservative therapy.; arm/leg pain, unconsciousness; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology;

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; 56 year old right handed male who comes as a follow up for neuropathy and low back pain. Patient has been following Booker/Dr. Pellegrino in the past. Patient reports that and current dose of gabapentin his paresthesias stable. Patient reports of really b

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; Eval for Demyelinating lesion.

Neurology Approval

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Abnormal brain MRI, HEADACHES, HIGH BLOOD PRESSURE, Description

Abnormal brain MRI (R90.89). Suspicious for MS, given the trigone area lesions, the others are not typical of MS. Will do MR brain with contrast only and MR C spine with and without. Will c; No, the patient does not have new or changing neurological signs or symptoms; yes, there are documented clinical findings of Multiple sclerosis.

1

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Multiple sclerosis, ONE YEAR FOLLOW UP, ABNORMAL MRI; No, the patient does not have new or changing neurological signs or symptoms; yes, there are documented clinical findings of Multiple sclerosis.

1

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms; No, the patient is experiencing or presenting new symptoms of upper extremity weakness; Yes, the patient is demonstrating unilateral muscle wasting; yes, there are documented clinical findings of Multiple sclerosis.

1

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

1

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Neurological deficits; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness; No, the patient is not demonstrating unilateral muscle wasting; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

1

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness; Yes, the patient is demonstrating unilateral muscle wasting; yes, there are documented clinical findings of Multiple sclerosis.

20
This is a request for cervical spine MRI; Neurological deficits; Hyperreflexia; She is also having numbness in her right lateral thigh over the last half year, developed some shooting pains. 

Suspect this probably represents meralgia paresthetica though. We checked an EMG/NCV study today. The findings suggested an unde; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction; Yes, the patient is experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Neurological deficits; Optic neuritis (H46.9); Right eye vision changes with pain, and a headache that is not typical of her previous migraines. This is suggestive of optic neuritis, although no optic nerve inflammation seen on the MRI. Keep in mind the MRI was done several ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms; The patient does have new signs or symptoms of bladder or bowel dysfunction.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.  

This is a request for cervical spine MRI; Neurological deficits; None of the above; &lt;Enter Additional Clinical Information&gt; ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting; ; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; ; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; None of the above; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has completed 6 weeks or more of Chiropractic care.

This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.  

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.
This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, the patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.;

This is a request for cervical spine MRI; There is no laboratory or x-ray evidence of osteomyelitis.; Known or Suspected Multiple Sclerosis, Infection or abscess; &Enter Additional Clinical Information&; No, there are no documented clinical findings of Multiple sclerosis.; No, there is not a laboratory or x-ray evidence of Meningitis.; No, there is not a laboratory or x-ray evidence of an infected disc, septic arthritis or “discitis”; No, there is no laboratory or x-ray evidence of a paraspinal abscess.

This is a request for cervical spine MRI; Trauma or recent injury; None of the above; Yes, the patient demonstrate neurological deficits.; Yes, there is a documented evidence of extremity weakness on physical examination.; Yes, the patient is experiencing new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; Trauma or recent injury; 1. Neckpain &x0D; Additional information: PT 2 x per week for 6 wks. Feels as if helped initially but not anymore. &x0D; 2. Back pain &x0D; Additional information: PT 2 x per week for 6 wks. . Feels as if helped initially but not anymore. Assessment&x0D; Back pain du;

No, the patient does not have new or changing neurological signs or symptoms.

This is a request for cervical spine MRI; Trauma or recent injury; Neckpain &x0D; Pertinent negatives include bladder incontinence. Additional information: Related to MVA, had PT, Dr Diemel did occip injections. Questionable syrinx on C spine MR. Started on AMT, Gabapentin and Lyrica. Hands numb constantly and worse in; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; Yes, the patient is experiencing new onset of parathesia diagnosed by a neurologist.; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness.; Patient is falling and has numbness/tingling in legs.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.
Neurology Approval
72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The patient does have new or changing neurologic signs or symptoms; There is weakness; The patient complains of low back pain. She complains that it will radiate down into her lower extremities. The frequency and severity seems to wax and wane. The patient has noticed if the weather changes the pain is worse. She has been seen in the past; The patient does not have a new foot drop; There is not x-ray evidence of a recent lumbar fracture.

Neurology Approval
72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Neurology Approval
72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

57-year-old gentleman with excessive daytime sleepiness. Start Provigil 100 mg daily for OSA not responsive to CPAP. He will keep OSA treatment for multilevel latency sleep test. MRI Lumbar spine to address worsening of left leg weakness, pain, and meralgia; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

Neurology Approval
72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

Abnormal reflexes.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/14/2017; There has not been any treatment or conservative therapy.; Numbness and weakness on the left side of the body and lower back pain.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Neurology Approval
72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

anesthetic during seizure episode.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; two weeks ago; There has not been any treatment or conservative therapy.; paresthesia in left arm, confusion, seizure, (hour to recover); One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Neurology Approval
72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

Back and neck pain radiating into extremities.; This study is being ordered for a neurological disorder.; 07/21/2017; There has been treatment or conservative therapy.; Back and neck pain radiating into extremities.; Physical Therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Neurology Approval
72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

History of testicular cancer. Patient with complaints of increase numbness and tingling in his upper and lower extremity. Numbness and paresthesias began after treatment chemotherapy for testicular cancer but also has underlying history of cervical lumbar; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Neurology Approval
72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

Ms. Jeannette Briggs evaluated by me for the management of headaches that have bothered her since 1994. She is in tears today with her Lt hip pain where she had her hip replacement. She is to see Dr. Massaneli the orthopedist in a few weeks. Her Norco is; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
No info given.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2016; There has been treatment or conservative therapy.; numbness in digits 4-5 in left hand, bilateral cramping positive tingling, sharp pain in feet toes and ankles, hyper active reflexes; Pt had nerve conduction study; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

suspected tethered cord; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has not been any treatment or conservative therapy.; urinary retention; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The current episode started more than 1 year ago. The problem occurs daily. The problem is unchanged. The pain is present in the thoracic spine. The quality of the pain is described as aching and stabbing. The pain does not radiate. The pain is at a sever; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for Neurologic deficits

The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Symptoms or x-ray evidence of a recent fracture;

This procedure is being requested for Trauma or recent injury

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection
| Neurology Approval | 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST | The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine. |
| Neurology Approval | 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST | The patient has a Neurological deficit(s) unknown; The patient has a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. |
| Neurology Approval | 73221 MRI JOINT OF UPPER EXTREMITY | One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. |
| Neurology Approval | 73221 MRI JOINT OF UPPER EXTREMITY | The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion. |
| Neurology Approval | 73221 MRI JOINT OF UPPER EXTREMITY | This is a request for an upper extremity joint MRI.; The patient has documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of supervised physical therapy. |
| Neurology Approval | 73221 MRI JOINT OF UPPER EXTREMITY | This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; Instability |
| Neurology Approval | 73221 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT | This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion. |
| Neurology Approval | 73221 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT | This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion. |
| Neurology Approval | 73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT | This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient does not have a documented limitation of their range of motion. |
This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; &gt; Enter Additional Clinical Information; &gt; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; "The patient has not had an abdominal ultrasound, CT, or MR study.;

Yes, this is a request for CT Angiography of the abdominal arteries.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.

TIA is possible. Complex partial seizure is less likely. The associated urinary urgency is an uncommon symptom for either of these. Her MRI and EEG look good. Her tremor is a new complaint but she reports it has 1

Neurology Disapproval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary This is a request for cervical spine MRI; There is laboratory or x-ray evidence of osteomyelitis.; Known or Suspected Multiple Sclerosis, Infection or abscess on a bone scan or x-ray.; Suspected Tumor with or without Metastasis; M5gs: severe L neck pain.4.2 Neck pain on left side,\&x0D; CAROTID ARTERY ULTRASOUND:IMPRESSION\&x0D; Normal carotid ultrasound. No hemodynamically significant stenosis of the carotid vasculature PROCEDURE(S): XR C SPINE 2-3

Neurology Disapproval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary V,\&x0D; &\&x0D; &\&x0D; Findings:&\&x0D; Frontal, lateral, an to evaluate the pain in the patient neck and lower back and compare with a MRI done in 2015; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Neurology Disapproval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary UNKNOWN; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; PHYSICAL EXAM REVEALED A BROAD BASED GAIT WITH LIMP SUPINE WITHOUT MENINGEAL SIGNS. SPASMS IN THE NECK, TRIGGER POINTS NOTED IN THE CERVICAL SPINE REGION; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Neurology Disapproval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary UNKNOWN; This study is being ordered for a neurological disorder.; Neurological: Positive for speech difficulty, light-headedness and headaches after a lengthy discussion regarding her symptoms it sounds like she has a variant of ophthalmologic migraine disorder. I think she needs to see a neurologist and she agrees. She; There has been treatment or conservative therapy.; HEADACHES&\&x0D; VISION BLURRING; NSAIDS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Neurology Disapproval 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary UNKNOWN; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; Severe, worsening headaches with pressure. Chronically on a near daily basis. Associated with neck pain that radiates with spasm and component of anxiety. Radiation of pain into shoulders. Headaches are chronic, intractable, but without status type headac; Medication therapy with Zanaflex for months, Imitrex for months; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; UNKNOWN; There has been treatment or conservative therapy.; RADIATING PAIN IN NECK TO HANDS. NUMBNESS AND TINGLING. WORSENING HEADACHES ASSOCIATED WITH CONFUSION AND GARBLED SPEECH PER DR REPORT.; MEDICATION THERAPY; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

WORSENING THORACIC SPINE PAIN. SUBSTANTIVE LOW BACK PAIN WHILE SITTING OR STANDING FOR BRIEF PERIODS OF TIME. WORSENING THROBBING AND SPASMS IN THE CERVICAL SPINE. COMPONENT OF FATIGABLE WEAKNESS. RADIATING NECK/MID BACK PAIN; This study is being ordered for a neurological disorder.; 12/02/2011; There has been treatment or conservative therapy.; WORSENING THORACIC SPINE PAIN. SUBSTANTIVE LOW BACK PAIN WHILE SITTING OR STANDING FOR BRIEF PERIODS OF TIME. WORSENING THROBBING AND SPASMS IN THE CERVICAL SPINE. COMPONENT OF FATIGABLE WEAKNESS. RADIATING NECK/MID BACK PAIN; MEDICATION THERAPY FOR SPASMS IN BACK; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.; Patient with MS with new thoracic numbness with recent brain activity

AMBIETTER + DOUBLE STUDY= AUTOMATIC REVIEW. WILL JUST SEND NOTES.; This study is being ordered for a neurological disorder.; 07/2017; There has been treatment or conservative therapy.; AMBIETTER + DOUBLE STUDY= AUTOMATIC REVIEW. WILL JUST SEND NOTES.; PT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Low bilateral midline stabbing pain that radiates to lower sciatica nerve; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2000; There has been treatment or conservative therapy.; Left leg numbness; increased trouble with bladder; worsened back pain; trouble walking; Medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
No info given.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2016; There has been treatment or conservative therapy.; numbness in digits 4-5 in left hand, bilateral cramping positive tingling, sharp pain in feet and ankles, hyper active reflexes; Pt had nerve conduction study; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient reports numbness in upper and lower extremities, needs MRI of Thoracic Spine and Cervical Spine to evaluate for Transverse Myelitis.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.

This is a request for a thoracic spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.

This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.

WORSENING THORACIC SPINE PAIN. SUBSTANTIVE LOW BACK PAIN WHILE SITTING OR STANDING FOR BRIEF PERIODS OF TIME. WORSENING THROBBING AND SPASMS IN THE CERVICAL SPINE. COMPONENT OF FATIGABLE WEAKNESS. RADIATING NECK/MID BACK PAIN; This study is being ordered for a neurological disorder.; 12/02/2011; There has been treatment or conservative therapy.; WORSENING THORACIC SPINE PAIN. SUBSTANTIVE LOW BACK PAIN WHILE SITTING OR STANDING FOR BRIEF PERIODS OF TIME. WORSENING THROBBING AND SPASMS IN THE CERVICAL SPINE. COMPONENT OF FATIGABLE WEAKNESS. RADIATING NECK/MID BACK PAIN; MEDICATION THERAPY FOR SPASMS IN BACK; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Note: The decision to deny or approve these procedures is based on medical necessity and adherence to the guidelines set by the aforementioned specialties.
Neurology Disapproval 72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary to evaluate the pain in the patient neck and lower back and compare with a MRI done in 2015; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Unknown; Gabapentin; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.1

Neurology Disapproval 72192 CT PELVIS WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.1

Neurology Disapproval 72196 MRI PELVIS Radiology Services Denied Not Medically Necessary WILL JUST UPLOAD NOTES. AMBETTER GOES TO REVIEW ANYWAY.; This is a request for a Pelvis MRI.; The study is being ordered for something other than suspicion of tumor, mass, neoplasm, metastatic disease, PID, abscess, Evaluation of the pelvis prior to surgery or laparoscopy, Suspicion of joint or bone infect1

Neurology Disapproval 73221 MRI JOINT OF UPPER EXTREMITY Radiology Services Denied Not Medically Necessary denervation edema of shoulder muscles can be better evaluated by MRI Left Shoulder®&039;d &®&039;d; &®&039;d; concern for left brachial neuritis; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has not been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks. Ms. Jeannette Briggs evaluated by me for the management of headaches that have bothered her since 1994. She is in tears today with her Lt hip pain where she had her hip replacement. She is to see Dr. Massanelli the orthopedist in a few weeks. Her Norco is ; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.1

Neurology Disapproval 73221 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT Radiology Services Denied Not Medically Necessary The study revealed a focus of abnormal radiotracer uptake about the left aspect of the urinary bladder. This may represent a bladder diverticulum and either a bladder ultrasound or CT abdomen/pelvis with delayed phase imaging were recommended for further.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT1

Neurology Disapproval 74150 CT ABDOMEN WITHOUT CONTRAST Radiology Services Denied Not Medically Necessary he study revealed a focus of abnormal radiotracer uptake about the left aspect of the urinary bladder. This may represent a bladder diverticulum and either a bladder ultrasound or CT abdomen/pelvis with delayed phase imaging were recommended for further.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT1

Neurology Disapproval 74176 CT ABD & PELVIS W/O CONTRAST Radiology Services Denied Not Medically Necessary

Neurology Disapproval 78608 BRAIN PET [POSITRON EMISSION TOMOGRAPHY] Radiology Services Denied Not Medically Necessary This is a request for a Metabolic Brain PET scan; This study is being ordered for dementia.2
considerable cognitive early onset signs of Alzh Dz in the center of emotions.; This is a request for a Metabolic Brain PET scan; This study is being ordered for Alzheimer's disease.

Neurology Disapproval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.; This is NOT a Medicare member.

Neurology Disapproval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY Radiology Services Denied Not Medically Necessary

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.; This is NOT a Medicare member.

Neurology Disapproval 93350 ECHO TTHRC R-T 2D →M-MODE COMPLETE REST&STRS Radiology Services Denied Not Medically Necessary

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; It is not known if the member has known or suspected coronary artery disease. 1

Neurology Disapproval 93350 ECHO TTHRC R-T 2D →M-MODE COMPLETE REST&STRS Radiology Services Denied Not Medically Necessary

This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease

OB/Gynecology Approval 70544 Mr angiography head w/o dye

There is an immediate family history of aneurysm.; This is a request for a Brain MRA; Elevated prolactin, amenorrhea; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

OB/Gynecology Approval 70551 MRI HEAD, BRAINSTEM WITHOUT CONTRAST

Pt presented with amenorrhea, hot flashes and night sweats. Her FSH and LH were found to be WNL, however, her Estrogen level is abnormally low. Additional lab work including Thyroid panel, Hemoglobin A1C and Prolactin has been ordered, however, results ; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.
Severe headache x 1 month. Was a sudden onset. 20 wks pregnant; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache [less than 1 week] not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.; This is NOT a Medicare member.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor. 

Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT

Chest pain describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer.; The patient is between 55 and 80 years old.; This patient is NOT a smoker nor do they have a history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT CT imaging surveillance.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
new onset abdominal tenderness and pain; history of endometrial cancer; Malignant neoplasm of endometrium; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

‘None of the above’ describes the reason for this request.; This study is being requested for suspicion of pulmonary embolism (PE); This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT.

Reassessment of poorly differentiated carcinoma of the endometrium; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

stage 3b primary peritoneal low grade psammocarcinoma; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has had 6 weeks of completed conservative care in the past 3 months or had a spine injection.

This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.

Patient is non-compliant on follow up of a 8.7cm pelvic mass seen on CT one year ago. Patient refuses pelvic exam related to ptsd.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; It is not known if there documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT.
STATUS POST TAH 6 WKS AGO WITH URGENCY, INCONTINENCE AND PELVIC PAIN AND PRESSURE. PELVIC US SHOWED LOCULATED FLUID COLLECTION ABOVE BLADDER. PELVIC CT SHOWED FLUID COLLECTION ADJACENT TO THE VAGINAL CUFF WORRISOME FOR ABSCESS OR INFECTED SEROMA. CLOSE; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT

Pregnancy complicated by: Previous c/s X 3 w/ concern for morbidly adherent placenta. 07/31/2017: There has not been any treatment or conservative therapy.; MORBIDLY ADHERENT PLACENTA; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

OB/Gynecology Approval 72196 MRI PELVIS

There have been plans on doing surgery; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

OB/Gynecology Approval 72196 MRI PELVIS

This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.

OB/Gynecology Approval 72196 MRI PELVIS

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?

OB/Gynecology Approval 73221 MRI JOINT OF UPPER EXTREMITY

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI.; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

Patient has multiple bilateral ovarian cyst on ultrasound 11/16/2017. She is complaining of lower back pain with rectal pain. She is having irregular periods with unwanted hair growth around nipples, back, chin, and neck that requires shaving and plucking; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &Rx0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &Rx0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT.

OB/Gynecology Approval 74150 CT ABDOMEN WITHOUT CONTRAST

This is a request for a Diagnostic CT.

OB/Gynecology Approval 74150 CT ABDOMEN WITHOUT CONTRAST

This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post-op evaluation.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Yes this is a request for a Diagnostic CT.

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT.

OB/Gynecology Approval 74150 CT ABDOMEN WITHOUT CONTRAST

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Yes this is a request for a Diagnostic CT.

OB/Gynecology Approval 74176 CT ABDOMEN & PELVIS W/O CONTRAST

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.;
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

9/25/17 ultrasound done.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

New onset abdominal tenderness and pain; history of endometrial cancer; Malignant neoplasm of endometrium; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Reassessement of poorly differentiated carcinoma of the endometrium; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Stage 3b primary peritoneal lowgrade psammocarcinoma; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Thickened endometrium, right ovary is not well defined, complex cystic mass occupying left adnexal region. Transvaginal ultrasound has been performed and further evaluation will be accomplished with CT.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.;

This is a request for an abdomen-pelvis CT combination.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; RIGHT LOWER ABDOMINAL PAIN IS SEVERE AND CONSTANT; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient does not have Crohn's Disease, Ulcerative Colitis or Diverticulitis.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; It is not know if this study is being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.;

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Vascular disease; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operotive evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Other; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; &lt;Enter Additional Clinical Information&gt;; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; 6month ct because vaginal pap smears are abnormal; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Dense pelvic adhesions, bowel obstructions, family history pancreatic cancer; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; pain; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; patient had rt lower quad pain for 3 months with diarrhea and constipation, abdominal bloating and upper abdominal pain. US was done with not determination.; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; pelvic pain female; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There is no abdominal and pelvic or retroperitoneal mass that has been confirmed by previous imaging other than a CT.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; Known Tumor, Cancer, Mass, or Rule out metastases; No, there is not a palpable or observed abdominal mass.; inguinal mass; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; It is unknown if the patient have an endoscopy.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
pelvic mass measuring 22 m and abdominal blotting; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Pregnancy complicated by:
1. Previous c/s X 3 w/ concern for morbidly adherent placenta
   - US 9/22: Anterior placenta previa with suspected morbidly adherent placenta. Significant hypervascularization at the bladder uterine interface. No TV US performed; This study is being ordered for Congenital Anomaly.; 07/31/2017; There has not been any treatment or conservative therapy.; MORBIDLY ADHERENT PLACENTA; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.";

This is a request for a Fetal MRI.; An ultrasound of the mother been completed.; Abdominal, retroperitoneal or pelvis abnormalities has been identified or remains uncertain after an ultrasound.

This is a request for a heart or cardiac MRI.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.
Abnormal mammogram; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

Her mother has a history of breast cancer. The patient has a Lifetime Risk of 22.5%. A breast MRI screening is recommended.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

inconclusive mammogram; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; It is not known if this patient have axillary node adenocarcinoma.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

Lifetime Risk=31.8% &nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;Sister diagnosed with breast cancer at age 47.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

Mammographic microcalcification found on diagnostic imaging of breast; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

Patient has a Lifetime Risk of 27.8% using the Tyrer Cuzick Risk Assessment model. Her mother was diagnosed with breast cancer at age 56. She had a screening mammogram 4/7/17 which was normal. It is recommended she have a screening MRI between mammograms; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

Previous MRI showed an area of non-mass enhancement. Biopsy was performed. Path report was negative for malignancy. Patient needs 6 month follow up.; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

PT HAS A CALCULATED LIFETIME RISK OF 26.6% OF DEVELOPING BREAST CANCER.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).
PT HAS A PALPABLE LUMP WITH A NEGATIVE MAMMO AND ULTRASOUND.; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; No, there are no anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

PT has multiple findings in bilateral breast. mri is requested for biopsy planning. pt has family hx of breast cancer in maternal grandmother at age 30 and pt's mother is BRCA positive.; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; It is not known if this is an individual who has known breast cancer in the contralateral (other) breast.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

PT IS CONSIDERED HIGH RISK BECAUSE PT'S MOTHER HAS HAD BREAST CANCER TWICE AS WELL AS PT'S MATERNAL GRANDMOTHER HAD BREAST CANCER. PT'S CALCULATED LIFETIME RISK IS 33%; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

R/O BREAST ENLARGEMENT AND PAIN ON THE LEFT SIDE; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

She was also diagnosed with a pituitary adenoma. She has a paternal aunt with a history of breast and ovarian cancer.; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

The patient has a Lifetime Risk of 30.5% using the Tyrer Cuzick Risk Assessment. There is history of breast cancer in her mother and aunt. It is recommended to alternate annual MRI's with mammograms for screening.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

She was also diagnosed with a pituitary adenoma. She has a paternal aunt with a history of breast and ovarian cancer.; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.

The patient is at high risk for breast cancer, and the radiologist is recommending she have a breast MRI to screen for breast cancer.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).
This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20. 4

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; Yes, the patient have a known mutation such as BRCA1, BRCA2, PTEN or TP53.; It is unknown if the patient has a lifetime risk score of greater than 20. 1

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children). 2

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children). 8

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient’s further management. 4

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; Yes, there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk. 1

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are benign lesions in the breast associated with an increased cancer risk. 2

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, this is a confirmed breast cancer.; This request is for initial evaluation of a murmur.; This request is for initial evaluation of a murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease. 1 0.44 [H];;

Hormonal issues, night sweats; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures. 1

r/o pituitary tumor; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have a sudden severe, chronic or recurring or a thunderclap headache. 1
Chest pain describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT.; CT imaging surveillance.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

It; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain.; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Checking for microcalcifications due to decreased T score in L1 through L4.; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above.

post op pain. per caller pt had hysterectomy 8/16/2017; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT.

This is a request for CT Angiography of the Abdomen and Pelvis.

&lt;Enter answer here - or Type In Unknown If No Info Given.&gt; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/10/17; There has not been any treatment or conservative therapy.; &lt;Describe primary symptoms here - or Type In Unknown If No Info Given &gt; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Patient has a history of thyroid issues; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt;Enter date of initial onset here - or Type In Unknown If No Info Given &gt; It is not known if there has been any treatment or conservative therapy.; &lt;Describe primary symptoms here - or Type In Unknown If No Info Given &gt; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Patient is complaining of blur x one to two months.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

"This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is suspicion of neoplasm, tumor or metastasis.fct"; Yes this is a request for a Diagnostic CT Severe Stenoid Sinusitis and diabetic with new right 6 nerve palsey; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT

This study is being ordered for follow-up to trauma.; This study is being ordered for a metastatic disease.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; It is unknown if there is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; It is unknown if there is a suspicion of an infection or abscess.; It is unknown if this is being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT

Yes, this is a request for CT Angiography of the brain.

