Advanced Practice Registered Nurse	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.	1
Advanced Practice Registered Nurse	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The patient has a new onset of a headache within the past month; Headache best describes the reason that I have requested this test.	1
Advanced Practice Registered Nurse	Approval	70480 Computed tomography, orbit, sella, or posterior fossa or outer, middle, or inner ear; without contrast material		"This request is for orbit,sella, int. auditory canal,temporal bone, mastoid, CT.239.8"; "There is suspicion of bone infection, cholesteatoma, or inflammatory disease.ostct"	1
Advanced Practice Registered Nurse	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		small frontal hemorrhage, grade3 spleen laceration.; This study is being ordered for trauma or injury.; 10/11/2018; There has been treatment or conservative therapy.; Rt frontal small extraaxial hemorrhage with hemorrhagic contusion in the rt frontal lobe.; surgery; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	70547 Magnetic resonance angiography, neck; without contrast material(s)		The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This is a request for a Neck MR Angiography.	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material			1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		patient presented to clinic on 10/22/18 with c/o migraine headache, duration of 6 days at that time. Has them about 4 times per month, averages a 7 out of 10 on pain scale, for 1.5 years. No known triggers, no auras, not related to menstrual cycle. Doe; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		She has had chronic migraines. She wears tinted glasses at all times due to light sensitivity. She reports that she has a "regular" headache approximately once a week. She reports that she has light sensitivity, nausea and vomiting; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	3
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	4
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	1
Advanced Practice Registered Nurse	Approval	70450 Computed tomography, head or brain; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
Advanced Practice Registered Nurse	Approval	70450 Computed tomography, head or brain; without contrast material		Headache, vomiting, possible contusion, possible concussion.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
Advanced Practice Registered Nurse	Approval	70450 Computed tomography, head or brain; without contrast material		HEADACHE; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.	1
Advanced Practice Registered Nurse	Approval	70450 Computed tomography, head or brain; without contrast material		Pt is now under the care of a neurologist. Original imaging was on 5/22/18. Neurologist wanted MRI and CT in a few months before he consider treatment.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Accidental finding on sinus ct 05/18. Previous study on 5/22/18 showed a bone lesion. Follow up recommended.; There has not been any treatment or conservative therapy.; Pain on left side of face, eye, upper cheek, and temple region.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.	3
Advanced Practice Registered Nurse	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; Recent (in the past month) head trauma with neurologic symptoms/findings best describes the reason that I have requested this test.	2

Advanced Practice Registered Nurse	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.	1
Advanced Practice Registered Nurse	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
Advanced Practice Registered Nurse	Approval	70486 Computed tomography, maxillofacial area; without contrast material		This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	70490 Computed tomography, soft tissue neck; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	70490 Computed tomography, soft tissue neck; without contrast material		Abnormal ultrasound showing Some scattered nodes present with mildly prominent jugulodigastric&#x0D; nodes could be reactive. They are recommending a CT soft tissue neck for this.; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	70490 Computed tomography, soft tissue neck; without contrast material		Pt has had mass on back of neck, ultrasound completed and suggested to have neck CT completed for further evaluation.; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		small frontal hemorrhage, grade3 spleen laceration.; This study is being ordered for trauma or injury.; 10/11/2018; There has been treatment or conservative therapy.; Rt frontal small extraaxial hemorrhage with hemorrhagic contusion in the rt frontal lobe.; surgery; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the Neck.	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		blurred vision headache and nausea; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Pt has hearing loss, left assymetrical loss, vertigo and tinnitus.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Pt is now under the care of a neurologist. Original imaging was on 5/22/18. Neurologist wanted MRI and CT in a few months before he consider treatment.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Accidental finding on sinus ct 05/18. Previous study on 5/22/18 showed a bone lesion. Follow up recommended.; There has not been any treatment or conservative therapy.; Pain on left side of face, eye, upper cheek, and temple region.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	1

Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	1
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material			1
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	6
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		Chest pain describes the reason for this request.; This study is being requested for an unresolved cough; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		hx of esophageal cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		No, the patient was NOT seen by a specialist because of the traumatic injury.; Chest pain describes the reason for this request.; Abnormal imaging (xray) finding was noted on evaluation after the injury.; This is a request for a Chest CT.; This study is beign requested for chest injury or trauma within the past 2 weeks.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	2
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has undergone treatment for multiple sclerosis.	3
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.	1
Advanced Practice Registered Nurse	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.	1
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		Chest pain describes the reason for this request.; Abnormal finding on physical examination was relevant in the diagnosis or suspicion of inflammatory bowel disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; An abnormal imaging (xray) finding led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema); Yes this is a request for a Diagnostic CT	1

Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; Restaging during ongoing treatment is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		This is a request for a Thorax (Chest) CT.; Abnormal imaging test describes the reason for this request.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		pt is having a lot of pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/24/18; There has been treatment or conservative therapy.; mid back and neck pain, wake up through the night with pain radiates to arm unable to lift arm w/o pain . previous MRI shows bulging disc.; Medication.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	1
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; Yes, the patient is experiencing or presenting new symptoms of Bowel or bladder dysfunction.; yes, there are documented clinical findings of Multiple sclerosis.	1
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	5
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	4
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		unk; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
Advanced Practice Registered Nurse	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		swelling and mass lump with pain; This is a request for a thoracic spine MRI.; None of the above; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.	1
Advanced Practice Registered Nurse	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of asymmetric reflexes.	1
Advanced Practice Registered Nurse	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; It is unknown if the patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; This procedure is being requested for None of the above	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		bypass; The study requested is a Lumbar Spine MRI; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		lumbar radiculopathy. x-ray indicated degenerative disc disease; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; This reason this study is being requested is unknown.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	71250 Computed tomography, thorax; without contrast material		Patient is currently undergoing chemotherapy and it is restaging; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	3
Advanced Practice Registered Nurse	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.; PAIN AND RADICULOPATHY; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 12/01/2018; There has been treatment or conservative therapy.; difficult of walking unable to move her neck; medication and chiropractic's; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		She has had chronic migraines. She wears tinted glasses at all times due to light sensitivity. She reports that she has a "regular" headache approximately once a week. She reports that she has light sensitivity, nausea and vomiting; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	9
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.; yes, there are documented clinical findings of Multiple sclerosis.	1
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.;	1
Advanced Practice Registered Nurse	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		Xray done has bone spurs; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.; Neck pain -numbness tingling both arm and L leg - PT made worse-; PT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Advanced Practice Registered Nurse	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.	1
Advanced Practice Registered Nurse	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	4
Advanced Practice Registered Nurse	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; ; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	5
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	12
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; pain radiating down right leg and cause numbness and tingling, having problems getting out of bed; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.	1
Advanced Practice Registered Nurse	Approval	72192 Computed tomography, pelvis; without contrast material	Illness: Cynthia R Bernard is a 59 y.o. year old female patient. The patient has had bilateral femoral neck fractures. The left was 1st in 1998 her right 2004. These were treated with screws fixation. She has osteoporosis and is being treated for this; There is not a known tumor.; This study is being ordered as pre-operative evaluation.; "The ordering physician is NOT an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; There is NO known pelvic infection.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	73220 Magnetic resonance (eg, proton) imaging, upper extremity, other than joint; without contrast material(s), followed by contrast material(s) and further sequences	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.	1
Advanced Practice Registered Nurse	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; Stroke; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Advanced Practice Registered Nurse	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.	2

Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; left leg to drag and become weaker; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; muscle weakness and numbness right hip and right leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.; PAIN AND RADICULOPATHY; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 12/01/2018; There has been treatment or conservative therapy.; difficult of walking unable to move her neck; medication and chiropractic's; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Lower back pain radiating to the lower extremity; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Rx medication back pain MVA in 2004; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Advanced Practice Registered Nurse	Approval	73220 Magnetic resonance (eg, proton) imaging, upper extremity, other than joint; without contrast material(s), followed by contrast material(s) and further sequences		The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.	1
Advanced Practice Registered Nurse	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.;" Severe Right Shoulder pain for 2 weeks. Had previously been pulling on a trailer no specific injury. Decreased range of motion, tenderness, bony tenderness, pain, decreased strength. Has seen a chiropractor, had xrays. Pain in increasing. Taking Ibuprofen	1
Advanced Practice Registered Nurse	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; RIGHT PERSISTANT SHOULDER PAIN, right shoulder pain has not resolved, having pain in upper arm, just below shoulder joint and having pain if she tries to lift her arm above her head. Cannot use her arm d/t the pain. &#x0D; REPORTS: Taking Ibuprofen for shoulde	1
Advanced Practice Registered Nurse	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; The patient has a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.	1
Advanced Practice Registered Nurse	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is experiencing joint locking or instability.	1
Advanced Practice Registered Nurse	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; The patient has had recent plain films of the shoulder.; The plain films were not normal.	1
Advanced Practice Registered Nurse	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study is being ordered for known/suspected joint infection.; The patient has not had a recent bone scan.; The patient has not had a recent ultrasound of the shoulder.; The plain films were normal.; pt may have rotator cuff tear; The patient had a recent CT of the shoulder.; The shoulder CT was abnormal	1

Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	2
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.	3
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; ; This study is being ordered for Suspicious Mass or Suspected Tumor/ Metastasis	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a lower extremity MRI; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a lower extremity MRI; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is a pre-operative study for planned surgery.	1
Advanced Practice Registered Nurse	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	1
Advanced Practice Registered Nurse	Approval	74150 Computed tomography, abdomen; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	16
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The symptom keeping her from doing her job.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		This patient has been seen multiple times for severe back pain. He came back in on 9/27/18 after being seen @ the ER. He went to the ER because he was attempting at home exercises and he was in too much pain. CT Scan was done @ the ER which showed L5 pars; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Advanced Practice Registered Nurse	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Unknown; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1

Advanced Practice Registered Nurse	Approval	72192 Computed tomography, pelvis; without contrast material		; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are NO active, clinical findings or endoscopic findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "There are no radiographical or ultrasound findings consistent with abnormal fluid collection, pelvic abscess, pelvic inflammation or ascites."; "There are no physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Chronic and severe shoulder pain that has worsened with treatment. Mobility of L shoulder is limited - patient cannot lift shoulder above his head. Pain is worsening as time goes.	1
Advanced Practice Registered Nurse	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; pt has continuing right shoulder pain with limited range of motion due to pain, pt has tried physical therapy with no relief and has also recieved injection to shoulder with little relief, pt has had oral pain medications and anti-inflammatory drugs witho	1
Advanced Practice Registered Nurse	Approval	74150 Computed tomography, abdomen; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; Which organ is enlarged? Kidney; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74150 Computed tomography, abdomen; without contrast material		Pt suffers with abdominal pain.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Abdominal pain, colicky. Chronic diarrhea and weight loss. Has increased diet and still cannot gain weight. Stool studies pending. BMI 17.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		hx of esophageal cancer; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Pain is getting severely worse. Along with menstrual cycle; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	4

Advanced Practice Registered Nurse	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; S/P fail	1
Advanced Practice Registered Nurse	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Instability	2
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Limited range of motion	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Locking	2
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Swelling greater than 3 days; It is unknown if surgery is planned.	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days	3
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; This study is being ordered for None of the above; Pain greater than 3 days	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Yes, there is a known trauma involving the knee.; Instability; Instability	1

Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Patient is currently undergoing chemotherapy and it is restaging; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	4
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	4
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		Trying to RO osteomyelitis; This is a request for a foot MRI.; It is not known if surgery is planned for in the next 4 weeks.; The study is being oordered for infection.; There are physical exam findings, laboratory results, other imaging including bone scan or plain film confirming infection, inflammation and or aseptic necrosis.	1
Advanced Practice Registered Nurse	Approval	74150 Computed tomography, abdomen; without contrast material		Patient has been seen several times for continued abd pain. His pain is generalized and is worse in RUQ at times, and is present sometimes after eating meals. He describes the pain as "sharp, aching pressure." Epigastric pain resolves when taking pantopra; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	1

Advanced Practice Registered Nurse	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material			1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Abnormal Ultrasound showing multiple masses and recommending a CT with hemangioma protocol to further evaluate.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		also Ketones, glucose trace of protein- r/o Kidney stones.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for bilirubin.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have an amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	4
Advanced Practice Registered Nurse	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" there is a heterogeneous indeterminate density right adrenal mass measuring up to 4.0 cm. there has been interval increase in size of the hematoma in the left rectus abdominus, which now measures up to approximately 3cm thick (previously 2.4cm thick) ther	1
Advanced Practice Registered Nurse	Approval	77058 Magnetic resonance imaging, breast, without and/or with contrast material(s); unilateral		This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; Yes, this is an individual who has known breast cancer in the contralateral (other) breast.	1
Advanced Practice Registered Nurse	Approval	78813 Positron emission tomography (PET) imaging; whole body		This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient completed a course of treatment initiated within the last 8 weeks.; 1 PET Scans has already been performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
Advanced Practice Registered Nurse	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		metastatic breast cancer, restaging; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	2
Advanced Practice Registered Nurse	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	1
Advanced Practice Registered Nurse	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.	1
Advanced Practice Registered Nurse	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; It is unknown what type of cardiac valve conditions apply to this patient.	1
Advanced Practice Registered Nurse	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		'None of the above' describes the reason for this request.; Restaging during ongoing treatment is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is beign requested for known cancer or tumor; Yes this is a request for a Diagnostic CT	1

Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		ONGOING ABDOMINAL PAIN; This is a request for an abdomen-pelvis CT combination; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		pt had ultrasound on 09/26/18 , has had abdominal pain on and off for 6 mos.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		R10.9 Abdominal pain in male, &#x0D; s: normal exam--having abdominal pain and cramping&#x0D; 1. Follow Up of Abdominal pain &#x0D; Onset: 2 Days. The location is midline. The quality of the pain is achy. The patient denies relieving factors.Abdomen&#x0D; *&#x0D; Auscultation ; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the hematuria is not known.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.	1
Advanced Practice Registered Nurse	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	1
Advanced Practice Registered Nurse	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Low Dose CT for Lung Cancer Screening.; It is unknown if this patient has had a Low Dose CT for Lung Cancer Screening in the past 11 months.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.	1
Advanced Practice Registered Nurse	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary		1
Advanced Practice Registered Nurse	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Advanced Practice Registered Nurse	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
Advanced Practice Registered Nurse	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	family history of aneurysm and worsening headaches; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
Advanced Practice Registered Nurse	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	headaches wake patient up in middle of night happens 4-5 times a week; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1

Advanced Practice Registered Nurse	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	Patient experiencing frequent recurrent headaches and dizziness; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Advanced Practice Registered Nurse	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.	3
Advanced Practice Registered Nurse	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; 'None of the above' best describes the reason that I have requested this test.; None of the above best describes the reason that I have requested this test.	1
Advanced Practice Registered Nurse	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.	4
Advanced Practice Registered Nurse	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immunocompromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Advanced Practice Registered Nurse	Disapproval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 12/1/2018; There has been treatment or conservative therapy.; hbp, chest pain, and pressure in neck; long term medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)	Radiology Services Denied Not Medically Necessary	; There is not a suspicion of an infection or abscess.; This examination is NOT being requested to evaluate lymphadenopathy or mass.; There is not a suspicion of a bone infection (osteomyelitis); There is NOT a suspicion of an orbit or face neoplasm, tumor, or metastasis.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.	1
Advanced Practice Registered Nurse	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Advanced Practice Registered Nurse	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	mental status change; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack);. This study is NOT being ordered as a 12 month annual follow up.	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is vascular disease.; There is known or suspicion of an abdominal aortic aneurysm.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	5
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1

Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Aneurysm or a Pelvis Mass.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	1
Advanced Practice Registered Nurse	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Abnormal finding on examination of the chest, chest wall and/or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	4
Advanced Practice Registered Nurse	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	5
Advanced Practice Registered Nurse	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Chest pain describes the reason for this request.; An abnormal bronchoscopy finding led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema).; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	'None of the above' describes the reason for this request.; This reason this study is being requested is unknown.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	'None of the above' describes the reason for this request.; This study is being requested for an unresolved cough; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	patient had a recent imaging that states needs follow up CT to check status of nodule.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	unknown; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Advanced Practice Registered Nurse	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	MASS; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
Advanced Practice Registered Nurse	Disapproval	72128 Computed tomography, thoracic spine; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Lumbar spine disc disease, cervical spine disc disease, chronic neck pain, chronic back pain; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	Chronic neck pain: Unchanged, states the pain radiates into the hands / fingers. She is going to pain management. She reports hand shaking which has been worsening over the past several months. Has been having numbness of both hands as well.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.	1
Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	Patient complaints of headaches and neck pain that has been going on for 3 weeks. Patient has had cervical x-ray done; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1
Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; Yes, there is evidence of recent development of unilateral muscle wasting.	1
Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1

Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; unknown	1
Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; &t;Enter Additional Clinical Information&t;	1
Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for a neurological disorder.; 3/22/2018; There has been treatment or conservative therapy.; neck pain sharp and burning and radiating to bilateral upper extremities, lumbar is sharp stabbing pain with radiation to lower extremities; failed home exercise, failed nsaid, unable to attend PT due to the pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed a pelvic mass.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" IMPRESSION:&#x0D; 1. Hepatic steatosis.&#x0D; 2. Ovoid hypochoic area at the central liver near the porta hepatis&#x0D; that measures 2 x 1.2 x 2.3 cm in size. Focal fatty sparing is&#x0D; favored, however, underlying liver mass/neoplasm cannot be ruled out&#x0D; by ultrasound.	1
Advanced Practice Registered Nurse	Approval	75635 Computed tomographic angiography, abdominal aorta and bilateral iliofemoral lower extremity runoff, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the abdominal arteries.	1
Advanced Practice Registered Nurse	Approval	77078 Computed tomography, bone mineral density study, 1 or more sites, axial skeleton (eg, hips, pelvis, spine)		This is a request for a Bone Density Study.; This patient has not had a bone mineral density study within the past 23 months.; This is a bone density study in a patient with clinical risk of osteoporosis or osteopenia.	1
Advanced Practice Registered Nurse	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Melanoma.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; More than 4 PET Scans have already been performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
Advanced Practice Registered Nurse	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		Assess left ventricular function, SICKLE CELL DISEASE; This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	1
Advanced Practice Registered Nurse	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected left ventricular disease.	1
Advanced Practice Registered Nurse	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	It is not known if the patient has any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.	1

Advanced Practice Registered Nurse	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	pt is having a lot of pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/24/18; There has been treatment or conservative therapy.; mid back and neck pain, wake up through the night with pain radiates to arm unable to lift arm w/o pain . previous MRI shows bulging disc.; Medication.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.	1
Advanced Practice Registered Nurse	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	This patient is having continued mid thoracic back pain with worsening symptoms. The pain radiates to both of his hips. He has spasms and has trouble getting comfortable. He states that sitting and standing makes the pain worse. He has tried heat, tylenol; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	2
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; abd. pain, back pain; insaids, pt and chiropractic therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Patient has had an abnormal MRI before. Neurosurgery needs an updated MRI for further evaluation.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient is unable to complete at home physical therapy because of the pain and swelling in his back.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Patient is having severe back pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	The patient abnormal urine.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more than once for these symptoms.	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for a neurological disorder.; 3/22/2018; There has been treatment or conservative therapy.; neck pain sharp and burning and radiating to bilateral upper extremities, lumbar is sharp stabbing pain with radiation to lower extremities; failed home exercise, failed nsaid, unable to attend PT due to the pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for Inflammatory/ Infectious Disease.; 12/1/18; There has been treatment or conservative therapy.; abdomen distention, mass you can feel, severe kidney pain; antibiotics and gerds medicine; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	had left shoulder xray last yr showed acromioclavicular arthrosis ,order mri last year claudfobic wanted open mri; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.	1

Advanced Practice Registered Nurse	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; x-ray negative	1
Advanced Practice Registered Nurse	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	1
Advanced Practice Registered Nurse	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.	1
Advanced Practice Registered Nurse	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.	1
Advanced Practice Registered Nurse	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status.	1
Advanced Practice Registered Nurse	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING		This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.	2
Advanced Practice Registered Nurse	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.	1
Advanced Practice Registered Nurse	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	pt. has blurred vision sensitivity to light nausea; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Advanced Practice Registered Nurse	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; The patient has the worst headache of patient's life with onset in the past 5 days; Headache best describes the reason that I have requested this test.; This is NOT a Medicare member.	2
Advanced Practice Registered Nurse	Disapproval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 12/1/2018; There has been treatment or conservative therapy.; hbp, chest pain, and pressure in neck; long term medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	Unknown; The pain is not from a recent injury, old injury, chronic pain or a mass.; This is a request for an elbow MRI; The study is requested for evaluation of elbow pain.	1
Advanced Practice Registered Nurse	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	2
Advanced Practice Registered Nurse	Disapproval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 10/22/18; There has not been any treatment or conservative therapy.; OFF BALANCE; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Advanced Practice Registered Nurse	Disapproval	74150 Computed tomography, abdomen; without contrast material	Radiology Services Denied Not Medically Necessary	Cyst of ovary, unspecified side ovarian cyst; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1

Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	2 months with frequent lower abd pain and bloating with discomfort, different than previous RLQ and LLQ abd pain, some pressure/feeling like needs to have a BM but doesn't really need to. Abdominal distention; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have an amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	Patient came to clinic with complaints of severe lower abdominal pain. Patient states that the pain has been going on for a while. Patient had lab drawn today that came back normal.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	The patient is in extreme pain rating 10 out of 10.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have an amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the brain.	1
Advanced Practice Registered Nurse	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient is experiencing vertigo	1
Advanced Practice Registered Nurse	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Headache and dizziness. Difficulty in though processes; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
Advanced Practice Registered Nurse	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Pt. eye pain and redness , headache every day.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Advanced Practice Registered Nurse	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Advanced Practice Registered Nurse	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	No, the patient was NOT seen by a specialist because of the traumatic injury.; Chest pain describes the reason for this request.; 'None of the above' were noted on evaluation after the injury.; This is a request for a Chest CT.; This study is being requested for chest injury or trauma within the past 2 weeks.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	pt. is fatigue, problem breathing, complains of SOB history, smoker, symptoms include constant constant cough....; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	currently in pain management; This study is being ordered for trauma or injury.; 5/17/2018; There has been treatment or conservative therapy.; taken muscle relaxer, in a TLSO brace; physical therapy at least 6 weeks without improvement; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	Patient had a car accident, hit from behind. Had therapy for at least six weeks; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1

