

## Shared Access now Available on [www.RadMD](http://www.RadMD)

Magellan Healthcare is excited to share a new feature on our [RadMD](http://www.RadMD) website: **Shared Access**. This feature allows ordering providers to view authorization requests initiated by other RadMD users within their practice.

### What does this mean for you?

If you or any of the staff in your practice are unavailable for a period of time, you can share your access with other users in your practice. They will be able to view and manage the authorization requests that you initiated on RadMD, allowing them to communicate with your patients and progress with treatment in your absence.

This new feature includes:

- The ability for you to share your access with others through a “share request” feature on [RadMD.com](http://www.RadMD.com).
- The ability for other users in your practice to have the ability to share their access with you.

Please note that sharing of requests will allow the user access to Protected Health Information (PHI).

Look for more improvements to [RadMD](http://www.RadMD) in the upcoming months!