Yes, this is a request for CT Angiography of the brain.
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for a neurological disorder.; 3 wks ago; There has not been any treatment or conservative therapy.; macular edema in right eye, optic nerve head swelling in both eyes; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/12/2017; There has not been any treatment or conservative therapy.; visual loss, sudden; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; mva almost exactly two years ago; There has not been any treatment or conservative therapy.; vision loss in the left eye, and pain when turning the eye in any motion; Describe primary symptoms here - or Type In Unknown If No Info Given.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/30/2017; There has been treatment or conservative therapy.; vision loss, sudden; Describe treatment / conservative therapy here - or Type In Unknown If No Info Given.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/30/2017; There has been treatment or conservative therapy.; Describe treatment / conservative therapy here - or Type In Unknown If No Info Given.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Assessment
Unspecified chronic inflammatory disorders of orbit (H05.10); This study is being ordered for Inflammatory/ Infectious Disease.; Unspecified chronic inflammatory disorders of orbit: H05.10.; OS: Discussed diagnosis in detail with patient. unlikely Optic neuritis due to completely normal exam (including color vision being 16/16 correct), most likely orbital inflammation, possibly po; There has been treatment or conservative therapy.; The patient is a 20 year old W woman with complaint of severe pain with left eye movements. When patient looks up, down, or to the side (especially looking right) she has a sharp shooting pain in her temple and a deep ache behind her left eye. There is no; Naproxen 500 mg PO BID and if no improvement in symptoms then may need some oral steroids; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

FOLLOW UP OF PAPILLEDEMA; This study is being ordered for Congenital Anomaly.; 5 YEARS OLD; There has been treatment or conservative therapy.; PAPILLEDEMA WITH SHUNT FAILURE S/P REVISION OF SHUNT, BILATERAL CRANIAL 4 NERVE PALSY; LUMBOPERITONEAL SHUNT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

History of tumor; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

MILD EARLY ADEMA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/13/2017; There has not been any treatment or conservative therapy.; EYE PAIN UPON MOVEMENT, VISION LOSS IN THE LEFT EYE; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ongoing; It is not known if there has been any treatment or conservative therapy.; The Pt has vision loss, monovula esotropia of left eye. Pt has strabismus in bilateral eyes. Pt has history of vision issues since childhood.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
patient complains of left sided head pain near eye with pressure sensation. visual field testing shows minor abnormalities. testing in office indicates imaging studies as next step; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Prior history of cataract surgery in the left eye, but did not show visual improvement. We are concerned with the history of prostate cancer because it can spread to the brain.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

There is a suspicion of an infection or abscess.; This is a request for an Orbit MRI.; It is unknown if there is a history of orbit or face trauma or injury. There is not a suspicion of a bone infection (osteomyelitis); There is a suspicion of an orbit or face neoplasm, tumor, or metastasis.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.

This is a request for an Orbit MRI.; There is a history of orbit or face trauma or injury. unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/14/2017; There has not been any treatment or conservative therapy.; headaches, trying to rule out ms; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for a neurological disorder.; 10/15/17; There has not been any treatment or conservative therapy.; vision loss, black outs after headache, visual disturbance.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Pt suffers from headaches, blacking out and sudden onset of pain; One of the studies being ordered is a Brain MRA.

There is a family history of aneurysm.

The patient has a chronic or recurring headache. Not requested for evaluation of a headache. The headache is not associated with aneurysm, infection, inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

The patient has a chronic or recurring headache. Not requested for evaluation of a headache. The headache is described as chronic or recurring; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for a neurological disorder.; 10/15/17; There has not been any treatment or conservative therapy.; vision loss, black outs after headache, visual disturbance.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for a neurological disorder.; 3 wks ago; There has not been any treatment or conservative therapy.; macular edema in right eye, optic nerve head swelling in both eyes; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/12/2017; There has not been any treatment or conservative therapy.; MBR has esotropia getting worse and has trouble driving vision is blurry; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/30/2017; There has been treatment or conservative therapy.; vision loss in the left eye, and pain when turning the eye in any motion; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; mva almost exactly two years ago; There has not been any treatment or conservative therapy.; &lt;Describe primary symptoms here - or Type In Unknown If No Info Given.>; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; mva almost exactly two years ago; There has not been any treatment or conservative therapy.; &lt;Describe primary symptoms here - or Type In Unknown If No Info Given.>; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Double vision in both eyes, went to ER Tuesday evening, headache begin with onset of diplopia headache was hurting form left back of head to left eye with vertical separation of images and having headache and nausea due to this issue; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

headaches eye pain and brain tumor in the family; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

A typical case as obvious drusen but adima extent beyond disk margin in quite pronounce over disk head with translucency.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

FOLLOW UP OF PAPILLEDEMA; This study is being ordered for Congenital Anomaly.; 5 YEARS OLD; There has been treatment or conservative therapy.; PAPILLEDEMA WITH SHUNT FAILURE S/P REVISION OF SHUNT, BILATERAL CRANIAL 4 NERVE PALSY; LUMBOPERITENEAL SHUNT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

headache; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

headaches eye pain and brain tumor in the family; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).
History of tumor; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

MILD EARLY ADEMA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/13/2017; There has not been any treatment or conservative therapy.; EYE PAIN UPON MOVEMENT, VISION LOSS IN THE LEFT EYE; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

MRI of brain with and without contrast to rule out mass, cerebral venous sinus thrombosis, or chiari malformation. & RxD; & RxD; Patient has daily headaches in addition to ringing in the ears.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ongoing; It is not known if there has been any treatment or conservative therapy.; The Pt has vision loss, monovula esotropia of left eye. Pt is glaucoma suspect. Pt has strabismus in bilateral eyes. Pt has history of vision issues since childhood.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

patient complains of left sided head pain near eye with pressure sensation. visual field testing shows minor abnormalities. testing in office indicates imaging studies as next step; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Patient has optic atrophy and increased eye pressure. Trying to rule out compression lesion.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.
patient was knock down by a cow and hit head on the ground; This study is being ordered for trauma or injury.; 11/10/2017; There has not been any treatment or conservative therapy.; patient is having extreme pain around left and left side of head and blurry vision in left eye, patient is seeing a glear out out the peripheral on the right side; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

PERIFERAL VISION LOSS; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/anuryism, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have diziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Prior history of cataract surgery in the left eye, but did not show visual improvement. We are concerned with the history of prostate cancer because it can spread to the brain.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Pt suffers with headaches, blacking out and sudden onset of pain.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sisted weakness, speech impairments, or vision defects.

unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/14/2017; There has not been any treatment or conservative therapy.; headaches, trying to rule out ms; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; diplopia; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; diplopia; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

This is a request for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sisted weakness, speech impairments, or vision defects.

unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/14/2017; There has not been any treatment or conservative therapy.; headaches, trying to rule out ms; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; diplopia; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; diplopia; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for orbit, face, or neck soft tissue MRI.239.8; The study is ordered for trauma or injury of the orbit, face or neck soft tissue continued neck pain after failed conservative treatment; "This is a request for orbit, face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection,cancer, mass, tumor, pre or post-operative evaluation

1
Orthopedics Approval 70544 Mr angiography head w/o dye
There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.

Orthopedics Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

Orthopedics Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

Orthopedics Approval 71250 CT CHEST, THORAX
This study is being ordered for a pre-operative evaluation.; Yes this is a request for a Diagnostic CT

Orthopedics Approval 71250 CT CHEST, THORAX
There is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being requested for known or suspected inflammatory disease such as sarcoidosis, pneumoconiosis, asbestosis, silicosis; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT

Orthopedics Approval 71250 CT CHEST, THORAX
'None of the above' describes the reason for this request.; Abnormal imaging (xray) finding was relevant in the diagnosis or suspicion of inflammatory lung disease; This study is being requested for known or suspected inflammatory disease such as sarcoidosis, pneumoconiosis, asbestosis, silicosis; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT

Orthopedics Approval 71250 CT CHEST, THORAX
There is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being requested for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

Orthopedics Approval 71250 CT CHEST, THORAX
This study is being ordered for follow-up to trauma.; "The ordering physician is a surgeon, pulmonologist, or cardiologist.".; This is a request for a chest MRI.

Orthopedics Approval 71550 MRI CHEST
This study is being ordered for inflammatory disease.; The ordering physician is a surgeon or pulmonologist.; This is a request for a chest MRI.

Orthopedics Approval 71215 CT CERVICAL SPINE, NECK SPINE NO CONTRAST
; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.
AP and lateral x-ray of the cervical spine ordered, obtained, and interpreted today reveals no change from previous x-rays the cervical spine. He thinks he has slight increased lordosis. Radiolucency noted through the fusion, question pseudoarthrosis; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1. Status post ACDF, C6-7, on 11/21/14 with progressive right upper extremity radiculopathy; There has been treatment or conservative therapy.; She has several month history of progressive right intrascapular pain radiate down the right arm. She is undergoing chiropractic care which recently has made the right-sided neck pain worse. She has been anti-inflammatories and muscle relaxers including; physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Colin McCandles patient is a 46-year-old male we have followed primarily for nonradicular neck pain. This is predominantly on the left, associated with headaches, constant posterior neck pain, limited range of motion.&lt;br&gt;We have seen him since 2016, a w; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI. 1

Patient had MRI Cervical, results of MRI Cervical recommend CT Spine.&lt;br&gt;Extensive overgrowth of the right facet at C3 3-4 with narrowing of;&lt;br&gt;that neural canal. Please consider a CT scan for closer evaluation of&amp;rdquo; this area.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI. 1

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Abnormal gait. 1

This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT 2

; This is a request for a thoracic spine CT.; There is no reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT 1

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; 26-year-old female with known history of adolescent idiopathic scoliosis. She has severe right-sided thoracic pain and mild left-sided lumbar pain. She has some shoulder, waist and breast asymmetry which bothers her. She has pain occasionally down the.; She has had 5 different courses of physical therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology 1

Orthopedics Approval 72131 CT LUMBAR SPINE, LOW BACK

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/13/2017; There has been treatment or conservative therapy.; severe right sided low back pain; Patient has been seeing a Chiropracter; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Orthopedics Approval 72131 CT LUMBAR SPINE, LOW BACK

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1. Severe kyphoscoliosis, 100 kyphosis; 2. Post polio syndrome; 3. Severe degenerative disc disease and stenosis at L4-5; 4. Status post thoracolumbar fusion 40 years ago with Harrington rod, currently removed; There has been treatment or conservative therapy.; 62-year-old female with post polio syndrome who has a chronic progressive history of moderate to severe back pain radiating to both legs bilaterally. The pain is burning and piercing. The pain is getting worse. Rest and heat does help. The patient als; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Orthopedics Approval 72131 CT LUMBAR SPINE, LOW BACK

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/18/17; There has been treatment or conservative therapy.; Persistant low back pain. left sided thoracolumbar pain. Post lumbar spine fusion L4 to the sacrum; Physical therapy, Medication and lifestyle modification; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Orthopedics Approval 72131 CT LUMBAR SPINE, LOW BACK

1. Grade 1 degenerative spondylolisthesis, L4-5 with lateral recess narrowing, foraminal narrowing with bilateral radiating numbness and tingling; 2. Grade 1 mild degenerative spondylolisthesis, L3-4; 3. Multilevel lumbar degenerative disc disease; This study is being ordered for a neurological disorder.; 12/16/2014; There has been treatment or conservative therapy.; Grade 1 degenerative spondylolisthesis, L4-5 with lateral recess narrowing, foraminal narrowing with bilateral radiating numbness and tingling; Grade 1 mild degenerative spondylolisthesis, L3-4; Multilevel lumbar degenerative disc disease; Outpatient physical therapy.; Home exercise program; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
AP and lateral x-ray of the lumbar spine ordered, obtained, and interpreted today reveals grade 1 spondylolisthesis did not at L3-4. Prior anterior fusion at L5-S1. L4-5 looks okay on x-ray alignment wise but has had a prior decompression posteriorly. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/16/2017; There has been treatment or conservative therapy.; 58-year-old gentle status post multiple spinal surgeries. He has the main issue is severe back pain radiating to the left buttock and leg mainly above the knee ongoing with standing and walking. He can only stand and walk for very short periods before he has had epidural injections and physical therapy. He has had 3 prior spinal surgeries.&lt;#x0D; 2008 L5-S1 fusion with Dr. Greenberg;&lt;#x0D; 2013 L4-5 laminectomy by Dr. adametz;&lt;#x0D; 2013 L3-4 laminectomy by Dr. adametz; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology. For some reason the patient's insurance company is declining further imaging. The patient has a very dermatomal postoperative radiculopathy that worse than before surgery. She is now developing neurologic deficit and foot drop. This may could have been; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.; Yes this is a request for a Diagnostic CT. This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT. This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT. This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.; Yes this is a request for a Diagnostic CT. This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.; Yes this is a request for a Diagnostic CT. This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT. &lt;Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Document exam findings; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in digit in hand; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; Pain getting severe, aching burning, throbbing, cold sensations in upper extremity.; medications, home exercise, injection.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2005; There has been treatment or conservative therapy.; Pain getting severe, aching burning, throbbing, cold sensations in upper extremity.; medications, home exercise, injection.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for Vascular Disease.; 2012; There has not been any treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Positive for weakness in right arm.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms; There is weakness; 55-year-old white male bilateral shoulder rotator cuff arthropathy. He does have mildly decreased grip strength bilaterally. Anterior deltoid is intact. MRI of the C-spine is ordered today to rule out neuropathic shoulder and/or C-spine involvement. 1; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Mild Weakness of both upper extremities was observed, Light touch sensation is diminished through the left upper extremity.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/17; There has been treatment or conservative therapy.; over the last year so she is been developing worsening back pain and a lump in her lower back on the left side.; a popping sensation. She also leans forward and has some difficulty with at extending back up from a flexed position. some shoulder discomfort; She is able to get some pain relief with wearing a brace. She takes Aveve prescription strength for her pain and uses an over-the-counter sleep aid.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/30/15; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 years; There has been treatment or conservative therapy.; This patient states that she is had persistent problems with left shoulder and neck pain for approximately 2 years. She had this evaluated in Batesville, Arkansas couple of years ago. She was told at that time that she had some sore muscles and was give; Cortisone Injection; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST

AP and lateral x-ray of the cervical spine ordered, obtained, and interpreted today reveals no change from previous x-rays the cervical spine. He thinks he has slight increased lordosis. Radiolucency noted through the fusion, question pseudoarthrosis; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1. Status post ACDF, C6-7, on 11/21/14 with progressive right upper extremity radiculopathy; There has been treatment or conservative therapy.; She has several month history of progressive right intrascapular pain radiate down the right arm. She is undergoing chiropractic care which recently has made the right-sided neck pain worse. She has been anti-inflammatoryes and muscle relaxers including; physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

His curvature is rather severe. It is definitely contributing to his back pain. It is likely to continue to progress throughout his life in cause progressive disability and possibly pulmonary impairment.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/26/17; There has not been any treatment or conservative therapy.; WORSENING THORACIC AND LUMBAR BACK PAIN; SCOLIOSIS, SOMETIMES WEAKNESS, AS WELL AS INTERMITTENT NUMBNESS ALONG 1 SIDE OF THE BODY; INTERMITTENT MUSCLE CRAMPS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
IMPRESSION: #1. C-spine herniated nucleus pulposus versus foraminal stenosis with C6 and C7 radiculopathy left more symptomatic and right; &h=x0D; &h=x0D; &h=x0D; &h=x0D; &h=x0D; &h=x0D; PLAN:&h=x0D;: #1. Secondary to his continued pain in his main complaints with with weakness and upper extrem; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.;

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.;

Patient has tried Tylenol, Ibuprofen and Aleve with no relief. It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt has weakness on the right hand; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/21/2016; There has been treatment or conservative therapy.; Piercing pain in back with radiculopathy to the extremities; Difficulty walking, tingling and numbness in extremities; Nonsteroidal anti-inflammatory medications, lifestyle modifications, spinal exercises and failed x 6 weeks; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.;

Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

numbness in left hand. Left sided radiculopathy.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Numbness, and hurts when touching, Inflation.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Review of Systems ros negative except as stated above in HPI;&h=x0D; Physical Exam
The patient is in no apparent distress is alert oriented times 3 and has hearing and comprehension intact to the spoken word. Their respirations are even and unlabored.&h=x0D; Imaging; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
She returns today for recheck of her right shoulder pain. She reports minimal improvement since starting physical therapy. She continues to have substantial catching. She also describes episodes circumferential nondermatomal weakness in the right shoul; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/1/17; There has been treatment or conservative therapy.; right shoulder pain, weakness; She reports minimal improvement since starting rest, physical therapy, or anti-inflammatories.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.
There seems to be a disconnect between the nerves that originate in her neck and the muscles they control. This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; scapular winging and dyskinesia. Radiating and burning shoulder pain from her shoulder down to her arm. numbness and tingling. weakness with shoulder flexion, extension, abduction, and adduction; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; Follow-up to Surgery or Fracture within the last 6 months

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; None of the above; &lt;Enter Additional Clinical Information&gt; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.

This is a request for cervical spine MRI; Pre-Operative Evaluation; No, the last Cervical spine MRI was not performed within the past two weeks.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.
This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; Trauma or recent injury; C4 injury of spinal cord; Neck pain; Quadriplegia; It is not known if the patient have new or changing neurological signs or symptoms.; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; 26-year-old female with known history of adolescent idiopathic scoliosis. She has severe right-sided thoracic pain and mild left-sided lumbar pain. She has some shoulder, waist and breast asymmetry which bothers her. The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.

Hips: Bony Palpation Right: tenderness of the SI joint and the greater trochanter. Bony Palpation Left: tenderness of the SI joint and the greater trochanter. Soft Tissue Palpation Right: no tenderness of the hip flexor muscles. Soft Tissue Palpation Left; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Mr. Johnson returns for follow up of his chronic bilateral sciatica, left greater than right, with a history of foraminal stenosis bilaterally at L3-4 and L4-5. We have not seen him for about twenty months. He had two LESI's ordered the last time I saw; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Weakness of left lower extremities was observed.&lt;#x0D; Patellar and achilles tendon reflexes 2+ bilaterally.&lt;#x0D; Light touch sensation is diminished throughout left&lt;#x0D; lower extremity. Positive left straight leg raise.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness and instability of lower extremities with positive Ovcrs test on right side; positive Gaenlen's test as well.x-rays of lumbar spine unremarkable.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Right knee positive grind sign motion is full. Mildly positive straight leg raise test on right. Diminished strength in the L4-L5 and S1 distributions and diminished sensation in the L4 distribution as well. No long track signs noted; The patient does not have acute or chronic back pain.; The patient has none of the above.; This procedure is being requested for Trauma or recent injury.
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; 26-year-old female with known history of adolescent idiopathic scoliosis. She has severe right-sided thoracic pain and mild left-sided lumbar pain. She has some shoulder, waist and breast asymmetry which bothers her. She has pain occasionally down the ; She has had 5 different courses of physical therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

1
AP and lateral x-ray of the lumbar spine ordered, obtained, and interpreted today reveals grade 1 spondylolisthesis did not at L3-4. Prior anterior fusion at L5-S1. L4-5 looks okay on x-ray alignment wise but has had a prior decompression posteriorly. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. 08/16/2017; There has been treatment or conservative therapy. 58-year-old gentle status post multiple spinal surgeries. He has the main issue is severe back pain radiating to the left buttock and leg mainly above the knee ongoing with standing and walking. He can only stand and walk for very short periods before he has had epidural injections and physical therapy. He has had 3 prior spinal surgeries. 2008 L5-S1 fusion with Dr. Greenberg. 2013 L4-5 laminectomy by Dr. adametz; 2013 L3-4 laminectomy by Dr. adametz; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Chronic low back pain with history of disc hernation. It is hard to say what is going on. She had an MRI scan done about 2 years ago, but we do not have it or the report. Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Chronic low back pain. Persistent Thoracolumbar pain persistent obesity class III; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Chronic low back pain. Persistent obesity class III; Thoracolumbar pain persistent obesity class III; Possible facetogenic obesity class III; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

FACET JOINT ARTHROSIS THROUGH OUT THE LUMBAR SPINE, NUMBNESS IN LEFT FOOT; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

For some reason the patient’s insurance company is declining further imaging. She is now developing neurologic deficit and foot drop. This may could have been; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. Low back pain with occasional radiating leg pain; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; It is not know if the patient has seen the doctor more then once for these symptoms.

His curvature is rather severe. It is definitely contributing to his back pain. It is likely to continue to progress throughout his life in cause progressive disability and possibly pulmonary impairment.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/26/17; There has not been any treatment or conservative therapy.; WORSENING THORACIC AND LUMBAR BACK PAIN; SCOLIOSIS, SOMETIMES WEAKNESS, AS WELL AS INTERMITTENT NUMBNESS ALONG 1 SIDE OF THE BODY; INTERMITTENT MUSCLE CRAMPS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
On physical examination, there is pain to palpation of the lower lumbar spine. There is pain to flexion and extension of the lower lumbar spine. There is pain to straight leg raising on the involved side, and to a lesser degree on the uninvolved side. The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; On physical examination, there is pain to palpation of the lower lumbar spine. There is pain to flexion and extension of the lower lumbar spine. There is pain to straight leg raising on the involved side, and to a lesser degree on the uninvolved side. The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Pain is severe in intensity and burning, sharp in nature. Pain is getting worse. Pain radiates into the right buttock, thigh, shin to the ankle. Positive for numbness, tingling. Pain is aggravated with bending, lifting, standing, stairs, walking, exert; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; There does have new or changing neurologic signs or symptoms.; There is weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Patient is 6 months post decompression and interbody fusion at L5-S1. Last week developed low back pain radiating posteriorly in her hamstrings down to her right knee. She has a positive straight leg raise on the right side. She is currently using medic; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.; Patient was in for a follow up on her microdiskectomy L5-S1 done August 2, 2017. Pt is having sporadic back pain with a pulling sensation in her legs; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.; Review of Systems ros negative except as stated above in HPI. Physical Exam the patient is in no apparent distress is alert oriented times 3 and has hearing and comprehension intact to the spoken word. Their respirations are even and unlabored.; Imag; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. She returns today to discuss severe low back pain which radiates down bilateral legs to the knees in an L5 dermatomal distribution. This is worse constantly without any improving position or therapy. She previously has tried physical therapy and medicat; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Left Hip: tender to palpation at the distal gluteus medius. Flexion 100, FIR 20, FER 45.; Right Hip: tender to palpation at the distal gluteus medius. Flexion 100, FIR 20, FER 45.; Her previous MRI showed a disc herniation at L5/S1 with no evidence of s1
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new or changing neurologic signs or symptoms.; The patient does not have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Follow-up to Surgery or Fracture within the last 6 months; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

The study requested is a Lumbar Spine MRI.; Pre-Operative Evaluation; No, the last Lumbar spine MRI was not performed within the past two weeks.; Surgery is scheduled within the next 4 weeks.

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection
This is a 44-year-old female who presents with low back pain. She has a few month history of back pain, reports pain started around the past summer. Denies any injury. Pain is moderate to severe in intensity and she has pain at night. Pain is aching; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/2017; There has been treatment or conservative therapy.; Medial and lateral pain in her knee, painful walking, trouble getting up and down.; OTC pain relievers, and some physical therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Unknown; This study is being ordered for staging; Known Tumor with or without metastasis; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.

**Orthopedics Approval**

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

X-rays on R showed no fracture, no degenerative changes, loss of disc space height arthropathy L4-5, slight calcification of the arterial vessel to the lumbar spine; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Flexion and extension is limited to no more than 50 degrees flexion and 0 degrees of extension, tender to palpation lower back, no dimension on the lateral side of the R, reflex 1/4 on the patellar; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

X-rays were taken today and show moderate DJD of the lower lumbar spine without spondylolisthesis; On physical examination there is moderate pain to palpation of the lower lumbar spine. There is pain to flexion and extension of the lower lumbar spine as w; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above BONE LESION; This study is being ordered because of a suspicious mass/ tumor.; "Caller doesn't know if patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT

This is a request for a Pelvis MRI.; The study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; don't know; There has been treatment or conservative therapy.; swelling; not sure; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY There is a history of upper extremity joint or long bone trauma or injury.; This is a request for an Arm CT Non Joint; Yes this is a request for a Diagnostic CT 1
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY There is not a history of upper extremity joint or long bone trauma or injury.; This is a preoperative or recent postoperative evaluation.; This is a request for an Arm CT Non Joint; Yes this is a request for a Diagnostic CT 1
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.; This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT 65
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT 1
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT 18
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT 7
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT 1
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT 1
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT 1
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT 1
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT 1
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT 1
Orthopedics Approval 73200 CT ARM OR UPPER EXTREMITY This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT 1

Orthopedics Approval 73206 CT ANGIOGRAPHY UPPER EXTREMITY Yes, this is a request for CT Angiography of the upper extremity. 1
Orthopedics Approval 73206 CT ANGIOGRAPHY UPPER EXTREMITY &lt;Enter answer here - or Type In Unknown If No Info Given.&gt;; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. 1
Orthopedics Approval 73206 CT ANGIOGRAPHY UPPER EXTREMITY &lt;Enter answer here - or Type In Unknown If No Info Given.&gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology 1

Orthopedics Approval 73206 CT ANGIOGRAPHY UPPER EXTREMITY &lt;Enter answer here - or Type In Unknown If No Info Given.&gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology 1
Due to persistent pain and swelling per the patient with a normal x-ray and lack of response to anti-inflammatories recommended a MRI for further evaluation. An MRI of the Right Wrist was ordered. The patient is to return when the result of MRI is available; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. 