Advanced Practice Registered Nurse	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Lumbar spine disc disease, cervical spine disc disease, chronic neck pain, chronic back pain; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	72128 Computed tomography, thoracic spine; without contrast material	Radiology Services Denied Not Medically Necessary	currently in pain management; This study is being ordered for trauma or injury.; 5/17/2018; There has been treatment or conservative therapy.; taken muscle relaxer, in a TLSO brace; physical therapy at least 6 weeks without improvement; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	72131 Computed tomography, lumbar spine; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Lumbar spine disc disease, cervical spine disc disease, chronic neck pain, chronic back pain; Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt has decreased range of motion. Severe pain with movement. Tingling, numbness down both upper extremities. The pain is causing headache. Plain films were undiagnostic. Please allow this MRI for further evaluation.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; pt has neck pain for a year, left arm is tingling	1
Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Abnormal X-rays.	1
Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This patient had weak grips in bilateral hands, light touch sensation decreased in 4th-6th digits of bilateral hands. She has been taking Ibuprofen with no relief.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Upon neurological exam, patient had weak grips in bilateral hands.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Advanced Practice Registered Nurse	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This is a request for cervical spine MRI; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Extremity weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Advanced Practice Registered Nurse	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	UNKNOWN; This is a request for a thoracic spine MRI.; Trauma or recent injury; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known was medications were used in treatment.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 10/22/18; There has not been any treatment or conservative therapy.; OFF BALANCE; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	back pain with no alleviating factors; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; home exercise and stretches for 6 weeks	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	degeneration of lumbar; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	patient has pain to his legs and hips; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	3
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	3
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for Inflammatory/ Infectious Disease.; 12/1/18; There has been treatment or conservative therapy.; abdomen distention, mass you can feel, severe kidney pain; antibiotics and gerds medicine; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Back pain persistent with treatment starting 1/2018	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	unknown; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	WILL FAX IN; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; DECREASE STRENGTH TO LEFT FOOT PLANTAR SECTION 5- OUT 5; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Advanced Practice Registered Nurse	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Xray done has bone spurs; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.; Neck pain -numbness tingling both arm and L leg - PT made worse-; PT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.	1
Advanced Practice Registered Nurse	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;;	1
Advanced Practice Registered Nurse	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
Advanced Practice Registered Nurse	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the abdominal arteries.	2
Advanced Practice Registered Nurse	Disapproval	75635 Computed tomographic angiography, abdominal aorta and bilateral iliofemoral lower extremity runoff, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment; Yes this is a request for a Diagnostic CT	1
Allergy & Immunology	Approval	70486 Computed tomography, maxillofacial area; without contrast material		This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	1
Allergy & Immunology	Approval	70486 Computed tomography, maxillofacial area; without contrast material		This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	2
Allergy & Immunology	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	'None of the above' describes the reason for this request.; This study is being requested for an unresolved cough; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
Allergy & Immunology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	x ray ordered, stool and blood samples pending; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/2018; There has not been any treatment or conservative therapy.; 34 pound weight loss in 2 weeks and abdominal pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Approval	72128 Computed tomography, thoracic spine; without contrast material		This is a request for a thoracic spine CT.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.; There is a reason why the patient cannot undergo a thoracic spine MRI.; There are documented clinical findings of immune system suppression or AIDS.; Yes this is a request for a Diagnostic CT	1
Anesthesiology	Approval	72128 Computed tomography, thoracic spine; without contrast material		This is a request for a thoracic spine CT.; The study is being ordered due to pre-operative evaluation.; There is a reason why the patient cannot undergo a thoracic spine MRI.; There is no known condition of tumor, infection, or neurological deficits.; Yes this is a request for a Diagnostic CT	1
Anesthesiology	Approval	72131 Computed tomography, lumbar spine; without contrast material		; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	2
Anesthesiology	Approval	72131 Computed tomography, lumbar spine; without contrast material			1

Advanced Practice Registered Nurse	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	TO INVESTIGATE PAIN IN R-ANKLE; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; A FEW MONTHS; There has been treatment or conservative therapy.; SWOLLEN WARM KNOTS BEHIND R-KNEE WEARS WALKING BOOT FOR 1 WEEK STILL PAIN IN R-ANKLE PAIN SHOOTS UP RIGHT THIGH; MEDS PT; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Advanced Practice Registered Nurse	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	74150 Computed tomography, abdomen; without contrast material	Radiology Services Denied Not Medically Necessary	Pt has an adrenal mass, weight loss over 6 months greater than 50lbs without trying; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	This is a request for CT Angiography of the Abdomen and Pelvis.	1
Advanced Practice Registered Nurse	Disapproval	74175 Computed tomographic angiography, abdomen, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the abdomen.	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; abd. pain, back pain; insaids, pt and chiropractic therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	ongoing pain, negative ultrasound and neg prior pelvic exam; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Anesthesiology	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.; Yes this is a request for a Diagnostic CT	2
Anesthesiology	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT	8
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if there is x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; NECK PAIN . BURNING AND SHOOTING PAIN.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		See previous; This study is being ordered for a neurological disorder.; 2012; There has been treatment or conservative therapy.; Back pain, leg and feet pain, decreased sensation to left upper extremity and bilateral lower extremities, positive bilateral clonus and positive Hoffman, and hyperreflexia.; Medications trials:&#x0D; moxic&#x0D; Diclofenac&#x0D; Gabapentin&#x0D; Physical Therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	8
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	2
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	11
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Pre-Operative Evaluation; No, the last Cervical spine MRI was not performed within the past two weeks.	2
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	23
Anesthesiology	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		See previous; This study is being ordered for a neurological disorder.; 2012; There has been treatment or conservative therapy.; Back pain, leg and feet pain, decreased sensation to left upper extremity and bilateral lower extremities, positive bilateral clonus and positive Hoffman, and hyperreflexia.; Medications trials:&#x0D; moxic&#x0D; Diclofenac&#x0D; Gabapentin&#x0D; Physical Therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a known condition of neurological deficits.; The study is being ordered due to pre-operative evaluation.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		. The pain is radiating to the left leg. Since this time the pain has worsened. On an average day, the pain is rated at 8/10 on the NRS. At its best it is rated 5/10 and at its worst it is 10/10. The pain is described as burning, pricking, numbing, a; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; The patient has failed conservative treatment (drug therapy, activity modifications, and physical therapy at least since 06/14/18	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	2
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		complaining of more numbness and tingling in her left hand and previously. She is also having more pain in her left lower extremity. She is also having issues with her bladder; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; chronic neck pain and pain involving her left side from her thorax down to her foot. The pain began 7 years ago without trauma. The pain is radiates throughout her left side. Since this time the pain has worsened; Patient has had PT in the past; Epidural injections/trigger point injections in the past; history of cervical fusion at C5-6, C6-7; currently taking pain medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Evaluating for ESI or MBB.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; Gabapentin&#x0D; Keppra&#x0D; Hydrocodone&#x0D; Tylenol&#x0D; Ibuprofen	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		MRI of the lumbar spine to further evaluate the patient's persistent pain and symptoms and to rule out disc herniation. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treat; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Loss of strength. &#x0D; Inspection of the lumbar spine reveals scoliosis. Palpation of the lumbar facet reveals right sided pain at L3-S1. ROM of lumbar spine is noted to be Limited and Painful (Including extension, lateral flexion). Extension of lumbar spin; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		No clinical available; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Patient has history of lumbar surgery. Is now having pain in area which radiates to his lower extremities. Patient is experiencing limited motion (extension and flexion) which causes pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	2
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with an Epidural.	2
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has completed 6 weeks or more of Chiropractic care.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has Neurological deficit(s)	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.	1

Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		unknown; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	2
Anesthesiology	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.	1
Anesthesiology	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	3
Anesthesiology	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days	1
Anesthesiology	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient has a documented limitation of their range of motion.	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for acute pain.; There has not been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	5
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	2
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
Advanced Practice Registered Nurse	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Advanced Practice Registered Nurse	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for None of the above; The patient has not had a stress echocardiogram within the past eight weeks.	1
Advanced Practice Registered Nurse	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.	1
Advanced Practice Registered Nurse	Disapproval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING	Radiology Services Denied Not Medically Necessary	xray of chest recommended ct to be done for further characterization of results.; This request is for a Low Dose CT for Lung Cancer Screening.; It is unknown if this patient has had a Low Dose CT for Lung Cancer Screening in the past 11 months.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.	1
Allergy & Immunology	Approval	70490 Computed tomography, soft tissue neck; without contrast material		This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT	2
Allergy & Immunology	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	x ray ordered, stool and blood samples pending; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/2018; There has not been any treatment or conservative therapy.; 34 pound weight loss in 2 weeks and abdominal pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Allergy & Immunology	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is immune-compromised.; Yes this is a request for a Diagnostic CT	1
Allergy & Immunology	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT	1
Allergy & Immunology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	'None of the above' describes the reason for this request.; This study is being requested for 'none of the above'.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
Allergy & Immunology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	x ray ordered, stool and blood samples pending; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/2018; There has not been any treatment or conservative therapy.; 34 pound weight loss in 2 weeks and abdominal pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a "thunderclap" or the worst headache of the patient's life.	1
Anesthesiology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.	1
Anesthesiology	Approval	72125 Computed tomography, cervical spine; without contrast material		The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Abnormal gait.	1
Anesthesiology	Approval	72128 Computed tomography, thoracic spine; without contrast material		; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Anesthesiology	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT	4

Anesthesiology	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT	1
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material			7
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		complaining of more numbness and tingling in her left hand and previously. She is also having more pain in her left lower extremity. She is also having issues with her bladder; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; chronic neck pain and pain involving her left side from her thorax down to her foot. The pain began 7 years ago without trauma. The pain is radiates throughout her left side. Since this time the pain has worsened; Patient has had PT in the past; Epidural injections/trigger point injections in the past; history of cervical fusion at C5-6, C6-7; currently taking pain medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		evaluation and management of neck pain who was referred from Dr. Smith. Pain started 3 years ago and is located in neck and radiates down the bilateral shoulders down the arms dorsally and into all of the fingers and sometimes radiates up the head to her ; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Left weakness on the whole body. + numbness/ tingling in LUE anterior arm into the whole hand; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		He reports pain in the entire body but his worst pain is in the neck and radiates into the right shoulder and in the low back and radiates down the right leg; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; He notes that he has had pain since the 3rd grade.; There has been treatment or conservative therapy.; He reports pain in the entire body but his worst pain is in the neck and radiates into the right shoulder and in the low back and radiates down the right leg.; Patient states he has had physical therapy, chiropractic care, medications, spine surgery, and injections.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 06/22/2018; There has been treatment or conservative therapy.; Pain that radiates and leg pain, muscle weakness; PT, MEDS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		Patient having bilateral shoulder pain for past 6months, no injuries, just pain; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; It is not known if the patient has seen the doctor more then once for these symptoms.	1

Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		RIGHT UPPER EXTREMITY RADIULOPATHY WITH NUMBNESS ANDE TINGLING DOWN THE UPPER RIGHT UPPER EXTREMITY; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; DIFFICULTY RAISING HER RIGHT ARM. RECOGNIZABLE AND NOTICELABLE WEAKNESS TO TRICEPS EXTENSION ON THE RIGHT UPPER EXTREMITY. SOME PAIN WITH RESISTANCE TO ABDUCTION. TENDERNESS TO PALPATION OVER LOWER SEGMENTS AND LUMBAR SPINE.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.	1
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	9
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	4
Anesthesiology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with an Epidural.	1
Anesthesiology	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material			3
Anesthesiology	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 06/22/2018; There has been treatment or conservative therapy.; Pain that radiates and leg pain, muscle weaknes; PT, MEDS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	2
Anesthesiology	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; Injections and physical therapy.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10-26-2018; There has been treatment or conservative therapy.; sharp aching pain numbness and weakness in one side of arm; P/T and Chiropractice with no relief and steroid injections; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	Recommend MRI of the (cervical/thoracic) to further evaluate the patient's persistent pain and symptoms and to rule out disc herniation. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in f; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	The patient has been experiencing this pain for the last several months. She reports onset of pain gradually over time . The patient describes her pain as constant with intermittent flare ups. The pain is aching. The pain radiates to the back. The patient has failed a course of anti-inflammatory medication or steroids.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode. &#x26; Enter Additional Clinical Information	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	4
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/10/2018; There has been treatment or conservative therapy.; Pain, Burning, Aching, Tingling, Numbness; Describe treatment / conservative therapy here -NSAIDs, Chiropractic Care, Stretching/Exercise, Massage; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	&#x26; Enter answer here - or Type In Unknown If No Info Given. &#x26;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/01/2018; There has been treatment or conservative therapy.; pain; kyphoplasty, Taking steroids, nsaid, pain meds.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	MRI of the thoracic spine to further evaluate the patient's persistent pain and symptoms and to rule out disc herniation. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment plan; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.	1

Anesthesiology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	pain management MD wants to perform cervical spine epidural injections to reduce the pain medications, and cannot do the procedure until the patient has the MRI of the lumbar, thoracic, and cervical; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; August 16, 2017; There has been treatment or conservative therapy.; chronic neck pain, lumbar degenerative disease, guarded movement, fibromyalgia, chronic low back pain, degenerative joint/hip disease, sharp pain radiating down both legs, lumbar spine sclerosis, lumbar spine tenderness, limited lateral on the right side.; pain medication and ten units to stop pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	PATIENT HAS FALLEN SEVERAL TIMES SINCE HER TOES HAVE BEEN AMPUTATED. SHE HAS CHRONIC LUMBOSACRAL RADICULOPATHY; This study is being ordered for trauma or injury.; UNKNOWN; It is not known if there has been any treatment or conservative therapy.; A LOT OF PAID BELOW THE RIBCAGE AND BILATERAL FLANK PAID WITH BENDING OVER. UNABLE TO BEND OVER AT HER LUMBAR SPINE DUE TO FORAMINAL STENOSIS.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	Recommend MRI of the (cervical/thoracic) to further evaluate the patient's persistent pain and symptoms and to rule out disc herniation. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in f; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Anesthesiology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	1
Anesthesiology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/10/2018; There has been treatment or conservative therapy.; Pain, Burning, Aching, Tingling, Numbness; Describe treatment / conservative therapy here -NSAIDs, Chiropractic Care, Stretching/Exercise, Massage; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; Injections and physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10-26-2018; There has been treatment or conservative therapy.; sharp aching pain numbness and weakness in one side of arm; P/T and Chiropractic with no relief and steroid injections; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	LAST MRI WAS PERFORMED IN 2016; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/03/2018 PATIENT STARTED HAVING EXACERBATION. HE HAD AN ACCIDENT AT AGE 16 THAT CAUSED CHRONIC LOW BACK PAIN; There has been treatment or conservative therapy.; MUSCLE SPASMS, LOW BACK PAIN FROM LEG TO HEEL WITH BALL OF HIS FOOT BEING TENDER, WEAKNESS, RADICULOPATHY, SPONDYLOSIS, BILATERAL LEG PAIN.; PATIENT HAD PHYSICAL THERAPY FROM 10/23/18-11/27/18 ALONG WITH HOME EXERCISES. PATIENT HAS BEEN ON PAIN MEDICATION SINCE 09/2018.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	MRI of the lumbar to further evaluate the patient's persistent pain and symptoms and to rule out disc herniation. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment p; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Back pain is worsening, radiating down legs. He has tried 6 weeks of PT and NSAIDS and is still having back pain. The patient was unable to do heel walk.&#x0D; The patient was unable to do toe walk. Reports trouble concentrating.&#x0D; headache, loss of strength, p; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	pain management MD wants to perform cervical spine epidural injections to reduce the pain medications, and cannot do the procedure until the patient has the MRI of the lumbar, thoracic, and cervical; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; August 16, 2017; There has been treatment or conservative therapy.; chronic neck pain, lumbar degenerative disease, guarded movement, fibromyalgia, chronic low back pain, degenerative joint/hip disease, sharp pain radiating down both legs, lumbar spine sclerosis, lumbar spine tenderness, limited lateral on the right side., pain medication and ten units to stop pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	PATIENT HAS FALLEN SEVERAL TIMES SINCE HER TOES HAVE BEEN AMPUTATED. SHE HAS CHRONIC LUMBOSACRAL RADICULOPATHY; This study is being ordered for trauma or injury.; UNKNOWN; It is not known if there has been any treatment or conservative therapy.; A LOT OF PAID BELOW THE RIBCAGE AND BILATERAL FLANK PAID WITH BENDING OVER. UNABLE TO BEND OVER AT HER LUMBAR SPINE DUE TO FORAMINAL STENOSIS.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Radiating pain to LE. Limb pain on walking. Patient reports gait disturbance. Palpation of the lumbar facet reveals pain on both the sides at L3-S1 region. Palpation of the bilateral sacroiliac joint area reveals right and left sided pain. ROM of lumbar s; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Radiating pain to LE. Limb pain on walking. Patient reports gait disturbance. Palpation of the lumbar facet reveals pain on both the sides at L3-S1 region. Palpation of the bilateral sacroiliac joint area reveals right and left sided pain. ROM of lumbar s; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Spondylolisthesis, lumbar region Other cervical disc degeneration, mid-cervical region, unspecified level Other intervertebral disc degeneration, lumbar region Cervicalgia Low back pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; March 30, 2018; There has been treatment or conservative therapy.; Cluster Headaches; Pain Management Injections Cervical Spine MRI; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	The patient complains of pain in the BACK, NECK, . The patient has been experiencing this pain for the last&#x0D; several months. She reports onset of pain gradually over time . The pain is aching, dull, hot-burning, numbing,&#x0D; pins and needle, shooting, throbb; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Reports muscle pain, muscle cramp, muscle weakness, neck pain, shoulder pain, back pain, joint pain, joint stiffness and night cramps.Reports history of fractures in the past. Reports trouble concentrating, headache, loss of strength and numbness. The pa; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	unknown; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	2
Anesthesiology	Disapproval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	Radiology Services Denied Not Medically Necessary	; This is a request for a Pelvis MRI.; The study is being ordered for something other than suspicion of tumor, mass, neoplasm, metastatic disease, PID, abscess, Evaluation of the pelvis prior to surgery or laparoscopy, Suspicion of joint or bone infect	1
Anesthesiology	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	No relief from shoulder joint injection, continued pain and decreased ROM. Shoulder x-ray negative. MRI to evaluate if surgical consult is needed.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/03/2017; There has been treatment or conservative therapy.; aching, sharp pain. decreased ROM; Medication: Opiates, Baclofen, Gabapentin&#x0D; &#x0D; Shoulder Joint Injection; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Anesthesiology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Patient is a 52-year-old gentleman with a occlusion of his right internal carotid artery seen by ultrasound. Clearly a CT angiogram would be more definitive ensuring that this artery is occluded. He states that he underwent a CT scan in source he Arkans; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Cardiac Surgery	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		TIA symptoms; This study is being ordered for a neurological disorder.; 11/04/2018; There has not been any treatment or conservative therapy.; vision loss, hallucinations, and weakness; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	2
Cardiac Surgery	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Approval	71250 Computed tomography, thorax; without contrast material		Chest pain describes the reason for this request.; This study is being requested for suspicion of pulmonary embolism (PE); This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; Abnormal ultrasound finding was relevant in the diagnosis or suspicion of vascular disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	2
Cardiac Surgery	Approval	71250 Computed tomography, thorax; without contrast material		Patient is needing test and is being evaluated for surgery for her Mediastinal mass; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1

Cardiac Surgery	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	known 5.1cm descending aortic aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is not scheduled/ planned.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Unknown; This study is being ordered for Vascular Disease.; 10/16/18; There has not been any treatment or conservative therapy.; sudden onset chest pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		1
Cardiac Surgery	Approval	72192 Computed tomography, pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Approval	75573 Computed tomography, heart, with contrast material, for evaluation of cardiac structure and morphology in the setting of congenital heart disease (including 3D image postprocessing, assessment of LV cardiac function, RV structure and function and evaluation of venous structures, if performed)	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/12/18; There has not been any treatment or conservative therapy.; chest pain, issues breathing, echo showed mild left atrial enlargement, unable to measure pulmonary artery; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Anesthesiology	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Pre-surgical evaluation.; This is a request for a thoracic spine MRI.; Pre-Operative Evaluation; Surgery is not scheduled within the next 4 weeks.	1
Anesthesiology	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	3
Anesthesiology	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	This is a request for a thoracic spine MRI.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist.;" The study is being ordered due to follow-up to surgery or fracture within the last 6 months.	1
Anesthesiology	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Anesthesiology	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	This is a request for a thoracic spine MRI.; Pre-Operative Evaluation; Surgery is scheduled within the next 4 weeks.; No, the last Thoracic Spine MRI was not performed within the past two weeks.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		20

Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		As previously stated, patient has some hyperreflexia and some clonus on exam.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Patient has some hyperreflexia and some clonus on exam.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		He reports pain in the entire body but his worst pain is in the neck and radiates into the right shoulder and in the low back and radiates down the right leg; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; He notes that he has had pain since the 3rd grade.; There has been treatment or conservative therapy.; He reports pain in the entire body but his worst pain is in the neck and radiates into the right shoulder and in the low back and radiates down the right leg.; Patient states he has had physical therapy, chiropractic care, medications, spine surgery, and injections.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Abnormal Stress Echo; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1
Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	1
Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for A cardiac history with known myocardial infarction and/or cardiac intervention such as cardiac surgery/angioplasty (PCI); It has been greater than 2 years since the surgery/procedure or last cardiac imaging.	2
Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	2
Cardiac Surgery	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
Cardiac Surgery	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	1

Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Pain is in the low And mid back pain with radiation into RLE occasionally down the left but not that often. Sometimes pain goes down to the foot but mostly just down to the knee. He has some numbness/tingling left lateral thigh and bilateral feet. Pai; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Patient has been seen multiple times and pain in l spine and lower extremities is worsening. Need MRI to eval and treat properly.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient has also recently seen her PCP who is ordering a bone density test as she has weakening of her bones.&#x0D; Palpation of lumbar facet reveals pain on both the sides at L3-S1 region. Palpation of the b/l sacroiliac joint area reveals right and left side; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		patient has numbness, tingling, weakness in legs, balance trouble and falls, previous lumbar spine surgery and has not had any imaging since her original spine surgery in 2001. Based on MRI results, doctor may consider lumbar epidural steroid injections; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in legs, buckling and causes fall; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Patient completed PT; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; the patient was treated with a facet joint injection.	3
Cardiac Surgery	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.	1
Cardiac Surgery	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.	10
Cardiac Surgery	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	1
Cardiac Surgery	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	1
Cardiac Surgery	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.	1
Cardiac Surgery	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	3