- There has not been any treatment or conservative therapy. 
- Pain is severe with a rating of 10/10. She describes the symptoms as aching. The symptoms come and go. Since the onset, she reports the problem is getting worse. The symptoms are made worse with gripping. The patient experiences swelling, numbness, stiffness. 
- One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
- The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
- The request is for an upper extremity non-joint MRI; This is not a preoperative or recent postoperative evaluation.
- There is not suspicion of upper extremity bone or soft tissue infection.
- The ordering physician is an orthopedist.

Orthopedics Approval
73221 MRI JOINT OF UPPER EXTREMITY

Surgery or arthroscopy is not scheduled in the next 4 weeks. The request is for shoulder pain. There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Orthopedics Approval
73221 MRI JOINT OF UPPER EXTREMITY

The requested study is a Shoulder MRI. The pain is from a recent injury. Surgery or arthroscopy is not scheduled in the next 4 weeks. The request is for shoulder pain. There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Orthopedics Approval
73221 MRI JOINT OF UPPER EXTREMITY

As a result of persistent pain and swelling per the patient with a normal x-ray and lack of response to anti-inflammatories recommended a MRI for further evaluation. An MRI of the Right Wrist was ordered. The patient is to return when the result of MRI is available. There has not been any treatment or conservative therapy. Pain is severe with a rating of 10/10. She describes the symptoms as aching. The symptoms come and go. Since the onset, she reports the problem is getting worse. The symptoms are made worse with gripping.

Orthopedics Approval
73221 MRI JOINT OF UPPER EXTREMITY

There are no skin wounds or rashes, no erythema, stiffness, or swelling. One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering MD's specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, or Surgical Oncology or Radiation Oncology. The patient experiences swelling, numbness, stiffness.

Orthopedics Approval
73221 MRI JOINT OF UPPER EXTREMITY

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The patient has not completed 6 weeks or more of Chiropractic care. The physician has not directed a home exercise program for at least 6 weeks. Two of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Orthopedics Approval
73221 MRI JOINT OF UPPER EXTREMITY

The patient has been treated with medication. The patient has not completed 6 weeks of physical therapy. The patient has not completed 6 weeks of physical therapy. Xanax.

Orthopedics Approval
73221 MRI JOINT OF UPPER EXTREMITY

The patient received medication other than joint injections(s) or oral analgesics. Has been to physical therapy and had steroid injection of which only helped about a week. The requested study is a Shoulder MRI. The pain is from a recent injury. Surgery or arthroscopy is not scheduled in the next 4 weeks. The request is for shoulder pain. There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.
He has pain right over the radiostyloid and x-rays do show some bone changes in this area also consistent with a distal radius fracture.; The pain is from a recent injury.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.

Orthopedics Approval 73221 MRI JOINT OF UPPER EXTREMITY

He has previously had right rotator cuff repair 12/22/2016. He fell down stairs approximately one month ago and has had limited range of motion and pain. MRI is ordered to evaluate the rotator cuff.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Orthopedics Approval 73221 MRI JOINT OF UPPER EXTREMITY

LEFT shoulder pain after she fell directly on her shoulder on 11/1/17. No pain at night. No associated numbness and tingling.; No previous surgeries or problems with this shoulder. &xD; The pain is described as a stabbing, burning pain that is constant and.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

Orthopedics Approval 73221 MRI JOINT OF UPPER EXTREMITY

left shoulder pain not relieved after steroid injection.; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.

Orthopedics Approval 73221 MRI JOINT OF UPPER EXTREMITY

No relief from pain with surgery, medication and steroid injections..Upper extremity pain with paresthesias and weakness down to his hands. has had some balance issues with frequent falls. Pain is severe and getting worse; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/19/16; There has been treatment or conservative therapy.; Bilateral upper extremity pain. Upper sternum pain with paresthesias and weakness down to the bilateral hands.; Cervical Spine surgery, medication and steroid injections; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

None; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.

Orthopedics Approval 73221 MRI JOINT OF UPPER EXTREMITY

PAIN W/ ACTIVITY, IN BRACE, MEDS, HOME EXER; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.
Patient has not improved with conservative treatment including physical therapy, rest, subacromial injection, and trigger point injections. Left shoulder pain with scapulothoracic dysfunction. The right shoulder shows on exam: impingement sign is positive; This study is being ordered for trauma or injury.; May 2013; There has been treatment or conservative therapy.; Pain, stiffness, clicking, popping and weakness; The symptoms have improved with bracing. The symptoms are made worse with physical therapy. There has been no change in the symptoms with heat, rest and injection. Physical therapy started 2015. Injection(s) started Steroid injection 11/2/2016, 5/11/2017; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Orthopedics Approval 73221 MRI JOINT OF UPPER EXTREMITY

Patients initial injury was 7/10/17. Patient was seen at Emergent Care same day with x-rays taken. Patient saw PCP one week later. Patient is taking NSAIDS. Patient referred to us 10/10/17. Patients x-rays reviewed. Patient given steroid injection. Patient; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear. 1

Orthopedics Approval 73221 MRI JOINT OF UPPER EXTREMITY

Positive Rent test and limited range of motion. MRI is ordered for evaluation.; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks. 1

Orthopedics Approval 73221 MRI JOINT OF UPPER EXTREMITY

Post seizure weakness is of concern for significant cuff tear in left shoulder and cuff re-tear of right shoulder.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Very nice 45-year-old underwent repair of very large right rotator cuff tear 3 months ago. He had recovered quite nicely in and resumed work without difficulty. I had discussed precautions at work with him. He finished his normal work day 4 days ago witho 2

Orthopedics Approval 73221 MRI JOINT OF UPPER EXTREMITY

Post seizure weakness is of concern for significant cuff tear in left shoulder and cuff re-tear of right shoulder. &xOD; &xOD; bilateral shoulder weakness; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
pt had mva 14.17, + hawkins + cross chest adduction, r/o cuff tear.; the requested study is a shoulder mri.; the pain is from a recent injury.; it is not know if surgery or arthroscopy is scheduled in the next 4 weeks.; the request is for shoulder pain.; there is a suspicion of tendon, ligament, rotator cuff injury or labral tear. reaching out to pick something up is a problem. activities such as driving bother him. he is able to reach the lumbar spine but this causes a pulling sensation in his anterior shoulder, he can reach overhead but only with pain. dr ball felt his symptom; the requested study is a shoulder mri.; the pain is described as chronic; the request is for shoulder pain.; it is not known if the physician has directed conservative treatment for the past 6 weeks.

right shoulder demonstrates tenderness over the ac joint, positive cross body adduction test, positive o'brien's; the requested study is a shoulder mri.; the pain is not from a recent injury, old injury, chronic pain or a mass.; the request is for shoulder pain.

right shoulder pain after a fall while working on the tow boats in late 2014. pt has pain at night. some associated numbness and tingling in the hand going up the arm. pt had a mri on this shoulder in 2015 and was told at that time he had just sprained/s; the requested study is a shoulder mri.; the pain is from an old injury.; the request is for shoulder pain.; the physician has not directed conservative treatment for the past 6 weeks.

rotator cuff tear; the requested study is a shoulder mri.; the pain is described as chronic; the request is for shoulder pain.; the physician has directed conservative treatment for the past 6 weeks.; it is not known if the patient has completed 6 weeks of physical therapy?; the patient has been treated with medication.; it is not known if the patient has completed 6 weeks or more of chiropractic care.; the physician has directed a home exercise program for at least 6 weeks.; the home treatment did include exercise, prescription medication and follow‐up office visits.; nsaids, muscle relaxants and hep for 6 months; the patient received oral analgesics.

rt shoulder pain for several weeks, + cross chest adduction, + neer's, speed's test positive, leaning towards diagnosis of cuff tear; the requested study is a shoulder mri.; the pain is described as chronic; the request is for shoulder pain.; the physician has directed conservative treatment for the past 6 weeks.; the patient has not completed 6 weeks of physical therapy?; the patient has been treated with medication.; the patient has not completed 6 weeks or more of chiropractic care.; it is not known if the physician has directed a home exercise program for at least 6 weeks.; the patient received oral analgesics.

rtc tear. mva 9/28/15 has bothered her for 2 years.
symptoms: pain, numbness, tingling in arms, crepitus, decreased mobility, joint instability, joint locking, joint tenderness, popping, weakness. physical exam: bilat strength decreased. bilat positives haw; one of the studies being ordered is a breast mri, ct colonoscopy, ebcg, mrs, pet scan, or unlisted ct/mri.
She returns today for recheck of her right shoulder pain. She reports minimal improvement since starting physical therapy. She continues to have substantial catching. She also describes episodes circumferential nondermatomal weakness in the right shoul; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/1/17; There has been treatment or conservative therapy.; right shoulder pain, weakness; She reports minimal improvement since starting physical therapy. This has not improved despite rest, physical therapy, or anti-inflammator; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Since he has failed conservative treatment I think he should have an MRI performed. We will order that and see him back once it is completed.; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear. Surgery not scheduled but will be once we get a confirmation through MRI that it is a left distal biceps rupture Surgery will be scheduled right away.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.

The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months.; This is a request for an elbow MRI; The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months.; This request is for a wrist MRI; This study is requested for evaluation of wrist pain.

The pain is from a recent injury.; Surgery or arthroscopy is scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; This request is for a wrist MRI; This study is requested for evaluation of wrist pain.

The patient does have a biceps rupture. The patient does have atrophy of the supraspinatus and infraspinatus. The patient does have SA crepitation. The patient does have pain with range of motion. The patient does have pain with strength testing.; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; Mobic; The patient received medication other than joint injections(s) or oral analgesics.
The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.";

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.";

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.";

The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.";

62-year-old known to me from previous open left rotator cuff surgery years ago fell on her dominant right shoulder 2 weeks ago at home. Severe pain and some weakness since. She felt to have before meals sprain in the ER and sling was applied. Denies pri

Acute, severe onset of R shoulder pain. Examination shows a Positive Hawkins Impingement, Kim Test Positive. O'Brien Positive. Significant tenderness to palpation at the biceps groove with tenderness at the greater tuberosity, AC joint and posterior joi

Impingement provocative positions. cuff generates less than expected force on super spinatus testing and is very painful. She has some prominence at the A.C. joint but no instability

Pain and weakness in the right shoulder. Patient has completed physical therapy but is not doing any better. He has a positive Jobe Impingement, positive Hawkins Impingement.

Patient is unable to elevate her shoulder. Severe pain with extremes of abduction, Hawkins test is positive, Neers test is positive. Patient has a probable torn rotator cuff..
The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; possible rotator cuff tear. Pain for over a year.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Pt complaining of L shoulder pain for several months. difficulty raising overhead, and radiating to her elbow. painful at night.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Referred here today for right shoulder pain. He has had right shoulder pain for the last couple of years. He has had 2 previous C-spine surgeries which have relieved some of his radicular arm pain. He just moved from New York. He had an MRI one year ago.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Right shoulder demonstrates tenderness over the AC joint, positive cross body adduction test, positive O'Brien

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; shoulder exam

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; shoulder pain chronic.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Shoulder pain has persisted for the last 5 or 6 months. Diclofenac helps but only temporarily. He had left shoulder arthroscopic cuff repair from near complete tear by me last year as well as large SLAP repair done 17 months ago. In recent months he's had.

The requested study is a Shoulder MRI; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; suspected rotator cuff tear.

The requested study is a Shoulder MRI; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment;

The requested study is a Shoulder MRI; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment; &lt;Enter answer here - or Type In Unknown If No Info Given. &gt;

The requested study is a Shoulder MRI; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment; Chronic right shoulder pain for greater than one year.
The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; Doctor suspect Labral Tear / RCT

He does not remember a specific history of trauma. He is complaining of significant weakness in his left shoulder

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; Patient had a fall onto the right shoulder

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; She has had left shoulder pain on and off for years but the pain has worsened in the past 3 weeks. She has tried conservative treatment of heat, rest and Tylenol without relief. X-rays were negative from orthopedic standpoint. Cross arm test is positive for

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; She has right shoulder pain on and off for years but the pain has worsened in the past 3 weeks. She has tried conservative treatment of heat, rest and Tylenol without relief. X-rays were negative from orthopedic standpoint. Cross arm test is positive for

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; 11.17.17 pt was cleaning off the kitchen table and she tripped over a dog and fell onto the shoulder. concern for acute rotator cuff tear AC joint compression + and Hawkins +
The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; 11.9.17 pt had football injury and fell onto outstretched arm, subluxation

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; INJURY 11/28/17 LIFTING WORKING OUT. SYMPTOMS: PAIN, NUMBNESS, TINGLING IN ARM, CREPITUS, JOINT INSTABILITY, JOINT LOCKING, POPPING, SPASMS. LIMITED ROM. STABILIT/LAXITY-ANTERIOR APPEHENSION-LEFT POSITIVE. RELOCATION- LEFT - POSITIVE. 12/12/17 XRAY- NORMA

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Patient has deficits in or problems with: pain, decreased function

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Pt has pain with crossover testing, some weakness with supraspinatus isolation testing, pain with impingement testing, and pain with direct palpitation over the a.c. joint

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Reginald Blanton is a 52-year-old with complaints of bilateral shoulder pain, left greater than right. &x0D;&x0D; Past medical history and review of systems: Hypertension, GERD, history of peptic ulcer, obesity &x0D;&x0D; Allergies: Ibuprofen &x0D;&x0D; Blood pressure

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; It is not known if the patient is experiencing joint locking or instability.; The patient has a documented limited range of motion on physical examination. &x0D;&x0D; The patient is NOT experiencing joint locking or instability.; The patient does not have a documented limited range of motion on physical examination.
The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; There are documented findings of pain.; It is not known if there are documented findings of crepitus.; It is not known if there are documented findings of swelling.; It is not known if the patient is experiencing joint locking or instability.; It is not known if the patient has a documented limited range of motion on physical examination.

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were not normal.  

The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The results of the plain films is not known.; It is not known if the patient is experiencing joint locking or instability.; The patient has a documented limited range of motion on physical examination.  

The requested study is a Shoulder MRI.; Study being ordered for post-operative evaluation.; The ordering physician is an orthopedist.  

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation.; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; Adhesive capsulitis left shoulder which at this point is quite chronic for this individual. His functional loss of motion is quite debilitating. I think this individual is probably going to require an arthroscopic capsulotomy.  

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation.; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; He reports his pain began after he was throwing a rag ball when he felt numbness and pain radiate down the arm. &RxOD; He complains of numbness and tingling in the hand that comes and goes, the numbness is worse at night. He reports he has had some pain prior to this event.  

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation.; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; LEFT shoulder pain secondary to subacromial impingement/bursitis/tendonitis and possible RCT; LEFT shoulder pain secondary to subacromial impingement/bursitis/tendonitis and possible RCT; LEFT shoulder pain secondary to subacromial impingement/bursitis/tendonitis and possible RCT; LEFT shoulder pain secondary to subacromial impingement/bursitis/tendonitis and possible RCT; Glenohumeral arthritis, Mild AC joint arthritis, and a Type 2 acromion. LEFT shoulder pain secondary to subacromial impingement/bursitis/&RxOD; tendonitis. Need an MRI to R/O RCT.
The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; Outside x-rays RT shoulder show non displaced clavicle fracture and minimally displaced scapula fracture. MRI to R/O labral tear vs. RCT and follow up with results. Pt to continue sling until f/u. Steroid DP and Mobic prescribed.

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; Pt points to the anterior shoulder and down under the arm along the chest wall as her most painful area. She reports not being able to push a door open, or reach back behind without significant pain. She uses Voltaren Gel, and states it helps some. Pt is

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; Pt reports some pain at night when laying on the shoulder. No associated numbness and tingling. No previous surgeries or problems with this shoulder. He reports for a time after the accident, he was unable to raise the arm. He notes some feelings of insta

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; RIGHT shoulder pain since June 2017. No specific injury. Pt reports pain at night. No associated numbness and tingling. No previous surgeries or problems with this shoulder. Pt points to the anterior shoulder as the area of most pain. The pain is describ

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; Significant pain in her right shoulder. X-ray of the right shoulder show &x0D; a-c arthritis and subacromial spurring, with a probable rotator cuff tear. Additionally there is biceps tendinitis present.

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; The pain is described as sharp, achy pain that is constant and varies from 4-8 out of 10 in severity. &x0D; The pain is worse with overhead activity and reaching behind and better with rest and medications. Pt reports he has had steroid injections before. Pt

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; The pain is worse with lifting heavy objects and better with rest and medications. &x0D; She reports the past injections have helped some. &x0D; No medications. Her previous MRI showed a partial RCT.
The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; This left him dangling using his left arm for suspension support. He is been having substantial pain and soreness in the anterior lateral aspect of his left shoulder since that time. This man notes he is unable to do any weight workouts secondary to sev.

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; This young lady describes a snapping sensation she gets around her coracoid process on an occasional basis. She cannot recall any specific problem that causes this. She denies any trauma with the right shoulder. She rates her pain 8 on a 10 point scale.

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery; It is not known if the study is for pre-operative planning; &lt;Enter answer here - or Type In Unknown If No Info Given.&gt; 1

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery; It is not known if the study is for pre-operative planning; on his non contrast MRI the radiologist reported some irritation of the glenoïd and suggested an MRI with contrast to delineate this further.

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery; 5

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery; 2

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery; continues with shoulder pain, positive neer and jobe, eval for surgery.

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery; Description: moderate, severe and intermittent; Quality: burning, sharp and stabbing; Location: diffuse; Exacerbating factors: Overhead activities, lifting; Alleviating factors/Previous Non surgical Treatment: RICE, otc meds, HEP, RX meds yes, PT yes, injec.

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery; Dr. Johnson is afraid patient has torn her rotator cuff. Patient can not raise her arm due to pain. Dr. Johnson thinks she has either a partial or full thickness tear of her rotator cuff. Needing an MRI to confirm this.

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery; Dr. Johnson thinks this patient has a SLAP tear from his MVA.
The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery; Exam:

Orientation: Alert and oriented to person, place, time.
Mood: mood and affect well-adjusted, pleasant and cooperative, appropriate for clinical and encounter circumstances.

Appearance: well developed and nourished.
LN Exam: 1

If indicated by MRI, patient will proceed with Rotator Cuff Repair.

laberal tear, and glenoid dysplasia and ossification.

Possible rupture of biceps tendon

right shoulder reveal; AP film shows a normal positioned humeral head with Severe acromioclavicular degenerative changes.
Outlet reveals a type 2 acromion. no
The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery; possible rotator cuff tear, popping, locking and instability.

Possible rupture of biceps tendon

The patient has history of right shoulder arthroscopy with the compression of subacromial space September 22, 2017. She did well in the postoperative period with physical therapy and enjoyed relief of shoulder pain. However the patient:

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery; Right shoulder pain: The patient has history of right shoulder arthroscopy with the compression of subacromial space September 22, 2017. She did well in the postoperative period with physical therapy and enjoyed relief of shoulder pain. However the patient:

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery; Right shoulder pain: The patient is a 43-year-old male presenting with right shoulder pain after a fall sustained on November 18, 2017. Apparently he was getting out of the bathtub slipped on a wet surface falling injuring right shoulder. Later examiniation

The patient has one week old injury where he felt a pop and now has a bicep deformity

Patient has pain when lifting his arm up. Has failed NSAIDS

The patient has tried AC injections and couple months ago however pain/problem with shoulder continues. Pt has been on pain meds Tramadol and Flexeril 12+ weeks with no relief. MRI needed to assess and treat

The patient is a 43-year-old male presenting with right shoulder pain after a fall sustained on November 18, 2017. Apparently he was getting out of the bathtub slipped on a wet surface falling injuring right shoulder. Later examination

The requested study is a Shoulder MRI; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery; Positive jobe, neer, and crossover adduction. Three views obtained in our office today of the right shoulder reveal; AP film shows a normal positioned humeral head with Severe acromioclavicular degenerative changes.
Outlet reveals a type 2 acromion. no
The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.; Rotator Cuff tear. Surgery will be performed if indicated by MRI.  

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.; Shoulder pain worried he could have a labral tear limited ROM. 

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.; Suspected full thickness rotator cuff tear needs MRI to diagnosis and treat failed all other care he can barely move arm so he cant do PT anymore and he has a positive empty can sign severe pain subscapularis weakness. 

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.; Suspected Rotator Cuff Tear. 

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.; torn rotator cuff repair. 

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.; XRAY normal. avoid aggressive factors. positive sign for instability. adhesion test cuase. abduction, with internal rotation cuases pain. flexion with internal rotation cuases pain. shoulder abduction 4-5 tenderness is present interior acromial border. u 

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.). "This study is being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is not being ordered prior to arthroscopic surgery.; It is not known if the study is for pre-operative planning.; &lt; Enter answer here - or Type In Unknown if No Info Given. &gt; 

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; The patient has had recent plain films of the shoulder.; The plain films were not normal. 

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient has not had a recent CT of the shoulder. 

The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy? 

The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has completed 6 weeks or more of Chiropractic care.; ; The patient received medication other than joint injections(s) or oral analgesics.
The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has completed 6 weeks or more of Chiropractic care.; The patient received oral analgesics.

The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.

The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.

The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The patient has not completed 6 weeks of physical therapy.; The patient has been treated with medication.; The patient has completed 6 weeks or more of Chiropractic care.; MOBIT; The patient received medication other than joint injection(s) or oral analgesics.

The requested study is a Shoulder MRI.; This study being ordered for suspected aseptic necrosis.; The patient has had recent plain films of the shoulder.; The plain films were not normal.; LEFT SHOULDER PAIN WITH ABNORMAL XRAY CONSISTENT WITH AVASCULAR NECROSIS, EVAL TO SEE HOW EXTENSIVE AND APPROPRIATE SURGICAL PROCEDURE FOR REPAIR

There is pain that radiates down into the deltoid insertion if No Info Given. Some degree of crepitus is noted as well by the patient when they range their right arm.; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.
This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.
This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.
This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is being ordered by the operating surgeon for pre-operative planning.

This patient is seen today for their initial evaluation of right shoulder pain approximately 2 weeks ago this woman experienced the acute onset of pain and soreness in her right shoulder. She felt a popping sensation. She is been unable to lift the arm; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.

Unknown; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; prednisone , naproxen, ibuprofen; The patient received medication other than joint injections(s) or oral analgesics.

Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11-10-17&x0D; 54-year-old white male in today for his shoulders. He reports she has had years of episodic shoulder pain. He has pain during the day with overhead activities and also has night pain. The pain is primarily anterior and lateral. He takes Mobic an; There has been treatment or conservative therapy.; Years of episodic shoulder pain. Pain during the day with overhead activities, night pain. Pain with compression testing. Tenderness in coracoacromial arch and AC joint bilaterally.; Mobic, Steroid injection; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient has had MRI on 9/6/17 which was unremarkable.

There is not a history of lower extremity joint or long bone trauma or injury.; This is a request for a Knee CT.; Yes this is a request for a Diagnostic CT.

"There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle.".; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.; BILATERAL ANKLE PAIN; This is a request for a bilateral ankle MRI.

"There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle.".; There is a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.; MRI bilateral ankles rule out mass lesions on tarsal tunnel.; This is a request for a bilateral ankle MRI.

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; It is not known if the ordering physician is an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; There is no symptom of locking, Instability, Swelling, Redness, Limited range of motion or pain.

This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.; This is a request for a Knee CT.; Yes this is a request for a Diagnostic CT.

No, patient has not completed and failed a course of conservative treatment.
This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Right shoulder pain, Limited ROM, stiffness, popping, knee pain, popping, Locking, stiffness.; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Knee 12/18/2015, shoulder 8/9/2017.; There has been treatment or conservative therapy.; Shoulder and arm pain, worse on movement, pain radiates from lateral shoulder to arm. No improvement with anti-inflammatory; Injection for right knee; steroid injection and ice for shoulder; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Knee 12/18/2015, shoulder 8/9/2017.; There has been treatment or conservative therapy.; Shoulder and arm pain, worse on movement, pain radiates from lateral shoulder to arm. No improvement with anti-inflammatory; Injection for right knee; steroid injection and ice for shoulder; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for trauma or injury.; 10/11/2017; There has not been any treatment or conservative therapy.; pain and popping in shoulder in shoulder and knee.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for known fracture.; The study is NOT being ordered for a routine follow up or for a possible non union fracture.

This is a request for a foot MRI.; The study is being ordered for known fracture.; The study is NOT being ordered for a routine follow up or for a possible non union fracture.

This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for acute pain.
This is a request for a Knee MRI.; The study is requested for knee pain.;
The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; The patient received oral analgesics.

This is a request for a Knee MRI.; The study is requested for knee pain.;
The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; It is not known if the patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.

This is a request for a Knee MRI.; The study is requested for knee pain.;
The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.;
It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.

This is a request for a Knee MRI.; The study is requested for knee pain.;
The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.;
Surgery or arthroscopy is not scheduled in the next 4 weeks.

This is a request for a Knee MRI.; The study is requested for knee pain.;
The pain is not from a recent injury, old injury, chronic pain or a mass.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

10-23-17:
HPI: This patient returns today for follow-up again for her left knee.
I've seen her in the past for this knee and felt like she had some patellofemoral symptoms and a contusion of the knee. She was treated with anti-inflammatories and physical; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

11.28.17 pt was playing with her son and she twisted her knee. still having knee pain w instability, medial joint line pain, medial McMurray's, eval for meniscal tear or MCL sprain.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.

48 yo male with acute on chronic left knee pain after new injury. Based on his history and exam today, I am concerned for meniscal tear. He did not respond to conservative measures with CSI and PT. Will obtain MRI for further evaluation and have him follow; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.
abnormal malformation of lower limbs; This study is being ordered for Congenital Anomaly.; 2016; There has not been any treatment or conservative therapy.; difficulty walking; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Chief complaint: New problem of recurrent locking both knees 65‐year‐old jujitsu instructor well known to me from knee surgeries. Had ACL reconstruction right knee 6 years ago with partial medial meniscectomy. Left knee ACL reconstructed by me 9 years ago with partial medial meniscectomy. Left knee ACL reconstructed by me; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Chronic left foot pain status post injury 6 months ago with no improvement despite shoe wear changes and orthotics; This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; The patient has been treated with orthotics for at least 6 weeks.

Continued pain after conservative treatment; This study is being ordered for trauma or injury; 8/17/2017; There has been treatment or conservative therapy.; Pain; Physical therapy prescribed by PCP and NSAIDs.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

decreased range of motion, Atrophy, positive McMurrays; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

exam is consistent with anterolateral impingement of the right ankle. My opinion is repeat MRI to rule out osteochondral lesion prior to ankle arthroscopy. MRI of the right ankle, follow up afterwards. Likely will plan for arthroscopy, debridement, syno; This is a request for an Ankle MRI.; It is not known if surgery or arthroscopy is scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.

History of Present Illness;&x0D;&x0D; The patient is a right handed 28 year old male seen today for the right knee. There is no pain present. He describes the symptoms as sharp. The symptoms come and go. Since the onset, he reports the problem is getting better. Th; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.
I have told her that likely her symptoms are related to her flatfoot. My recommendation is meloxicam and comfortotic insoles. We will have her wear them for a month and then report back to us. If they are helpful we will ask for custom-made orthotics. This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; Tendon or ligament injury is not suspected.

Knee pain and a sclerotic lesion in the lateral aspect of the tibial epiphysis. Subsequent scans and MRI scan showed abnormalities. Some evidence for Osgood Slaughter, the pain in the leg persisted. He is on anti-inflammatories.; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; There is no symptom of locking, Instability, Swelling, Redness, Limited range of motion or pain.

Melissa is here today with swollen left knee. She reports she tripped and fell onto hard surface 2 days ago. Landed on knees. Left knee has pain and swelling has steadily worsened. Was seen at Mercy Ozark ER yesterday. X-ray revealed effusion but no fx.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

MRI needed to determine if surgery is needed d/t injury.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

None; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

None; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Obese and has ankle pain; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; Tendon or ligament injury is not suspected.

of recommended repeat MRI evaluation of the left foot to evaluate the cuneiforms and cuboid as well as 1st metatarsal base for stress reaction versus stress fracture. Stay immobilized in the boot to light for MRI. I do not anticipate this will require s; This study is being ordered for trauma or injury. 08/2017; It is not known if there has been any treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Pain in LT Ankle; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; It is not known if there is a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; It is not known if there is a suspicion of tendon or ligament injury.

Pain with passive dorsiflexion of the L ankle. Mild irregularities noted with palpation over the Achilles tendon. Large effusion is present in the posterior aspect of the heel.; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.

Patient has a positive McMurrays and effusion present in knee. Straight leg raise is not possible without pain.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass. Persistent pain for the pass 6 weeks, knee brace; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.

Possible meniscus tear in knee; This is a request for a Knee MRI.; The study is requested for knee pain.; The patient has an old injury.; The physician has not directed conservative treatment for the past 6 weeks.

Pt complains of locking and catching to the knee. The pain is described as a sharp pain to the medial aspect of the knee. The pain is worse with walking and better with rest. Pt is also 2 years s/p ACLR on 9/25/15. No medications are noted. &x003D; Mild pain w. This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks. Pt had an accident in July; had surgery on the left femur; had PT and HE for the femur, but now the knee is starting to hurt. Had a Lt grade 3 open femur Fx with an external fixation; open reduction internal fixation; RT lower extremity vascular repair fr; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.; The patient received oral analgesics.

Pt has ankle pain; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.

Pt in a boot walker. Pt is still having RT ankle pain. Risks and benefits were discussed and sterile technique was used to inject 1 cc of Betamethasone and 1 cc of Lidocaine. into the LT ankle for an ankle sprain. Patient tolerated the procedure well.; This is a request for an Ankle MRI.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.
Pt. has L knee pain. She is having more medial joint space pain, as well as, catching and popping in the knee with ambulation. She has failed physical therapy and medicines are not helping. This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.

Right knee pain. Possible medial meniscus tear. Date of injury 11/11/2017. He states he had a large effusion after his first injury. He tells me he was getting up from a squatted position while hunting. After this he rested the knee for several weeks. It;

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Right knee pain. The patient is a 23-year-old male who presents with insidious onset of right knee pain. There is no history of injury. The patient suddenly awoke one morning with knee pain. He does have history of previous Ewings sarcoma. But has been;

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury, old injury, chronic pain or a mass.

Ro infection of knee; This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had a recent bone scan.; The plain films were normal.; There are no documented physical or laboratory findings of a joint infection.; Known or Suspected Joint Infection

Rule out a meniscal tear or other that will require a knee arthroscopy. Surgery will not be scheduled until confirmation with MRI of need for a knee arthroscopy.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

She is a 32-year-old, black female, status post left ankle twisting injury years ago. It has been progressively more sore and tender and starting to hurt at night now. She is having to wear a boot to get around;

This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The member has surgery planned.; The study is requested for a reason other than ankle pain.

She is having Right knee pain, redness, bruising, swelling, limping, popping, weakness and giving way. The problem started after an injury on 10-10-2017. Patient states she got into a four wheeler accident and it rolled. She jumped off it and the four whe;

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Tenderness to palpation about the peroneal muscle distribution lateral lower legs bilaterally. Has increased pain with eversion and external rotation of the feet against resistance bilaterally. STILL HAVING PROBLEMS EVEN AFTER PT AND NSAIDS; This study is being ordered for trauma or injury.; ABOUT9-4-17, 4-5 WEEKS AGO; There has been treatment or conservative therapy.; Tenderness to palpation about the peroneal muscle distribution lateral lower legs bilaterally. Has increased pain with eversion and external rotation of the feet against resistance bilaterally.; NSAIDS, PHYSICAL THERAPY.; One of the studies being ordered is NOT A Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Chronic pain with increased pain with fall on 09/11/17; There has been treatment or conservative therapy.; NSAIDS, oral narcotics; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

10-10-17: 58-year-old white male in today for his right hip. He had the onset of right hip pain in May when he misstepped. He identifies pain as being lateral and anterior. He says prolonged sitting is uncomfortable. Walking is also painful. He has not h.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Right hip pain, lateral and anterior. Prolonged sitting is uncomfortable. Walking is also painful. He has not h.; There has been treatment or conservative therapy.; Right hip pain, lateral and anterior. Prolonged sitting is uncomfortable. Walking is painful.; Treatment/Conservative Therapy: Mobic, IM injections, fluoroscopically guided steroid hip injections, Celebrex; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Cam lesions noted on x-rays. MR arthrogram ordered to evaluate for labral tear in bilateral hips.; This study is being ordered for Congenital Anomaly.; 1 year-12/1/2016; There has been treatment or conservative therapy.; pain with motion, and night time pain.; anti-inflammatory, activity modification, rest, and therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Continued pain after conservative treatment; This study is being ordered for trauma or injury.; 8/17/2017; There has been treatment or conservative therapy.; Pain; Physical therapy prescribed by PCP and NSAIDs; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Patient comes in complaining of left hip and left knee pain. I think most left knee pains radiating from the left hip. X-rays show severe degeneration of the left hip knee x-rays and spine x-rays look good. We are going to set him up for a steroid injection.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/20/17; There has been treatment or conservative therapy.; Patient comes in complaining of left hip and left knee pain. I think most left knee pains radiating from the left hip. X-rays show severe degeneration of the left hip knee x-rays and spine x-rays look good. We are going to set him up for a steroid injection.

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Questionable osteomyelitis of right iliac wing with ileo psoas abscess per MRI. See Infectious Disease notes about patient's recent admission to the Med Center for septic shock. He was in renal failure therefore unable to get MRI with contrast. Osteomy; This study is being ordered for Inflammatory/ Infectious Disease.; 10/6/17; There has been treatment or conservative therapy.; He returns in f/u of MRSA bacteremia and septic hip and iliacus osteomyelitis. He was in hospital from 8/26/17 to 9/8/17. He completed 6 wks of IV vancomycin on 10/8/17 with complication of redman Sx requiring his daily dose of vancomycin to infuse over; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a requests for a hip MRI.; Surgery or arthroscopy is scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; The hip pain is due to a recent injury.; The request is for hip pain.

This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.

This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.
This is a request for a hip MRI; This study is being ordered in conjunction with a pelvic MRI; There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is not a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.  

This is a request for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI.; There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is a suspicion of AVN.; This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.  

This is a request for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI.; There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is a suspicion of AVN.; This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.  

This is a request for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI.; There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is no a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient does not have a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is no a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is no a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion. 4

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion. 1

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion. 6

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion. 4
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient has an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone); The patient had an abnormal plain film study of the hip other than arthritis.; The patient does not have a documented limitation of their range of motion.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone); The patient has a documented limitation of their range of motion.

Medical Decision Making
X-ray Interpretation
AP and lateral x-ray of the lumbar spine ordered, obtained, and interpreted today reveals fairly well maintained alignment. There may be some subtle anterolisthesis L4-5. There may be transitional anatomy.; This is a request for an Abdomen CT.; This study is being ordered for trauma.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is no recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; There are no physical findings or lab results indicating an intra-abdominal bleed.; Yes this is a request for a Diagnostic CT

This is a request for CT Angiography of the Abdomen and Pelvis.
This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

Neck pain x 3 months with numbness and tingling into extremities. no improvement with conservative treatment; "This is a request for orbit, face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection, cancer, mass, tumor, pre or post-operative evaluation

1. Adjacent segment degenerative disc disease, C6-7, with axial neck pain and right shoulder and arm radiculopathy.
2. Status post C4-5 and C5-6 ACDF on 3/14/14; large disc protrusion, C4-5 the spinal cord impingement and early cervical myelopathy; April 2014; There has not been any treatment or conservative therapy.; He presents to the clinic today with approximately 6-month history of neck pain, radiating into the right shoulder and down into the elbow. He also complains of right-sided low back pain, with occasional radiating pain into the right leg, down to the foot; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

AP lateral cervical spine films obtained today and personally reviewed show normal alignment. There is disc space narrowing and degenerative change at C5-6, and a little more so at C6-7. &lt;Enter answer here - or Type In Unknown If No Info Given.&gt; ; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/26/17; It is not known if there has been any treatment or conservative therapy.; scoliosis, alternating hemiplegia; One of the studies being ordered is NOT a Chest CT, Thoracic CT, Cervical CT, Brain CT, Brain MRI, or Neck MRI.239.8; The reason for the study is not for trauma, infection, cancer, mass, tumor, pre or post-operative evaluation; Yes this is a request for a Diagnostic CT

1. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/26/17; It is not known if there has been any treatment or conservative therapy.; scoliosis, alternating hemiplegia; One of the studies being ordered is NOT a Chest CT, Thoracic CT, Cervical CT, Brain CT, Brain MRI, or Neck MRI.239.8; The reason for the study is not for trauma, infection, cancer, mass, tumor, pre or post-operative evaluation; Yes this is a request for a Diagnostic CT

PARSONAGE; TURNER SYNDROME; This study is NOT being ordered for a Work-up for Suspicious Mass, Known Tumor, Known or Suspected Inflammatory Disease, etc...; This is a request for a chest MRI
Her symptoms sound mostly like a facet problem. The tingling in the back of her head that comes up from her neck sounds like a greater occipital nerve irritation, so the problem may actually be at the Cl-2 level. CT is the best way to evaluate that, so we;

This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT;
There is no reason why the patient cannot have a Cervical Spine MRI.

It is not known if the patient has any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.

This is a 41-year-old woman who has a mild scoliotic deformity, leg length discrepancy, and a left head tilt. While it is correctable, it is causing her some element of discomfort so I would like to work up her head-tilt a bit further with a CT scan of her; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.

This is a request for a thoracic spine CT.; There is no reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/26/17; It is not known if there has been any treatment or conservative therapy.; scoliosis, alternating hemiplegia; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD's specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

X-ray Interpretation

MRI lumbar spine performed at St. Vincent 11/9/17. Pedicle screws seen L1, T12, T11. No disc bulging or herniation. Conus medullaris is normal. Disc height and disc signal maintained. Otherwise normal. Imaging reviewed, there a; This is a request for a thoracic spine CT.; There is no reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT.

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/26/17; It is not known if there has been any treatment or conservative therapy.; scoliosis, alternating hemiplegia; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD's specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
AP and lateral x-ray of the lumbar spine ordered, obtained, and interpreted today reveals no change in position or alignment of the implants. X-rays look okay. Flattening through L4-S level. Unchanged from previous x-rays.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/5/17; There has been treatment or conservative therapy.; 50-year-old female status post L4-S fusion. Over last month she is having progressive left buttock and leg pain. It bothers her at night. Neurontin does help.; We discussed increasing Neurontin dose.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT

unknown; This study is being ordered for a neurological disorder.; 03/09/2017; There has been treatment or conservative therapy.; numbness, tingling and weakness in bilateral arms; OP therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; shoulder and the right arm; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; right arm weakness going down into right hand; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; None of the above; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; WEAK GRIP; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
Orthopedics Disapproval

1. Adjacent segment degenerative disc disease, C6-7, with axial neck pain and right shoulder and arm radiculopathy.
2. Status post C4-5 and C5-6 ACDF on 3/14/14; large disc protrusion, C4-5 the spinal cord impingement and early cervical myelopathy.
3. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.

APRIL 2014; There has not been any treatment or conservative therapy. He presents to the clinic today with approximately 6-month history of neck pain, radiating into the right shoulder and down into the elbow. He also complains of right-sided low back pain, with occasional radiating pain into the right leg, down to the foot.

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

11.17.17 seat belted passenger in MVA, rt shoulder and neck pain, rt paraspinal tenderness. This is a request for cervical spine MRI; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms; There is weakness; 11.17.17 seat belted passenger in MVA, rt shoulder and neck pain, rt paraspinal tenderness; The patient does not have new signs or symptoms of bladder or bowel dysfunction; There is not x-ray evidence of a recent cervical spine fracture.

Cervical pain with radiculopathy; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks; The patient has not seen the doctor more than once for these symptoms.

Chronic pain in R shoulder and cervical radiculopathy; This study is being ordered for trauma or injury; 11/01/2017; There has been treatment or conservative therapy; Instability of R Shoulder joint; Cervical Radiculopathy; Patient has done home exercises with no good results as well as nsaids; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Evaluate for cervical rib, parathesia present; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness; Positive right sign with loss of radio pulse and multiple trigger points in the periscapular area; The patient does not have new signs or symptoms of bladder or bowel dysfunction; There is not x-ray evidence of a recent cervical spine fracture.
further evaluation for disc extrusion; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt has neurological weakness decreased sensation of the arm, fingers; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Having left arm pain and tingling down to hand. Has had steroid injection to left shoulder and a steroid dose pack which has not helped.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.;

Mr. Martin is back today in follow-up of neck and lower back pain. &lt;#x0D;&gt; &lt;#x0D;&gt; He has pain in both hands and also some numbness. Both of those symptoms seem to be gradually getting worse. &lt;#x0D;&gt; &lt;#x0D;&gt; He has stiffness in both his neck and his lower back. He has a lot of.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Cervical and lumbar stenosis. He symptoms may have worsened, but his exam is still negative. He is also having more difficulty walking and he is at the point where he feels like he needs to have a handicap parking sticker.; There has been treatment or conservative therapy.; Mr. Martin is back today in follow-up of neck and lower back pain. &lt;#x0D;&gt; &lt;#x0D;&gt; He has pain in both hands and also some numbness. Both of those symptoms seem to be gradually getting worse. &lt;#x0D;&gt; &lt;#x0D;&gt; He has stiffness in both his neck and his lower back. He has a lot of.; Meloxicam; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Numbness and tingling in the right hand. Patient takes Mobic, MRI shows moderate AC joint arthritis, and rotator cuff tendonitis with questionable RCT. Patient reports injection on 9/29/17 was no significant help. Patient reports having a lot of pain at t; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Patient has ongoing pain that radiates out of neck down through the shoulder on down the arm. He has had previous surgery on right shoulder. Failed conservative treatment; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.

Positive Spurling Testing From ER: 3 views LT shoulder show no glenohumeral arthritis, minimal AC joint arthritis, and type 3 acromion.&lt;nOD&gt; 3 views C/Spine show DDD at C5/C6.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Pt had injury in may and is still having neck pain and left shoulder and arm pain despite nsaids and PT.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

Pt has persistant severe pain in neck upper and lower back with radiculopathy to the upper and lower extremeties. Symptoms aggravated by going up or down stairs, bending, coughing, lifting, pushing, standing and walking. Symptoms include decreased mobil; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/29/16; There has been treatment or conservative therapy.; Severe persistant pain in neck, upper and lower back with radiculopathy. Pt has decreased mobility, tenderness and weakness in the back/neck; medications, lifestyle modification and spinal exercises; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Right shoulder pain with radiculopathy and loss of strength that radiates from Neck down to fingers. over 8 weeks of conservative treatment consisting of meloxicam, Physical therapy, Home exercises, steroid injection, and change in activity level has no; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness when grasping despite over 8 weeks over conservative care.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
rt shoulder pain and radiculopathy x 1 year. neck pain w paraspinal muscle
tenderness; This is a request for cervical spine MRI; Neurological deficits; The patient
does have new or changing neurologic signs or symptoms.; There is no weakness or
reflex abnormality.; The patient does not have new signs or symptoms of bladder or
bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.
Severe degenerative changes, C4-5, C5-6, L3-4, L4-5, S1 with spinal stenosis.&amp;rsquo;D;
&amp;rsquo;D; Bilateral facet blocks C4-5, C5-6, occital nerve; This study is being ordered for
something other than: known trauma or injury, metastatic disease, a neurological
disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;
10/02/2011; There has been treatment or conservative therapy.; Severe lower back
and mid back pain with radiculopathy to the shoulders and legs.; Pt has failed 6 weeks
of conservative therapy to include: Physical Therapy, medications and steroid
injections; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy,
EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT
Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation
Oncology

She has pain with numbness and tingling and has tried multiple injections into the
neck with no relief. MRI is ordered of the cervical spine and lumbar spine for
evaluation.; This study is being ordered for something other than: known trauma or
injury, metastatic disease, a neurological disorder, inflammatory or infectious disease,
congenital anomaly, or vascular disease.; 2015; There has been treatment or
conservative therapy.; Neck pain, lower back pain, radiculopathy into the left upper
extremity, numbness and tingling.; She has been getting injections in the neck and
taking pain medications.; One of the studies being ordered is NOT a Breast MRI, CT
Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is
NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation
Oncology

The patient has not failed a course of anti-inflammatory medication or steroids.; This
is a request for cervical spine MRI; It is not known if there has been a supervised trial
of conservative management for at least six weeks.; Acute or Chronic neck and/or
back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a
documented evidence of extremity weakness on physical examination.; No, there is
no evidence of recent development of unilateral muscle wasting.; It is not known if
this patient had a recent course of supervised physical Therapy.; No, the patient did
not have six weeks of Chiropractic care related to this episode.; His rheumatoid
arthritis is under good control. He does have mild degenerative changes in the
cervical spine concerning for impingement. We'll send for MRI of the cervical spine.
EMG nerve conduction study of the left upper extremity. Her on gabapentin 30

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The
patient does not have new or changing neurologic signs or symptoms.; The patient
has had back pain for over 4 weeks.; The patient has seen the doctor more then once
for these symptoms.; The physician has directed conservative treatment for the past 6
weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is
experiencing or presenting new symptoms of upper extremity weakness.
This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Ms. Lejeune is a 56-year-old woman seen today in evaluation of neck pain. Today she says that she began having problems a couple of years ago. She ultimately got better without doing anything, but she her symptoms returned and she continues to have pr

UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2012; There has been treatment or conservative therapy.; PAIN AT THE AC JOINT WITH SWELLING, NECK AND SCALPULAR PAIN; SURGERY IN 2012 AND PHYSICAL THERAPY ON AND OFF SINCE THEN; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.

This study is being ordered for a thoracic spine MRI.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

It is not known if there are documented findings of immune system suppression.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.

It is not known if there are documented findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits. ; Spoke with physical therapist today who states Camille is still having significant pain over the right anterolateral chest wall in the T7-T9 intercostal area. She played in a volleyball game yesterday which greatly exacerbated the symptoms. Will obtain MR
Severe degenerative changes, C4-5, C5-6, L3-4, L4-5, S1 with spinal stenosis; Bilateral facet blocks C4-5, C5-6, occiatal nerve; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/02/2011; There has been treatment or conservative therapy.; Severe lower back and mid back pain with radiculopathy to the shoulders and legs.; Pt has failed 6 weeks of conservative therapy to include: Physical Therapy, medications and steroid injections; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.

The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/29/2017; There has been treatment or conservative therapy.; Back pain, scoliosis, degenerative disc disease; PT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; bulge at L12 sharp aching throbbing diffused low back pain; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above.