Cardiac Surgery	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Chest pain describes the reason for this request.; Abnormal finding on physical examination was relevant in the diagnosis or suspicion of inflammatory bowel disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	'None of the above' describes the reason for this request.; This study is being requested for 'none of the above'; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	2
Cardiac Surgery	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Post-operative evaluation describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Disapproval	75557 Cardiac magnetic resonance imaging for morphology and function without contrast material;	Radiology Services Denied Not Medically Necessary	This is a request for a heart or cardiac MRI	1
Cardiac Surgery	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; It is not known if the member has known or suspected coronary artery disease.	1
Cardiac Surgery	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	1
Cardiology	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.	2
Cardiology	Approval	70490 Computed tomography, soft tissue neck; without contrast material		patient is complaining of chronic cough and has a history of throat cancer; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Cardiology	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing			1
Cardiology	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		HISTORY OF TIA, CAROTID AND PERIPHERAL ARTERY DISEASE; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Cardiology	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Pt has severe headache with Obstruction of carotid artery. pt has had possible TIA or CVA; This study is being ordered for Vascular Disease.; long history of carotid disease Pt has had prior carotidendartectomy in the past and pt has severe head pain and Obstruction of carotid arteries; There has been treatment or conservative therapy.; Pt has severe headache with Obstruction of carotid artery. pt has had possible TIA or CVA; Pt has had prior carotidendartectomy in the past and pt has severe head pain and Obstruction of carotid arteries. Has CAD and is on anticoagulants.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.	1
Cardiology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	2
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.; Yes this is a request for a Diagnostic CT	2
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	2
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		Chest pain describes the reason for this request.; It is unknown if anything else was relevant in the diagnosis or suspicion of vascular disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	1
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; This study is being requested for suspicion of pulmonary embolism (PE); This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1

Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		patient is complaining of chronic cough and has a history of throat cancer; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing			3
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		&lt; Enter answer here - or Type in Unknown If No Info Given. &gt;; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has not been any treatment or conservative therapy.; Syncope&#x0D; fatigue&#x0D; chest pain&#x0D; dizziness&#x0D; shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has not been performed within the last month.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		Evaluation of thoracic aortic aneurysm (without rupture) seen on echocardiogram dated 9/24/2018.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		F/U aortic aneurysm; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/08/2018; There has been treatment or conservative therapy.; SOB Known CAD S/P pci diabetes hyperlipidemia; Echocardiogram EKG; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		Follow-up scan for known thoracic aortic aneurysm, without rupture. Previous scans in 2015 and 2017.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		KNOWN THORACIC AORTIC ANEURYSM.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		mildly dilated aortic root, mild dilation of all cardiac chambers; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		Patient has a known ascending thoracic aortic aneurysm, last measured 4.7cm in 2014. This scan will be for new measurements.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is no other type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		Pre-Ablation testing; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		pt has AAA last CTA was 4-5 years ago. Need follow up.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		There is moderate to severe fibrocalcific degeneration of the prosthetic aortic valve with evidence of severe stenosis.; There is mild perivalvular leak.; Bio prosthetic transvalvular gradient is 45mmHg.; AV area 0.86cm2; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Perivalvular leak repair 08/18; Anti-coagulation therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	48
Cardiology	Approval	71555 Magnetic resonance angiography, chest (excluding myocardium), with or without contrast material(s)		; This is a request for an MR Angiogram of the chest or thorax	1
Cardiology	Approval	71555 Magnetic resonance angiography, chest (excluding myocardium), with or without contrast material(s)		aneurysm 5.3 cm in May 2018 and waiting for 5.5 cm before surgery so they are just watching it; This is a request for an MR Angiogram of the chest or thorax	1
Cardiology	Approval	73706 Computed tomographic angiography, lower extremity, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the lower extremity.	1
Cardiology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Yes this is a request for a Diagnostic CT	1
Cardiology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Cardiology	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing			1
Cardiology	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has not been any treatment or conservative therapy.; Syncope; fatigue; chest pain; dizziness; shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing		IMPRESSION AND PLAN; Severe aortic stenosis; patient meets severe criteria based on echo and is symptomatic, however, her surgical risk is currently unknown and questionable given her age and lack of PMH. Will proceed with TAVR work up including PFS and C; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Cardiology	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing		There is moderate to severe fibrocalcific degeneration of the prosthetic aortic valve with evidence of severe stenosis.; There is mild perivalvular leak.; Bio prosthetic transvalvular gradient is 45mmHg.; AV area 0.86cm2; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Perivalvular leak repair 08/18; Anti-coagulation therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	74175 Computed tomographic angiography, abdomen, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the abdomen.	9

Cardiology	Approval	75557 Cardiac magnetic resonance imaging for morphology and function without contrast material;		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Congenital Anomaly.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; &lt; Describe treatment / conservative therapy here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	75557 Cardiac magnetic resonance imaging for morphology and function without contrast material;		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	75557 Cardiac magnetic resonance imaging for morphology and function without contrast material;		None; This study is being ordered for Congenital Anomaly.; 01/26/2011; There has not been any treatment or conservative therapy.; F/u congenital heart disease; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	75557 Cardiac magnetic resonance imaging for morphology and function without contrast material;		UNKNOWN; This study is being ordered for Congenital Anomaly.; 01/22/2018; There has not been any treatment or conservative therapy.; COGENITAL AORTIC STINOSIS, ASCENDING AORTA DILATION; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	75573 Computed tomography, heart, with contrast material, for evaluation of cardiac structure and morphology in the setting of congenital heart disease (including 3D image postprocessing, assessment of LV cardiac function, RV structure and function and evaluation of venous structures, if performed)		This is a request for Heart CT Congenital Studies.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for CTA Coronary Arteries.; The patient has had a stress echocardiogram; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		none; This study is being ordered for Vascular Disease.; unknown; There has not been any treatment or conservative therapy.; CP shortness of breath, fatigue, Dizzy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; ; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; &lt;Additional Clinical Information&gt;; Yes, there is Chronic Chest Pain.	3
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; n/a; Yes, there is Chronic Chest Pain.	1

Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Pt has leg swelling and hyperlipidemia. Recently pt c/o CP that is substernal in nature.; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Pt having chest pain and shortness of breath. Nausea is common but diaphoresis and vomiting are not always noted. Sometimes it occurs at night, but it is most often in the waking hours brought on by exertion or stress but may occur at rest. Palpitations ; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Pt worsening chest pain and dyspnea on exertion. Pt has hx of HTN, Hyperlipidemia, strong family hx of CAD, and hx of DVT. Provider requesting CTA heart and arteries as pt is on anticoagulant therefore needs less invasive evaluation of CAD symptoms.; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; unknown; Yes, there is Chronic Chest Pain.	2
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This is a request for CTA Coronary Arteries.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This is a request for CTA Coronary Arteries.; The study is requested for known or suspected cardiac septal defect.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; None of the above.; &lt;Additional Clinical Information&gt;	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; None of the above.; He had an ECHO / DOPPLER that showed NORMAL LV and RV function. Normal Right Heart Pressures but showed "moderate pulmonary insufficiency" but RVSP was estimated at 26mm Hg.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for being evaluated prior to a noncardiac surgical procedure.; ongoing for couple of yrs, echo has low normal lv systolic function of 50 %, trace mitral and tricuspid regurgitation, mod. elevation in rv systolic at 48 mmhg	1

Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for being evaluated prior to a noncardiac surgical procedure.; the chronic systolic heart failure, ACC/AHA stage C likely ischemic. The systolic dysfunction, LVEF 35% on 8-13-18. she also has dizziness and palpitations.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.; &Additional Clinical Information&gt;	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.; cad right cad placement in may cabg x 5 in 2015 occluded left carotid, pvd left femoral popliteal bypass in 2008. hyperlipidemia, htn, a fib, and sob. some reasons of why they want to do a CTA. sob becomes dyspneic just walking up a slight incline. this i	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; Recurrent palpitations: He had a recent stress echo that was suboptimal secondary to inadequately visualized left ventricular wall secondary to history of pectus excavatum and surgical repair. We will arrange for coronary CTA.; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; Yes, patient has new onset congestive heart failure.; None	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.;	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Will fax in the clinical info	1
Cardiology	Approval	75635 Computed tomographic angiography, abdominal aorta and bilateral iliofemoral lower extremity runoff, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/4/18; There has not been any treatment or conservative therapy.; shortness of breath, hypertension, coronary artery disease; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	75635 Computed tomographic angiography, abdominal aorta and bilateral iliofemoral lower extremity runoff, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the abdominal arteries.	46
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		#1 angina: He's been having symptoms of chest discomfort and shoulder discomfort over the past few months. He was recent started on Prilosec. The symptoms in his chest and abdomen seem to improve on the medication. However still having some discomfort acr; The patient is not diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; It is unknown if the chest pain was relieved by rest (ceasing physical exertion activity) and/or nitroglycerin	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	2
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	17
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; the patient was treated with a facet joint injection.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with an Epidural.	3
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	139
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	3
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks	5
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	13
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; December 28, 2015 Injections, patient is still experiencing pain did not help	1
Anesthesiology	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)			3
Anesthesiology	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		"There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; This is a request for bilateral foot MRI.; &lt;Enter answer here OR type 'Unknown' if no info given.&gt;	2
Anesthesiology	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Limited range of motion	1
Anesthesiology	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	1
Anesthesiology	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Pt reports she is getting debilitating headaches about once weekly. she reports this has been going on for the last 5 weeks. she reports she does get decreased focus. she reports the pain comes from her cervical spine and radiates to her head. she reports; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient does not have HIV or cancer.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1

Anesthesiology	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.	1
Anesthesiology	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	to further evaluate pathology and consider other treatment options other than medications.; This study is being ordered for trauma or injury.; 5/11/2018; There has been treatment or conservative therapy.; unknown; pain specialist, medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72131 Computed tomography, lumbar spine; without contrast material	Radiology Services Denied Not Medically Necessary	to further evaluate pathology and consider other treatment options other than medications.; This study is being ordered for trauma or injury.; 5/11/2018; There has been treatment or conservative therapy.; unknown; pain specialist, medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary		1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; down his arm and is numb and tingly; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; Patient does have radicular cervical neck pain, ongoing for more than 1 year.Patient was referred by PCP for evaluation of chronic pain, gradually and progressively worsening, resulting in difficulty in standing / ambulation, and in completing ADL's to th	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	LAST MRI WAS PERFORMED IN 2016; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/03/2018 PATIENT STARTED HAVING EXACERBATION. HE HAD AN ACCIDENT AT AGE 16 THAT CAUSED CHRONIC LOW BACK PAIN; There has been treatment or conservative therapy.; MUSCLE SPASMS, LOW BACK PAIN FROM LEG TO HEEL WITH BALL OF HIS FOOT BEING TENDER, WEAKNESS, RADICULOPATHY, SPONDYLOSIS, BILATERAL LEG PAIN.; PATIENT HAD PHYSICAL THERAPY FROM 10/23/18-11/27/18 ALONG WITH HOME EXERCISES. PATIENT HAS BEEN ON PAIN MEDICATION SINCE 09/2018.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	-MRI lumbar spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings&#x0D; from this study will be incorporated, in conjunction with objective findings, into the decision process in&#x0D; formulating a treatment plan for thi; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	pain management MD wants to perform cervical spine epidural injections to reduce the pain medications, and cannot do the procedure until the patient has the MRI of the lumbar, thoracic, and cervical; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; August 16, 2017; There has been treatment or conservative therapy.; chronic neck pain, lumbar degenerative disease, guarded movement, fibromyalgia, chronic low back pain, degenerative joint/hip disease, sharp pain radiating down both legs, lumbar spine sclerosis, lumbar spine tenderness, limited lateral on the right side., pain medication and ten units to stop pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	8
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent CCTA to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.; It is unknown if the patient has known diabetes	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	2
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	patient has failed injection therapy and gabapentin. he reports worsening pain w/ associated numbness/tingling; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness; weakness compared to opposite side. decreased range of motion and tender to palpation. no improvement w/ injections and minimal improvement w/ Gabapentin; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	PATIENT HAS FALLEN SEVERAL TIMES SINCE HER TOES HAVE BEEN AMPUTATED. SHE HAS CHRONIC LUMBOSACRAL RADICULOPATHY; This study is being ordered for trauma or injury.; UNKNOWN; It is not known if there has been any treatment or conservative therapy.; A LOT OF PAID BELOW THE RIBCAGE AND BILATERAL FLANK PAID WITH BENDING OVER. UNABLE TO BEND OVER AT HER LUMBAR SPINE DUE TO FORAMINAL STENOSIS.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	Spondylolisthesis, lumbar region Other cervical disc degeneration, mid-cervical region, unspecified level Other intervertebral disc degeneration, lumbar region Cervicalgia Low back pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; March 30, 2018; There has been treatment or conservative therapy.; Cluster Headaches; Pain Management Injections Cervical Spine MRI; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2

Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Neurological deficits; ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Anesthesiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; None of the above; &lt;Enter Additional Clinical Information&gt;; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The patient is not diabetic; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; The chest pain was relieved by rest (ceasing physical exertion activity) and/or nitroglycerin; It is unknown if there is a physical restriction to the member's ability to exercise	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The patient is not diabetic; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; The chest pain was relieved by rest (ceasing physical exertion activity) and/or nitroglycerin; There is no physical restriction to the member's ability to exercise	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The study is being ordered for known CAD; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member; The patient's age is between 45 and 64 years old.	9
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The study is being ordered for known CAD; The patient is not presenting new symptoms of chest pain or increasing shortness of breath; The patient has not had a recent non-nuclear stress test; The patient had a recent abnormal EKG consistent with CAD; The patient has not had a recent stress echocardiogram; This patient had a previous cardiac surgery or angioplasty; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient is male; This is NOT a Medicare member; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The study is being ordered for known CAD; The patient is not presenting new symptoms of chest pain or increasing shortness of breath; The patient has not had a recent non-nuclear stress test; The patient has not had a recent abnormal EKG consistent with CAD; The patient has not had a recent stress echocardiogram; This patient had a previous cardiac surgery or angioplasty; The patient has not had a stress echocardiogram within the past eight weeks; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member; The patient's age is between 45 and 64 years old.	1
Anesthesiology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	LAST MRI WAS PERFORMED IN 2016; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/03/2018 PATIENT STARTED HAVING EXACERBATION. HE HAD AN ACCIDENT AT AGE 16 THAT CAUSED CHRONIC LOW BACK PAIN; There has been treatment or conservative therapy.; MUSCLE SPASMS, LOW BACK PAIN FROM LEG TO HEEL WITH BALL OF HIS FOOT BEING TENDER, WEAKNESS, RADICULOPATHY, SPONDYLOSIS, BILATERAL LEG PAIN.; PATIENT HAD PHYSICAL THERAPY FROM 10/23/18-11/27/18 ALONG WITH HOME EXERCISES. PATIENT HAS BEEN ON PAIN MEDICATION SINCE 09/2018.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	-MRI lumbar spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings&#x0D; from this study will be incorporated, in conjunction with objective findings, into the decision process in&#x0D; formulating a treatment plan for this; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

Anesthesiology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	MRI to need for approval of medial branch block.; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.	1
Anesthesiology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	3
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	2
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/01/2018; There has been treatment or conservative therapy.; pain; kyphoplasty, Taking steroids, nsaid, pain meds.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	He also reports debilitating low back pain ongoing for multiple years. Patient was referred by PCP for evaluation of chronic pain, gradually and progressively worsening, resulting in difficulty in standing / ambulation, and in completing ADL's to their sa; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	HISTORY OF LOW BACK PAIN. LUMBAR RADICULOPATHY. MID BACK PAIN. THORACIC RADICULOPATHY. THORACIC DISC PROTUSION. MYOSITIS. HAS A KNOT IN HER RIGHT LOWER BACK THAT IS VERY PAINFUL TO THE TOUCH.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	LOW BACK PAIN; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Lumbar pain with extension and bending; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms; There is weakness.; weakness in bilateral lower extremities.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	MRI of the lumbar spine to further evaluate the patient's persistent pain and symptoms and to rule out disc herniation. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treat; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; MRI of the lumbar spine to further evaluate the patient's persistent pain and symptoms and to rule out disc herniation. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treat; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	See previous; This study is being ordered for a neurological disorder.; 2012; There has been treatment or conservative therapy.; Back pain, leg and feet pain, decreased sensation to left upper extremity and bilateral lower extremities, positive bilateral clonus and positive Hoffman, and hyperreflexia.; Medications trials:&#x0D; moxic&#x0D; Diclofenac&#x0D; Gabapentin&#x0D; Physical Therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	The patient has been experiencing this pain for the last several months. She reports onset of pain gradually&#x0D; over time . The patient describes her pain as constant with intermittent flare ups. The pain is aching. The pain radiates to the back. &#x0D; &#x0D; The ce; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	5
Anesthesiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Disapproval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	Radiology Services Denied Not Medically Necessary	groin pain, hip pain, lower extremity pain on the left, history of hernia repair on that side; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; neuralgia; medications, narcotics, injection; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Anesthesiology	Disapproval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	Radiology Services Denied Not Medically Necessary	Unknown; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Anesthesiology	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for None of the above; Pain greater than 3 days	1
Anesthesiology	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	The patient complains of pain of bilateral knee, lower back and hips and legs. The patient has been&#x0D; experiencing this pain for several years. She reports onset of pain was: gradual. The patient describes her pain&#x0D; as constant. The pain is aching, deep, s; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days	1
Anesthesiology	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
Anesthesiology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	groin pain, hip pain, lower extremity pain on the left, history of hernia repair on that side; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; neuralgia; medications, narcotics, injection; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Patient is a 52-year-old gentleman with a occlusion of his right internal carotid artery seen by ultrasound. Clearly a CT angiogram would be more definitive ensuring that this artery is occluded. He states that he underwent a CT scan in source he Arkans; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Cardiac Surgery	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		TIA symptoms; This study is being ordered for a neurological disorder.; 11/04/2018; There has not been any treatment or conservative therapy.; vision loss, hallucinations, and weakness; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Severe 70/80 % stenosis of the left carotid; This study is being ordered for Vascular Disease.; 10/24/2018; There has not been any treatment or conservative therapy.; Patient had TIA 10/24/2018; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the Neck.	3

Cardiac Surgery	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; Abnormal mass in the chest, chest wall, or lung is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; This reason this study is being requested is unknown.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Approval	71250 Computed tomography, thorax; without contrast material		Patient has CABG in March 2016 a recent chest X-ray showed broken sternal wires. Patient report sternal pain keeping him awake at night; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiac Surgery	Approval	71250 Computed tomography, thorax; without contrast material		Pre-operative evaluation describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Approval	71250 Computed tomography, thorax; without contrast material		This is a request for a Thorax (Chest) CT.; Post-operative evaluation describes the reason for this request.; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is not scheduled/ planned.; Yes, this is a request for a Chest CT Angiography.	1

Cardiac Surgery	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has not been performed within the last month.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		Anurism; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		Patient is a 50-year-old gentleman with severe aortic stenosis seen by dobutamine stress echo. The patient also is symptomatic. He will need an aortic valve replacement. Due to his young age and otherwise good health he is a candidate for open aortic v; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/12/18; There has not been any treatment or conservative therapy.; chest pain, issues breathing, echo showed mild left atrial enlargement, unable to measure pulmonary artery; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member.; This study is being ordered for A cardiac history with known myocardial infarction and/or cardiac intervention such as cardiac surgery/angioplasty (PCI); It has NOT been greater than 2 years since the surgery/procedure or last cardiac imaging.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for Known Coronary Artery Disease (CAD); The diagnosis was established by something other than listed; The patient has not had a stress echocardiogram within the past eight weeks.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for None of the above; The patient has not had a stress echocardiogram within the past eight weeks.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent ) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient has not had a stress echocardiogram within the past eight weeks.; It is not known if patient had a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiac Surgery	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing		This is a request for CT Angiography of the Abdomen and Pelvis.	8