---
The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness and pain while walking relief by rest; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness and pain while walking relief by rest; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness and pain while walking relief by rest; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness and pain while walking relief by rest; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness and pain while walking relief by rest; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Patient presents clinic today with low back pain numbness weakness in the right leg and pain in right hip. The hip pain occurred previously after he fell 2 weeks ago had quite a bit of bruising in her right leg he saw his primary provider no x-rays were; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has none of the above.; This procedure is being requested for Trauma or recent injury

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pain that stiffens her at some point where she has to get up slowly and slowly work out the stiffness. heaviness in her leg or sometimes it is both legs but more so on the right than on the left.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pain that stiffens her at some point where she has to get up slowly and slowly work out the stiffness. heaviness in her leg or sometimes it is both legs but more so on the right than on the left.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pain that stiffens her at some point where she has to get up slowly and slowly work out the stiffness. heaviness in her leg or sometimes it is both legs but more so on the right than on the left.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pain that stiffens her at some point where she has to get up slowly and slowly work out the stiffness. heaviness in her leg or sometimes it is both legs but more so on the right than on the left.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pain that stiffens her at some point where she has to get up slowly and slowly work out the stiffness. heaviness in her leg or sometimes it is both legs but more so on the right than on the left.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pain that stiffens her at some point where she has to get up slowly and slowly work out the stiffness. heaviness in her leg or sometimes it is both legs but more so on the right than on the left.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

AP and lateral x-ray of the lumbar spine ordered, obtained, and interpreted today reveals no change in position or alignment of the implants. X-rays look okay. Flattening through L4-5 level. Unchanged from previous x-rays. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease. 9/5/17; There has been treatment or conservative therapy.; 50-year-old female status post L4-5 fusion. Over last month she is having progressive left buttock and leg pain. It bothers her at night. Neurontin does help.; We discussed increasing Neurontin dose.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

He's been treated for stenosis in the past so I know he has that but the way he walks, I have to be concerned with AVN of the hips. Degenerative Disk Disease L3-L4.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5-29-2017; There has been treatment or conservative therapy.; Pain, swelling, stiffness, limping, weakness and giving way. There has been no change in the symptoms with ice, heat, rest, ibuprofen, physical therapy, lumbar injections and use of cane.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

HISTORY OF PRESENT ILLNESS: Amanda returns concerning her low back and right leg. Her pain is now radiating to the level of her toes. She reports tingling into the toes as well. The steroid dose pack failed to provide even transient relief. She rates her;

The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Range of Motion: Forward Flexion; Full with increased midline low back pain; Extension; Full extension and painless; Hip and painless; Special Tests; Sitting Straight lower back pain radiating down both legs, numbness and tingling down both legs, received injections in back with now relief, activity modification and oral medications with no relief; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Symmetric deep tendon reflexes and positive straight leg raise.
L-spine with herniated pulposus versus foraminal stenosis; Physical exam of her lumbar spine reveals pain and tenderness to palpation of her paraspinal muscles. She has pain with rotation and extension of her lumbar spine. Her bilateral lower extremities are; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Physical exam of her lumbar spine reveals pain and tenderness to palpation of her paraspinal muscles. She has pain with rotation and extension of her lumbar spine. Her bilateral lower extremities are neurologically intact with dorsalis pedis and posterior; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Mr. Martin is back today in follow-up of neck and lower back pain. He has pain in both hands and also some numbness. Both of those symptoms seem to be gradually getting worse. He has stiffness in both his neck and his lower back. He has a lot of; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Cervical and lumbar stenosis. He symptoms may have worsened, but his exam is still negative. He is also having more difficulty walking and he is at the point where he feels like he needs to have a handicap parking sticker.; There has been treatment or conservative therapy.; Mr. Martin is back today in follow-up of neck and lower back pain. He has pain in both hands and also some numbness. Both of those symptoms seem to be gradually getting worse. He has stiffness in both his neck and his lower back. He has a lot of; Meloxicam; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Patient reports continued pain in both knees, Patient has had injections with only 3-4 days relief, Patient reports some LBP, and bilateral LE numbness/tingling, 3 view LEFT and RIGHT; knee with minimal degenerative changes. Endobutton is in a very anteri; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
Plan: I had a long discussion with the patient today regarding his chronic pain issues. Unfortunately he had some insurance issues, so he has not been here for a few months. He reports that the last injection did not provide any relief. At this point, I; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pt has persistent severe pain in neck upper and lower back with radiculopathy to the upper and lower extremities. Symptoms aggravated by going up or down stairs, bending, coughing, lifting, pushing, standing and walking. Symptoms include decreased mobility. This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/29/16; There has been treatment or conservative therapy.; Severe persistent pain in neck, upper and lower back with radiculopathy. Pt has decreased mobility, tenderness and weakness in the back/neck; medications, lifestyle modification and spinal exercises; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

She has been doing physical therapy, which has not helped. I discussed with her, that in order to evaluate properly, I would like to get an updated MRI of the lumbar spine, to evaluate for nerve impingement. Given the numbness in the feet, I would also; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; 1. Degenerative disc disease, lumbar spine, L1-2 and L2-3, and also at L5-S1, with axial back pain and bilateral leg radiculopathy to the feet, worse on the right. 2. C5-C6 and C6-7 degenerative disc disease.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

She has pain with numbness and tingling and has tried multiple injections into the neck with no relief. MRI is ordered of the cervical spine and lumbar spine for evaluation.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; Neck pain, lower back pain, radiculopathy into the left upper extremity, numbness and tingling.; She has been getting injections in the neck and taking pain medications.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Subluxation of lumbar vertebra, initial encounter; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.
The study requested is a Lumbar Spine MRI.; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; This procedure is being requested for Follow-up to surgery or fracture within the last 6 months; The patient been seen by or the ordering physician is a neuro-specialist, orthopedist, or oncologist.  

TREATMENT PLAN: Under aseptic technique, 5 cc of Lidocaine and 80 mg of Depo Medrol, lot #80529, expiration 01/2018 were placed in the left knee. For cervical and lumbar pain issues, we are going to set up with an MRI of the lumbar spine. I will see he; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)  

unknown; The study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/29/2017; There has been treatment or conservative therapy.; numbness, tingling and weakness in bilateral arms; OP therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Will fax in clinicals; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks. Worsening low back pain and worsening left-sided sciatica.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above 1 Worsening pain, difficulty ambulating; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above 1 X-ray revealed mild acetabular dysplasia. Exostosis of the right ischium. Possible chronic gluteus medius tear.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/24/2017; There has been treatment or conservative therapy.; R/O tear in hip. Pain, radiating pain. Limited range of motion with hip.; Steroids, anti-inflammatory medication and home exercises.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology 1 X-rays of the cervical spine AP, lateral, odontoid view were done in the clinic today, review and interpreted. The x-ray showed small straightening of the cervical lordosis with narrowing of the disc space C5-C6 in some small deformity at the superior end; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Ht, Wt, & Pulse; are reviewed on EMR intake. Patient is well developed, well nourished, and in no apparent acute distress.

Gait: Normal pattern
HEENT: Normocephalic, PERRL
Face: Symmetric
Chest: Nonlabored breathing, no audible cough
CV: No edema or v; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. &lt;Enter answer here - or Type In Unknown If No Info Given. &gt; This is a request for a Pelvis MRI.; The request is not for any of the listed indications. 1

21-year-old male with multiple joint pains. I am seeing him for his bilateral hips today. No injury or trauma. He reports years of joint pains. Hip pain is anterior and posterior. It does not radiate down the leg. He has not had improvement with anti-inf; This is a request for a Pelvis MRI.; The request is not for any of the listed indications. ANKYLOSING; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.
Antalgic gait favoring the affected side. Using a cane. Very slow to transition from sitting to standing. Pain reproduced in the SI joint with passive ER and IR of the hips. FABER test is positive for SI joint. AP pelvis obtained at an outside facility re; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5-29-2017; There has been treatment or conservative therapy.; The patient experiences pain, swelling, stiffness, limping, weakness and giving way; There has been no change in the symptoms with rest, anti-inflammatory medication and bracing. Anti-inflammatory medication: Ibuprofen . Brace received Cane. Patient occasionally uses shock therapy on his hips &amp; Tramadol &amp; Hydrocodone; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology. This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT.; This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; Ultrasound showed left sublavian stenosis.; This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown. numbnness in right leg right leg pain had 6 weeks of back exercises with no improvement.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection. This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days.; This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture); This is not a pre-operative study for planned surgery. worsening neck pain and limited range of motion; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture. R/O NEORLOGIL BACK PROBLEMS; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain.; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. &lt;Enter answer here - or Type In Unknown If No Info Given. &gt;This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &lt;hD; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &lt;hD; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT. This is a request for a temporomandibular joint MRI.

Fell and hit her head and blacked out, memory loss.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.

"This request is for face, jaw, mandible CT.239.8"; "There is a history of serious facial bone or skull, trauma or injury.fct"; Yes this is a request for a Diagnostic CT

"This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT

"This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; Yes this is a request for a Diagnostic CT

Temporomandibular joint internal derangement; "This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; This is not a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT

"This is a request for orbit, face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;; There has not been any treatment or conservative therapy.; Pt has visual field loss with severe headaches.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD's specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.

This study is being ordered for a diagnostic CT. This study is being ordered for a Neurological disorder; There has been treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD’s specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for a diagnostic CT. This study is being ordered for a Neurological disorder; There has been treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MD’s specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

PT started, not been able to tolerate due to increased pain, tried NSAIDS, heat/ice, bed rest and no relief; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness; Weakness in bilateral lower extremities; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality

72196 MRI PELVIS

This is a request for a Pelvis MRI.; The request is for suspicion of joint or bone infection.

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

History of Present Illness: Subjective: Patient returns again for post-op evaluation excision of right foot soft tissue mass and resection of bone spur with craterization. DOS: 9/8/17. She states that the pain has become progressively worse. No changes in.; This is a request for a foot MRI.; Surgery or other intervention is not planned for in the next 4 weeks.; The study is being ordered for infection.; There are physical exam findings, laboratory results, other imaging including bone scan or plain film confirming infection, inflammation and or aseptic necrosis. Patient relates spraining her ankle May of this year. She states RICE therapy, use of aircast walking boot, and ankle brace with continued pain. She relates continued pain and swelling in the ankle since injury.; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are known or endoscopic findings of Abscess.; Yes this is a request for a Diagnostic CT.

74150 CT ABDOMEN WITHOUT CONTRAST

This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are known or endoscopic findings of Abscess.; Yes this is a request for a Diagnostic CT

74176 CT ABD & PELVIS W/O CONTRAST

Calculus of kidney; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed a Kidney/Renal cyst(s); Yes this is a request for a Diagnostic CT.
Pt has abdominal pain and microscopic hematuria; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for ketones.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; It is not know if this study is being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is suspicion of metastasis.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.

This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.

This is a request for a Sinus CT.; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; Yes this is a request for a Diagnostic CT

; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.; Pt has visual field loss with severe headaches.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; &lt;Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt;Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

MVA, rear ended, numbness/tingling after MVA; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; L upper numbness/tingling; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;

unknown; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

This study requested is a Lumbar Spine MRI; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Yes, this is a request for CT Angiography of the lower extremity.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt;Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt;Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT.

This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);. This is NOT a Medicare member.; The patient’s age is between 45 and 64 years old.

This is a request for a brain/head CT.; It is unknown if the study is being requested for evaluation of a headache.; The patient has hearing loss.; The patient had an audiogram.; The results of the audiogram were abnormal.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.

This is a request for orbit,sella, int. auditory canal, temporal bone, mastoid, CT.

There is not suspicion of bone infection, cholesteatoma, or inflammatory disease.ostct.

There is not a history of serious head or skull, trauma or injury.ostct.

There is not suspicion of neoplasm, or metastasis.ostct.

This is a preoperative or recent postoperative evaluation.

This is a request for orbit, sella, int. auditory canal, temporal bone, mastoid, CT.

There is not suspicion of bone infection, cholesteatoma, or inflammatory disease.ostct.

There is not a history of serious head or skull, trauma or injury.ostct.

There is not suspicion of neoplasm, or metastasis.ostct.

This is not a preoperative or recent postoperative evaluation.; There is not suspicion of acoustic neuroma, pituitary or other tumor. ostct.

There is not suspicion of bone infection, cholesteatoma, or inflammatory disease.ostct.; There is not a history of serious head or skull, trauma or injury.ostct.;

There is not suspicion of neoplasm, or metastasis.ostct.

This is a request for orbit, sella, int. auditory canal, temporal bone, mastoid, CT.

There is not suspicion of bone infection, cholesteatoma, or inflammatory disease.ostct.; There is not a history of serious head or skull, trauma or injury.ostct.;

There is not suspicion of neoplasm, or metastasis.ostct.
This request is for orbit, sella, int. auditory canal, temporal bone, mastoid, CT.239.8; There is suspicion of bone infection, cholesteatoma, or inflammatory disease.

Very tender left mastoid tip hard 1 cm node, 2.5 cm very tender right area III node; This study is being ordered for inflammatory/infectious disease.

Yes this is a request for a Diagnostic CT

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of neoplasm, tumor or metastasis.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of bone infection, osteomyelitis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of neoplasm, tumor or metastasis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of bone infection, osteomyelitis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of neoplasm, tumor or metastasis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of bone infection, osteomyelitis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of neoplasm, tumor or metastasis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of bone infection, osteomyelitis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of neoplasm, tumor or metastasis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of bone infection, osteomyelitis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of neoplasm, tumor or metastasis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of bone infection, osteomyelitis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of neoplasm, tumor or metastasis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of bone infection, osteomyelitis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.

This request is for face, jaw, mandible CT.239.8; There is not a suspicion of neoplasm, tumor or metastasis.

This request is for face, jaw, mandible CT.239.8; There is not a history of serious facial bone or skull trauma or injury.
This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); Yes this is a request for a Diagnostic CT; It has been less than 28 days since onset

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT

28 year old female presents for frequent sinus infections. She has had 4-6 sinus infections in the past 6 months. She denies any use of antibiotics, steroid nasal sprays, or antihistamines. She was given a Decadron in injection during her last office visit; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT

Decreased sense of smell, taste and nasal obstruction x 20 years. DNS to left and bilateral polyp tissue noted on intranasal exam with np scope.; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT

Evaluate sinus. He says he has a constant had sinus infection in the last year. He has been treated with amoxicillin. He complains of PPP, PND, nasal congestion and headaches. He denies a nasal preference and he denies a previous nasal fracture. He ha; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment; Yes this is a request for a Diagnostic CT
He has had sinus congestion and pressure off and on for several years. He has greenish yellow mucus almost every morning. He has been on 4 abx with some improvement but symptoms will recur.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT

He is here today for evaluation of nasal congestion. He has trouble breathing through his nose, which is worse at night. He uses a CPAP machine. He has facial pain and pressure, nasal drainage and congestion. He gets better with antibiotics but sym; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT

Headache, loss of smell; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT

Medically necessity needing anesthesia; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT

PAIN IN RIGHT NERVE AREA; “This request is for face, jaw, mandible CT.239.8”; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, osteomyelitis].fct"; This is not a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT

PATIENT IS SICK ALL THE TIME AND HAS BEEN ON MEDICATIONS; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT
Patient suffers frequent (5-6) sinus infections per year for years and typically severe with bad headache, foul drainage, clogging of ears-most often worse symptoms on her left; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT.

Patient with over one month headaches, nausea, sinus pressure, ear pressure, no improvement on sinus and migraine meds. &\textsuperscript{10D}; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT.

Pt has lot of sinus issues, feels like nose clogged, she has sinus pressure and she is having drainage; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); Yes this is a request for a Diagnostic CT.

Pt was given cefdinir but worsened and given levaquin.&\textsuperscript{10D}; Ear pain, dizziness, imbalance but no vertigo. Facial pain, headaches, recurrent bouts of sinusitis and bronchitis, cannot blow nose, pt smokes and intolerant to steroids. Mucus in nose, septum twist; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of treatment; Yes this is a request for a Diagnostic CT.

She states that she is having nasal congestion, rhinorrhea, ears stay stopped up, cough. She states that she has pressure in her ears. She does get muffled hearing. She used to take allergy shots. She does take Zyrtec D and Flonase nasal steroid spray. This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT.

Sinuitis, congestion, watery rhinorrhea w headaches, stuffy and ringing ears, takes monthly IVIG &\textsuperscript{10D}; hx leukemia CLL.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
sore throat, cough, headaches, runny nose and neck pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; No specific date given by patient. She says she has had problems since a child and the problems are becoming worse and have worsened over the past 2 weeks.; There has been treatment or conservative therapy.; ear pain, ear drainage ear swollen shut, swallowing problems and hearing loss; She has had many different antibiotics and ear drops.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for a Sinus CT.; This study is being ordered for a known or suspected tumor.; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for follow-up to trauma.; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for post-operative evaluation.; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for pre-operative evaluation.; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been less than 14 days since onset; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment; Yes this is a request for a Diagnostic CT
This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset; Yes this is a request for a Diagnostic CT 2

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT 69

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT 26

This study is being ordered for a known or suspected tumor.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT 4

This study is being ordered for post-operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT 2

This study is being ordered for pre-operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT 14

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT 3

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT 1

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT 8

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT 28

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT 5

This is a request for a sinus MRI.; This study is not being ordered in conjunction with a head or brain CT or MRI.; "There is not evidence of tumor from a physical exam, plain sinus film, or previous CT or MRI study."; This patient has been treated with medications for at least four weeks with no improvement.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic workup done including urinalysis, electrolytes, and complete blood count with results not completed.; The patient does not have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the patient had a normal audiogram.; The patient is experiencing hearing loss.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic workup done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient does not have a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.); The doctor does not note on exam that the patient has delirium or acute altered mental status.; The patient does not have a Brain CT showing abscess, brain infection, meningitis or encephalitis.; This is NOT a Medicare member.
Otolaryngology Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are no recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

difficulty with headaches, He has had issues with being tired and some stomach issues, pt localizes his headaches to the frontal/temporal region, onset of his headaches was years ago; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are no recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Dizziness and giddiness; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.

ears popping/dizziness and right sided pulsatile tinnitus. eval for possible CP angle tumor/possible glomus; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; Is is not known if the patient has a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; The doctor does not note on exam that the patient has delirium or acute altered mental status.; The patient does not have a Brain CT showing abscess, brain infection, meningitis or encephalitis.; This is NOT a Medicare member.

everything was totally normal today, but because of the history of tinnitus unilaterally, right-sided facial pain and headache on the right side, we need to do an MRI scan intermittent right-sided throat pain, right-sided face pain, right-sided headache.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are no recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Hearing Loss; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.

hearing issues, when in a room with background noise she feels a static rattle in her head-she localizes this to the left side primarily; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. Hearing Loss; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.
left sided facial numbness, swelling of the left side of the face; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).

MRI Brain on 11/17 showed findings consistent with Bell's palsy with inflammation of the cranial nerve VII on the left side characterized by enhancement. An intracanalicular schwannoma of the cranial nerve VII is felt to be unlikely. Followup is recommended; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has Bell's Palsy.; It is unknown why this study is being ordered.

MRI scan of her brain just to rule out any sort of problem with the olfactory grooves such as an esthesioneuroblastoma, also make sure it is not a brain problem.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if a metabolic work up was done including urinalysis, electrolytes and complete blood count with results completed.; The patient is experiencing loss of smell.

n/a; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the patient had a normal audiogram.; The patient is experiencing hearing loss.

onset of dizziness, vertigo; spinning lasting one to two hours ...had PT for BPV tried migraine meds and steroid and otc meds; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

Parotid mass The patient is a 50 year old female with left parotid mass she first noticed this in January or February 2017. She was treated with 2 rounds of doxycycline by her PCP and 1-2 rounds of additional antibiotic by her nurse practitioner with no; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Patient of history of migraines and vertigo; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

pt has had tinnitus for the last 2 years and we need an MRI brain to rule out any tumor.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.
pt has intracranial mass and left chronic neck and ear pain; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology. Recommended MRI and MRV looking for vasculature around the ear and the upper neck; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/01/2017; There has not been any treatment or conservative therapy.; Audiogram shows bilateral significant sensorineural hearing loss in the high tones. Very symmetrical new symptom is he has pulsatile tinnitus in the right ear. He hears his heartbeat in the right ear. It is worse when he turns his head a certain way.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Sudden acute asymmetrical hearing loss of the left ear. Hearing has decreased suddenly on left ear.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient had a normal audiogram.; The patient is experiencing hearing loss.
The doctor is trying to rule out the need for surgery on this patient. The MRI will give a better look into what is causing the hearing loss in the patient.; This study is being ordered for Inflammatory/ Infectious Disease.; Long history of hearing loss with episodic fullness and distortion primarily in the right ear. Ringing in the ear.; Unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is a suspected cholesteatoma of the ear.; The patient has not had a recent brain CT or MRI within the last 90 days.; There are no neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.; This is a pre-operative evaluation for a known tumor of the middle or inner ear.

This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is not a suspected cholesteatoma of the ear.; The patient has not had a recent brain CT or MRI within the last 90 days.; There are no neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.; This is not a pre-operative evaluation for a known tumor of the middle or inner ear. This is for hearing loss; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient does not have a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; The doctor does not note on exam that the patient has delirium or acute altered mental status.; The patient does not have a Brain CT showing abscess, brain infection, meningitis or encephalitis.; This is NOT a Medicare member.
This request is for a Brain MRI; it is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient did not have a normal audiogram.; The patient is experiencing hearing loss.  
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.  
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.  
This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.  
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.  
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo  
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient did not have a normal audiogram.; The patient is experiencing hearing loss.  
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has hearing loss.; The patient had an audiogram.; The results of the audiogram were abnormal.; It is unknown why this study is being ordered.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.

unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.

UNKNOWN; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient is experiencing vertigo

With sig headaches and otalgia eval with MRI Head with gad at CSM indicated to r/o central lesion; Audio shows mixed HL in right ear; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.;" A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT

Invasive well differentiated squamous cell carcinoma.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

| 71250 CT CHEST, THORAX | 'None of the above' describes the reason for this request.; The patient had an abnormal finding on physical exam related to the suspicion of cancer.; This is a request for a Chest CT.; This study is being requested for suspected cancer or tumor.; Yes this is a request for a Diagnostic CT |

| 71250 CT CHEST, THORAX | 'None of the above' describes the reason for this request.; This study is being ordered for 'none of the above'.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT |

| 71250 CT CHEST, THORAX | voice started becoming horas and has carsnomea; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology |

| 71250 CT CHEST, THORAX | `72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST` We are referring the pt to a Neurosurgeon and they wanted the pt to have one before they will make her an appt.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI. |

| 72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST | This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness. |

| 73220 MRI UPPER EXTREMITY, ENTIRE EXTREMITY, NOT A JOINT | The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis. |

| 78813 PET IMAGING WHOLE BODY | This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Head/Neck Cancer.; The patient has Thyroid cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member. |

| 78813 PET IMAGING WHOLE BODY | This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Head/Neck Cancer.; The patient does NOT have Thyroid or Brain cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member. |

| 78813 PET IMAGING WHOLE BODY | This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; The patient does NOT have Thyroid or Brain cancer.; 2 PET Scans have already been performed on this patient for this cancer.; This is NOT a Medicare member. |
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA; This study is being requested for an other solid tumor; This would be the first PET Scan performed on this patient for this cancer; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Head/Neck Cancer; The patient does NOT have Thyroid or Brain cancer; This would be the first PET Scan performed on this patient for this cancer; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Head/Neck Cancer; The patient has Thyroid cancer; This would be the first PET Scan performed on this patient for this cancer; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment; This study is being requested for Head/Neck Cancer; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer; The patient does NOT have Thyroid or Brain cancer; More than 4 PET Scans have already been performed on this patient for this cancer; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment; This study is being requested for Head/Neck Cancer; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new singns or symptoms; The patient does NOT have Thyroid or Brain cancer; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis; There is existing evidence of metastasis or other tumor in the body; This study is being requested for Head/Neck Cancer; The patient does NOT have Thyroid or Brain cancer; This would be the first PET Scan performed on this patient for this cancer; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being requested for Head/Neck Cancer; It is unknown if the patient has Thyroid or Brain cancer; This is NOT a Medicare member.

This is a request for a brain/head CT; The patient has a suspected tumor outside the brain; Known or suspected tumor best describes the reason that I have requested this test.

This study is being ordered for sinusitis; This is a request for a Sinus CT; The patient is NOT immune-compromised; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT.
This is a request for a Sinus CT.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT

He is here today because at least for the last 20-30 years he gets some nasal pain and discomfort in the right medial canthal area. A recent episode on September 11 was so severe at 3 AM in the morning that he almost went to the emergency room. Afrin nose; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for follow-up to trauma.; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for pre-operative evaluation.; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment; Yes this is a request for a Diagnostic CT

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT

Pediatrics Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation).

Pediatrics Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness. 1

Pediatrics Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. 1

Pediatrics Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation). 1

Pediatrics Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation). 1

Pediatrics Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. 2

Pediatrics Approval 70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. 2
This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/2013; There has not been any treatment or conservative therapy.; progressive motor tic; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Caller is by passing questions and faxing in clinical.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

left temporal lobe cyst on CT; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient is experiencing dizziness.

patient has back pain, blurred vision, and ansicoria; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. Patient is having frequent headaches. Patient does stutter. Dad has Chiari malformation; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

pt has had a new onset of headaches in the past 12 months with an increasing intensity over the last -6 weeks; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.

suddate due to age; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.
This is to evaluate if the patient has a mass; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.

unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT

Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT

RTUNIQUE EVAL; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

STAGE 1 WILM'S TUMOR; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/2013; There has not been any treatment or conservative therapy.; progressive motor tic;

The patient has failed a course of anti-inflammatory medication or steroid.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; Follow-up to Surgery or Fracture within the last 6 months.

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; normal xray

This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

; This study is being ordered for a metastatic disease.; There are 4 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST
The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; &lt;Enter Additional Clinical Information&gt;

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST
The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above;

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST
The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed and failed a course of conservative care in the past 3 months or had a spine injection.

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST
The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality.

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST
The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s).

72196 MRI PELVIS
This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.

73221 MRI JOINT OF UPPER EXTREMITY
The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Pt has something in the scapula.

73221 MRI JOINT OF UPPER EXTREMITY
The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

73221 MRI JOINT OF UPPER EXTREMITY
This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.
This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; Pain greater than 3 days

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

This is a request for a Knee MRI.; No, the patient did not have a recent ultrasound of the knee.; The patient has not had recent plain films of the knee.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; Decreases in range of motion, pain is severe; Suspicious Mass or Suspected Tumor/ Metastasis

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion
This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.; Yes this is a request for a Diagnostic CT

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

STAGE 1 WILM'S TUMOR; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-Ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; &lt;Enter Additional Clinical Information&gt;; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has not been a physical exam.; The patient had an amylase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT.

72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST  
Radiology Services Denied Not Medically Necessary

It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.;

72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST  
Radiology Services Denied Not Medically Necessary

patient has back pain, blurred vision, and anisocoria; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST  
Radiology Services Denied Not Medically Necessary

The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Neurological abnormalities; This procedure is being requested for Trauma or recent injury.
&lt;Enter answer here - or Type in Unknown if No Info Given.&gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/25/2017. There has been treatment or conservative therapy.; pain in hip and pain in low back, osteo arthritis.; medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for a Pelvis MRI.; The request is not for any of the listed indications.

Evaluate muscular and visceral pathology.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

left knee injury; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; &lt;Enter Additional Clinical Information&gt;; Yes this is a request for a Diagnostic CT

Evaluate muscular and visceral pathology.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Enter Additional Clinical Information;&lt; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT

Evaluate muscular and visceral pathology.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.
The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.

The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.;

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection

This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.;

The patient has completed 6 weeks of physical therapy?

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; It is not known if there has been any treatment or conservative therapy. ; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for a brain/head CT.; 'None of the above' best describes the reason that I have requested this test.; None of the above best describes the reason that I have requested this test.
This is a request for a brain/head CT.; 'None of the above' describes the congenital anomaly of the skull.; Known or suspected congenital anomaly best describes the reason that I have requested this test.; None of the above best describes the reason that I have requested this test.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; It is not known if there has been any treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

"There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.; This is a request for bilateral foot MRI.; trauma
"There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle.; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.; &lt;Enter answer here OR type 'Unknown' if no info given.&gt;; This is a request for a bilateral ankle MRI.

&lt;Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; The patient has been treated with something other than crutches, a protective boot, walking cast, immobilization, orthopedics, anti-inflammatory medication or a cast for at least 6 weeks.

&lt;Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 10/20/17; There has been treatment or conservative therapy.; Pain; Boot.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Foot Pain; Onset: 1 month ago. Duration: 1 Month. Severity level is 9. It occurs constantly and is worsening. Location: left planar 4th intermetatarsal space. The pain radiates to the side of left foot. The pain is sharp and throbbing. Context: t; This is a request for a foot MRI.; The study is being ordered for a known palpated mass.; This study is being ordered for evaluation of Morton's Neuroma.; The patient has had foot pain for over 4 weeks.; The patient has been treated with anti-inflammatory medication for at least 6 weeks.

History of Present Illness: Subjective: Patient returns clinic today for continued evaluation of RIGHT foot and ankle pain. She states completion cancer therapy. She states use of braces with tolerable pain with limited activities. Today she would like to; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Musculoskeletal: she is painful along the insertion of the achilles tendon bilaterally, the right is worse then the left. Dorsiflexion is painful and limited. She has calcaneal spurs noted.; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.

NONE; This is a request for a foot MRI.; Surgery or other intervention is not planned for in the next 4 weeks.; The study is being ordered for infection.; There are physical exam findings, laboratory results, other imaging including bone scan or plain film confirming infection, inflammation and or aseptic necrosis.

ONSET CIRCA 2015; EPISODIC ACUTE PAIN &amp; SOELING L ANKLE, USUALLY ABOUT 2 X/MONTH. PAIN IS SO SEVERE PATIENT IS UNABLE TO PUT WEIGHT ON FOOT. X-RAY NEGATIVE FOR OSSEOUS PATHOLOGY; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.

This is a request for an Ankle MRI.; Surgery or arthroscopy is scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.

This is a request for an Ankle MRI.; The pain is described as chronic; The member has failed a 4 week course of conservative management in the past 3 months.; The member has a recent injury.; The study is requested for a reason other that ankle pain.

This is a request for an Ankle MRI.; There is a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; Tendon or ligament injury is not suspected.

Unknown; This is a request for a foot MRI.; Surgery or other intervention is not planned for in the next 4 weeks.; The study is being ordered for infection.; There are physical exam findings, laboratory results, other imaging including bone scan or plain film confirming infection, inflammation and or aseptic necrosis.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has been completed.; The results of the contrast/barium x-ray were normal.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT

"There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.; Inversion ankle sprain; This is a request for a bilateral ankle MRI.

2 recent falling injuries within the last 3 weeks, both on the L foot, x-ray negative for fracture, pain, swelling not resolved on his own; The patient has not had a recent bone scan.; This is a request for a foot MRI.; The study is being ordered for suspected fracture.; They did not have 2 normal x-rays at least 3 weeks apart that did not show a fracture.

BILATERAL FOOT PAIN, SUBCUTANEOUS FOOT MASS, 3RD INTERSPACE RIGHT AND LEFT. 0.5 X 0.5 CM, NODULE, TENDER; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MR5, PET Scan, or Unlisted CT/MRI.

Subjective: Patient returns to clinic following up of pain in her right foot and ankle and left foot. Pt relates that this has been ongoing for years and injections, orthotics, boots, and off loading have failed. Left foot is better but right is killing h; This is a request for an Ankle MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The member has a recent injury.; The study is requested for a reason other that ankle pain.

This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for plantar fasciitis.; The patient has had foot pain for over 4 weeks.; The patient has been treated with crutches for at least 6 weeks.
This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture); This is not a pre-operative study for planned surgery. This is a request for an Ankle MRI.; Surgery or arthroscopy is scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury. This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed. This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type. R/o central process as cause of psychosis, pt endorses hx of depressive sx since 10 or 11 yo, pt was also raped at 10 or 11yo, pt currently endorses depressive sx and meets criteria for MDE present episode has been ongoing for about 5 years, pt has chro; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications. Developed chronic back pain, pain is debilitating and adversely affecting her ability to function in activities of daily living; This study is being ordered for trauma or injury.; initial onset 2008; There has not been any treatment or conservative therapy.; Chronic back pain, pain is aching and occasionally stabbing, right sided pain is greater than left, exacerbated by standing for prolonged periods or sitting for prolonged periods; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology. Developed chronic back pain, pain is debilitating and adversely affecting her ability to function in activities of daily living; This study is being ordered for trauma or injury.; initial onset 2008; There has not been any treatment or conservative therapy.; Chronic back pain, pain is aching and occasionally stabbing, right sided pain is greater than left, exacerbated by standing for prolonged periods or sitting for prolonged periods; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology. She has persistent cough and sinusitis even with the use of Flonase and singulair.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT.
This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT

This is a request for a neck soft tissue CT.; There has been recent trauma or other injury to the neck.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.; Yes this is a request for a Diagnostic CT

")' "The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.;" A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
Pulmonary Medicine  Approval  71250 CT CHEST, THORAX

A Chest/Thorax CT is being ordered. This study is being ordered for screening of lung cancer. The patient is 54 years old or younger. The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months. Yes this is a request for a Diagnostic CT.

A Chest/Thorax CT is being ordered. This study is being ordered for known or suspected inflammatory disease or pneumonia. Yes this is a request for a Diagnostic CT.

A Chest/Thorax CT is being ordered. This study is being ordered for work-up for suspicious mass. Yes this is a request for a Diagnostic CT.

A Chest/Thorax CT is being ordered. This study is being ordered for work-up for suspicious mass. Yes this is a request for a Diagnostic CT.

A Chest/Thorax CT is being ordered. This study is being ordered for screening of lung cancer. The patient is between 55 and 80 years old. This patient is a smoker or has a history of smoking. The patient has a 30 pack per year history of smoking. The patient did NOT quit smoking in the past 15 years. The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition. The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months. Yes this is a request for a Diagnostic CT.

A Chest/Thorax CT is being ordered. This study is being ordered for work-up for suspicious mass. Yes this is a request for a Diagnostic CT.

A Chest/Thorax CT is being ordered. This study is being ordered for work-up for suspicious mass. Yes this is a request for a Diagnostic CT.

A Chest/Thorax CT is being ordered. This study is being ordered for work-up for suspicious mass. Yes this is a request for a Diagnostic CT.

Problem List Impression: 1. COPD (chronic obstructive pulmonary disease) J44.9. Comment/Status: moderately severe. symptoms are well controlled. Plan: She could not tolerate Anoro due to side effects. back on advair. cont same. Full PFTs in 3 m; A Chest/Thorax CT is being ordered. This study is being ordered for screening of lung cancer. The patient is between 55 and 80 years old. This patient is a smoker or has a history of smoking. The patient has a 30 pack per year history of smoking. The patient did NOT quit smoking in the past 15 years. The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition. The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months. Yes this is a request for a Diagnostic CT.

There is evidence of a lung, mediastinal or chest mass noted within the last 30 days. They had a previous Chest x-ray. A Chest/Thorax CT is being ordered. This study is being ordered for work-up for suspicious mass. Yes this is a request for a Diagnostic CT.

There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days. A Chest/Thorax CT is being ordered. This study is being ordered for work-up for suspicious mass. Yes this is a request for a Diagnostic CT.

</table>
According to Radiologist:
Impression:
Slight interval decrease in size of right lower lobe pulmonary nodule; and stable right hilar lymph node. Follow-up chest CT in 6 months can monitor.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

Chest pain describes the reason for this request.; Abnormal imaging (xray) finding was relevant in the diagnosis or suspicion of inflammatory lung disease; This study is being requested for known or suspected inflammatory disease such as sarcoidosis, pneumoconiosis, asbestosis, silicosis; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT

Chest pain describes the reason for this request.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

Chest pain describes the reason for this request.; An abnormal finding on physical examination led to the suspicion of infection.; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema); Yes this is a request for a Diagnostic CT

Coughing up blood (hemoptysis) describes the reason for this request.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

CXR today showed loculated effusion and ?nodule. No indication for ABx at this time; They had a previous Chest x-ray.; "There is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT
| Pulmonary Medicine Approval 71250 CT CHEST, THORAX Follow up CT Chest for further evaluation on pulmonary nodules found on 8/17/17 CT Chest; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT | 1 |
| Pulmonary Medicine Approval 71250 CT CHEST, THORAX follow up CT for known nodules; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT | 1 |
| Pulmonary Medicine Approval 71250 CT CHEST, THORAX follow up CT for lung mass from 4/2017; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT | 1 |
| Pulmonary Medicine Approval 71250 CT CHEST, THORAX follow up from ct performed 06/22/2017 and showed pulmonary nodule left lower lobe recommended ct follow up 3-6 months; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT | 1 |
| Pulmonary Medicine Approval 71250 CT CHEST, THORAX follow up of known nodules. Last CT Chest dated 2/8/17 &x0D; &x0D; IMPRESSION: &x0D; 1. There are multiple calcified and noncalcified pulmonary nodules throughout both lungs. The changes are most likely related to granulomatous disease. A followup study in 9 month; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT | 1 |
| Pulmonary Medicine Approval 71250 CT CHEST, THORAX From Oct 26;&x0D; FINDINGS:&x0D; 2 view radiograph of the chest was submitted for review. No osseous;&x0D; abnormality is seen. There is an opacity in the left lung apex.&x0D; Follow-up chest CT in 3-4 months is recommended. The heart,&x0D; mediastinum, hila, and pulmonary ve; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT | 1 |
| Pulmonary Medicine Approval 71250 CT CHEST, THORAX He has been having worsening SOB recently. He saw a cardiologist in Benton recently, Dr. Stewart?, who preformed a LHC. As per the patient, he was told his arteries are clean. No echo;&x0D; Shortness of breath severity moderate, gets OOB on walking for a co; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT | 1 |
| Pulmonary Medicine Approval 71250 CT CHEST, THORAX Higher resolution than one done in 10/17; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT | 1 |
| Pulmonary Medicine Approval 71250 CT CHEST, THORAX 'None of the above' describes the reason for this request.; Abnormal mass in the chest, wall, or lung is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study beign requested for known cancer or tumor; Yes this is a request for a Diagnostic CT | 1 |
'None of the above' describes the reason for this request.; An abnormal imaging (xray) finding led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema); Yes this is a request for a Diagnostic CT

'None of the above' describes the reason for this request.; Another abnormality was relevant in the diagnosis or suspicion of inflammatory lung disease; This study is being requested for known or suspected inflammatory disease such as sarcoidosis, pneumoconiosis, asbestosis, silicosis; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT

'None of the above' describes the reason for this request.; It is unknown what if anything else is related to this request for imaging of a known cancer or tumor.; This is a request for a Chest CT.; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT

'None of the above' describes the reason for this request.; Known tumor and new symptoms involving the chest, chest wall, lung or pelvis is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT

'None of the above' describes the reason for this request.; 'None of the above' were related to the suspicion of cancer in this patient.; This is a request for a Chest CT.; This study is being requested for suspected cancer or tumor.; Yes this is a request for a Diagnostic CT

'None of the above' describes the reason for this request.; Surveillance of a known cancer following treatment is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT

'None of the above' describes the reason for this request.; The patient had an abnormal imaging (xray) finding related to the suspicion of cancer in this patient.; This is a request for a Chest CT.; This study is being requested for suspected cancer or tumor.; Yes this is a request for a Diagnostic CT

'None of the above' describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

'None of the above' describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT
'None of the above' describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

None of the above describes the reason for this request.; This reason this study is being requested is unknown.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT

None of the above describes the reason for this request.; This study is being requested for an unresolved cough; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT

None of the above describes the reason for this request.; This study is being requested for 'none of the above'.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT

There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

pt had a CTA on 08/21/17; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

pt had previous CT chest in June 2017 showing 12mm mass in the right upper lobe; "There is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Pt has 5mm nodule on the right lower abdomen, shortness of breath; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

pt has mediastinal lymphadenopathy; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; Yes this is a request for a Diagnostic CT

pt has pulmonary nodules; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT
PULMONARY NODULES; A Chest/Thorax CT is being ordered.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

Recurrent respiratory infections. Last round of antibiotics 1 month ago and patient is having symptoms again; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

The patient is presenting new signs or symptoms.; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

There is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

This is a request for a Thorax (Chest) CT.; 'None of the above' describes the reason for this request.; The patient had an abnormal finding on physical exam related to the suspicion of cancer.; This study is beign requested for suspected cancer or tumor.; Yes this is a request for a Diagnostic CT

This is a request for CT Chest for the year follow up of lung nodules. Last CT Chest is dated 10/17/17. IMPRESSION: Multiple small indeterminate lung nodules are identified. You may wish to consider short term followup in 4 months for further ev; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT

Unknown; "There is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Unknown; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Unknown; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

unknown; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

PULMONARY MEDICINE

Approval 71250 CT CHEST, THORAX

IMPRESSION: MULTIPLE SMALL INDETERMINATE LUNG NODULES ARE IDENTIFIED. YOU MAY WISH TO CONSIDER SHORT TERM FOLLOWUP IN 4 MONTHS FOR FURTHER EVALUATION.
Pulmonary Medicine Approval 71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST RAST

This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography. 1

Pulmonary Medicine Approval 71275 CT ANGIOGRAPHY CHEST

This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography. 1

Pulmonary Medicine Approval 72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST

This is a request for a thoracic spine MRI.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis. 1

Pulmonary Medicine Approval 72196 MRI PELVIS

This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Yes this is a request for a Diagnostic CT 1

Pulmonary Medicine Approval 74150 CT ABDOMEN WITHOUT CONTRAST

This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT 1

Pulmonary Medicine Approval 74176 CT ABD & PELVIS W/O CONTRAST

This is a request for a Diagnostic CT 1

Pulmonary Medicine Approval 74176 CT ABD & PELVIS W/O CONTRAST

A 1.1 centimeter enhancing lesion in the inferior pole of the right kidney. While this could represent a complex cyst, this could also represent a solid mass. Further evaluation with a pre and post contrast MRI of the abdomen is recommended.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology 1

Pulmonary Medicine Approval 74181 MRI ABDOMEN

This is a request for a Diagnostic CT 1
Pulmonary Medicine Approval 75557 Cardiac MRI Morph & structure w/o contrast
This is a request for a heart or cardiac MRI 2

Pulmonary Medicine Approval 78813 PET IMAGING WHOLE BODY
This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.; This is NOT a Medicare member. 1

Pulmonary Medicine Approval 78813 PET IMAGING WHOLE BODY
This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This is NOT a Medicare member. 1

Pulmonary Medicine Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has not been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member. 1

Pulmonary Medicine Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member. 4

Pulmonary Medicine Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member. 4

Pulmonary Medicine Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
This is a request for a Tumor Imaging PET Scan; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
Other nonspecific abnormal finding of lung field, lung mass; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member. 1

Pulmonary Medicine Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has not been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; This study is being requested for Lung Cancer.; This is NOT a Medicare member. 1
This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Brain Cancer/Tumor or Mass.; This is NOT a Medicare member.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected pulmonary hypertension.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient’s cardiac symptoms.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.
Pulmonary Medicine  Approval  G0297 Low dose CT scan (LDCT) for lung cancer screening

Problem List/Impression: 1. Cough R05
Comment/Status: from history, most likely related to post nasal drip and upper airway syndrome. He has GERD and he is symptomatic now. He produces white phlegm. Plan: Flonase, zyrtec and follow up wi; This request is for a Low Dose CT for Lung Cancer Screening.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening.; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.

Radiology Services Denied Not Medically Necessary

This is a request for a Sinus CT.; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT

Radiology Services Denied Not Medically Necessary

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/11/2017; There has been treatment or conservative therapy.; chronic sinusitis, infections, asthma.; test, medications.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for a Diagnostic CT

There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Radiation Oncology  

This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT  

This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT
Radiation Oncology Approval 74181 MRI ABDOMEN
This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; It is not known if the patient is presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.\"; INITIAL SCAN AFTER FINISHING TREATMENT

Radiation Oncology Approval 74181 MRI ABDOMEN
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.\"; "The patient has had an abdominal ultrasound, CT, or MR study.\"; Initial staging for liver metastases.

Radiation Oncology Approval 78813 PET IMAGING WHOLE BODY
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Cervical Cancer.; This is NOT a Medicare member.

Radiation Oncology Approval 78813 PET IMAGING WHOLE BODY
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; 1 PET Scans has already been performed on this patient for this cancer.; This is NOT a Medicare member.

Radiation Oncology Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Radiation Oncology

Radiation Oncology Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being requested for Colo-rectal Cancer.; This is NOT a Medicare member.

Radiation Oncology Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

Radiation Oncology Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Colo-rectal Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

Radiation Oncology Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; The patient does NOT have Thyroid or Brain cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

Radiation Oncology Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; 1 PET Scans has already been performed on this patient for this cancer.; This is NOT a Medicare member.

Radiation Oncology Approval 78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Ovarian or Esophageal Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Cervical Cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Breast Cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new signs or symptoms.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 2 PET Scans have already been performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; There is existing evidence of metastasis or other tumor in the body.; This study is being requested for Head/Neck Cancer.; The patient does NOT have Thyroid or Brain cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being requested for Head/Neck Cancer.; It is unknown if the patient has Thyroid or Brain cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; There is existing evidence of metastasis or other tumor in the body.; This study is being requested for Head/Neck Cancer.; The patient does NOT have Thyroid or Brain cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being requested for Head/Neck Cancer.; It is unknown if the patient has Thyroid or Brain cancer.; This is NOT a Medicare member.

This is a request for a brain/head CT.; The patient has a new onset of a headache within the past month; Headache best describes the reason that I have requested this test. 1
'None of the above' describes the reason for this request.; Initial staging prior to treatment is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT
This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.
This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.; This is NOT a Medicare member.

Yes, this is a request for CT Angiography of the brain.

Yes, this is a request for CT Angiography of the abdomen.

Yes this is a request for a Knee MRI.; The ordering physician is not an oncologist or orthopedist.; This study is being ordered for staging.; Known Tumor
This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Yes this is a request for a Diagnostic CT
This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastes.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT
This is a request for CT Angiography of the Abdomen and Pelvis.

Yes, this is a request for CT Angiography of the abdomen.

Unknown; “There is evidence of a lung, mediastinal or chest mass noted within the last 30 days.”; It is unknown if they had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT

Previous CT was done, wants to get better look at chest; This is a request for an MR Angiogram of the chest or thorax

This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.; Yes this is a request for a Diagnostic CT

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT

This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.

This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Ms. Waldrip is a 60 year old female who comes on referral of Dr. West for RA evaluation. She has a previous diagnosis of RA, previously followed by Dr. Jones. She reports that she is “falling apart.” She also reports a previous diagnosis of fibromyalgia,

UNKNOWN: This study is being ordered for a neurological disorder.; 05/09/2017; There has been treatment or conservative therapy.; BACK AND NECK PAIN; MEDICATIONS, XRAYS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; “The patient has not been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist.”.; This is a continuation or recurrence of symptoms related to a previous surgery or fracture.; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.; &<Enter Additional Clinical Information>; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.
The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain.; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; the patient was treated with a facet joint injection.

The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks.

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT

This is a request for a Pelvis MRI.; The request is for suspicion of joint or bone infection.

This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.

This is a request for a Pelvis MRI.; The study is being ordered for joint pain or suspicion of joint or bone infection.; The study is being ordered for bilateral hip avascular necrosis.

UNKNOWN; This study is being ordered for a neurological disorder.; 05/09/2017; There has been treatment or conservative therapy.; BACK AND NECK PAIN; MEDICATIONS, XRAYS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for Inflammatory/Infectious Disease; Approximately 6 years ago; There has been treatment or conservative therapy; MULTIPLE JOINT PAIN. REFERRED TO DR. CHI FOR INFLAMMATORY ARTHRITIS.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Enter date of initial onset here 11/07/2005 - or Type In Unknown If No Info Given; There has been treatment or conservative therapy; Describe primary symptoms here - Abnormal labs, pain and stiffness in his hands and feet.

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment.; The patient does not have a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment.; MRI of the right shoulder to rule out rotator cuff tear. Restriction of shoulder movement. Tenderness - Mild tenderness in the PIPs and MCPs. Bilateral & right; Restricted movement - Severe restriction on abduction in both shoulders, more on right side. According to

The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; It is not known if the study is ordered prior to arthroscopic surgery.; It is not known if the study is for pre-operative planning; He can’t abduct shoulder, rotator cuff surgery.

The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis; The patient has had recent plain films of the shoulder.; The plain films were not normal.

The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.
This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks; The patient does have an abnormal plain film study of the joint; The patient has been treated with and failed a course of four weeks of supervised physical therapy.

This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks; The patient does have an abnormal plain film study of the joint; The patient has not been treated with and failed a course of four weeks of supervised physical therapy; The patient has a documented limitation of their range of motion; The patient has experienced pain for greater than six weeks; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; There has been treatment or conservative therapy; Describe primary symptoms here - or Type In Unknown If No Info Given; medication, PT;

One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This is a request for a foot MRI; The study is being ordered for foot pain; The study is being ordered for chronic pain; The patient has had foot pain for over 4 weeks; The patient has been treated with anti-inflammatory medication for at least 6 weeks. Osteoarthritis of knee, pt has completed PT and steroid injections and anti-inflammatory meds; This is a request for a Knee MRI; The study is requested for knee pain; The pain is not from a recent injury, old injury, chronic pain or a mass. Positive SSA; This study is being ordered for Inflammatory/ Infectious Disease; 7/2017; There has been treatment or conservative therapy; Muscle weakness worsening, weight loss, EMG shows no muscle damage. CPK levels are elevated; Lab tests, and steroids; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

pt. is using crutches to walk, twisted knee, buckling when trying to stand, effusion on knee, medication; This is a request for a Knee MRI; The study is requested for knee pain; The pain is from a recent injury; There is a suspicion of a meniscus, tendon, or ligament injury; Surgery or arthroscopy is not scheduled in the next 4 weeks.

This is a request for a foot MRI; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition; There is a history of new onset of severe pain in the foot within the last two weeks.
This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; &lt;Additional Clinical Information&gt;; Suspicous Mass or Suspected Tumor/ Metastasis

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is an orthopedist.; There is no suspected meniscus, pre-op or post-op evaluation, non-acute Chronic Pain, suspected tumor or Aseptic Necrosis; Pain greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.

This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.
This is a request for an Ankle MRI.; There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle.; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.

This is a request for an Ankle MRI.; There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle.; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient does not have a documented limitation of their range of motion.

This is a request for an Ankle MRI.; There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle.; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.

This is a request for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is a suspicion of AVN.

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone).

This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.

Chest pain describes the reason for this request.; An abnormal imaging (xray) finding led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema).; Yes this is a request for a Diagnostic CT; restrictive lung disease; shortness of breath, chest pain. ruling out PE; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT

This is a request for a Thorax (Chest) CT.; Unexplained weight loss describes the reason for this request.; Yes this is a request for a Diagnostic CT

This is a request for CT Angiography of the abdominal arteries.

Rheumatology Disapproval
78451 Myocardial perfusion imaging, tomographic (SPECT); single study Radiology Services Denied Not Medically Necessary
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (Transient ischemic attack).; This study is being ordered for trauma or injury.; There has been treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBC, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Sports Medicine Approval
70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurologic deficits.; Yes, there is a documented evidence of extremity weakness on physical examination.

Sports Medicine Approval
72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurologic deficits.; Yes, there is a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.
72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST; This study is being ordered for trauma or injury.; There has been treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBC, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Pt presents with low back pain, has had IM cortisone injections in the past with the last injection being about a year ago. Pt had a herniated disc that was repaired back in 1995. Pain is worse in the morning and after sitting for a while with associated.

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient has 6 weeks of completed Conservative care in the past 3 months or had a spine injection

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint.; There is a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.

This is a request for a Knee MRI.; There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury
73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT
This is a request for a hip MRI.; There is a suspicion of fracture not adequately determined by x-ray.; Tendon or ligament injury is not suspected.; The hip pain is due to a recent injury.; The request is for hip pain.

EGD FOR DYSPESIA REAVALING LOWER ESOPHAGEAL ADENOCARCINOMA AND HEARTBURN; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

EHPI: Mr. Brown is a 62yo male with a history of HTN who was referred to the general surgery clinic for a large incisional hernia in RUQ. He had an open cholecystectomy in July and a incisional hernia repair in April. He states that he wears an abdominal ; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Follow up for lung nodule; A Chest/Thorax CT is being ordered.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT.

none; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT.

Patient had a pre-operative chest x-ray, showing tracheal deviation at the cervicothoracic junction. The surgeon would like to rule out any mass by CT before going through with surgery.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Onset unknown - deviation found on pre-operative chest x-ray.; There has not been any treatment or conservative therapy.; Patient had an abnormal pre-operative chest x-ray showing tracheal deviation. CT is being ordered to rule out a mass.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Post-operative evaluation describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT.

Pre-operative evaluation describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT.

The patient has been diagnosed with adenocarcinoma of the rectosigmoid junction. Patient is scheduled for a colon resection. Patient had an abnormal pre-operative chest x-ray, showing pleural effusion. Abd/Pelvis/Chest CT ordered for pre-operative assessment; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Surgery  Approval  71250 CT CHEST, THORAX
Will provide if needed; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Surgery  Approval  71250 CT CHEST, THORAX
Yes, the patient was seen by a specialist because of the traumatic injury.; Chest pain describes the reason for this request.; The patient as seen by another type of surgical specialist; This is a request for a Chest CT.; This study is being requested for chest injury or trauma within the past 2 weeks.; Yes this is a request for a Diagnostic CT

Surgery  Approval  71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST
This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

Upper Gi study was done that showed a mild contoured deformity.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

Surgery  Approval  71550 MRI CHEST
This study is being ordered for a work-up of a suspicious mass.; There is radiographic or physical evidence of a lung or chest mass.; This is a request for a chest MRI.

Surgery  Approval  72131 CT LUMBAR SPINE, LOW BACK
This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.; Yes this is a request for a Diagnostic CT

This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT n/a; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2000; There has been treatment or conservative therapy.; Low back and pelvic pain; Miralax; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Surgery  Approval  72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
This is a request for cervical spine MRI; acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.

Surgery  Approval  72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST
This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.

Wendy M King is a 36 y.o. female who has struggled with chronic right groin pain since undergoing a right inguinal hernia repair with mesh in November 2015 by Dr. Halter at SVI in Hot Springs. She was first evaluated in clinic in late August at which time; This study is being ordered due to known or suspected infection; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.;; It is not known if there has been any treatment or conservative therapy.;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

She has limited thumb range of motion. When she tries to oppose it to the small finger compared to the contralateral side. She has sensation changes and pain issue with thumb more the radial sensory nerve and the cutaneous branch the median nerve distribution; This study is being ordered for trauma or injury; 4/21/2017; There has been treatment or conservative therapy; She still has a lot of pain, soreness, and occasional swelling. She has pain and tenderness all along her thenar muscles and ranging from the first CMC joint along the first metacarpal bone and towards the first MCP joint. There is no gross instability, b; Conservative treatment of time, rest, anti-inflammatory, and activity modifications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

There is a history of upper extremity joint or long bone trauma or injury; This is a request for an Arm CT Non Joint; Yes this is a request for a Diagnostic CT; This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT; This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT.

She is tried splints, activity modifications, anti-inflammatory, and no improvement. At this point, she still symptomatic and is impacting her function and comfort; This study is being ordered for trauma or injury; 7/31/2016; There has been treatment or conservative therapy; Pain; Wrist sprain exercises, Ibuprofen, meloxicam, cockup wrist splints.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Surgery Approval

**73220 MRI UPPER EXTREMITY, ENTIRE EXTREMITY, NOT A JOINT**

This study is being ordered for Inflammatory/ Infectious Disease.; This study is being ordered for Congenital Anomaly.; 2/10/17; There has not been any treatment or conservative therapy.; patient has deformity in his right thumb and left index finger that also has swelling; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

**73220 MRI UPPER EXTREMITY, ENTIRE EXTREMITY, NOT A JOINT**

The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation. 18

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is an orthopedist.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.

X-rays also show cystic change of the middle phalanx, left index finger, possibly an enchondroma. At this point, we'll get MRIs of her left hand. Due to the cystic mass of the bone as well as her left wrist about the anatomy of the ECU.; This study is being ordered for Congenital Anomaly.; 8/2017; There has been treatment or conservative therapy.; ECU tendon subluxation, swelling and pain; Splinting; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

**73221 MRI JOINT OF UPPER EXTREMITY**

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 11/17/2017; There has been treatment or conservative therapy.; Pain, swelling, numbness, tingling; PT(2Xwk), splints for night wear; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; Yes this is a request for a Diagnostic CT

1
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; upper GI reveals mass, rlo pancreatic or dualdenal; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was not performed.; Yes this is a request for a Diagnostic CT.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is NO suspicion of metastasis.
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; It is not known if there has been any treatment or conservative therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This request is for an Abdomen MRI.; The study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist.".; Chronic Pancreatitis

This request is for an Abdomen MRI.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; unknown

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.";

This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; abd CT viewed +2cm enlarged right adrenal gland

This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; preop evaluation for consideration of pancreatic resection/Whipple's surgery

This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; Surgery is planned for within 30 days.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;; "The patient has had an abdominal ultrasound, CT, or MR study.;"

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;; "The patient has had an abdominal ultrasound, CT, or MR study.;; &lt; Enter answer here - or Type In Unknown if No Info Given. &gt;

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Abdominal pain pos from lifting weights Pain radiating to the groin

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; PANCREATIC CYST

Yes, this is a request for CT Angiography of the abdominal arteries.

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.

This is a request for neck soft tissue CT.; The study is being ordered for Follow Up.; The patient has a known tumor or metastasis in the neck.; They have not had a previous Neck CT in the last 10 months.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; There are NO new or changing symptoms in the neck.; Yes this is a request for a Diagnostic CT

‘None of the above’ describes the reason for this request.; Initial staging prior to treatment is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT

‘None of the above’ describes the reason for this request.; Known tumor and new symptoms involving the chest, chest wall, lung or pelvis is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT

Pre-operative evaluation describes the reason for this request.; This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.

This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.; Yes this is a request for a Diagnostic CT

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.

This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT

This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.
Surgical Oncology Approval

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT
This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT
There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Surgical Oncology.

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT
This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Post-operative Evaluation.

73720 MRI LEG OR LOWER EXTREMITY, OTHER THAN JOINT
This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."

74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST
This is a request for a CT Angiography of the Abdomen and Pelvis.
Reports diffuse abdominal pain, onset several weeks, moderate intensity, intermittent, cramping in character with no radiation to other abdominal sites and no aggravating or relieving factors. Patient is s/p Robotic-assisted laparoscopic radical hysterectomy; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT.

74176 CT ABD & PELVIS W/O CONTRAST
There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is Surgical Oncology.

74176 CT ABD & PELVIS W/O CONTRAST
This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; The study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT.

74176 CT ABD & PELVIS W/O CONTRAST

74176 CT ABD & PELVIS W/O CONTRAST
This is a request for an abdomen-pelvis CT combination.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Pre-op or post op evaluation; Yes this is a request for a Diagnostic CT.

74176 CT ABD & PELVIS W/O CONTRAST
This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or Rule out metastases; Yes this is a request for a Diagnostic CT.

74176 CT ABD & PELVIS W/O CONTRAST
This is a request for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient did NOT have chemotherapy, radiation therapy or surgery in the last 3 months.; They did NOT have an Abdomen MRI in the last 10 months.

74181 MRI ABDOMEN
This request is for an Abdomen MRI.; This study is being ordered for known tumor.; This study is being ordered for follow-up.; The patient did NOT have chemotherapy, radiation therapy or surgery in the last 3 months.; They did NOT have an Abdomen MRI in the last 10 months.
This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study."; Follow up of indeterminate MRI abdomen performed 6/8/2017

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.".; "The patient has had an abdominal ultrasound, CT, or MR study."; Ms. Jones is a 64F with history of Stage III melanoma excised for her left cheek in 2015. Surveillance CT and MR of showed a suspicious area in segment 3 of the liver. A sonographic directed biopsy was either non-diagnostic or it is benign. I do not ha

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20.

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; Yes, the patient have a known mutation such as BRCA1, BRCA2, PTEN or TP53.; It is unknown if the patient has a lifetime risk score of greater than 20.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; It is not know if the results of this MRI (size and shape of tumor) affect the patient's further management.

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20.

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; Yes, the patient have a known mutation such as BRCA1, BRCA2, PTEN or TP53.; It is unknown if the patient has a lifetime risk score of greater than 20.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Breast Cancer.; This is NOT for an evaluation of axillary lymph nodes.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.
This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Lung Cancer; This would be the first PET Scan performed on this patient for this cancer; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment; This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer; This is NOT a Medicare member.

'Stage' describes the reason for this request; Known tumor and new symptoms involving the chest, chest wall, lung or pelvis is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT

More troublesome perhaps is his left arm numbness. The numbness lacks clear radicular distribution but may result from proximal nerve compression or stenosis, I believe examination in the hand clinic may be beneficial and that nerve conduction studies m; This is a request for cervical spine MRI; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms; The patient has NOT had back pain for over 4 weeks.

Yes, this is a request for CT Angiography of the Neck.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache; This study is being ordered for seizures; There has been a change in seizure pattern or a new seizure.

"The ordering physician is a surgeon, pulmonologist, or cardiologist."; A Chest/Thorax CT is being ordered; This study is being ordered for vascular disease other than cardiac; Yes this is a request for a Diagnostic CT

There is no radiologic evidence of asbestosis; There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection; There is no radiologic evidence of a lung abscess or empyema; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed; A Chest/Thorax CT is being ordered; This study is being ordered for known or suspected inflammatory disease or pneumonia; Yes this is a request for a Diagnostic CT

A Chest/Thorax CT is being ordered; This study is being ordered for known tumor; Yes this is a request for a Diagnostic CT

'None of the above' describes the reason for this request; Surveillance of a known cancer following treatment is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT

Post-operative evaluation describes the reason for this request; This is a request for a Diagnostic CT

A Chest/Thorax CT is being ordered; This study is being ordered for non of the above; Yes this is a request for a Diagnostic CT

Post-operative evaluation describes the reason for this request; This is a request for a Chest CT; Yes this is a request for a Diagnostic CT
This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

History of Present Illness: Marty R Blanchard is a pleasant 58 y.o. year-old male who is being seen in the CVT surgery clinic for evaluation. He was seen a year ago with a CT scan which was done because of his chronic back pain. It showed a thin area of ; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &Rx0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &Rx0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

This is a request for CT Angiography of the Abdomen and Pelvis. 3

This study is being ordered for suspected pulmonary embolus.; This study is not requested to evaluate thoracic aneurysm, follow up post surgery; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.

Yes, this is a request for CT Angiography of the abdominal arteries. 5

The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient has a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Ovarian or Esophageal Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

Unknown Approval  70450 CT BRAIN, HEAD
This is a request for a brain/head CT.; Known or suspected blood vessel abnormality (AVM, aneurysm) with documented new or changing signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.  

Unknown Approval  70450 CT BRAIN, HEAD
This is a request for a brain/head CT.; Known or suspected inflammatory disease best describes the reason that I have requested this test.; This is a request for a brain/head CT.; 'None of the above' best describes the reason that I have requested this test. 

Unknown Approval  70450 CT BRAIN, HEAD
This is a request for a brain/head CT.; Recent (in the past month) head trauma with neurologic symptoms/findings best describes the reason that I have requested this test. 

Unknown Approval  70450 CT BRAIN, HEAD
This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test. 

Unknown Approval  70450 CT BRAIN, HEAD
This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury. 

Unknown Approval  70450 CT BRAIN, HEAD
This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer. 

Unknown Approval  70450 CT BRAIN, HEAD
This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; 

Unknown Approval  70450 CT BRAIN, HEAD
This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being ordered for trauma or injury.; 10/13/17; There has been treatment or conservative therapy.; difficulty breathing; surgery; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology 

Unknown Approval  70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST
This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is immune-compromised.; Yes this is a request for a Diagnostic CT 

Unknown Approval  70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST
This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient’s current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT 

Unknown Approval  70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST
This study is being ordered for post-operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT 

Unknown Approval  70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST
This study is being ordered for post-operative evaluation.; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT
This study is being ordered for sinusitis; This is a request for a Sinus CT.; The patient is NOT immune-compromised; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT

This is a request for a Neck CT.; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Cervical mass; right side of neck along anterior side of sternocleidomastoid muscle has enlarged lymph node or mass. Lymph Nodes: no supraclavicular LAD and cervical LAD; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT

Patient with a 4 month history of a lump on the right side of the neck that is getting larger.; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has NOT been examined twice at least 30 days apart.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; The study is being ordered for Follow Up.; The patient has a known tumor or metastasis in the neck.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; There are new or changing symptoms in the neck.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; The study is being ordered for Initial Staging.; The patient has a known tumor or metastasis in the neck.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; There has been recent trauma or other injury to the neck.; Yes this is a request for a Diagnostic CT

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT

Yes, this is a request for CT Angiography of the Neck.

"This is a request for orbit, face, or neck soft tissue MRI.239.8"; The study is ordered for trauma or injury of the orbit, face or neck soft tissue
70540 MRI ORBIT/FACE/NECK W/O DYE

There is not a suspicion of an infection or abscess.; This examination is NOT being requested to evaluate lymphadenopathy or mass.; There is not a suspicion of a bone infection (osteomyelitis).; There is NOT a suspicion of an orbit or face neoplasm, tumor, or metastasis.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.

This is a request for an Orbit MRI.; There is a history of orbit or face trauma or injury.

There is not an immediate family history of aneurysm.; This is a request for a Brain MRA.

There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has been a stroke or TIA within the past 2 weeks.; This is a request for a Brain MRA. This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; “There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness.”

This is a request for a head and neck MR Angiogram.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; “There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness.”

This is a request for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

This is a request for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).
This request is for a Brain MRI. It is unknown if the study is being requested for evaluation of a headache. Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell’s Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation). ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation). ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if the headache is described as a “thunderclap” or the worst headache of the patient’s life. ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache. ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache. ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache. ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache. n/a; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ongoing since 09/19/2014; There has been treatment or conservative therapy.; migraine and neck pain greater than 3 days; imitrex as needed, relaxation techniques, topamax, maxalt; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Patient has a mild intermittent right upper extremity rest tremor along with cupping of the right hand and dystonic posturing of the right hand when at rest. A mild right upper extremity postural and minimal right upper extremity action tremor is also seen. This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

Patient is a 59F with previously diagnosed multiple sclerosis presenting to the University of Colorado to establish care. Currently on no DMTs. Previous trials of Copaxone and Avonex in the past. Has remained stable radiographically on scans in 2016.; This study is being ordered for a neurological disorder.; multiple sclerosis. last scan 8/11/16.; There has been treatment or conservative therapy.; Patient is a 59F with previously diagnosed multiple sclerosis presenting to the University of Colorado to establish care. Currently on no DMTs. Previous trials of Copaxone and Avonex in the past.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Patient is here to follow-up. She is accompanied by her mother. Her memory loss continues to be an issue. She states that she is still concerned with this. She is seeing Dr. Gustafson neurology in 2-3 weeks. She is also having worsening migraines. They're; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).

Patient reports BLE weakness.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.

RESTAGING BRAIN CANCER WITH NEW PAIN IN SPINE; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
RESTAGING KNOWN BREAST CANCER AND LUNG CANCER; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Right arm and leg weakness with increased tone and brisk reflexes differential include cervical cord pathology vs left hemisphere lesions; HIV; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.

SATURDAY MORNING FEELING LIGHTHEADED AND DIZZY, FACIAL NUMBNESS, STABBING, PAIN IN LEFT EYE, RIGHT ARM NUMBESS, DIMISHED APPETITE.; This study is being ordered for Congenital Anomaly.; SATURDAY MORNING FEELING LIGHTHEADED AND DIZZY, FACIAL NUMBNESS, STABBING, PAIN IN LEFT EYE, RIGHT ARM NUMBESS, DIMISHED APPETITE; It is not known if there has been any treatment or conservative therapy.; SATURDAY MORNING FEELING LIGHTHEADED AND DIZZY, FACIAL NUMBNESS, STABBING, PAIN IN LEFT EYE, RIGHT ARM NUMBESS, DIMISHED APPETITE; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

see scanned info; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/29/2017; It is not known if there has been any treatment or conservative therapy.; seizure while driving, now neck pain present, family hx of aneurysm; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.

This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell’s Palsy.
This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. 

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo. 

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient has a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.); This is NOT a Medicare member. 

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was abnormal. 

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed. 

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type. 

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack). 

This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor. 

This request is for a Brain MRI; This study is being requested for evaluation of a headache.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.
unknown; This study is being ordered for something other than: known trauma or injury, metastastic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/17/2017; There has not been any treatment or conservative therapy.; Pain to neck, Limited range of motion to neck with no reported injury. Severe, pulsating, pain to head that does not respond to treatment with OTC pain relievers.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

worsening headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache. "The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient. "; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT

There is a potential 12 mm density overlying the left midlung and the posterior 8-9 rib interspace. No acute infiltrate or pulmonary edema. Mild eventration of the anterior right diaphragm. Possible nodule in the left lower lung. Please consider a chest CT; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT.

There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient.".; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT.

71250 CT CHEST, THORAX; This study is being ordered for Vascular Disease.; 12/01/2015; It is not known if there has been any treatment or conservative therapy.; underwent TEVAR/Lt carotid subclavian bypass 12/2015. He subsequently developed Type I endoleak and underwent extension of endovascular stent/coil embolization of proximal false lumen. This was done by Dr. Michael McNally at UT in Knoxville, TN.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST RAST; This study is being ordered for Vascular Disease.; 12/01/2015; It is not known if there has been any treatment or conservative therapy.; underwent TEVAR/Lt carotid subclavian bypass 12/2015. He subsequently developed Type I endoleak and underwent extension of endovascular stent/coil embolization of proximal false lumen. This was done by Dr. Michael McNally at UT in Knoxville, TN.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Known ascending aortic aneurysm; This study is being ordered for Vascular Disease.;
Ascending aortic aneurysm; There has been treatment or conservative therapy.; He
has coronary disease.; Blood pressure medication to keep blood pressure controlled.
Treatment for hyperlipidemia.; One of the studies being ordered is NOT a Breast MRI,
CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs
specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical
Oncology or Radiation Oncology.

Ms. Crain is a 56y/o female patient who was referred to EP by Dr. Paydak for possible
PVI d/t paroxysmal atrial fibrillation. Symptoms include palpitations in the neck and
all body and head dizziness. Breakthrough on flecainide. Daily recur. She was on am;
This study is not requested to evaluate suspected pulmonary embolus.; This study will
not be performed in conjunction with a Chest CT.; This study is being ordered for
Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is
scheduled/planned.; A catheter angiogram has not been performed within the last
month.; Yes, this is a request for a Chest CT Angiography.

Referring provider: Andrew Henry MD;
I had the pleasure of seeing Mrs. Alarcon in consultation for Atrial fibrillation.
As you know she is a pleasant 56 yr old female with a history of HTN, HL, atria; This study is not requested to
evaluate suspected pulmonary embolus.; This study will not be performed in
conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.;
This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter
angiogram has not been performed within the last month.; Yes, this is a request for a
Chest CT Angiography.

Referring Provider: Paxio, Andre;
I had the pleasure of seeing Mr. Reed in consultation for persistent atrial fibrillation. As you know he is a pleasant 58 yr old
male with a history of HTN, prior gastric bypa; This study is not requested to evaluate
suspected pulmonary embolus.; This study will not be performed in conjunction with
a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-
operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has not
been performed within the last month.; Yes, this is a request for a Chest CT Angiography.

This study is not requested to evaluate suspected pulmonary embolus.; This study
will not be performed in conjunction with a Chest CT.; This study is being ordered for
Suspected Vascular Disease.; There are no new signs or symptoms indicative of a
dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.;
There are signs or symptoms indicative of vascular insufficiency to the neck or arms.;
Yes, this is a request for a Chest CT Angiography.

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a
request for a Chest CT Angiography.

The patient does have neurological deficits.; This study is not to be part of a
Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due
to chronic neck pain or suspected degenerative disease.; There is a reason why the
patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting
symptoms of Evidence of a recent fracture on previous imaging studies.
The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.  

The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Radiculopathy documented on EMG or nerve conduction study.  

The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.  

The patient does not have any neurological deficits.; This is a request for a thoracic spine CT.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT  

The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.; Yes this is a request for a Diagnostic CT  

The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT  

The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; Yes this is a request for a Diagnostic CT
| Unknown Approval | 72131 CT LUMBAR SPINE, LOW BACK | This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT |

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. 1

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. 1

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness, numbness and tingling down her left leg.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture. 1

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms. 1
Chief Complaint:
back pain

Reason For Visit:
Patient is here with c/o x 1 month. Patient reports pain is worsening also states pain has started to radiate down leg into bottom of foot as well as some tingling and numbness.

Lumbar back: She exhibits decreased range of motion, tenderness and spasm. Neurological: Positive for dizziness, tingling, sensory change, weakness and headaches; The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms; There is weakness; Neurological: She is alert and oriented to person, place, and time. A sensory deficit is present. Decreased strength to BLE 2/5. Decreased sensation to BLE. Positive bilateral straight leg raise.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Lumbar spondylosis; The study requested is a Lumbar Spine MRI; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.
Patient has had physical therapy (see attached clinicals) also the has had more than 6 weeks of Nsaids; Aleve 220mg, gabapentin 800mg, tramadol 50mg and ibuprofen 200mg (see 05/25/17 office visit note); The study requested is a Lumbar Spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; This 50 year old female presents with low back pain with bilateral leg pain but mainly on the right. She states her pain is so deep in her legs that she can't tell if it's on the anterior or posterior side. She states the pain is worse with standing and w; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pt is in pain, Limited ROM.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Bi-lateral extremidades.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

The patient complains of pain in lower back. He reports onset of pain gradually over time without significant initiating factor. The patient describes his pain as constant with intermittent flare ups. The pain is aching, stabbing, sharp, deep, cramping an; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.

The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.

Ms. Jones is a 33 y.o. G0 African American female who presents for evaluation of Pelvic mass. Pt reports she was admitted to the hospital recently d/t cardiac related issues and during w/u, a pelvic mass of some sort was noted during cardiac echol, and ; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. PELVIC CONGESTION SYNDROME; This is a request for a Pelvis MRI.; It is not known if this is a preoperative study.; The study is being ordered for suspicion of pelvic inflammatory disease or abscess. 1

The ordering physician is an orthopedist.; This is a request for a Pelvis MRI.; The study is being ordered for pelvic trauma or injury.; This is an evaluation of the pelvic girdle. 1

This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury. 3

This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease? 3

X-ray of pelvis recently revealed changes suspicious for sacroiliitis. I suspect that he has seronegative spondyloarthritis causing both peripheral and axial arthritis.; This is a request for a Pelvis MRI.; No, this is not a preoperative study.; The study is being ordered for suspicion of pelvic inflammatory disease or abscess. 1

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT 2

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT 2

This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT 1
This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; The ordering physician is an orthopedist.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity bone or soft tissue infection.

The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity bone or soft tissue infection.

The request is for a shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

The requested study is a Shoulder MRI.; The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment.; The ordering physician is an orthopedist.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; The patient has a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.

The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.

Reports bilat feet have been cool to touch x 2 yrs, complaining of abdominal pain, nausea, diarrhea, dizziness, weakness; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/10/2017; It is not known if there has been any treatment or conservative therapy.; abdominal pain, nausea, diarrhea, dizziness, weakness, left leg pain he has been having for the last couple of days, reports bilat feet have been cool to touch x 2 yrs; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

1

This is a request for a foot MRI.; A plain x-ray of the area been done.; The study is being ordered for foot pain.; The study is being ordered for known or suspected septic arthritis or osteomyelitis.; The results of the plain film x-ray were abnormal.
1

This is a request for a foot MRI.; A plain x-ray of the area been done.; The study is being ordered for foot pain.; The study is being ordered for known or suspected septic arthritis or osteomyelitis.; The results of the plain film x-ray were normal.; The patient has NOT had any abnormal lab studies.
1

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.
2
This is a request for a Knee MRI.; The study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/2017; There has not been any treatment or conservative therapy.; He has bilateral knee pain and it has been going on for many months. It seems to be getting worse. He complains of grinding and catching in the knee, much of the pain is anteromedial.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/2017; There has not been any treatment or conservative therapy.; He has bilateral knee pain and it has been going on for many months. It seems to be getting worse. He complains of grinding and catching in the knee, much of the pain is anteromedial.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for a knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

This is a request for a Knee MRI.; The study is being ordered for infection.; There are physical exam findings, laboratory results, other imaging including bone scan or plain film confirming infection, inflammation and or aseptic necrosis.

This is a request for a Knee MRI.; The study is being ordered for foot pain.; The study is being ordered to rule out tarsal coalition.; The patient has had foot pain for over 4 weeks.; The patient has been treated with a protective boot for at least 6 weeks.

This is a request for a Knee MRI.; The study is being ordered for foot pain.; The study is being ordered for infection.; There are physical exam findings, laboratory results, other imaging including bone scan or plain film confirming infection, inflammation and or aseptic necrosis.

This is a request for a Knee MRI.; The study is being ordered for foot pain.; The study is being ordered to rule out tarsal coalition.; The patient has had foot pain for over 4 weeks.; The patient has been treated with immobilization for at least 6 weeks.

This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.;非急性慢性疼痛; 疼痛大于3天

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Instability; It is not known if the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.
This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion

This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days

This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Immobilization; No, the member do not experience a painful popping, snapping, or giving away of the knee.

This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy

This is a request for a Knee MRI.; This study is being ordered prior to arthroscopic surgery.; The ordering physician is an orthopedist.; Pre-operative Evaluation; Locking
This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI.;" There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.

This is a request for an Ankle MRI.; There is a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; Tendon or ligament injury is not suspected.

This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.

X-ray shows Left tibial plateau fracture.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.

Pt has left hip and groin pain. the pain is increased with any type of movement. anti-inflammatories help a little. External rotation and extension elicits pain. Flexion and internal rotation elicit some pain also; This is a request for a hip MRI.; The hip pain is not due to a recent injury, old injury, Chronic Hip Pain or a Mass.; The request is for hip pain.

Right hip pain that has been going on for several months. The pain is located on the right side and radiates to the pts. groin area. Internal rotation elicits significant hip and groin pain.; This is a requests for a hip MRI.; The hip pain is not due to a recent injury, old injury, Chronic Hip Pain or a Mass.; The request is for hip pain.

This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;." There is a suspicion of AVN.

This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;." There is a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone).
This is a request for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.

This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Abnormal abdominal ultrasound.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

NASH, abnormal liver functions, ascites; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &x; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT

Patient had U/S done that recommended patient have a CT scan done; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT

RESTAGING; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Yes this is a request for a Diagnostic CT

Yes this is a request for a Diagnostic CT

Yes this is a request for a Diagnostic CT
This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Yes this is a request for a Diagnostic CT 1

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT 2

This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; This patient is experiencing hematuria.; The hematuria is newly diagnosed.; Yes this is a request for a Diagnostic CT 1

This is a request for an Abdomen CT.; This study is being ordered for a known tumor, mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT 2

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT 3

This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; Yes this is a request for a Diagnostic CT 1

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/10/2017; It is not known if there has been any treatment or conservative therapy.; abdominal pain, nausea, diarrhea, dizziness, weakness, left leg pain he has been having for the last couple of days, reports bilat feet have been cool to touch x 2 yrs; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology 1

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. 2

&It; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for protein.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT 1
This is a request for an abdomen-pelvis CT combination. A urinalysis has not been completed. This study is being requested for abdominal and/or pelvic pain. The study is being ordered for chronic pain. This is the first visit for this complaint. The patient did not have a amylase or lipase lab test. Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination. The reason for the study is known tumor. This study is being ordered for follow-up. The patient is not presenting new symptoms. This study is not being requested for abdominal and/or pelvic pain. The study is not requested for hematuria. The patient is female. The last Abdomen/Pelvis CT was performed within the past 10 months. The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days. Yes this is a request for a Diagnostic CT

This study is being requested for abdominal and/or pelvic pain. The study is being ordered for acute pain. There has been a physical exam. The patient is female. A pelvic exam was NOT performed. Yes this is a request for a Diagnostic CT

This study is being ordered for a metastatic disease. There are 2 exams are being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

This study is being ordered for a metastatic disease. There are 3 exams are being ordered. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
74176 CT ABD & PELVIS W/O CONTRAST

; This study is being ordered for Inflammatory/ Infectious Disease.; ; There has not been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; ; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

74176 CT ABD & PELVIS W/O CONTRAST; This study is being ordered for Vascular Disease.; 12/01/2015; It is not known if there has been any treatment or conservative therapy.; underwent TEVAR/Lt carotid subclavian bypass 12/2015. He subsequently developed Type I endoleak and underwent extension of endovascular stent/coil embolization of proximal false lumen. This was done by Dr. Michael McNally at UT in Knoxville, TN.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; ; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

74176 CT ABD & PELVIS W/O CONTRAST due to lesions and pain ordered these test to look for something causing problems; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.; ; pain, lesions are all over her body including the face, chest, abdomen and pelvis area.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; ; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

74176 CT ABD & PELVIS W/O CONTRAST fatigue and weight loss (10 lbs), on chest xray there are several questionable areas, possible right upper low mass, possible left low mass; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

74176 CT ABD & PELVIS W/O CONTRAST Lab done 9/28/17 shows a microcytic anemia and a normal WBC and normal differential (normal lymphocyte percentage). Chemistry panel normal including LDH (see below for results); ; This is a request for an abdomen-pelvis CT combination.; ; The reason for the study is known tumor.; ; This study is being ordered for follow-up.; ; The patient is not presenting new symptoms.; ; This study is not being requested for abdominal and/or pelvic pain.; ; The study is not requested for hematuria.; ; The patient is female.; ; The last Abdomen/Pelvis CT was performed within the past 10 months.; ; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; ; Yes this is a request for a Diagnostic CT.

74176 CT ABD & PELVIS W/O CONTRAST Mr. Williams is a 59-year-old African-American male who was referred to me for further evaluation of newly diagnosed rectal cancer. The patient reports he recently developed hemorrhoidal pain as well as bright red blood per rectum. He underwent a colon; This study is being ordered for a metastatic disease.; ; There are 3 exams are being ordered.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; ; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

74176 CT ABD & PELVIS W/O CONTRAST nausea , pain R/O appendice; ; This is a request for an abdomen-pelvis CT combination.; ; This study is being requested for abdominal and/or pelvic pain.; ; The study is being ordered for acute pain.; ; There has been a physical exam.; ; The patient is female.; ; A pelvic exam was NOT performed.; ; Yes this is a request for a Diagnostic CT.
Neoplasm: colorectal, rx monitor or f/u; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

PROGRESSION EVALUATION; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

pt having a rising psa and having new hip pain.; This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This is a request for evaluation of prostate cancer.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is male.; The patient had a prior Abdomen/Pelvis CT.; Yes this is a request for a Diagnostic CT.

pt having abd pain, hx of liver infiltrates, no nausea but does have heartburn. RUQ tenderness and RLQ tenderness.; Gb US was negative; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT.

RESTAGING COLON CANCER; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

RESTAGING KNOWN BREAST CANCER AND LUNG CANCER; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

SPLENOMEGALY; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT.

Stage IIA Rectal Adenocarcinoma; CT&x0D; CAP 7/24/17 showed no clinical evidence of disease recurrence;&x0D; Will&x0D; repeat CT CAP in 6 months; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
STATUS POST LIVER BIOPSY WITH ACUTE ABDOMINAL PAIN. BLOOD NOTED ON CT DURING BIOPSY - BLEEDING.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT SUSPECTED CANCER; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Tender to left lower ABD, Blood on UA.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the hematuria is not known.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; It is not known if the urinalysis results were normal or abnormal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for acute pain.; It is unknown if there has been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This is not know if this study is being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; It is unknown if the patient has Crohn's Disease, Ulcerative Colitis or Diverticulitis.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient is male.; The patient completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is being ordered for follow-up.; This study is not being requested for abdominal and/or pelvic pain.; The patient is male.; The patient completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is being ordered for staging.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; The patient is female.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient did NOT have an abnormal abdominal Ultrasound, CT or MR study.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; abnormal renal ultrasound. Attempted to get patient in with urology and urologist wants patient to have CT Abdomen and pelvis before scheduling.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; ATTEMPTED TO DO COLONOSCOPY TODAY FOR THE RECTAL BLEEDING IT WAS INCOMPLETE NOW WANTS CT OF ABDOMEN AND PELVIS; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT
| Unknown | Approval | 74176 CT ABD & PELVIS W/O CONTRAST | This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Anerysm or a Pelvis Mass.; Yes this is a request for a Diagnostic CT  |
| Unknown | Approval | 74176 CT ABD & PELVIS W/O CONTRAST | This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT  |
| Unknown | Approval | 74176 CT ABD & PELVIS W/O CONTRAST | This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT  |
| Unknown | Approval | 74176 CT ABD & PELVIS W/O CONTRAST | This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT  |
| Unknown | Approval | 74176 CT ABD & PELVIS W/O CONTRAST | This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT  |
| Unknown | Approval | 74176 CT ABD & PELVIS W/O CONTRAST | This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT  |
| Unknown | Approval | 74176 CT ABD & PELVIS W/O CONTRAST | This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT  |
| Unknown | Approval | 74176 CT ABD & PELVIS W/O CONTRAST | This is a request for an abdomen-pelvis CT combination.; This study is not being requested for abdominal and/or pelvic pain.; The study is being ordered for hematuria.; Yes this is a request for a Diagnostic CT  |
| Unknown | Approval | 74181 MRI ABDOMEN | This is a request for an abdomen-pelvis CT combination.; This study is not being ordered for a metastatic disease.; There are 3 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology  |
Ms. Jones is a 33 y.o. G0 African American female who presents for evaluation of Pelvic mass. Pt reports she was admitted to the hospital recently d/t cardiac related issues and during w/u, a pelvic mass of some sort was noted during cardiac echol, and one of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. This request is for an Abdomen MRI; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.;"; elevated liver enzymes &lt;400; She has been to the ER on a couple of occasions with severe abdominal pain. Her AST and ALT were 719 and 594 respectively on Sept. 3rd. She went back to the ER on Sept. 14th and they had decreased to 420 and 319. She had a cholec.

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;"; "The patient has not had an abdominal ultrasound, CT, or MR study.;"; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient with a strong family history of CAD with the complaint of chest pain and chest tightness, palpitations, dyspnea, decreased exercise tolerance, and fatigue; Yes, there is Chronic Chest Pain.

Yes, this is a request for CT Angiography of the abdominal arteries.

Yes, this is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; It is unknown if there is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).
Patient is a G6P6 peri menopausal 54 year old female referred by UAMS Breast Center after a referral from Dr Martha Flowers with a new dx of clinical STAGE Ia T(0.9cm)N0Mx (per images done on 11/27/2017) R Breast Cancer. She has a PMH of HTN and NO Known; This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; It is not known if this is an individual who has known breast cancer in the contralateral (other) breast.

This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20.

This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; Yes, there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.

This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; Yes, this is an individual who has known breast cancer in the contralateral (other) breast.

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; Yes, there are anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.

This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are benign lesions in the breast associated with an increased cancer risk.

This is a request for Breast MRI.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This study is being ordered as a pre-operative evaluation.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.
78451 Myocardial perfusion imaging, tomographic (SPECT); single study

This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study). The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39

LHC showed single-vessel CAD of the RCA with subtotal occlusion with collaterals from the left. Akinetic inferior to posterior segment. EF 20-25%; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient is experiencing new signs or symptoms indicating a recurrence of cancer.; 4 PET Scans have already been performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for Vascular Disease.; 10/27/2017; There has not been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG indicative of heart disease.); The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG indicative of heart disease.); The patient has high blood pressure.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG indicative of heart disease.); There has been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG indicative of heart disease.);

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG indicative of heart disease.); This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG indicative of heart disease.); The patient has shortness of breath; Known or suspected valve disease.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG indicative of heart disease.); This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG indicative of heart disease.); The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Embolism.
This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is NOT for prolapsed mitral valve, suspected valve disease, new or changing symptoms of valve disease, annual review of known valve disease, initial evaluation of artificial heart valves or annual re-eval of artificial heart valves.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; The patient does not have a history of a recent heart attack or hypertensive heart disease.

This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; The patient has a history of hypertensive heart disease.; There is a change in the patient’s cardiac symptoms.

This is a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for evaluation of atrial fibrillation or flutter to determine the presence or absence of left atrial thrombus or evaluate for radiofrequency ablation procedure.

This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.

This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.

This request is for a Low Dose CT for Lung Cancer Screening.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening.; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.
Unknown Approval G0297 Low dose CT scan (LDCT) for lung cancer screening

This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago. This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.

Unknown Approval S8037 mrcp

This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.

Unknown Disapproval 70336 MRI TEMPROMANDIBULAR JOINT,TMJ,JAW JOINT 70336 MRI TEMPROMANDIBULAR JOINT,TMJ,JAW JOINT Radiology Services Denied Not Medically Necessary

This is a request for a temporomandibular joint MRI.

Unknown Disapproval 70450 CT BRAIN, HEAD Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.

Unknown Disapproval 70450 CT BRAIN, HEAD Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.

Unknown Disapproval 70450 CT BRAIN, HEAD Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT.; Known or suspected infection best describes the reason that I have requested this test.

Unknown Disapproval 70450 CT BRAIN, HEAD Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT.; Known or suspected TIA (stroke) with documented new or changing neurologic signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.

Unknown Disapproval 70450 CT BRAIN, HEAD Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT.; 'None of the above' best describes the reason that I have requested this test.; None of the above best describes the reason that I have requested this test.

Unknown Disapproval 70450 CT BRAIN, HEAD Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.

Unknown Disapproval 70450 CT BRAIN, HEAD Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT.; The patient has a new onset of a headache within the past month; Headache best describes the reason that I have requested this test.

Unknown Disapproval 70450 CT BRAIN, HEAD Radiology Services Denied Not Medically Necessary

This is a request for a brain/head CT.; The patient has a suspected tumor outside the brain.; Known or suspected tumor best describes the reason that I have requested this test.
This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; 10 years ago; There has been treatment or conservative therapy; mbr has pain in face and headaches and noises in jaw joint and ear and jaw joint pain and tender and tenderness muscles; Splint therapy and PT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology

Unknown Disapproval
70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST Radiology Services Denied Not Medically Necessary

This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); Yes this is a request for a Diagnostic CT

Unknown Disapproval
70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST Radiology Services Denied Not Medically Necessary

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; Yes this is a request for a Diagnostic CT

Unknown Disapproval
70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST Radiology Services Denied Not Medically Necessary

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT

Unknown Disapproval
70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST Radiology Services Denied Not Medically Necessary

This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT

Unknown Disapproval
70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST Radiology Services Denied Not Medically Necessary

There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; Yes this is a request for a Brain MRA.

Unknown Disapproval
70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST Radiology Services Denied Not Medically Necessary

This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT

Unknown Disapproval

Note: The studies being ordered are not for a neurological disorder. There has not been any treatment or conservative therapy. One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI. The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.
Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT
Chest pain describes the reason for this request.; This study is being requested for an unresolved cough; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT
cough persistent despite abx, steroids and ud tx, hx of tobacco use, SOB with exertion been persistent, Wheezing on and off as well at times; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT
‘None of the above’ describes the reason for this request.; Abnormal imaging (xray) finding was relevant in the diagnosis or suspicion of inflammatory lung disease; This study is being requested for known or suspected inflammatory disease such as sarcoidosis, pneumoconiosis, asbestosis, silicosis; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT
‘None of the above’ describes the reason for this request.; An abnormal imaging (xray) finding led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abcess, empyma); Yes this is a request for a Diagnostic CT
‘None of the above’ describes the reason for this request.; ‘None of the above’ led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abcess, empyma); Yes this is a request for a Diagnostic CT
Post-operative evaluation describes the reason for this request.; This study is being requested for known or suspected infection (pneumonia, abcess, empyma); Yes this is a request for a Diagnostic CT
Pre op; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
pt has pleural effusion; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.
; This study is being ordered for trauma or injury.; 8/19/2017; There has been treatment or conservative therapy.; 1- right knee pain “with a knot” since MVC Aug 19. Pt reports that it hit the dash. Reports that pain is worse after being up on it after working. &x0D; Denies new injury. &x0D; 2- c/o soreness to left chest- this symptom is also since wreck in August. States t; Nonsteroidal anti-Inflammatory drug;&x0D; Muscle relaxant; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology
; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT Angiography.
; This study is a request for a Cervical Spine CT;
Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.

Patient states he is less and less able to perform activities of daily living. He wants to try injection therapy as alternative and MRI is required to do so.

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease; approximately 10-15 years ago. There has been treatment or conservative therapy; pain, swelling, tenderness, stiffness; Patient reported to clinic that he has previously tried Chiropractic treatment and Physical Therapy as well.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Pt has increased pain to her lumbar spine. She has degenerative change facet joints and disc narrowing lower two levels greatest at L5-S1.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt is hardly unable to sit or stand by herself due to her increased back problems. Pt requires assistance with sitting, standing and walking.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Pt has tried medication with no relief. Has developed numbness down rt leg; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt is having numbness down rt leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.

Received call from chiropractor, states he said Rachel in the office and feels she needs MRI. States she is experiencing UI and has flattened thoracic disc and loration.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above.

The patient complains of pain in lower back and legs for last several years. Reports onset of pain as sporadic since April 2017. The pain has progressively gotten worse over time and is not being controlled with rest, activity modification and medication.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.; The patient had an Ultrasound; The Ultrasound was abnormal; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Anerysm or a Pelvis Mass.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT
This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT.

This is a request for an abdomen-pelvis CT combination.; This study is requested for post-op evaluation.; The study is not requested as a first follow up study for a suspected or known post-op complication.; It is not known if this study is being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT.

Ultrasound suggest highly suspicious 8cm left renal mass. there is a mass on the left kidney up to 13cm. highly suspicious for renal cell carcinoma & family hx of renal mass in his brother.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Urinary tract infection, MEDS have not helped.; This is a request for an abdomen-pelvis CT combination.; This study is requested for post-op evaluation.; The study is not requested as a first follow up study for a suspected or known post-op complication.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT.

&nlt;Enter answer here - or Type In Unknown If No Info Given. &nrt; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A kidney abnormality was found on a previous CT, MRI or Ultrasound.; The patient has a renal cyst.
patient needs a MRI of the abdomen and MRI of the pelvis due to renal mass and hematuria. need to evaluate mass and evaluate for stone. patient unable to have contrast CT due to anaphylactic reaction to the iodine needed for a contrast study.;
This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology. 

This request is for an Abdomen MRI.; This study is being ordered for hematuria.; The patient has painful hematuria.; The patient has not had an IVP.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; It is not known if the patient is presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; It is not known if the patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; There is a 1.7 cm low-density focus at the mid right kidney which may represent solid mass or complex cyst. There is also suggestion of a slightly complex cyst at the lower right kidney. Again MRI would likely be most helpful in further evaluation.&lt;#x0D; There is no info given.

This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; It is not known if the patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Malignant neoplasm of unspecified kidney, except renal pelvis &lt;#x0D; MRI six months for hx rcc &lt;#x0D; 12.1 x 5.8 cm. Approximate 1.3 cm left lower pole hypoechoic lesion &lt;#x0D; probably represents a cyst.

This request is for an Abdomen MRI.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; No info given.

This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; noted CT evidence of right adrenal hypertrophy
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.;"

This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.;" &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;
This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;; "The patient has had an abdominal ultrasound, CT, or MR study.;; pain. 9mm kidney cyst., This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;; "The patient has had an abdominal ultrasound, CT, or MR study.;; The patient has microscopic hematuria. She had a noncontrast CT scan that showed multiple renal masses. MRI is being ordered to better classify these masses., This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;; It is not known if the patient had an abdominal ultrasound, CT or MR study.; &lt;Enter answer here - or Type In Unknown If No Info Given.&gt;., This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.;; 1 cm mass posterior to the left kidney in the perinephric fat., This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.;; indeterminate, isoenhancing 2.3 cm hepatic mass which is partially exophytic and along the inferior hepatic tip. Contrast-enhanced MRI is recommended for more definitive characterization., This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.;; Renal mass: 4x3cm complex cyst in medial right kidney; seen as renal cyst on MRI on 10/17/2016 shows Simple cysts both kidneys, &lt;#x0D;&gt; &lt;#x0D;&gt; Renal cyst; proteinaceous cyst inferior pole left kidney. Needs F/u per radiologist recomendation., This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.
This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on more than 1 of the following: diagnostic test, imaging study, or biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made.); This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for an other solid tumor.; This is NOT a Medicare member.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

This is a request for a Tumor Imaging PET Scan; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Vascular Surgery Approval

70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST

This study is being ordered for Vascular Disease.; There has been treatment or conservative therapy.; Artery stenosis; Anti platelets; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Vascular Surgery Approval

71250 CT CHEST, THORAX
71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

He is s/p thoracic stent repair. He has an aneurysm that needs to be evaluated for surgical options.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Vascular Surgery Approval

71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

Pt with symptoms consistent with upper extremity claudication and vascular insufficiency. Her ABI evaluation today shows normal pressures at the wrist on the right and greatly diminished (0.68) on the left. Will obtain CTA of the chest for evaluation of t; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.

Vascular Surgery Approval

71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.

Vascular Surgery Approval

71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Vascular Surgery Approval

71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST

unknown; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is not scheduled/ planned.; Yes, this is a request for a Chest CT Angiography.

Vascular Surgery Approval

72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST

The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)

Vascular Surgery Approval

74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST

He is s/p thoracic stent repair. He has an aneurysm that needs to be evaluated for surgical options.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.

Vascular Surgery Approval

74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST

This is a request for CT Angiography of the Abdomen and Pelvis.
unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Vascular Surgery Approval 74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST RAST 1

Yes, this is a request for CT Angiography of the abdomen.

Vascular Surgery Approval 74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCONTRAST RAST 1

This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/08/2017; There has been treatment or conservative therapy.; Pt has a palpable mass.; Pt has had a biopsy and has had anti inflammatory.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Vascular Surgery Approval 74176 CT ABD & PELVIS W/O CONTRAST 1

This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; it is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT.

Vascular Surgery Approval 75635 CTA AA&BI ILIOFEM LXTR RS/I C-/C+ POST-PXESSING 8

The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; This is NOT a Medicare member.; The patient is 65 or older.; The patient has a cardiac history with known myocardial infarction and/or cardiac intervention such as cardiac surgery/angioplasty (PCI); It has not been greater than 2 years since the surgery/procedure or last cardiac imaging.; Enter answer here - or Type In Unknown If No Info Given. &gt; This study is being ordered for Vascular Disease.; There has been treatment or conservative therapy.; Artery stenosis; Anti platelets; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology.

Vascular Surgery Disapproval 70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST RAST 1

Radiology Services Denied Not Medically Necessary