Cardiac Surgery	Approval	74175 Computed tomographic angiography, abdomen, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Unknown; This study is being ordered for Vascular Disease.; 10/16/18; There has not been any treatment or conservative therapy.; sudden onset chest pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Approval	75635 Computed tomographic angiography, abdominal aorta and bilateral iliofemoral lower extremity runoff, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the abdominal arteries.	8
Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		suspected CAD pt has exertional chest pain and SOB.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiac Surgery	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has not been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; This study is being requested for Lung Cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
Cardiac Surgery	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		Enter answer here - or Type In Unknown If No Info Given Patient has had Cath w/coronary stenting, he has an ischemic cardiomyopathy w/ICD in place.; This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	1
Cardiac Surgery	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		1. Acute on chronic systolic heart failure decompensation with worsening dyspnea on exertion, orthopnea and weight gain. Will increase Lasix to 80mg daily. Metolazone 5mg daily for 3 days. Arrange for follow up in CHF clinic next week. Will obt; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		79 YEAR OLD WITH CHEST PAIN, HISTORY OF CONGESTIVE HEART FAILURE, HAS COPD CANNOT WALK ON TREADMILL; The patient is not diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; It is unknown if the chest pain was relieved by rest (ceasing physical exertion activity) and/or nitroglycerin	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		abnormal CTA showed CAD; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiac Surgery	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.	1
Cardiac Surgery	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		Shannon Danner is a 42 y.o. female.&#x0D; &#x0D; &#x0D; The patient is a 42 yo woman with DM type 2, HbA1c is 8.0% complicated by neuropathy, worsening, has been on Vit B complex now . She is s/p amputation of right 5th toe and now there is an ulcer on the right 1st; This study is being ordered for Vascular Disease., Pt reports that she has quit smoking. She has never used smokeless tobacco. She reports that she does not drink alcohol or use drugs.; There has been treatment or conservative therapy.; ; REVIEW OF SYSTEMS&#x0D; &#x0D; General: No fatigue, no malaise&#x0D; &#x0D; Skin: No rashes or bruises&#x0D; &#x0D; HEENT: No vision loss or diplopia&#x0D; &#x0D; Neck: No lymphadenopathy&#x0D; &#x0D; Resp: No wheezing or hemoptysis&#x0D; &#x0D; Cardio: as in HPI&#x0D; &#x0D; GI: No diarrhea, constipation, GI bleed&#x0D; &#x0D; GU: N; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	1
Cardiac Surgery	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	1
Cardiac Surgery	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	'None of the above' describes the reason for this request.; This reason this study is being requested is unknown.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
Cardiac Surgery	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	abnormal test Hx open lung biopsy 8/8/2018; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Severe 70/80 % stenosis of the left carotid; This study is being ordered for Vascular Disease.; 10/24/2018; There has not been any treatment or conservative therapy.; Patient had TIA 10/24/2018; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		abnormal ecg anteroseptal myocardial infraction. htn, cad, atypical chest pain, and is overweight.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		abnormal ekg, diabetes, hyperlipidemia, hypertension.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for None of the above	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Angina and dyspnea; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Angina pectoris; Provided angina: care instructions; Check electrocardiogram; essential hypertension; hyperlipidemia; Type 2 diabetes mellitus without complication; Provided type 2 diabetes: care instructions; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Angina, Dyspnea, CP, HTN, Abn-EKG, No stress echos done within 60 mile radius.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiac Surgery	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	Shannon Danner is a 42 y.o. female.; The patient is a 42 yo woman with DM type 2, HbA1c is 8.0% complicated by neuropathy, worsening, has been on Vit B complex now . She is s/p amputation of right 5th toe and now there is an ulcer on the right 1st; This study is being ordered for Vascular Disease.; Pt reports that she has quit smoking. She has never used smokeless tobacco. She reports that she does not drink alcohol or use drugs.; There has been treatment or conservative therapy.; REVIEW OF SYSTEMS; General: No fatigue, no malaise; Skin: No rashes or bruises; HEENT: No vision loss or diplopia; Neck: No lymphadenopathy; Resp: No wheezing or hemoptysis; Cardio: as in HPI; GI: No diarrhea, constipation, GI bleed; GU: N; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiac Surgery	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is NOT for prolapsed mitral valve, suspected valve disease, new or changing symptoms of valve disease, annual review of known valve disease, initial evaluation of artificial heart valves or annual re-eval of artificial heart valves.	1
Cardiac Surgery	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	1
Cardiology	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; Known or suspected TIA (stroke) with documented new or changing neurologic signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.	3
Cardiology	Approval	70450 Computed tomography, head or brain; without contrast material		Unknown; This study is being ordered for Vascular Disease.; 7/2018; There has been treatment or conservative therapy.; fatigue, syncope, absent radio pulses, dizziness, dyspnea; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Pt has severe headache with Obstruction of carotid artery, pt has had possible TIA or CVA; This study is being ordered for Vascular Disease.; long history of carotid disease Pt has had prior carotidectomy in the past and pt has severe head pain and Obstruction of carotid arteries; There has been treatment or conservative therapy.; Pt has severe headache with Obstruction of carotid artery. pt has had possible TIA or CVA; Pt has had prior carotidectomy in the past and pt has severe head pain and Obstruction of carotid arteries. Has CAD and is on anticoagulants.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Angina, HTN, Palpitation; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		at this point in time the symptoms are somewhat atypical but he does have even some lower pain in his hips which may be atypical claudication although he has no physical exam signs consistent with vascular insufficiency in the lower extremities we'll cont; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		CAD by a calcium score, abnormal EKG; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		central chest pain&#x0D; &#x0D; strong family history of CAD&#x0D; &#x0D; fatigue&#x0D; &#x0D; hyperlipidemia&#x0D; &#x0D; BMI 31; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		CHEST PAIN AND SOB, CONSTANT FATIGUE, OCCAS. DIZZINESS, DAILY PALPITATIONS, CURRENT EVERY DAY SMOKER; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Chest pain at rest and exertion&#x0D; &#x0D; both parents deceased in their 60's from CAD&#x0D; &#x0D; Abnormal EKG&#x0D; &#x0D; BMI 38&#x0D; &#x0D; Diabetes&#x0D; &#x0D; Dyslipidemia&#x0D; &#x0D; bilateral ankle edema&#x0D; &#x0D; Sleep Apnea with CPAP; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		chest pain on exertion.&#x0D; this is a 63-year-old male who was referred to us for evaluation of chest pain. Patient has been complaining of intermittent episodes of chest pain on exertion, 5 out of 10 in intensity, with radiation to the left jaw. Gets worse ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		chest pain&#x0D; Provided chest pain: care instructions&#x0D; hyperlipidemia; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		chest pain; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration.;" The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; The patient is male.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		chest pains and ER visit on 11/13/18 and still having chest pains EKG abnormal; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the brain.	1
Cardiology	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing			2
Cardiology	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		HISTORY OF TIA, CAROTID AND PERIPHERAL ARTERY DISEASE; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Cardiology	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the Neck.	16
Cardiology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 2018; There has not been any treatment or conservative therapy.; NUMBNESS, TINGLING, WEAKNESS, L SHOULDER AND NECK PAIN; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.	1
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material			3
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	4
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal laboratory test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		Chest pain describes the reason for this request.; Abnormal finding on physical examination was relevant in the diagnosis or suspicion of inflammatory bowel disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	1
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		Chest pain describes the reason for this request.; This study is being requested for suspicion of pulmonary embolism (PE); This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	2
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		Mr. Mears is a pleasant 60yo that returns today due to intermittent chest pain. He underwent 5v-CABG with Dr. Williams in May of this year. He has been in cardiac rehab and seems to be tolerating it well. He admits to sharp intermittent left anterior chest; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; Abnormal finding on physical examination was relevant in the diagnosis or suspicion of inflammatory bowel disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		chest pressure; feel as like anxiety &#x0D; Severity: mild &#x0D; Duration: lasts minutes &#x0D; Onset/Timing: occurs daily &#x0D; Context: exertional; at rest&#x0D; Alleviating Factors: nothing gives relief.&#x0D; PT ALSO HAS A HX OF A-FIB; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Comments: Pt here for stress echo needed Definity to improve pictures, patient had reaction to Definity with severe&#x0D; back pain & amp; pain/cramping in both legs. Test terminated & amp; will have the complete echo from today read and he is set&#x0D; up to come back Wed; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Coronary artery disease needs to be ruled out.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		CP and SOB when walking. No Stress Echos done within 60 mile radius.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Cp, ABN EKG, no stress echos done within 60 mile radius.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; An abnormal lab finding led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema).; Yes this is a request for a Diagnostic CT	1
Cardiology	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; This study is being requested for 'none of the above'.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	2
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	3
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	2
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is a known or suspected coarctation of the aorta.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		6 month follow up. His CT Calcium showed total calcium was measured at 6.2. His CT also showed aneurysmal dilatation of ascending aorta measures up to 4.7 cm. He is here for repeat study. He feels well and voices no concerns today. He denies anginal compl; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a pre-operative evaluation.; This surgery is scheduled/planned.; A catheter angiogram has not been performed within the last month.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		cp, hypertension, smoker, asthma,; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; This is NOT a Medicare member.; The patient is less than 45 years old.; The patient does not have known diabetes	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Dr. Greer is wanting to do it bc her blood pressure seems to be getting out of control lately. we will resume lisinopril therapy 20 mg p.o. twice daily and continue all other present medical therapy as is. With this is also associated sob, mild edema, an; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		dyspnea fatigue malaise with exertion &#x0D; &#x0D; hypertension&#x0D; &#x0D; obesity&#x0D; &#x0D; bmi 50&#x0D; &#x0D; abnormal ekg with st-t wave changes; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Dyspnea with exertion, stable, no associated angina, was a heavy smoker, stopped 2 months ago, deconditioned and diet carbs low glycemic index and weight loss..chest pains . precordial at rest, lasting minutes, describes as a dull ache, he moves and pain ; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Echo 11/7/18&#x0D; 1. Abnormal LV systolic function. Ejection fraction 40% estimated. Difficult assessment for ischemic wall motion abnormalities. There is concentric left ventricular hypertrophy without dilation; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; This is a Medicare member.; This study is being ordered for None of the above	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		Abnormal echocardiogram; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		Aortic root dilation on recent Echo.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; It is not known whether there are new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Ascending aortic aneurysm: Aneurysm measures 5 cm on echocardiogram. She also appears to have a bicuspid aortic valve. I recommend CT scan of the aorta to evaluate the dimensions and to evaluate the entire aorta. I also recommend she undergo transeosoph; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/31/2018; It is not known if there has been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	CTA of the chest with and without contrast to rule out thoracic aortic aneurysm.Target blood pressure is less than 130/80.Discontinue diltiazem.Nifedipine ER 60 mg p.o. Daily.Blood pressure diary for two weeks Aggressive weight reduction.Continue otherwise; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	dilated aortic root found on echocardiogram; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Dr. Jolly has mild aortic valve disease and an ascending aortic aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Edward Shane Graves is a 60 y.o. male who presents for a 3 month follow up and bp recheck. He reports bp is elevated at home. Has some mild SOB on exertion and fatigues easily when doing something physical. Patient of Dr. Vengala's in our clinic. Pertinent; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Encounter for Observation, SOB, DOE, HTN, Abn-EKG, Smoker; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Essential (primary) hypertension; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for Suspected Coronary Artery Disease (CAD); The patient has not had a stress echocardiogram within the past eight weeks.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	essential hypertension&#x0D; Provided learning about high blood pressure&#x0D; Check electrocardiogram&#x0D; electrocardiogram abnormal&#x0D; angina pectoris&#x0D; Provided angina: care instructions&#x0D; hyperlipidemia&#x0D; Provided high cholesterol: care instructions&#x0D; carotid bruit; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Family of heart disease, Angina, CP; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		IMPRESSION AND PLAN&#x0D; Severe aortic stenosis; patient meets severe criteria based on echo and is symptomatic, however, her surgical risk is currently unknown and questionable given her age and lack of PMH. Will proceed with TAVR work up including PFS and C; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		Known thoracic aneurysm last checked on in 2016, this is routine check up 2018.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are no signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		she had an echo prior test; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is no other type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		To evaluate known ascending aortic aneurysm and make sure it hasn't grown in the past year.; This study is not requested to evaluate suspected pulmonary embolus.; It is not known if this study will be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are no signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71550 Magnetic resonance (eg, proton) imaging, chest (eg, for evaluation of hilar and mediastinal lymphadenopathy); without contrast material(s)		Herat failure; This study is NOT being ordered for a Work-up for Suspicious Mass, Known Tumor, Known or Suspected Inflammatory Disease, etc...; This is a request for a chest MRI.	1
Cardiology	Approval	71555 Magnetic resonance angiography, chest (excluding myocardium), with or without contrast material(s)		&#x0D; Enter answer here - or Type In Unknown If No Info Given. &#x0D; This study is being ordered for Congenital Anomaly.; &#x0D; Enter date of initial onset here - or Type In Unknown If No Info Given &#x0D; There has been treatment or conservative therapy.; &#x0D; Describe primary symptoms here - or Type In Unknown If No Info Given &#x0D; &#x0D; Describe treatment / conservative therapy here - or Type In Unknown If No Info Given &#x0D; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	71555 Magnetic resonance angiography, chest (excluding myocardium), with or without contrast material(s)		&#x0D; Enter answer here - or Type In Unknown If No Info Given. &#x0D; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &#x0D; Enter date of initial onset here - or Type In Unknown If No Info Given &#x0D; It is not known if there has been any treatment or conservative therapy.; &#x0D; Describe primary symptoms here - or Type In Unknown If No Info Given &#x0D; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	71555 Magnetic resonance angiography, chest (excluding myocardium), with or without contrast material(s)		None; This study is being ordered for Congenital Anomaly.; 01/26/2011; There has not been any treatment or conservative therapy.; F/u congenital heart disease; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	71555 Magnetic resonance angiography, chest (excluding myocardium), with or without contrast material(s)		unknown; This is a request for an MR Angiogram of the chest or thorax	1
Cardiology	Approval	71555 Magnetic resonance angiography, chest (excluding myocardium), with or without contrast material(s)		UNKNOWN; This study is being ordered for Congenital Anomaly.; 01/22/2018; There has not been any treatment or conservative therapy.; COGENITAL AORTIC STINOSIS, ASCENDING AORTA DILATION; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Approval	72125 Computed tomography, cervical spine; without contrast material		The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.	1
Cardiology	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT	1
Cardiology	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	1
Cardiology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1
Cardiology	Approval	73220 Magnetic resonance (eg, proton) imaging, upper extremity, other than joint; without contrast material(s), followed by contrast material(s) and further sequences		multiple joint tenderness and reports of swelling with other symptoms concerning for autoimmune disease including alopecia, rashes, and response to steroids.; This study is being ordered for Inflammatory/ Infectious Disease.; 10/15/2018; It is not known if there has been any treatment or conservative therapy.; multiple joint tenderness and reports of swelling with other symptoms concerning for autoimmune disease including alopecia, rashes, and response to steroids.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Cardiology	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		fax clinicals; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Female with hx of anxiety and palpitations for the past 14 years, who presented for worsening palpitations&#x0D; Presents today for routine follow up&#x0D; Had Event monitor that showed multiple PVCs in the past &#x0D; &#x0D; Since last visit she had few more recent episodes; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		follow up; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient is male.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		HPI&#x0D; The patient presented to Saint Vincent's Hospital on September 4, 2018 with a pain in his left chest and subsequent left arm and left leg numbness. He was found to have a basilar artery occlusion likely due to large vessel atherosclerosis. He ha; This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		HPI: 62 y.o. male referred to Cardiology for evaluation , has no prior cardiac history. He does have long-standing peripheral arterial disease, polycythemia vera. Gets phlebotomies once a month. States he is noticed gradual dyspnea on exertion over t; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Htn diabetic; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		impression:&#x0D; #1 hypertension: Her blood pressures not well controlled this point. She is currently on Norvasc as well as losartan. Her recent echo showed severe concentric left ventricular hypertrophy. There is no evidence of any outflow obstruction to su; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Joanne F Sprague is a 63 y.o. female who presents as a hospital follow-up for PVCs.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Known CAD with CABG X 2 on 9/26/18 and patient continues to have chest discomfort.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		known dilated cardiomyopathy, class III angina, shortness of breath, AICD placement; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing		F/U aortic aneurysm; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/08/2018; There has been treatment or conservative therapy.; SOB Known CAD S/P pci diabetes hyperlipidemia; Echocardiogram EKG; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing		none; This study is being ordered for Vascular Disease.; unknown; There has not been any treatment or conservative therapy.; CP shortness of breadth, fatigue, Dizzy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing		This is a request for CT Angiography of the Abdomen and Pelvis.	3
Cardiology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" Pt had CTA of chest abdomen w contrast showing 3cm right adrenal mass, possible large adenoma but indetemindate. Further evaluation by MRI recommended	1

Cardiology	Approval	7557 Cardiac magnetic resonance imaging for morphology and function without contrast material;		This is a request for a heart or cardiac MRI	16
Cardiology	Approval	75572 Computed tomography, heart, with contrast material, for evaluation of cardiac structure and morphology (including 3D image postprocessing, assessment of cardiac function, and evaluation of venous structures, if performed)		IMPRESSION AND PLAN&#x0D; Severe aortic stenosis; patient meets severe criteria based on echo and is symptomatic, however, her surgical risk is currently unknown and questionable given her age and lack of PMH. Will proceed with TAVR work up including PFS and C; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Cardiology	Approval	75572 Computed tomography, heart, with contrast material, for evaluation of cardiac structure and morphology (including 3D image postprocessing, assessment of cardiac function, and evaluation of venous structures, if performed)		This is a request for a Heart CT.	8
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		Nondiagnostic stress echo because of failure to achieve the 85% target heart rate and failure to achieve adequate cardiac stress. Patient walked on the treadmill for 4:45 minutes achieving 6.1 METS and only 75% of the max projected heart rate. Max BP-HR p; This is a request for CTA Coronary Arteries.; The patient has had a stress echocardiogram; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; pt had an abnormal stress test suggestive of ischemia; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		left bundle branch block; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/6/2018; There has been treatment or conservative therapy.; CAD, chest pains,left bundle block; patient went to the ER, CAD; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Mr. Davis returns for followup after missing his hospital followup last Winter. He states he was in the hospital for chest pain last week at El Dorado and had some testing but does not think he had a stress test. He presents with a request for cardiac cle; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Mr. Henderson is a very pleasant 53-year-old gentleman who is referred for sinus arrhythmia but has been having exertional chest discomfort with known coronary disease, lower extremity edema, symptoms of sleep apnea. We will set him up for sleep study as ; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Ms. Cantrell is referred for evaluation of chest pain by the VVI clinic. She has noticed intermittent episodes of chest pain, for the last 3 months, sometimes at rest, substernal, lasts for a minute and resolves spontaneously. She has had back problems an; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Ms. Lang is a 42 year old female. She is referred for evaluation of chest tightness. About a year ago she was found to have breast cancer. She had resection. She was treated with tamoxifen. She was then treated with a proteinase inhibitor. She takes; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.; The patient does not have known diabetes	1

Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; It is not known if patient has new onset congestive heart failure.; Pt has murmur with new chest pain and shortness of breath.Type 2 diabetes mellitus with complication, unspecified whether long term insulin use. Pt is a smoker. pt has stated that she has some issues with twilight anesthesia that would be needed for a hea; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; ; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; It is not known if patient has new onset congestive heart failure.; Hot searing pain in back and shoulder that radiates into arms, chest and neck.&#x0D; Palpitations &#x0D; Irregular Heart Rate &#x0D; Atrial Fib with RVR &#x0D; Dehydration &#x0D; Dysthmia &#x0D; OSA on CPAP&#x0D; Anxiety: Y&#x0D; Hypertension: Y&#x0D; Other: Y - osteopenia&#x0D; Sleep Apnea: Y - USES CPA; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient with a history of Type II diabetes, hypertension, and hyperlipidemia referred for chest pain by PCP. Patient had a Stress test with ECHO for evaluation. Chest Pain was invoked during the exercise stress portion of test.; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Ms. Moore is a 59 year old female here for preoperative evaluation prior to bariatric SX with Dr. Bledsoe. Denies chest pain. States that she is only well SOB when walking up a hill or climbing a flight of stairs. Works in her yard without SOB. Is able to; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		needs this for a DOT CLEARANCE for his job; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous myocardial infarction.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient is male.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Neurologic: memory lapses or changes and difficulty finding desired words.&#x0D; shortness of breath when walking and light-headed on standing.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		No Stress Echos done within 60 mile radius. Abnormal electrocardiogram with mild nonspecific ST-T Changes, Dyspnea on exertion. HTN. Patient also had an abnormal regular treadmill stress test.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member.; This study is being ordered for None of the above	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		No Stress Echocardiograms done within 60 mile radius. Angina, abnormal ECG, hypertension, hyperlipidemia, smoker; The patient is not diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; It is unknown if the chest pain was relieved by rest (ceasing physical exertion activity) and/or nitroglycerin	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		non ischemic cardiomyopathy defibrillator implant, ICD shocks, new chest pain; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		None; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient is male.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		none; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		None; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is less than 20	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		past 6 months or so she has been having daily chest heaviness/pressure; this happens daily and sometimes radiates into left arm and up neck. Daily shortness of breath, she gets worn out just getting dressed. Occasional palpitations. CURRENT EVERYDAY SMOKE; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient called this morning stating he was in the ER at AMMC on Saturday 9-29-18 with HTN and chest pain. He said his BP this morning was 198/84. He said upon his discharge from the ER, they instructed him to get an appointment with Dr. Hallak. His number is; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient has significant family history of CAD; It is not known if the patient is diabetic.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient is experiencing episodes of precordial chest pain associated with moderate to severe dyspnea. Abnormal EKG. Morbid obesity. Family history of CAD.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient is experiencing frequent episodes of left precordial chest pain associated with moderate to severe dyspnea and loss of consciousness. Hypertension, trivial nonrheumatic tricuspid insufficiency, severe obesity, abnormal EKG.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient is experiencing precordial chest pain associated with moderate to severe dyspnea and heart palpitations. Abnormal EKG. Hypertension. Severe obesity.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Pt also has dyspnea and prior history of diastolic dysfunction; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; pt had abnormal stress echo and EKG; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Pt has class 2 obesity but recently lost 10 lbs rapidly without effort.; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This is a request for CTA Coronary Arteries.; The study is requested for known or suspected valve disorders.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; CHEST PAIN, SOB AND NAUSEA.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; &Additional Clinical Information&gt; No, this patient does not have equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; &Additional Clinical Information&gt; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	1

Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterruptible cardiac imaging. ; Nonobstructive coronary arteries &#x0D; &#x0D; An anomalous takeoff of the left circumflex from the right coronary &#x0D; cusp &#x0D; &#x0D; Normal left ventricle systolic function with normal left ventricle &#x0D; end-diastolic pressure &#x0D; &#x0D; Recommendations &#x0D; Aggressive medi; No, this patient does not have equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; &#x0D;Additional Clinical Information&#x0D;	2
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Lexiscan sestamibi stress that showed no definite evidence of&#x0D; ischemia. WITH PT HAVING SOB AND CHEST PAIN.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Pt is still experiencing hyperlipidemia, precordial pain, syncope and collapse, dyslipidemia, and hypertensive urgency after a normal TMST	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Pt smokes a pack of cigarettes a day. He is on chantix and has tried to contact the smoking cessation hotline, but has not received a follow up from them yet. The pt had a lexiscan stress test which did not rule out inferior ischemia.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; worsening shortness of breath, chest pain, and dyspnea on exertion. coronary artery disease s/p ptca stent. diabetes, hypertension, tachycardia, dizziness, lower extremity edema, and arteriosclerosis of extremity with rest pain.	1
Cardiology	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		Unknown; This study is being ordered for Vascular Disease. ; 7/2018; There has been treatment or conservative therapy.; fatigue, syncope, absent radio pulses, dizziness, dyspnea, medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient is experiencing precordial chest pain associated with moderate to severe dyspnea. Abnormal EKG. Cardiac murmur. Obesity.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		patient is having chest pain, palpitations; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.; The patient does not have known diabetes	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient is having syncope episodes and needs a cardiac clearance for surgery.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient is post op from ablation & having new chest pain.; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent ) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient is seen today for a routine follow up. She's here for her annual follow up. She had been having daily chest pain and doe for quite some time. Radiates into her back. Not associated with meals. Not necessarily related to activity. She downplays it.; The patient is not diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath.; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress.; The chest pain was NOT relieved by rest (ceasing physical exertion activity) and/or nitroglycerin	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)			17
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		#1 abnormal EKG: He was recent seen in the office for a physical. He was recently diagnosed with diabetes mellitus. His EKG has anterolateral T-wave changes. He had some symptoms of dyspnea and chest discomfort from time to time. The symptoms are rather v; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		#1 angina: She's been experiencing symptoms of dyspnea on exertion over the past month or 2. It's rather profound by the time she gets to the top of the stairs in her house. She has to stop to catch her breath. She reports feeling a tightness or pressure ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		#1 coronary artery disease: He presented with a myocardial infarction about 3 years ago. At that time he underwent multivessel stenting. He's been doing well since his last visit. He's not really had any recurrent angina. He's not experiencing any dyspnea; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		#1 hypertension: Her blood pressures not well controlled this point. She is currently on Norvasc as well as losartan. Her recent echo showed severe concentric left ventricular hypertrophy. There is no evidence of any outflow obstruction to suggest HOCM. I; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		patient is unable to walk on a treadmill due to degenerative disc disease, chronic pain and exercise intolerance, patient has an irregular heart beat, fatigue, exercise intolerance, unable to do daily activities without becoming fatigued.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient reports chest pain on exertion, shortness of breath when walking, and palpitations; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient was seen in clinic for new onset of chest pain along with abnormal electrocardiogram. Patient's chest pain is left-sided and radiates to the jaw and shoulder. Patient also has hypertension.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient was seen in clinic for new onset of chest pain with shortness of breath. Patient also has edema and a fluttering sensation in his chest.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient with a history of Cerebral Ischemia, Tobacco Use, COPD, Idiopathic Gout, PVD, Hyperlipidemia, and Hypertension. Patient complaint is chest pain and shortness of breath on exertion. Patient can NOT walk on a treadmill because he has trouble feeling; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Pertinent history includes: HTN, dyslipidemia, DM; Has recurrent chest pains over last many years. Had some trauma long time back. No relation to exercise. Does have dizziness / lightheadedness esp when he bends and gets up. Did not have syncope. (hyper); The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Pt c/o chest pain unable to walk on treadmill due to previous stroke; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		PT HAD AN ABNORMAL STUDY, HAS, SOB, DIZZINESS AND FATIGUE; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; It is not known if the patient has had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		pt has SOB when walking. tobacco user; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		pt is having palpitations, not relieved by rest, chest pressure, aggravated by exertion, alleviated by rest; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		PT is SP MI with new cardiac symptoms; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		routine surveillance; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		see previous note; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Shortness of breath on exertion; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Shortness Of Breath; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study is being ordered for known CAD.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; It is not known if the patient is diabetic.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	5
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Stable angina: Even though the patient is young, he has risk factors for CAD and the description of the pain corresponds to a classical angina. Plan: Lexiscan MPI, he has chronic back pain and cannot do treadmill stress test. Echocardiogram. Sublingual; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		substernal chest pain&#x0D; &#x0D; HIV&#x0D; &#x0D; h/o DVT; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Suspected CAD, chest pain; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Suspected CAD; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The EKG shows sinus rhythm with inverted T waves in leads III, aVF, V3, V4 and V5. Abnormal EKG, consider inferoapical ischemia.&#x0D; Impression And Plan&#x0D; 1. Atypical chest pain, shortness of breath, abnormal EKG, rule out myocardial ischemia. &#x0D; 2. Hypertens; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		the patient has angina equivalent, cerebral infarction, class 3 diabetes, diabetes mellitus, hyperlipidemia, osa, family history of cardiovascular disease, and tobacco abuse. the patient want to do the mpi because the patient wanted it for the chest pain; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		the patient has Celiac Artery Stenosis: he underwent remote stenting about 10 years ago. He has not had any recurrent abdominal issues since then. He has some SOB and fatigue. They are suspected of retrosternal chest discomfort suspicious for angina; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		the patient has chronic lower back pain and can not walk on a treadmill he also has obesity.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		the patient has coronary artery disease and hyperlipidemia. the hyperlipidemia is a new problem and it is controlled. Had a history of MI, cardiac cath, coronary angioplasty, fracture surgery, rotator cuff repair. the reason for the mpi.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member.; This study is being ordered for cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; The chest pain was NOT relieved by rest (ceasing physical exertion activity) and/or nitroglycerin	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		.chest pain &#x0D; pleasant 55-year-old gentleman has long-standing hypertension, history of a stroke treated at LSU in 2014. patient found to have markedly abnormal EKG consistent with LVH. Patient has been having over the last several months chest discomfort; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	12
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; The chest pain was relieved by rest (ceasing physical exertion activity) and/or nitroglycerin; There is no physical restriction to the member's ability to exercise	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is not diabetic.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	5
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; This is NOT a Medicare member.; The patient is 65 or older.; The patient does NOT have cardiac history with known myocardial infarction and/or cardiac intervention such as cardiac surgery/angioplasty(PCI); This is NOT for a preoperative evaluation of a non cardiac surgery involving general anesthesia; It has been greater than 5 years since cardiac testing has been performed	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; This is NOT a Medicare member.; The patient is 65 or older.; The patient does NOT have cardiac history with known myocardial infarction and/or cardiac intervention such as cardiac surgery/angioplasty(PCI); This is NOT for a preoperative evaluation of a non cardiac surgery involving general anesthesia; It has not been greater than 5 years since cardiac testing has been performed	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for Known Coronary Artery Disease (CAD); The diagnosis was established by a previous cardiac surgery/angioplasty; The patient has not had a stress echocardiogram within the past eight weeks.	9
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The patient is not diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; The chest pain was NOT relieved by rest (ceasing physical exertion activity) and/or nitroglycerin	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The patient is not diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms cannot be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; There is no physical restriction to the member's ability to exercise	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for Suspected Coronary Artery Disease (CAD); The patient has not had a stress echocardiogram within the past eight weeks.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous myocardial infarction.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; It is not known if the patient has had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	10
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	38
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	5
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; The patient has had a stress echocardiogram within the past eight weeks.	3
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent ) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	3
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		1. Chest pain and shortness of breath: The patient has been experiencing episodic symptoms of chest pain and shortness of breath, and the patient recently had an echo in July 2018 that had an EF of 60%. Echo was performed at Arkansas Methodist Medical ; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.; The patient does not have known diabetes	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		1. Chest pain concerning for angina pectoris. Her symptoms are currently stable as they are not increasing in frequency, duration, or intensity. We will get her most recent lab work from Dr. Pennington's office and ensure there is no anemia that could ; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		1. CAD. Most recent cardiac cath November 2017 revealed patent LAD stent with 80-90% small OM stenosis. Medical management was recommended. Denels chest pain. However, noted VT during admission April 2018. Did not keep f/u appt. &#x0D; 2. Paroxysmal atrial fib; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		1. Dyspnea upon exertion and shortness of breath secondary to the acute congestive heart failure exacerbation with unknown baseline ejection fraction. &#x0D; 2. Morbid obesity.&#x0D; 3. Intermittent chest pain.&#x0D; 4. Hypertension.&#x0D; 5. Obesity and symptomatology suggest; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		15 years ago patient had a SVT Ablation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Shortness of breath, substernal chest pain; Medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		43-year-old male with history of coronary disease, hypertension, chest pain, shortness of breath, and nonobstructive coronary disease on heart catheterization in 2004. Latest CT scan of the chest showed an ascending thoracic aortic enlargement in the 3.6; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Abn EKG shows bradycardia non specific ST t changes sinus bradycardia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		angina pectoris, shortness of breath, dyspnea on exertion, tachycardia, dizziness, palpitations, lower extremity edema, hypertension, family history of coronary artery disease, family history of diabetes, obesity. Pt is unable to walk on treadmill due to; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Angina, COPD, HTN, Smoker; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Angina, DOE, Abn-EKG, HTN, Murmur, FM HX, Smoker; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Angina, DOE; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		can attach clinicals; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient is male.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		chest pain radiating down left arm, with shortness of breath, nausea and vomiting brought on by exertion; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.; The patient does not have known diabetes	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		chest pain, SOB, dizziness spells, htn. she reports chest pain that started last night and has not gone away, not worse with exertion. She states the pain radiates to her LUE and jaw occasionally. She has nausea with the pain as well. she has had a card; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Chest pain; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		CP chest pressure radiates to bilateral shoulders SOB elevated blood pressure; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		CURRENT EVERYDAY SMOKER, HAS CP, SOB, TACHYCARDIA. Reflex sympathetic dystrophy of bilateral upper limbs; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; UNKNOWN DATE FIRST HAD CHEST PAIN AND SOB. HAS HAD TACHYCARDIA BY HISTORY; It is not known if there has been any treatment or conservative therapy.; CP and has a history of chronic tachycardia. She has RSD and has significant pain issues. She has been diagnosed with anxiety attacks before as this is what the ER has told her. She also has significant hypertension at times. She also has SOB at times as; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Cynthia A Ulrich is a 60 y.o. female who presents to establish care and problem visit. Pertinent history includes: Hypercholesterolemia under clinical monitoring with her PCP, left carotid stenosis with history of bilateral carotid bruits, history of CVA ; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Encounter for observation, SOB, DOE, HTN, FM HX; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Enter answer here - or Type In Unknown If No Info Given CTA on 9-1-2018 showed 50% proximal LAD.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		essential hypertension&#x0D; Provided high blood pressure: care instructions&#x0D; Provided learning about high blood pressure&#x0D; dyspnea&#x0D; Provided shortness of breath: care instructions&#x0D; fibromyalgia&#x0D; tachycardia&#x0D; angina pectoris&#x0D; Provided angina: care instructions&#x0D; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.; The patient does not have known diabetes	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Ex smoker hyperlipidemia hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		exertional dyspnea&#x0D; hypertension&#x0D; type 2 diabetic&#x0D; nicotine dependence&#x0D; bmi38&#x0D; obstructive sleep apnea; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Known CAD, hyperlipidemia, shortness of breath on exertion; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/24/2018; There has not been any treatment or conservative therapy.; Angina, chest pain, shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		known cad, shoulder pain; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient had a recent non-nuclear stress test.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; The results of the previous nuclear cardiology study were normal.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Last seen in 2014 by Igbokidi for chest pain and palpitations. Here today for the same symptoms. Pertinent history includes: HTN, HLD, COPD and tobacco abuse. Had an episode of CP about 2 months ago while working in Texas. CEs were negative at that time.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Left sided Chest pain&#x0D; &#x0D; Father and grandfather died of MI in their 50's&#x0D; &#x0D; COPD; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not known	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Mr. Hardin is here today for a cardiac eval. He has SOB with exertion. He reports exertional chest pressure, relieved with rest.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; The patient is male.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Mr. Rawls is referred for cardiac evaluation of chest pain. He has a chronic past medical history of hypertension, hyperlipidemia, GERD, and anxiety. He presents to the office today with complaints of chest pain that started in September. he states the; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Ms White returns to clinic today with improved breathing status. She was unable to walk a treadmill at recently scheduled RSE and awaits NST to exclude ischemia, with patent coronaries in the past. ROS is otherwise negative.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Ms. Keeter is referred for cardiac evaluation of chest pain and shortness of breath. She has a chronic past medical history of hyperlipidemia and obesity. She presents to the office today with complaints of deep chest pain behind her left breast that ra; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Ms. Lakesha Hassell is being referred for cardiac evaluation. Patient has a past medical history of Anemia, Asthma, Migraines, and Sickle cell trait. Patient reports over the past 4 years has had palpitations that have worsened over the past year and pati; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Ms. Paschal returns for followup. She states she has been having "weird" chest pain, initially thought gas, for the last 2 weeks, intermittent, not limiting her activity. She has also been having neck pain. Her symptoms sound noncardiac--no further testin; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		New patient referred Dr Parker, chest pain last one month, left precordial, episodes with exertion and at rest, radiating left arm, associated dyspnea, not syncope, episodes a few times a week...smoker...one pack a day, obesity, and hypertension. Patient ; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		No Stress Echos done within 60 mile radius. Angina, Hyperlipidemia, HTN; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		no; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Palpations 11-12-2018; There has been treatment or conservative therapy.; Heart palpitation, heart racing, chest pain.; Heart monitor on patient.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		non-diagnostic, target heart rate was not achieved due to leg fatigue.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		none; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		none; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Palpitations intermittently over last few months. First time he had any symptoms was about 2 yrs ago. He had dizziness and passed out at that time - put it as one time event and did not seek medical attention. Recently over last few months symptoms recur; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Past myocardial bridge, angina, htn; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient came in with chest pain; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for Known Coronary Artery Disease (CAD); The diagnosis was established by a previous stress echocardiogram, Myocardial Perfusion Imaging, or stress EKG; The patient has not had a stress echocardiogram within the past eight weeks.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; This is NOT a Medicare member.; The patient is 65 or older.	19
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is status post angioplasty and stent in 2014. Had a repeat angiography in 2015 and 2016 but no intervention was undertaken. She is having atypical CP, often time when she is at rest. No stress echos done within 60 mile radius.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for A cardiac history with known myocardial infarction and/or cardiac intervention such as cardiac surgery/angioplasty (PCI); It has NOT been greater than 2 years since the surgery/procedure or last cardiac imaging.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	113

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient cannot walk on a treadmill because of pain in the legs.; Chest pain - Patient has been complaint of typical symptoms. Risk factors include smoking, strong family history of premature CAD, hyperlipidemia. We will get nuclear stress test (Patient c); The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.; The patient does not have known diabetes	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		patient has chest pain; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; The patient has had a stress echocardiogram within the past eight weeks.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		patient is a former smoker with a history of stroke. having chest pain that is on and off for the last few weeks no relieving factors and her Chads VASC score of four. history of atrial fib; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient is experiencing episodes of precordial chest pain associated with moderate to severe dyspnea. Abnormal EKG. Hypertension. Left ventricular systolic function in lower limits with EF of 50%. Cardiac valve disease.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient is experiencing palpitations, precordial chest pain associated with dyspnea and dyspnea on exertion. Abnormal EKG. Holter monitor has been ordered.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient is experiencing precordial chest pain associated with moderate dyspnea on exertion. Abnormal EKG resulting in right bundle branch block. Cardiac murmur. Hypertension.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient is having increasing chest pain over the last 2 months, patient states " pain feels like it did when I had my heart attack " pain radiates up into neck and down left arm, occurs with exertion, patient has history of coronary artery disease and ste; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		patient with dyspnea on mild exertion concerning for angina equivalent; abnormal EKG; history of two recent spinal surgeries with continue back pain so unable to walk a treadmill; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		patient with intermittent chest pain; patient attributes to stress; also dyspnea on exertion; dizziness; patient can not walk TM due to recent ankle surgery; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Plan&#x0D; 1. CM EF 40-45% per Echo . NP teaching plan initiated. Booklet "Success with HF" provided. CHF Clinic; goals; anticipated appointment schedule; causes HF; treatment plan: daily wts; fluid/salt restrictions; activity; labs; medications-use/effect/si; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		post ER visit as new mbr very short of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Pt has been treated for hypertensive nonobstructive cardiomyopathy. since 1/2015. Increasing shortness of breath started about 10/01/2018 He is on maximum medical management.; This study is being ordered for Vascular Disease.; Pt has been treated for hypertensive nonobstructive cardiomyopathy. since 1/2015. Increasing shortness of breath started about 10/01/2018 He is on maximum medical management.; There has been treatment or conservative therapy.; Pt has been treated for hypertensive nonobstructive cardiomyopathy. since 1/2015. Increasing shortness of breath started about 10/01/2018 He is on maximum medical management.; meds maximized. Anticoagulation: Coumadin&#x0D; Dr. Following INR's: Cardiology&#x0D; Clinical Pathway Rhythm Control&#x0D; Doctor following anticoagulation Lab: Dr. Riley&#x0D; Previous Cardioversion attempt: Yes; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		pt having angina and sob with activity for the past few months. pt had an echo at the cancer center and had a decreased EF around 50%; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Pt here for initial cardiology consultation for abnormal ecg. She was seeing Dr. Mitchell for routine followup and her ecg is abnormal. She has a family history of cabg which was her paternal grandmother. She has a history of degenerative joint disease an; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		pt is experiencing fatigue, shortness of breath on exertion, chest pain, lightheadedness; pt had a CTA that confirms stenosis; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for Known Coronary Artery Disease (CAD); The diagnosis was established by something other than listed; The patient has not had a stress echocardiogram within the past eight weeks.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Pt is here to re-establish care after not being seen since 3/2016. She says she has noted palpitations intermittently for the past 1.5 years, There is associated SOB, no chest pain. She is seeing Dr Wilson to have a ventral hernia repair.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		pt is obese, cannot walk a treadmill and has asthma; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; This is NOT a Medicare member.; The patient is less than 45 years old.; The patient does not have known diabetes	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		PT UNABLE TO TOLERATE TREADMILL STRESS R/T KNEE PROBLEMS, PREVIOUS SURGERY, AND HX OF DVT'S.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Recently evaluated for chest pain and fatigue. RSE nondiagnostic due to inability to reach target HR. He was only able to walk 3 minutes due to feeling extremely tired. He continues to have intermittent chest pain along with DOE and fatigue. I'll order NS; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Results &#x0D; &#x0D; Symptoms &#x0D; The patient exhibited hypertension during the drug infusion. &#x0D; &#x0D; Conclusions &#x0D; &#x0D; Summary &#x0D; The left atrium is mildly dilated. &#x0D; The left ventricular wall motion is normal. &#x0D; The Ejection Fraction estimate is 60-65% . &#x0D; Th; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Right sided chest pain, burning, tightness, and dyspnea with exertion&#x0D;&#x0D; hyperlipidemia&#x0D; &#x0D; hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		shortness of breath, chest pain, dizziness, numbness, coronary artery disease; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Sick sinus syndrome - &#x0D; Cerebrovascular accident - &#x0D; Cardiac pacemaker in situ &#x0D; Severity: symptoms are worsening; chest discomfort with household activities/yard work&#x0D; Associated Symptoms: left arm pain with exertion; under stress&#x0D; Hypertension History; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for A cardiac history with known myocardial infarction and/or cardiac intervention such as cardiac surgery/angioplasty (PCI); It has NOT been greater than 2 years since the surgery/procedure or last cardiac imaging.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Started having bilateral edema in feet a month ago. A couple of weeks ago she reports chest pressure/elevated heart rate (120s)/breathlessness/pedal edema, at work. This lasted 3 days before resolve. She works as a cashier and does not do any "physical" a; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Summary &#x0D; Technical quality is adequate &#x0D; LA is mildly dilated &#x0D; LV is normal in size and systolic function &#x0D; LVEF is 55-60% &#x0D; No regional wall motion abnormalities seen &#x0D; Mild diastolic dysfunction &#x0D; Grossly normal valve structure and function &#x0D; ; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient has not had a recent stress echocardiogram.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This is for a preoperative evaluation of a non cardiac surgery involving general anesthesia; This study is being ordered for Pre-operative Evaluation; The patient has not had a stress echocardiogram within the past eight weeks.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		the patient has oa and cant walk on a treadmill and obesity.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		the patient has obesity and the other reason is our doctor wants to do an MPI because of anemia and gerd, and sob. dyspnea on exertion.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		the patient has type 2 diabetes, htn, sob; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; It is unknown if the chest pain was relieved by rest (ceasing physical exertion activity) and/or nitroglycerin	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	22
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		the patient is having chest pain, dizziness, and high blood pressure; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; This is NOT a Medicare member.; The patient is 65 or older.; The patient does NOT have cardiac history with known myocardial infarction and/or cardiac intervention such as cardiac surgery/angioplasty(PCI); This is NOT for a preoperative evaluation of a non cardiac surgery involving general anesthesia; It is unknown if it has been greater than 5 years since cardiac testing has been performed	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for Known Coronary Artery Disease (CAD); The diagnosis was established by a previous myocardial infarction; The patient has not had a stress echocardiogram within the past eight weeks.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for Suspected Coronary Artery Disease (CAD); The patient has not had a stress echocardiogram within the past eight weeks.	62
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient does not have diabetes.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is 65 or older.	3
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		the patient unable to walk on a treadmill due to foot pain. in our office with an abnormal carotid US from Dr. Johnston's office. Not currently on ASA. Patient states she has been experiencing chest pressure/dyspnea with minimal exertion.; The patient is not diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; The chest pain was NOT relieved by rest (ceasing physical exertion activity) and/or nitroglycerin	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	3
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient is female.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	2

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous myocardial infarction.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	11
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient has congestive heart failure.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration.;" The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration.;" The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.; The patient is female.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	5
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	147
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	13
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	14
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	7
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration.;" The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration.;" The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; The patient is female.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This 32 year old male presents for bradycardia and hypertension.&#x0D; Mr Davidson is a 32 year old male here today as a new patient. History of traumatic brain injury in Sept 2017, hypertension, and GERD. He was referred here for bradycardia. Complains today ; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	3

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	6
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is requested for known or suspected cardiac septal defect.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is requested for known or suspected valve disorders.	9
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member.; This is for a preoperative evaluation of a non cardiac surgery involving general anesthesia; This study is being ordered for Preoperative evaluation of a non cardiac surgery involving general anesthesia	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; The chest pain was relieved by rest (ceasing physical exertion activity) and/or nitroglycerin; There is a physical restriction to the member's ability to exercise	11
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms cannot be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; There is a physical restriction to the member's ability to exercise	11
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.; The patient has known diabetes	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for Post MI (Myocardial Infarction) Evaluation; It has been greater than 2 years since the surgery/procedure or last cardiac imaging.; The patient has not had a stress echocardiogram within the past eight weeks.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; The patient is female.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Type 2 diabetes mellitus without complications; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		unknown; It is not known if the patient is diabetic.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		unknown; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		unknown; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.; The patient does not have known diabetes	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		UNKNOWN; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Unknown; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for None of the above	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		unknown; This study is being ordered as a pre-operative evaluation.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/4/18; There has not been any treatment or conservative therapy.; shortness of breath, hypertension, coronary artery disease; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		worsening angina, SOB; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78472 Cardiac blood pool imaging, gated equilibrium; planar, single study at rest or stress (exercise and/or pharmacologic), wall motion study plus ejection fraction, with or without additional quantitative processing		This is a request for a MUGA scan.; This study is being ordered for Known Cardiomyopathy/ Myocarditis.; There are not EKG findings consistent with cardiomyopathy or myocarditis.; There are stress echocardiogram findings consistent with cardiomyopathy or myocarditis.; Mr Easter is here today for echo results. He denies any cp or SOB. He does have life vest on today. He denies any shocks from device. He states that his bp went down after increasing carvedilol and he thought it was too low so he started back smoking.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 3 months or less since the last echocardiogram.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		Follow up from last Echo. Possible dfib. 20-25%; This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		none; This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease.	1

Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		patient with afib, abnormal ekg, syncope and cp; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This request is NOT for initial evaluation of a murmur.; This is NOT a request for follow up of a known murmur.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has abnormal heart sounds	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		patient with cad, abnormal ekg, cp and sob; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		patient with shortness of breath and abnormal ekg; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This study is being ordered for another reason; The reason for ordering this study is unknown.; This is an initial evaluation of suspected valve disease. This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has high blood pressure	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected left ventricular disease.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; It is unknown if this study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	11
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	2

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had previous cardiac surgery or angioplasty.; There are new symptoms or changing EKG findings.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	42
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	18
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of heart failure.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected Congestive Heart Failure.	4
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This request is NOT for initial evaluation of a murmur.; This is NOT a request for follow up of a known murmur.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has abnormal heart sounds	2
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Mass.; This is for the initial evaluation of a cardiac mass.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has NOT been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.	1

Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is NOT a request for follow up of a known murmur.	2
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	7
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.	10
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; The patient is female.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		this is a 58-year-old gentleman with history of hypertension, family history of coronary artery disease, and smoking which he quit two months ago. He presents to the Cardiology Clinic with a two-month history of chest pain. It is left-sided chest pain rad; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	23
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.; This is NOT a Medicare member.; The patient is 65 or older.	10
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for congestive heart failure.; The member does not have known or suspected coronary artery disease	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for evaluation of the heart prior to non cardiac surgery.	5

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member.; This study is being ordered for A cardiac history with known myocardial infarction and/or cardiac intervention such as cardiac surgery/angioplasty (PCI); It has been greater than 2 years since the surgery/procedure or last cardiac imaging.	14
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; It is unknown if the symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; There is a physical restriction to the member's ability to exercise	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This study is being ordered as a pre-operative evaluation.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; This patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This study is being ordered as a pre-operative evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	5
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; This patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	2
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual re-evaluation of artificial heart valves.; It has been at least 12 months since the last echocardiogram was performed.	2
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 12 - 23 months or more since the last echocardiogram.	8
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 24 months or more since the last echocardiogram.	4
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.	26
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of artificial heart valves.	3
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; It is unknown if there been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	25

Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.	47
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease.	11
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	24
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	3
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; This patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		unknown.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		unknown; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is NOT a change in the patient's cardiac symptoms.; It has NOT been at least 24 months since the last echocardiogram was performed.	2
Cardiology	Approval	93312 Echocardiography, transesophageal, real-time with image documentation (2D) (with or without M-mode recording); including probe placement, image acquisition, interpretation and report		; This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is NOT for suspected acute aortic pathology, pre-op of mitral valve regurgitation, infective endocarditis, left atrial thrombus, radiofrequency ablation procedure, fever with intracardiac device or completed NON diagnostic TTE.; The patient is 18 years of age or older.	1
Cardiology	Approval	93312 Echocardiography, transesophageal, real-time with image documentation (2D) (with or without M-mode recording); including probe placement, image acquisition, interpretation and report		completed transthoracic echocardiogram; This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is NOT for suspected acute aortic pathology, pre-op of mitral valve regurgitation, infective endocarditis, left atrial thrombus, radiofrequency ablation procedure, fever with intracardiac device or completed NON diagnostic TTE.; The patient is 18 years of age or older.	1

Cardiology	Approval	93312 Echocardiography, transesophageal, real-time with image documentation (2D) (with or without M-mode recording); including probe placement, image acquisition, interpretation and report		Maria presents for follow-up, she is doing well no angina PND orthopnea or syncope she is tolerating Eliquis no current side effects. She is going to be seeing Dr.E.L Shaefi for consideration of watchman device. As you recall she has a history of intrac; This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is NOT for suspected acute aortic pathology, pre-op of mitral valve regurgitation, infective endocarditis, left atrial thrombus, radiofrequency ablation procedure, fever with intracardiac device or completed NON diagnostic TTE.; The patient is 18 years of age or older.	1
Cardiology	Approval	93312 Echocardiography, transesophageal, real-time with image documentation (2D) (with or without M-mode recording); including probe placement, image acquisition, interpretation and report		This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested after a completed NON diagnostic transthoracic echocardiogram.; The patient is 18 years of age or older.	2
Cardiology	Approval	93312 Echocardiography, transesophageal, real-time with image documentation (2D) (with or without M-mode recording); including probe placement, image acquisition, interpretation and report		This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for diagnosis and management of infective endocarditis.; The patient is 18 years of age or older.	1
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This is a request for a Stress Echocardiogram.; This patient has not had a Nuclear Cardiac study within the past 8 weeks.; This study is being ordered for known Coronary Artery Disease.; This patient had a previous myocardial infarction.	1
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This is an evaluation prior to major surgery involving general anesthesia.; The patient has known CAD.; This is a request for a Stress Echocardiogram.; This patient has not had a Nuclear Cardiac study within the past 8 weeks.; This study is being ordered for Pre-operative (Cardiac Surgery, Angioplasty or stent) Evaluation; This patient had a previous cardiac surgery or angioplasty.	1
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MP), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	3
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; It is not known if the member has known or suspected coronary artery disease.	4
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MP), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	5
Cardiology	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	Patient with a complaint of headache for one month. Patient work involves computer usage.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Cardiology	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; Known or suspected TIA (stroke) with documented new or changing neurologic signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.	1
Cardiology	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; The patient has a new onset of a headache within the past month; Headache best describes the reason that I have requested this test.	1
Cardiology	Disapproval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	c/s pt does have hx of corroded artery stenosis, want to further evaluate with cta of head and neck, pt has been on medical mgmntm has remained stable until recent episodes of passing out and dizziness.; This study is being ordered for Vascular Disease.; c/s 05/2018; There has been treatment or conservative therapy.; c/s pt is having dizziness, she has passed out; pt on beta blockers, pt is taking 2 anti coagulants, pt is also on blood pressure meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	70544 Magnetic resonance angiography, head; without contrast material(s)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		unknown; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Unknown; The patient is not diabetic.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		unknown; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	5
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		unknown; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Unknown; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	7
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; The patient has had a stress echocardiogram within the past eight weeks.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		will attach clinicals.; The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Will FAX; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		will upload clinicals.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Approval	78459 Myocardial imaging, positron emission tomography (PET), metabolic evaluation		Unknown; This is a request for a Cardiac-imaging PET scan.; It is not known if this study is being ordered to identify a myocardial perfusion defect.	1
Cardiology	Approval	78472 Cardiac blood pool imaging, gated equilibrium; planar, single study at rest or stress (exercise and/or pharmacologic), wall motion study plus ejection fraction, with or without additional quantitative processing		This is a request for a MUGA scan.; This study is being ordered for Congestive Heart Failure.; The patient has not recently been diagnosed with and/or treated for congestive heart failure.; The patient is presenting new cardiac signs or symptoms.; The patient has not had a recent MI.; There are documented clinical findings consistent with a valve disease.;	1

Cardiology	Approval	78472 Cardiac blood pool imaging, gated equilibrium; planar, single study at rest or stress (exercise and/or pharmacologic), wall motion study plus ejection fraction, with or without additional quantitative processing		This is a request for a MUGA scan.; This study is being ordered for Congestive Heart Failure.; The patient has recently been diagnosed with and/or treated for congestive heart failure.; The patient has not had a previous MUGA scan.; The patient is not presenting any new cardiac signs or symptoms.; Study ordered to for cardiac clearance for noncardiac surgery.	1
Cardiology	Approval	78472 Cardiac blood pool imaging, gated equilibrium; planar, single study at rest or stress (exercise and/or pharmacologic), wall motion study plus ejection fraction, with or without additional quantitative processing		This is a request for a MUGA scan.; This study is being ordered for Known Cardiomyopathy/ Myocarditis.; There are not EKG findings consistent with cardiomyopathy or myocarditis.; There are no stress echocardiogram findings consistent with cardiomyopathy or myocarditis.; There are not abnormal laboratory findings consistent with cardiomyopathy or myocarditis.;	1
Cardiology	Approval	78472 Cardiac blood pool imaging, gated equilibrium; planar, single study at rest or stress (exercise and/or pharmacologic), wall motion study plus ejection fraction, with or without additional quantitative processing		This is a request for a MUGA scan.; This study is being ordered for Suspected Cardiomyopathy/ Myocarditis.; The patient has recently been diagnosed with and/or treated for congestive heart failure.; The patient has not had a previous MUGA scan.; The patient is presenting new cardiac signs or symptoms.; The patient has not had a recent MI.; There are not documented clinical findings consistent with a valve disease.; There are documented clinical findings consistent with hypertension.; LV function abnormal EF 30-35%, which dropped from 45% on prior&#x0D; echo report	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason.; The reason for ordering this study is unknown.	2
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	6
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Family history of cardiac disorder in father; There has not been any treatment or conservative therapy.; Family history of cardiac disorder in father; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		none; This study is being ordered for Vascular Disease.; unknown; There has not been any treatment or conservative therapy.; CP shortness of breath, fatigue, Dizzy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		patient with CAD and shortness of breath; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason.; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		patient with chest pain, shortness of breath, syncope and abnormal ekg; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason.; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		Pt has been treated for hypertensive nonobstructive cardiomyopathy. since 1/2015. Increasing shortness of breath started about 10/01/2018 He is on maximum medical management.; This study is being ordered for Vascular Disease.; Pt has been treated for hypertensive nonobstructive cardiomyopathy. since 1/2015. Increasing shortness of breath started about 10/01/2018 He is on maximum medical management.; There has been treatment or conservative therapy.; Pt has been treated for hypertensive nonobstructive cardiomyopathy. since 1/2015. Increasing shortness of breath started about 10/01/2018 He is on maximum medical management.; meds maximized. Anticoagulation: Coumadin&#x0D; Dr. Following INR's: Cardiology&#x0D; Clinical Pathway Rhythm Control&#x0D; Doctor following anticoagulation Lab: Dr. Riley&#x0D; Previous Cardioversion attempt: Yes; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Abnormal finding on examination of the chest, chest wall and/or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	2
Cardiology	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; It is not known whether there is a known or suspected coarctation of the aorta.; It is not known if there is another type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	check up of ascending aortic aneurysm requested every 2 years. Last check was January 2016. This is f/u CTA to check for progression.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are no signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	suspected coronary anomaly pain worse when exercising pain radiating to chest into neck. episodes of syncope are worsening during exercise as well. pain is typical neuro cardio genic syncope.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; It is not known if there is another type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	; There are no documented clinical findings of immune system suppression.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; None of the options listed is the reason for the study.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is not experiencing cervical neck pain not improving despite treatment.	1
Cardiology	Disapproval	72128 Computed tomography, thoracic spine; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 2018; There has not been any treatment or conservative therapy.; NUMBNESS, TINGLING, WEAKNESS, L SHOULDER AND NECK PAIN; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; None of the above.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Cardiology	Disapproval	73706 Computed tomographic angiography, lower extremity, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Disapproval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material	Radiology Services Denied Not Medically Necessary	Ms Thornton is here today stating that she had a bad experience in 2016 at Arkansas Heart Hospital when she was admitted and had stent placement. She states that after stent placement she had to get up to use the restroom and the nurse took her to the res; This study is being ordered for trauma or injury.; 06/2016; There has been treatment or conservative therapy.; ; physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Cardiology	Disapproval	74175 Computed tomographic angiography, abdomen, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Checking status of aortic repair and for further aneurysm; This study is being ordered for Vascular Disease.; 2015; There has been treatment or conservative therapy.; Unknown; Aortic repair 2015; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	74175 Computed tomographic angiography, abdomen, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	CHEST PAIN, SHORTNESS OF BREATH, LUPUS, PALPITATIONS, BROTHER AND FATHER HAVE HAD AORTIC ANEURYSMS.; This study is being ordered for Vascular Disease.; 09/03/2018; There has been treatment or conservative therapy.; CHEST PAIN AND SHORTNESS OF BREATH; MEDICATION; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	Not reporting claudication. Resting ABIs within clinically acceptable range. Post exercise results technically limited due to CNO vessels on the right. I suspect her edema affected testing. No wounds or signs of ischemia on exam. Appears stable from an ar; This is a request for an abdomen-pelvis CT combination.; The reason for the study is vascular disease.; There is known or suspicion of an abdominal aortic aneurysm.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Cardiology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
Cardiology	Disapproval	75557 Cardiac magnetic resonance imaging for morphology and function without contrast material;	Radiology Services Denied Not Medically Necessary	This is a request for a heart or cardiac MRI	1
Cardiology	Disapproval	75571 Computed tomography, heart, without contrast material, with quantitative evaluation of coronary calcium	Radiology Services Denied Not Medically Necessary	; This is a request for a CT scan for evaluation of coronary calcification.	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	; This is a request for CTA Coronary Arteries.; The patient has had Myocardial Perfusion Imaging including SPECT (single photon Emission Computerized Tomography) or Thallium Scan.; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Pt here for followup afib on amiodarone therapy. He is having more chest pain. He denies any syncope. He is on coumadin therapy for stroke prophylaxis according to ACC/AHA/HRS guidelines. He comes in today for routine followup.; Yes, there is Chronic Chest Pain.	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.; Stress Echo on 10/15/18 with equivocal results. Abnormal Calcium score in the past.&#x0D; &#x0D; Strong family history of ischemic heart disease, sister had recent heart attack.&#x0D; &#x0D; HTN, DM, Hyperlipidemia	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and asymptomatic (no significant symptoms); &lt;Additional Clinical Information&gt;	1

Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months; This study is being ordered for suspected Coronary Artery Disease (CAD) and asymptomatic (no significant symptoms)?; 1. Frequent PACs and PVCs. He is noted to have mild dilatation of all cardiac chambers. The LV systolic function is normal. There is no significant valvular disease. We will check a TSH, CMP, and magnesium. We will also schedule for a stress echocar	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months; This study is being ordered for suspected Coronary Artery Disease (CAD) and asymptomatic (no significant symptoms)?; family history of CAD, Hypercholesterolemia, EKG showed sinus bradycardia,	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; &tAdditional Clinical Information&t;	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; patient had positive stress test on 12/5/2018	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Pt has known CAD with new onset of chest pain he has had CABG in the past. He has hypertension and several medical issues. Pt does not want to have a heart cath unless he absolutely has too. Pt has had issues in the past where sedation makes him ill and h	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for Vascular Disease.; Unknown; There has not been any treatment or conservative therapy.; chest pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		the patient has sob and it is exertional. electrocardiogram shows minor nonspecific T wave flattening. Pt denies any other sx's at this time. Moderate lasting for a few minutes after exercise and gets better with rest. Also has morbid obesity. patient als; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	12
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.	2
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has high blood pressure	2

Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has shortness of breath; Known or suspected left ventricular disease.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has high blood pressure	4
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease., 09/04/2018; There has not been any treatment or conservative therapy.; ANGINA, HYPERTENSION, CHF; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease., 9/21/2018; There has not been any treatment or conservative therapy.; Chest pain, palpitations.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	. Chest pain and dyspnea for 4-6 weeks.ECG shows LBBB&#x0D; .# Left bundle branch block (I44.7):&#x0D; # Obesity (E66.9):&#x0D; # Bradycardia (R00.1):&#x0D; # Shortness of breath (R06.00):&#x0D; # Syncope (R55):&#x0D; # Hyperlipidemia (E78.5):&#x0D; # Hypertension (I10):&#x0D; # Angina ; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; The patient is not diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; It is unknown if the chest pain was relieved by rest (ceasing physical exertion activity) and/or nitroglycerin	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; HPI: This is a MERCY CLINIC RADIOLOGY ROGERS evaluation of Nancie G Carter is a 55 y.o. female who is a known case of chest pain The chest pain is substernal with duration varying from seconds to minutes which is heavy in nature and sometimes is burning ; There has not been any treatment or conservative therapy.; CHEST Pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; Pt has had a long history of CAD has stents in RAC and LAD has MVR and AVR. Pt is very high risk.; There has been treatment or conservative therapy.; Chest pain with shortness of breath. MVP and AVP; Pt has CAD with stents in RCA and LAD. MVP and AVR extensive history of cardiac disease.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	hx of MI; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	hypertension&#x0D; obesity&#x0D; OSA with Cpap&#x0D; Left arm discomfort with exertion&#x0D; hyperlipidemia; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	intermittent episodes of chest pain, worsening; dyspnea on exertion; patient is needing knee surgery and can not walk a treadmill; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Mother and Father had hear disease/issues. Patient has an abnormal EKG.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Myron D Brown Sr. is a 59 y.o. Caucasian male who presents for a routine annual follow up. He is a patient of Dr Igbokidi in our clinic. Pertinent history includes: CAD s/p CABG 3/17/17 per Dr. Howe, and Hyperlipidemia. Other past medical history is noted; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	None; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is less than 20	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Patient with recent onset of shortness of breath on exertion and elevated blood pressure. Patient has a history of liver transplant for alcoholic liver cirrhosis and hepatocellular carcinoma and now on immunosuppression. Patient also has diagnosis of hy; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	pt has Type 2 diabetes mellitus without complications.&#x0D; &#x0D; Pt has shortness of breath suggestive heart failure and hypertension&#x0D; &#x0D; Pt has dizziness and giddiness. &#x0D; &#x0D; Pt has malaise and fatigue; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	the patient has retrosternal chest discomfort suspicious for angina; he has multiple risk factories for cad including a strong family history. Syncope has had recurrent episodes over the past year, the most recent about a month ago. he also gets loss of c; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This 42 year old male presents for Chest Pain, Bradycardia and Raynaud's Disease. Enos Krupnow is a 42 year old male who presents to the clinic to establish care. Patient has c/o chest pain, weakness, bradycardia. Patient also reports that he has been re; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	2
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; It is not known if the member has known or suspected coronary artery disease.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; This is not for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.	4
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has NOT been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is an initial evaluation of suspected valve disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected valve disease.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.	4
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected pulmonary hypertension	2
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	14
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is requested for evaluation of the heart prior to non cardiac surgery.	3

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected cardiac septal defect.	2
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested to evaluate a suspected cardiac mass.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; The chest pain was relieved by rest (ceasing physical exertion activity) and/or nitroglycerin; There is a physical restriction to the member's ability to exercise	3
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Unknown - will fax in clinicals; It is not known if the patient is diabetic.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	unknown; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/08/2016; There has not been any treatment or conservative therapy.; Chest pain and shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for Vascular Disease.; Unknown; There has not been any treatment or conservative therapy.; chest pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/04/2018; There has not been any treatment or conservative therapy.; ANGINA, HYPERTENSION, CHF; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/21/2018; There has not been any treatment or conservative therapy.; Chest pain, palpitations.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	CURRENT EVERYDAY SMOKER, HAS CP, SOB, TACHYCARDIA. Reflex sympathetic dystrophy of bilateral upper limbs; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; UNKNOWN DATE FIRST HAD CHEST PAIN AND SOB. HAS HAD TACHYCARDIA BY HISTORY; It is not known if there has been any treatment or conservative therapy.; CP and has a history of chronic tachycardia. She has RSD and has significant pain issues. She has been diagnosed with anxiety attacks before as this is what the ER has told her. She also has significant hypertension at times. She also has SOB at times ass; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	Known CAD, hyperlipidemia, shortness of breath on exertion; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/24/2018; There has not been any treatment or conservative therapy.; Angina, chest pain, shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	left bundle branch block; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/6/2018; There has been treatment or conservative therapy.; CAD, chest pains, left bundle block; patient went to the ER, CAD; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	mitral valve replacement. Abnormal EKG.; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is an annual review of known valve disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; It has been 24 months or more since the last echocardiogram.; Known or suspected valve disease.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; It is unknown if this study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; It is unknown what type of cardiac valve conditions apply to this patient.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.	1

Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease.	4
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	7
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/08/2016; There has not been any treatment or conservative therapy.; Chest pain and shortness of breath; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;	Radiology Services Denied Not Medically Necessary	patient with chest pain, abnormal ekg, shortness of breath and htn; This is a request for a Stress Echocardiogram.; This patient has not had a Nuclear Cardiac study within the past 8 weeks.; This study is not being ordered for: CAD, post MI evaluation, or as a pre/post operative evaluation.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is NOT for prolapsed mitral valve, suspected valve disease, new or changing symptoms of valve disease, annual review of known valve disease, initial evaluation of artificial heart valves or annual re-eval of artificial heart valves.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected valve disease.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has abnormal heart sounds	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.	15
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; This is for the initial evaluation of a pericardial disease.	2
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Embolism.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.	2
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is NOT grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	20
Cardiology	Disapproval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;	Radiology Services Denied Not Medically Necessary	patient with chest pain, shortness of breath, syncope and abnormal ekg; This is a request for a Stress Echocardiogram.; This patient has not had a Nuclear Cardiac study within the past 8 weeks.; This study is not being ordered for: CAD, post MI evaluation, or as a pre/post operative evaluation.	1

Cardiology	Disapproval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;	Radiology Services Denied Not Medically Necessary	patient with palpitations, abnormal ekg and shortness of breath; This is a request for a Stress Echocardiogram.; This patient has not had a Nuclear Cardiac study within the past 8 weeks.; This study is not being ordered for: CAD, post MI evaluation, or as a pre/post operative evaluation.	1
Cardiology	Disapproval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;	Radiology Services Denied Not Medically Necessary	This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease	4
Chiropractic Medicine	Approval	70547 Magnetic resonance angiography, neck; without contrast material(s)		The patient has had a recent MRI or CT for these symptoms.; This is a request for a Neck MR Angiography.	1
Chiropractic Medicine	Approval	70547 Magnetic resonance angiography, neck; without contrast material(s)		The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This is a request for a Neck MR Angiography.	1
Chiropractic Medicine	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		unknown; This study is being ordered for trauma or injury.; 10/2018; It is not known if there has been any treatment or conservative therapy.; Pt suffers with short term memory loss and pain in neck.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Chiropractic Medicine	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	4
Chiropractic Medicine	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Neurological deficits; symptoms rt sided neck pain and now left sided pain; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Chiropractic Medicine	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	2
Chiropractic Medicine	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	3
Chiropractic Medicine	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; BACK PAIN, SPINAL STENOSIS; CHIRO CARE, MEDICATION; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Chiropractic Medicine	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	3
Chiropractic Medicine	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of asymmetric reflexes.	1
Chiropractic Medicine	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		Thoracic study: moderate scoliosis with radiating thoracic pain. Has not improved under therapy since 3/22/2018. &#x0D; &#x0D; Lumbar study: lumbar spine pain radiating into legs which feel painful and "won't quit moving" when the patient sits. No substantial impro; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Chiropractic Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
Chiropractic Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/30/2018; There has been treatment or conservative therapy.; pain; chiro. home exercise , blood work , meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Chiropractic Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; BACK PAIN, SPINAL STENOSIS; CHIRO CARE, MEDICATION; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Chiropractic Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	1
Chiropractic Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	2
Chiropractic Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Thoracic study: moderate scoliosis with radiating thoracic pain. Has not improved under therapy since 3/22/2018. &#x0D; &#x0D; Lumbar study: lumbar spine pain radiating into legs which feel painful and "won't quit moving" when the patient sits. No substantial impro; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Chiropractic Medicine	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/30/2018; There has been treatment or conservative therapy.; pain, chiro .home exercise ,blood work , meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Chiropractic Medicine	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?	1
Chiropractic Medicine	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s) and further sequences		This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.;" There is a suspected tarsal coalition.	1
Chiropractic Medicine	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot.;" There is a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
Chiropractic Medicine	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury	1
Chiropractic Medicine	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion	1
Chiropractic Medicine	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for trauma or injury.; 10/2018; It is not known if there has been any treatment or conservative therapy.; Pt suffers with short term memory loss and pain in neck.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Chiropractic Medicine	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Colon & Rectal Surgery	Approval	71250 Computed tomography, thorax; without contrast material		; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Colon & Rectal Surgery	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Lumbar and Right hip - Increased pain.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Colon & Rectal Surgery	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		A MASS WAS SEEN BY CT & THIS IS GOING TO BE USED FOR PRE-OP; This is a request for a Pelvis MRI.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; An abnormality was found in something other than the bladder, uterus or ovary.; The study is being ordered for suspicion of tumor, mass, neoplasm, or metastatic disease.	1

Colon & Rectal Surgery	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI; This study is being ordered in conjunction with a pelvic MRI; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.	1
Colon & Rectal Surgery	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Colon & Rectal Surgery	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Colon & Rectal Surgery	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
Colon & Rectal Surgery	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
Colon & Rectal Surgery	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Soft Tissue Sarcoma, Pancreatic or Testicular Cancer.; 1 PET Scans has already been performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
Colon & Rectal Surgery	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Doctors and Rehabilitation	Approval	72125 Computed tomography, cervical spine; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Approval	72125 Computed tomography, cervical spine; without contrast material		The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.	1
Doctors and Rehabilitation	Approval	72125 Computed tomography, cervical spine; without contrast material		This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT	1
Doctors and Rehabilitation	Approval	72128 Computed tomography, thoracic spine; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine CT.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; The patient is experiencing or presenting lower extremity weakness.; Yes this is a request for a Diagnostic CT	1
Doctors and Rehabilitation	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.; Yes this is a request for a Diagnostic CT	1
Doctors and Rehabilitation	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.; Yes this is a request for a Diagnostic CT	1
Doctors and Rehabilitation	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT	2
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; It is unknown what type of cardiac valve conditions apply to this patient.	1

Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.	4
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.	93
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is NOT for prolapsed mitral valve, suspected valve disease, new or changing symptoms of valve disease, annual review of known valve disease, initial evaluation of artificial heart valves or annual re-eval of artificial heart valves.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for initial diagnosis of congenital heart disease.	3
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for a routine follow up of congenital heart disease.; It has been at least 24 months since the last echocardiogram was performed.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for a routine follow up of congenital heart disease.; It is unknown if there been a change in clinical status since the last echocardiogram.; It has NOT been at least 24 months since the last echocardiogram was performed.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for a routine follow up of congenital heart disease.; There has NOT been a change in clinical status since the last echocardiogram.; It has NOT been at least 24 months since the last echocardiogram was performed.	1
Doctors and Rehabilitation	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Doctors and Rehabilitation	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	2
Doctors and Rehabilitation	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Doctors and Rehabilitation	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2

Doctors and Rehabilitation	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	3
Doctors and Rehabilitation	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Patient reports weakness and falls; Neurologic: no memory problems, no weakness, no numbness, unsteady gait, falls while walking ; Cervical Spine; Inspection: alignment normal; Bony Palpation: no tenderness of bilateral cervical facet joints", no tendern	1
Doctors and Rehabilitation	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.;	1
Doctors and Rehabilitation	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; History of a tibial plateau fracture and subsequently developed complex regional pain syndrome after ORIF. For presurgical planning in preparation for spinal cord stimulation I would recommend advanced imaging of the thoracic spine with MRI to ensure safe	1
Doctors and Rehabilitation	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; Several months neck and mid back pain.	1
Doctors and Rehabilitation	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
Doctors and Rehabilitation	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1
Doctors and Rehabilitation	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to Neurological deficits.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	2
Doctors and Rehabilitation	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Given the severity of her spondylolisthesis I think she may benefit from surgical intervention so in the setting of her history of trauma and for preoperative planning I would recommend advanced imaging of the lumbar spine with an MRI to evaluate for neur; This study is being ordered for Inflammatory/ Infectious Disease.; Eight year ago; There has been treatment or conservative therapy.; Lumbar pain with radiation down right lower extremity; Physical therapy, HEP, NSAIDs, muscle relaxants; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1
Doctors and Rehabilitation	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	109
Doctors and Rehabilitation	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.	1

Doctors and Rehabilitation	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	2
Doctors and Rehabilitation	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
Doctors and Rehabilitation	Approval	73700 Computed tomography, lower extremity; without contrast material		This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.; This is a request for a Knee CT; Yes this is a request for a Diagnostic CT	1
Doctors and Rehabilitation	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury	3
Doctors and Rehabilitation	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has NOT been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of a recent myocardial infarction (heart attack).	4
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.	64
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.	64
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is for pre-surg testing w risk factors diabetes, hypertension, hyperlipidemiaand chronic renal dz... also having shortness of breath and sleep apnea. also dyspnea on exertion. Neurologic: weakness and dizziness and no loss of consciousness; Mild con; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	1
Cardiology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		u/k; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	1
Cardiology	Approval	93312 Echocardiography, transesophageal, real-time with image documentation (2D) (with or without M-mode recording); including probe placement, image acquisition, interpretation and report		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is NOT for suspected acute aortic pathology, pre-op of mitral valve regurgitation, infective endocarditis, left atrial thrombus, radiofrequency ablation procedure, fever with intracardiac devise or completed NON diagnostic TTE.; The patient is 18 years of age or older.	1
Cardiology	Approval	93312 Echocardiography, transesophageal, real-time with image documentation (2D) (with or without M-mode recording); including probe placement, image acquisition, interpretation and report		abnormal cardiovascular studies reveal possible atrial septal defect. need this procedure to officially diagnose; This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is NOT for suspected acute aortic pathology, pre-op of mitral valve regurgitation, infective endocarditis, left atrial thrombus, radiofrequency ablation procedure, fever with intracardiac devise or completed NON diagnostic TTE.; The patient is 18 years of age or older.	1
Doctors and Rehabilitation	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient has a documented limitation of their range of motion.	7

Doctors and Rehabilitation	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.	1
Doctors and Rehabilitation	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	2
Doctors and Rehabilitation	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.	1
Doctors and Rehabilitation	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; There has been a supervised trial of conservative management for at least 6 weeks.; "The caller indicated that the patient is not experiencing or presenting symptoms of Abnormal Gait, Lower Extremity Weakness, Asymmetric Reflexes, Cauda Equina Syndrome, Bowel or Bladder Dysfunction, New Foot Drop, or Radiculopathy.;" The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.	1
Doctors and Rehabilitation	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms., There is weakness.; Weakness and tingling; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Cardiology	Approval	93312 Echocardiography, transesophageal, real-time with image documentation (2D) (with or without M-mode recording); including probe placement, image acquisition, interpretation and report		This is a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for evaluation of atrial fibrillation or flutter to determine the presence or absence of left atrial thrombus or evaluate for radiofrequency ablation procedure.; The patient is 18 years of age or older.	10
Cardiology	Approval	93312 Echocardiography, transesophageal, real-time with image documentation (2D) (with or without M-mode recording); including probe placement, image acquisition, interpretation and report		This is a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for pre-operative evaluation of mitral valve regurgitation; The patient is 18 years of age or older.	2
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		; This is a request for a Stress Echocardiogram.; This patient has not had a Nuclear Cardiac study within the past 8 weeks.; This study is not being ordered for: CAD, post MI evaluation, or as a pre/post operative evaluation.	1
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient complains of chest pain with abnormal ecg, found to have a systolic murmur. Needs cardiac evaluation; There has not been any treatment or conservative therapy.; Chest pain and murmur; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		The BMI is 20 to 29, chest heaviness that radiated down both arms shortness of breath history of smoking hypertension sedentary lifestyle; This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; It is not known if the patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	1

Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This is a request for a Stress Echocardiogram.; This patient has not had a Nuclear Cardiac study within the past 8 weeks.; This study is being ordered for known Coronary Artery Disease.; This patient had a previous cardiac surgery or angioplasty.	3
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; For the past year c/o SOB. Worse with exertion. Moderate (CCS/NYHA II). No associated chest pain. Lasts ~ 5 minutes. Noted to have HR ~ 50 in PCP's office.; This is a request for a Stress Echocardiogram.; This patient has not had a Nuclear Cardiac study within the past 8 weeks.; This study is being ordered for suspected coronary artery disease.; This patient is clinically obese or has an emphysematous chest configuration.	1
Doctors and Rehabilitation	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.;	1
Doctors and Rehabilitation	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Doctors and Rehabilitation	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	Patient is having increased neck pain and numbness and tingling to arms; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.;	1
Doctors and Rehabilitation	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	1
Doctors and Rehabilitation	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	It is not known if the patient has any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; It is not known how many follow-up thoracic spine MRIs the patient has had.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.;	1
Doctors and Rehabilitation	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to Neurological deficits.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	5
Doctors and Rehabilitation	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; PAIN IN BACK AND SHOULDERS; INJECTIONS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Doctors and Rehabilitation	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Doctors and Rehabilitation	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Doctors and Rehabilitation	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	14
Doctors and Rehabilitation	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Doctors and Rehabilitation	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days	1
Doctors and Rehabilitation	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.	2
Doctors and Rehabilitation	Disapproval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Emergency Medicine	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.	1
Emergency Medicine	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	2
Emergency Medicine	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	2
Emergency Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	1
Emergency Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	2
Emergency Medicine	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is experiencing joint locking or instability.	1
Emergency Medicine	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.	1
Emergency Medicine	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.	1

Emergency Medicine	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		abnormal CT shows liver lesions. Newly found. see report; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is NO suspicion of metastasis.	1
Emergency Medicine	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient has Rheumatoid arthritis and COPD and is on o2 and cannot walk on treadmill; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Emergency Medicine	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography 93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.	1
Emergency Medicine	Approval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	1
Emergency Medicine	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.	1
Emergency Medicine	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	acute confusion, forgetting, cannot recall any details. denies headaches, CT Brain, CTA no conclusion, no major atrial conclusion. Symptoms realte to anmesia TIA.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; it is unknown why this study is being ordered.	1
Emergency Medicine	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; hx of herniated disc in lower cervical spine pain radiates down rt shoulder	1
Emergency Medicine	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; radiculopathy: 11/11/2018; neck pain began a month ago; There has been treatment or conservative therapy.; pt is unable to walk; steroid injection; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Emergency Medicine	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	patient has been taking medication but continues to have pain radiating down legs.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Emergency Medicine	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Symptoms worsening instead of getting better; This study is being ordered for a neurological disorder.; 11/18/2018; There has been treatment or conservative therapy.; Radiculopathy with sharp pain radiating down both lower extremities. No fracture on x-ray; MEDS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Emergency Medicine	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	1
Emergency Medicine	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; There are no documented findings of crepitus.; There are no documented findings of swelling.; The ordering physician is not an orthopedist.; will attach clinicals; The patient is NOT experiencing joint locking or instability.; The patient does not have a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.	1
Emergency Medicine	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
Emergency Medicine	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	patient was in a mva and has neck pain, n/v/d, and fever; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Emergency Medicine	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	severe abdominal/pelvic pain. checking to see if patient has an infection- appendicitis, diverticulitis, etc.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	abnormal EKG; It is not known if the patient is diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is NOT a Medicare member.; The patient is less than 45 years old.	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Family hx of CAD htn abn ekg; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	high-sensitivity troponin trending upwards with a number that we consider significant that may indicate cardiac event.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease	1
Endocrinology	Approval	70450 Computed tomography, head or brain; without contrast material		Dizziness; Headache, chronic, new features; severe headaches and FH brain tumor&#x0D; Dx: Worsening headaches; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Endocrinology	Approval	70490 Computed tomography, soft tissue neck; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; It is unknown if a fine needle aspirate was done.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Approval	70490 Computed tomography, soft tissue neck; without contrast material		This is a request for neck soft tissue CT.; The patient has been diagnosed with cancer.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was done.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Approval	70490 Computed tomography, soft tissue neck; without contrast material		This is a request for neck soft tissue CT.; The study is being ordered for Follow Up.; The patient has a known tumor or metastasis in the neck.; The patient completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Approval	70490 Computed tomography, soft tissue neck; without contrast material		This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT	8
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease	5
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	111
Cardiology	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		This is a request for a Stress Echocardiogram.; To evaluate the heart prior to non-cardiac surgery.; The member does not have known or suspected coronary artery disease	1
Cardiology	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.	1
Cardiology	Disapproval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	c/s pt does have hx of corroded artery stenosis, want to further evaluate with cta of head and neck, pt has been on medical mgmntm has remained stable until recent episodes of passing out and dizziness.; This study is being ordered for Vascular Disease.; c/s 05/2018; There has been treatment or conservative therapy.; c/s pt is having dizziness, she has passed out; pt on beta blockers, pt is taking 2 anti coagulants, pt is also on blood pressure meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the Neck.	3
Cardiology	Disapproval	70547 Magnetic resonance angiography, neck; without contrast material(s)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Chest pain describes the reason for this request.; It is unknown if anything else was relevant in the diagnosis or suspicion of vascular disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	1

Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		failed his growth hormone stimulation test; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		None; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; It is not known if there are physical findings or laboratory values indicating abnormal pituitary hormone levels.; There has been a previous Brain MRI completed.; The results of the previous brain MRI are unknown.; This is NOT a Medicare member.	1
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	4
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	2
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.; This is NOT a Medicare member.	1
Cardiology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	She denies any chest pains on followup today but has significant fatigue and shortness of breath on exertion. She says she is trying to quit smoking and has not been successful. She says she is really worried about her lymphadenopathy that she was recent; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Cardiology	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	15 years ago patient had a SVT Ablation; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Shortness of breath, substernal chest pain.; Medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Checking status of aortic repair and for further aneurysm; This study is being ordered for Vascular Disease.; 2015; There has been treatment or conservative therapy.; Unknown; Aortic repair 2015; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	CHEST PAIN, SHORTNESS OF BREATH, LUPUS, PALPITATIONS, BROTHER AND FATHER HAVE HAD AORTIC ANEURYSMS.; This study is being ordered for Vascular Disease.; 09/03/2018; There has been treatment or conservative therapy.; CHEST PAIN AND SHORTNESS OF BREATH; MEDICATION; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Event monitor reported episodes of sinus tachycardia.Bicuspid aortic valve; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is another type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Unknown; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; It is not known whether there is a known or suspected coarctation of the aorta.; It is not known if there is another type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	1
Endocrinology	Approval	71250 Computed tomography, thorax; without contrast material		; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Endocrinology	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		; The patient is over 17 years old.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a non-cardiac nature.; Yes, this is a request for a Chest CT Angiography.	1
Endocrinology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; Yes, there is a ls there an abdominal and pelvic or retroperitoneal or abdominal mass that has been confirmed.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There is suspicion of an adrenal mass (pheochromocytoma); The suspicion of an adrenal mass was suggested by an Ultrasound.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Approval	74150 Computed tomography, abdomen; without contrast material		unknown; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new lab results or other imaging studies including doppler or x-ray (plain film) findings.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Endocrinology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has been completed.; The results of the contrast/barium x-ray were normal.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT	1
Cardiology	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 2018; There has not been any treatment or conservative therapy.; NUMBNESS, TINGLING, WEAKNESS, L SHOULD AND NECK PAIN; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Disapproval	72131 Computed tomography, lumbar spine; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 2018; There has not been any treatment or conservative therapy.; NUMBNESS, TINGLING, WEAKNESS, L SHOULDER AND NECK PAIN; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Looking to rule out spinal stenosis. Patient is experiencing worsening symptoms of numbness in both lower extremities.; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for None of the above	1
Cardiology	Disapproval	73706 Computed tomographic angiography, lower extremity, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the lower extremity.	2
Cardiology	Disapproval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Ascending aortic aneurysm: Aneurysm measures 5 cm on echocardiogram. She also appears to have a bicuspid aortic valve. I recommend CT scan of the aorta to evaluate the dimensions and to evaluate the entire aorta. I also recommend she undergo transesoph; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/31/2018; It is not known if there has been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; The reason for the study is vascular disease.; There is not a known or suspicion of an abdominal aortic aneurysm.; There is not an abnormal abdominal/pelvic ultrasound.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Cardiology	Disapproval	75573 Computed tomography, heart, with contrast material, for evaluation of cardiac structure and morphology in the setting of congenital heart disease (including 3D image postprocessing, assessment of LV cardiac function, RV structure and function and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	This is a request for Heart CT Congenital Studies.	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	; This is a request for CTA Coronary Arteries.; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Endocrinology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient did NOT have chemotherapy, radiation therapy or surgery in the last 3 months.; They did NOT have an Abdomen MRI in the last 10 months.	1
Endocrinology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	1
Endocrinology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; R/o tumor.	1
Endocrinology	Approval	77058 Magnetic resonance imaging, breast, without and/or with contrast material(s); unilateral		This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1
Endocrinology	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a more than 1 of the following; diagnostic test, imaging study, or biopsy.; This study is being ordered to establish a cancer diagnosis.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Thyroid Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
Endocrinology	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; The patient has a suspected brain tumor.; Known or suspected tumor best describes the reason that I have requested this test.; There are documented neurologic findings suggesting a primary brain tumor.; This is NOT a Medicare member.	1

Endocrinology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	'None of the above' describes the reason for this request.; This study is being requested for 'none of the above'.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Disapproval	74150 Computed tomography, abdomen; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; It is not known if there is evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; It is not known if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; ; Yes, there is Chronic Chest Pain.	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Mr. Wright is a 45 y/o male who presents today for evaluation of chest pain. &#x0D; For the past 5 years c/o left sided chest pain. Moderate. Sharp/burning. No radication. Not worse with exertion. Worse after eating. Stable. No associated symptoms. Had ; Yes, there is Chronic Chest Pain.	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	There is "Acute Chest Pain" or Angina.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Chest pain: Somewhat atypical, but with normal stress testing a year ago, I plan to get a CT angiogram of the coronaries to assess for degree of coronary disease, calcium amount, and whether his chest pain is anginal or not, and for any significant steno; No, there is no Chronic Chest Pain.	1
Cardiology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	This is a request for CTA Coronary Arteries.; The study is requested for known or suspected valve disorders.	4
Cardiology	Disapproval	75635 Computed tomographic angiography, abdominal aorta and bilateral iliofemoral lower extremity runoff, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the abdominal arteries.	13
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The patient is not diabetic.; The patient is not diabetic.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; This is NOT a Medicare member.; The patient is less than 45 years old.; The patient is less than 45 years old.	1
Endocrinology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Disapproval	76390 Magnetic resonance spectroscopy	Radiology Services Denied Not Medically Necessary	This is a request for MRS.	1
Gastroenterology	Approval	70450 Computed tomography, head or brain; without contrast material			1

Gastroenterology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; 2/16/18; There has been treatment or conservative therapy; pain poor appetite cyst renal and liver; transplant; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Gastroenterology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was abnormal.	1
Gastroenterology	Approval	71250 Computed tomography, thorax; without contrast material		1
Gastroenterology	Approval	71250 Computed tomography, thorax; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; There is no radiologic evidence of mediastinal widening.; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	71250 Computed tomography, thorax; without contrast material	Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		1
Gastroenterology	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	1
Gastroenterology	Approval	72192 Computed tomography, pelvis; without contrast material	Patient with inguinal hernia of right side with obstruction and without gangrene. Imaging is to evaluate hernia. Patient is status post liver transplant.; This study is being ordered as pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; July 1, 2018; There has been treatment or conservative therapy.; elevated Lipase (972) abdominal pain; CT scan, Labs, Colonoscopy, EGD; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	Change in medication; This study is being ordered for inflammatory/ Infectious Disease.; Unknown; There has been treatment or conservative therapy.; Crohns disease; Rx medication ABX; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.	1
Gastroenterology	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	THIS PT PRESENTS WITH A LONG HX OF CROHN'S DX. PT HAS HAD LONG HX OF CROHNS. PT HAS HAD SEVERAL SURGERIES FOR THIS. WE ARE WANTING TO ORDER A MRI TO AVIOD RADATION.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		4
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; Which organ is enlarged? Other; Yes this is a request for a Diagnostic CT	1

Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		abdominal pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	2
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&#x0D; Enter answer here - or Type In Unknown If No Info Given. &#x0D; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);.; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&#x0D; Enter answer here - or Type In Unknown If No Info Given. &#x0D; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);.; The patient had a recent CCTA to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&#x0D; Enter answer here - or Type In Unknown If No Info Given. &#x0D; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);.; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&#x0D; Enter answer here - or Type In Unknown If No Info Given. &#x0D; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);.; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&#x0D; Enter answer here - or Type In Unknown If No Info Given. &#x0D; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);.; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is less than 20	2
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&#x0D; Enter answer here - or Type In Unknown If No Info Given. &#x0D; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study);.; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		abnormal imaging showing common bowel dilation, elevated liver function test; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		AFP level was 82.2. Normal range is 0.0-8.3. Concerned about having a lesion on his liver. The patient has Hepatitis B.&#x0D; I am faxing all of his clinic notes and his results.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new lab results or other imaging studies including doppler or x-ray (plain film) findings.; Yes this is a request for a Diagnostic CT	1

Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		elevated AFP; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new lab results or other imaging studies including doppler or x-ray (plain film) findings.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		ELEVATED AFT; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc...; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		It seems likely that this is due to functional dyspepsia. However, given the age of the patient and his family history of pancreatic cancer in his father, I think further evaluation of these symptoms is warranted.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc...; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		Pain- see N18121100274 - 055762201 ** 12/11/2018 2:31:06 PM Michelle R Gill, MD Peer-to-Peer Discussion held. Case decision discussed with and understood by dr ellison. Synopsis of discussion: splenomegaly and LUQ pain only wants abd ct says that is wh; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc...; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		Patient has abdominal pain, weight loss, early satiety and nausea. Her lab work is normal except LFT's and EGD performed on 12/11/18 was normal except for a hiatal hernia.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc...; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a Medicare member.; This study is being ordered for None of the above	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	2
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	4
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	3
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is a suspicion of an adrenal mass.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		unknown; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc...; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Approval	74175 Computed tomographic angiography, abdomen, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the abdomen.	3
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt; no; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; 2/16/18; There has been treatment or conservative therapy.; pain poor appetite cyst renal and liver; transplant; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	2

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Chest pain with high risk for cardiac etiology; Family history of early CAD; Here for evaluation of chest tightness episodes. She reports that for approximately the last 2 weeks, she's developed upper midsternal chest tightness episodes. Episodes typical; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	chest pain, shortness of breath, edema, hypertension, coronary artery disease, diabetes; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	coronary artery disease, congested heart failure, diabetes, hypertension; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	diabetic, smoker, hypertension, peripheral vascular dz; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Enter answer here - or Type In Unknown if post stent placementNo Info Given.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	exertional dyspnea; palpitations; lightheaded and dizzy; right axis deviation on EKG; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	He reports chest pain, he has intermittent right sided pain, states "90% of the time it is indigestion, rolaids, turns, omeprazole usually works, so I contribute the pain to indigestion". He recently had a calcium score of 237; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		40lb weight loss in the last 3 mos; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/2018; There has not been any treatment or conservative therapy.; weight loss, abdominal pain, trouble swallowing; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		abd pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		abdominal pain; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Abnormal weight loss&#x0D; Chest pain&#x0D; Chronic abdominal pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10-01-2018; There has not been any treatment or conservative therapy.; Abnormal weight loss&#x0D; Chest pain&#x0D; Chronic abdominal pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Duration of Symptoms: Start: 09/26/2018 &#x0D; &#x0D; Physical Exam Findings: Pt with hx: rectal abscess/fissures, severe crohn's. C/O 2 wk hx of abd pain, both upper and lower quadrant. also C/O night sweats, nausea. abdominal mass palpated upon exam.&#x0D; Abdomen&#x0D; *; This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient has Crohn's Disease.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		gall bladder ultrasound, had an hyda scan and both were negative, kub, and abdominal ultrasound and a tiny stone; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Mr Laboy is a 27 year old male referred for non sustained VT. A 4 beat run of non sustained VT was noted on heart monitor at a rate of 105 bpm. She reports episodes of dyspnea, lightheadedness and palpitations. This started about a year ago. It seems to b; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Ms Robinson is a 43 yr old female who presents for return visit. Known history of CAD s/p STEMI with stenting LAD March 2016 with EF 40%. Cardiac cath August 2016 revealed nonobstructive CAD. DSE in 2016 revealed EF 40-45% with indication of ischemia. Hi; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Patient with complaint of chest pain is referred by primary care for evaluation. Patient is unable to walk treadmill due to chronic back pain and arthritis. Patient is a current smoker. Patient is diabetic. Patient has hyperlipidemia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Pertinent history includes: Hypertension, Mitral Value Prolapse, family history of premature CAD. Patient complains of palpitations, irregular heart beats, for years, no associated symptoms, chest pain present for about 1 year. Risk factors: positive family; The patient is not diabetic.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms can be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; The chest pain was relieved by rest (ceasing physical exertion activity) and/or nitroglycerin; There is no physical restriction to the member's ability to exercise	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		I81 Portal vein thrombosis &#x0D; History / Dx: R11.0 Nausea&#x0D; History / Dx: I85.10 Secondary esophageal varices without bleeding,&#x0D; Other: she has diffuse fleeting abd pain and bloating. mild constipation. previous ct showed cavernous transformation of por; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Patient was diagnosed with gastroparesis many years ago. She was seen by Dr. Hughes back in April 2018 and presents October 23, 2018 for follow up. She complains of increased nausea and vomiting. She states it comes from nowhere and she will have to run t; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Pt has liver lesion found on US done 8/27/18. She has had normal lab work. FU; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Patient had a colonoscopy on February 2, 2018 that showed focal active colitis and Hyperplastic polyps. She had an EGD on April 6, 2018 that showed gastritis.; This study is being ordered for Inflammatory/ Infectious Disease.; January 2018; It is not known if there has been any treatment or conservative therapy.; She is having diarrhea 30-40 pound weight loss, and reflux.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1

Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	2
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Pt here for initial cardiology consultation for congestive heart failure and shortness of breath. He went to the Emergency Room at Unity Hospital with complaints of fatigue and weakness. He had a positive D Dimer and had a CT scan. He is having more short; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	She is now s/p SVT ablation 2/2017. She underwent electrophysiology study, ablation of two different right atrial tachycardias on 01/05/2017.&#x0D; &#x0D; Pt has Supraventricular Tachycardia; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	shortness of breath previous MI; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	The patient is a 48-year-old white male with a history of hypertension, chronic smoker, hyperlipidemia, diabetes, SVT with WPW syndrome per patient, reports CKD with a creatinine of 0.9 in 03/2018 with potassium of 4.4 at that time, sleep apnea, unable to; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.	21
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	unknown; For clearance.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; The patient's age is between 45 and 64 years old.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; a few months ago; There has not been any treatment or conservative therapy.; chest pain palpitations; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient complains of chest pain with abnormal eeg, found to have a systolic murmur. Needs cardiac evaluation; There has not been any treatment or conservative therapy.; Chest pain and murmur; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; It is unknown if there has been a physical exam.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The hematuria is due to tumor or mass.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; It is not known if the patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; The patient has Diverticulitis.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; It is not known if the patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient has Diverticulitis.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient does not have Crohn's Disease, Ulcerative Colitis or Diverticulitis.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient has Diverticulitis.; Yes this is a request for a Diagnostic CT	2
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; Pt has had a long history of CAD has stents in RAC and LAD has MVR and AVR. Pt is very high risk.; There has been treatment or conservative therapy.; Chest pain with shortness of breath. MVP and AVP; Pt has CAD with stents in RCA and LAD. MVP and AVR extensive history of cardiac disease.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	has chest pain on exertion; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; Chest pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	no; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Palpitations 11-12-2018; There has been treatment or conservative therapy.; Heart palpitation, heart racing, chest pain.; Heart monitor on patient.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	patient with chest pain; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	patient with shortness of breath and chest pain; This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	7
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; There has been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.	2
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	7
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This request is NOT for initial evaluation of a murmur.; This is NOT a request for follow up of a known murmur.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has abnormal heart sounds	1
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; It is unknown if this is being ordered for initial diagnosis of congenital heart disease, Annual follow up of congenital heart disease or Evaluation of change of clinical status.	1

Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status.	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	7
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is organ enlargement.; There is ultrasound or plain film evidence of an abdominal organ enlargement.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is pre-op or post op evaluation.; The study is requested for post-op evaluation.; The study is requested as a first follow up study for a suspected or known post-op complication.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed within the past 10 months.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Anerysm or a Pelvis Mass.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	3
Cardiology	Disapproval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography	Radiology Services Denied Not Medically Necessary	This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.	1
Cardiology	Disapproval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;	Radiology Services Denied Not Medically Necessary	; This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is not experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	1
Cardiology	Disapproval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;	Radiology Services Denied Not Medically Necessary	The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; Patient needs evaluation of CAD by Stress Echocardiogram.; This is a request for a Stress Echocardiogram.; This patient has not had a Nuclear Cardiac study within the past 8 weeks.; This study is being ordered for known Coronary Artery Disease.; This patient had a previous cardiac surgery or angioplasty.	1
Cardiology	Withdrawal	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.	1
Chiropractic Medicine	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Chiropractic Medicine	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

Chiropractic Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Chiropractic Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Pt had injections but caller is unaware when; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Chiropractic Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	15
Chiropractic Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has an Abnormal x-ray indicating a significant abnormality	1
Chiropractic Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; It is not known if the patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.	1
Chiropractic Medicine	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.	1
Chiropractic Medicine	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	3
Chiropractic Medicine	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s) and further sequences		swelling and giving away with pain; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Chiropractic Medicine	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for None of the above; Limited range of motion	1
Chiropractic Medicine	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s) and further sequences		This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."	1
Chiropractic Medicine	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.;	1
Chiropractic Medicine	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.;	1
Chiropractic Medicine	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	The patient does not have any neurological deficits.; It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Chronic severe thoracic back pain severe spine distortion	1
Chiropractic Medicine	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Numbness and tingling down bilateral legs LBP; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Chiropractic Medicine	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	unknown; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1

Chiropractic Medicine	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; off and on for years, xray showed effusion; There has been treatment or conservative therapy.; effusion, pain, difficulty walking, massive swelling; taping, ultrasound; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Colon & Rectal Surgery	Approval	71250 Computed tomography, thorax; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Colon & Rectal Surgery	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		; This is a request for a Pelvis MRI.; No, this is not a preoperative study.; The study is being ordered for suspicion of pelvic inflammatory disease or abscess.	1
Colon & Rectal Surgery	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		Rectal polyp Pre-op; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Colon & Rectal Surgery	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.	2
Colon & Rectal Surgery	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?	4
Colon & Rectal Surgery	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	6
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; It is unknown if the patient had an Ultrasound.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Aneurysm or a Pelvis Mass.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT	4
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; There are NO physical findings or abnormal blood work consistent with peritonitis, pancreatitis or appendicitis.; There is active or clinical findings of ulcerative colitis, bowel inflammation or diverticulitis.	1

Colon & Rectal Surgery	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/30/2018; There has not been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Colon & Rectal Surgery	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is pre-op or post op evaluation.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Colon & Rectal Surgery	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	1
Colon & Rectal Surgery	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Colo-rectal Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	2
Colon & Rectal Surgery	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Colo-rectal Cancer.; The patient completed a course of treatment initiated within the last 8 weeks.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
Colon & Rectal Surgery	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/30/2018; There has not been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Dermatology	Approval	73220 Magnetic resonance (eg, proton) imaging, upper extremity, other than joint; without contrast material(s), followed by contrast material(s) and further sequences		The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.	1
Dermatology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; None	1
Dermatology	Disapproval	73220 Magnetic resonance (eg, proton) imaging, upper extremity, other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; May 2018; There has been treatment or conservative therapy.; Unknown; Still notes; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Dermatology	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; May 2018; There has been treatment or conservative therapy.; Unknown; Still notes; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Dermatology	Disapproval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body	Radiology Services Denied Not Medically Necessary	This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being requested for Melanoma.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
Doctors and Rehabilitation	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Doctors and Rehabilitation	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	1

Doctors and Rehabilitation	Approval	72128 Computed tomography, thoracic spine; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Approval	72131 Computed tomography, lumbar spine; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		nausea, vomiting & weight loss; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation. Patient present for consult and was referred by her PCP for continued worsening abdominal pain. This issue began 1 year ago and has gone unresolved. Dr. Angtuaco has ordered this test to further evaluate the cause of the worsening pain.; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist.";	3
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; Patient with continued abdominal pain and recurrent pancreatitis	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; Per pt, she has a history of pancreatitis. Currently with LUQ pain and elevated CRP	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; There are physical findings or abnormal blood work consistent with pancreatitis.; An amylase abnormality was noted.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; It is not known if the patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; & Enter answer here - or Type In Unknown If No Info Given. &	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Adenoma	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Patient with hepatocellular carcinoma requiring updated imaging for surveillance of treated tumor.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; liver lesion suspicious for hemangioma. A 5.1cm lesion in the liver suspicious also for hemangioma.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.;	1

Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Patient being evaluated for listing for a liver transplant. Imaging is to check for liver lesions.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	3
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; evaluation 3.4 cm mass associated w/neck and body	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Recent abdominal ultrasound showed dilated common bile duct can not rule out obstruction. She also has right upper quad pain that radiates into her back.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient had a ultrasound that showed gallstones and 3 small liver lesion.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; US shows small nodules in R hepatic lobe	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; ABN MRI ABD WITHOUT CONTRAST &#x0D; LIVER LESION&#x0D; RADIOLOGIST REQUESTED MRI ABD WITH CONTRAST	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; Elevated LFTs common bile duct dilated fatty liver	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient had an abnormal ultrasound, MRI, and pet scan. This is a f/up MRI	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; PT HAD AN U/S OF THE ABD AND HAS HETEROGENEOUS OF THE LIVER. PT'S LFT'S ARE ABNORMAL AND PT HAS A HX OF CIRRHOSIS.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is suspicion of metastasis.	2
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	3
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; liver lesion seen in previous MRI from the Mayo clinic, evaluate the small bowel is not inflamed, previous ultrasound.	1

Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; no.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Ulcerative colitis- previously on our colonoscopies noted to be extensive colitis, may have been pan colitis on prior examinations when she was diagnosed at 13. &#x0D; - Do not see any evidence of perianal disease when discussing with her, unsure of CD diagno	1
Doctors and Rehabilitation	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	18
Doctors and Rehabilitation	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	18
Doctors and Rehabilitation	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	1
Doctors and Rehabilitation	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."	1
Doctors and Rehabilitation	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.	1
Doctors and Rehabilitation	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of asymmetric reflexes.	1
Doctors and Rehabilitation	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	7
Doctors and Rehabilitation	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		Weight Loss; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
Gastroenterology	Approval	74261 Computed tomographic (CT) colonography, diagnostic, including image postprocessing; without contrast material			1
Gastroenterology	Approval	74261 Computed tomographic (CT) colonography, diagnostic, including image postprocessing; without contrast material		Mass found.; This patient does not have a medical problem that makes him/ her unsuitable for conventional colonoscopy.; This patient has undergone an attempted but incomplete conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Approval	74261 Computed tomographic (CT) colonography, diagnostic, including image postprocessing; without contrast material		Patient had a stent placed in August of 2018 and is unable to stop blood thinner (Brilinta) until August of 2019. Cardiac Clearance for colonoscopy denied.; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Approval	74261 Computed tomographic (CT) colonography, diagnostic, including image postprocessing; without contrast material		stiffened sigmoid colon, patient is on blood thinners; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Approval	75571 Computed tomography, heart, without contrast material, with quantitative evaluation of coronary calcium		Patient being evaluated for listing for a liver transplant. Imaging is to evaluate for abnormalities within the heart.; This is a request for a CT scan for evaluation of coronary calcification.	1

Gastroenterology	Approval	78813 Positron emission tomography (PET) imaging; whole body		This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	3
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		attention to the pancreas; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		Dr. Nutt has ordered a MRCP on this patient b/c she is having RUQ abdominal pain and had an abnormal CT scan that showed prominent bile ducts.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		Pancreatic mass; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		Patient has had an extensive GI workup. He has primary sclerosing cholangitis with bridging fibrosis. He continues to have elevated liver functions as well.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		PT'S GALLBLADDER SHOWED SLUDGE AND SHOWED THAT IT WAS "KINKY". WE HAVE TRYING TO RULE OUT STONES AND FURTHER EVALUATE HER LIVER. HER LIVER FUNCTIONS ARE ELEVATED.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		The patient tested positive for hepatitis C in 1993. He has not had treatment previously. Viral load is positive 6/2018. He had a blood transfusion in 1971. ALT and AST are elevated. He denies alcohol or illicit drugs use. He has not been vaccinated; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.	2
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has undergone unsuccessful ERCP and requires further evaluation.	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		This patient had a recent CT scan that showed dilated bile ducts and dilated pancreatic ducts. It also showed a large hiatal hernia that has caused the majority of her stomach to be pushed up into her chest. ERCP could be a risky procedure because of t; This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; It is not known if patient requires evaluation for a congenital defect of the pancreatic or biliary tract.; It is not known if MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.; "The patient is not an infant or young child, and not an adult who is debilitated or uncooperative in such a manner that ERCP is unsafe or cannot be performed."; "The patient has neither a documented allergy to iodine-based contrast materials, or a general history of allergic responses."; It is not known if patient has acute pancreatitis.	1
Gastroenterology	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is immune-compromised.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 2018; It is not known if there has been any treatment or conservative therapy.; 16 pound weight loss since May 2018; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	40lb weight loss in the last 3 mos; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/2018; There has not been any treatment or conservative therapy.; weight loss, abdominal pain, trouble swallowing; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1

Gastroenterology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Abnormal weight loss; Chest pain; Chronic abdominal pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10-01-2018; There has not been any treatment or conservative therapy.; Abnormal weight loss; Chest pain; Chronic abdominal pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	AGD procedure was done, having esophagitis, esophageal ring, having chest pain, and dysphagia. Cardiology evaluation, that's ok. Nausea, weight loss. Was in the ER on 11/16/2018, Echo and stress test done, looks normal. Hiatal hernia.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Gastroenterology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Status post liver transplant patient with elevated liver function, imaging is for post transplant complications.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	The patient does not have any neurological deficits.; It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Patients presents for consult with complaint of right sided pain. He states this is ongoing for the past year. He states the pain comes on suddenly and mainly on the right side and radiated from the mid-back over to his right side. He says it is almost co	1
Gastroenterology	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Ultrasound EGD; This study is being ordered for trauma or injury.; 10/31/2018; There has not been any treatment or conservative therapy.; Intense pain radiating from back to abdomen; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Disapproval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	Radiology Services Denied Not Medically Necessary	Patient was referred by her PCP to follow up on abnormal CT. Her PCP states she has dilatation of extrahepatic bile duct and was sent to Dr. Patel for a GI evaluation. She is being treated currently for IBS. She presented to Dr. Patel with abdominal pain.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Gastroenterology	Disapproval	74150 Computed tomography, abdomen; without contrast material	Radiology Services Denied Not Medically Necessary	; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Doctors and Rehabilitation	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Doctors and Rehabilitation	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	6
Doctors and Rehabilitation	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine	1
Doctors and Rehabilitation	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	15
Doctors and Rehabilitation	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	7
Doctors and Rehabilitation	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1

Doctors and Rehabilitation	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; constant pain, limitation to physical activity and exercise, pt tried NSAIDs and gabapentin	1
Doctors and Rehabilitation	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.; There is documented findings of severe pain on motion.	1
Doctors and Rehabilitation	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.	1
Doctors and Rehabilitation	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Instability	1
Doctors and Rehabilitation	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion	1
Doctors and Rehabilitation	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; There is no symptom of locking,instability, Swelling,Redness,Limited range of motion or pain.	1
Doctors and Rehabilitation	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	1
Doctors and Rehabilitation	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy	2
Doctors and Rehabilitation	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.	1
Doctors and Rehabilitation	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.	1
Gastroenterology	Disapproval	74150 Computed tomography, abdomen; without contrast material	Radiology Services Denied Not Medically Necessary	AGD procedure was done, having esophagitis, esophageal ring, having chest pain, and dysphagia. Cardiology evaluation, that's ok. Nausea, weight loss. Was in the ER on 11/16/2018, Echo and stress test done, looks normal. Hiatal hernia.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Gastroenterology	Disapproval	74150 Computed tomography, abdomen; without contrast material	Radiology Services Denied Not Medically Necessary	Chirosis of liver liver disease; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1

Gastroenterology	Disapproval	74150 Computed tomography, abdomen; without contrast material	Radiology Services Denied Not Medically Necessary	K21.9; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type in Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 2018; It is not known if there has been any treatment or conservative therapy.; 16 pound weight loss since May 2018; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	Abdominal bloating. Pain. Hard stools.; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for ketones.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
Doctors and Rehabilitation	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.	1
Doctors and Rehabilitation	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone); The patient has a documented limitation of their range of motion.	2
Doctors and Rehabilitation	Disapproval	72131 Computed tomography, lumbar spine; without contrast material	Radiology Services Denied Not Medically Necessary	Given the severity of her spondylolisthesis I think she may benefit from surgical intervention so in the setting of her history of trauma and for preoperative planning I would recommend advanced imaging of the lumbar spine with an MRI to evaluate for neur; This study is being ordered for Inflammatory/ Infectious Disease.; Eight year ago; There has been treatment or conservative therapy.; Lumbar pain with radiation down right lower extremity; Physical therapy, HEP, NSAIDs, muscle relaxants; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Doctors and Rehabilitation	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; Unknown.	1

Doctors and Rehabilitation	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; No clinicals available; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	7
Doctors and Rehabilitation	Disapproval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Doctors and Rehabilitation	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; No clinicals available; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	Please refer to notes from TR# 11279505; This is a request for a thoracic spine MRI; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
Doctors and Rehabilitation	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	2
Doctors and Rehabilitation	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more than once for these symptoms.	1
Doctors and Rehabilitation	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for trauma or injury.; Unknown; It is not known if there has been any treatment or conservative therapy.; Unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Doctors and Rehabilitation	Disapproval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Doctors and Rehabilitation	Disapproval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	Radiology Services Denied Not Medically Necessary	Patient has had bilateral SI Joint pain for 8 months.; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Doctors and Rehabilitation	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; PAIN IN BACK AND SHOULDERS; INJECTIONS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
Doctors and Rehabilitation	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for trauma or injury.; Unknown; It is not known if there has been any treatment or conservative therapy.; Unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Emergency Medicine	Approval	70450 Computed tomography, head or brain; without contrast material		patient was in a mva and has neck pain, n/v/d, and fever; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

Emergency Medicine	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.	1
Emergency Medicine	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	1
Emergency Medicine	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	1
Emergency Medicine	Approval	72125 Computed tomography, cervical spine; without contrast material		patient was in a mva and has neck pain, n/v/d, and fever; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Emergency Medicine	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has not been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; It is not known if this is the first visit for this complaint.; It is unknown if there has been a physical exam.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; It is unknown if there has been a physical exam.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	8
Emergency Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Emergency Medicine	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	2
Emergency Medicine	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		left ovarian cyst non conclusive through CT and ultrasound.; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Emergency Medicine	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	1

Emergency Medicine	Approval	73700 Computed tomography, lower extremity; without contrast material		This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Emergency Medicine	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days	1
Emergency Medicine	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	1
Emergency Medicine	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	2
Emergency Medicine	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Emergency Medicine	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for Suspected Coronary Artery Disease (CAD); The patient has not had a stress echocardiogram within the past eight weeks.	1
Emergency Medicine	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Emergency Medicine	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Emergency Medicine	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	Symptoms worsening instead of getting better; This study is being ordered for a neurological disorder.; 11/18/2018; There has been treatment or conservative therapy.; Radiculopathy with sharp pain radiating down both lower extremities. No fracture on x-ray; MEDS; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Emergency Medicine	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	patient has low back pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Emergency Medicine	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1
Emergency Medicine	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	1

Emergency Medicine	Disapproval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; radiculopathy: 11/11/2018; neck pain began a month ago; There has been treatment or conservative therapy.; pt is unable to walk; steroid injection; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Emergency Medicine	Disapproval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; LIMITED RANGE OF MOTION, POSITIVE HAWKINS TEST, INJURY ON 08/16/2018	1
Emergency Medicine	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	previous imaging abnormal; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.	1
Emergency Medicine	Disapproval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Radiology Services Denied Not Medically Necessary	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
Emergency Medicine	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	PT has had issue for about 4 months, blood in stool. pain is 9 out of 10. Did have colonoscopy 10 years ago, has bowel leak edge & has to wear pad for that.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Emergency Medicine	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	2
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The patient is not diabetic.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	atypical chest pain; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.; The patient does not have known diabetes	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	pain radiates into right shoulder, patient tried antacids with no relief; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1

Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; It is not known if the patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; It is not known if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; It is unknown if the patient has Crohn's Disease, Ulcerative Colitis or Diverticulitis.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	11
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	9
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	SUDDEN CENTRAL CHEST PAIN; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Endocrinology	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.	1
Endocrinology	Approval	70490 Computed tomography, soft tissue neck; without contrast material		; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Endocrinology	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)		"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass	1
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	2
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.	1
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	2
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.	1
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.; This is NOT a Medicare member.	3
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.	1
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		UNK; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Endocrinology	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Endocrinology	Approval	71250 Computed tomography, thorax; without contrast material		Pre-operative evaluation describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.; Yes this is a request for a Diagnostic CT	2
Endocrinology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	11
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT	1

Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	THIS PT PRESENTS WITH ANEMIA AND UNEXPLAINED GI BLEED. PT HAD A NORMAL EGD AND COLON. REQUESTING CT SCAN TO EVALUATE AND TREAT.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; It is unknown if the patient had an Ultrasound.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary		1
Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	none; This study is being ordered for Inflammatory/ Infectious Disease.; 09/22/2018; There has been treatment or conservative therapy.; recurrent episodes of upper quadrant pain following gallbladder removal in 2010; medication, hospital stay for IV fluids, etc; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	Suspicious lesion.; This request is for an Abdomen MRI; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
Endocrinology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is pre-op or post op evaluation.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Endocrinology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the pancreas during a previous CT, MRI or Ultrasound.	1
Endocrinology	Approval	78071 Parathyroid planar imaging (including subtraction, when performed); with tomographic (SPECT)		This is a request for Parathyroid SPECT imaging.;	1
Endocrinology	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; The patient has a new onset of a headache within the past month; Headache best describes the reason that I have requested this test.	1
Endocrinology	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Gastroenterology	Approval	70490 Computed tomography, soft tissue neck; without contrast material		This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Approval	71250 Computed tomography, thorax; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; Surveillance of a known cancer following treatment is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is beign requested for known cancer or tumor; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	71250 Computed tomography, thorax; without contrast material		Patient is a liver transplant recipient. Liver cancer diagnosis while transplanted. Since patient is a transplant recipient tested for recurrence of cancer every 3 to 6 months because of the medications the patient is taking. As the patient has the trans; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has not had an abdominal ultrasound, CT, or MR study."; Abnormal findings on diagnostic imaging of body structures	1
Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	This request is for an Abdomen MRI; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	1
Gastroenterology	Disapproval	74261 Computed tomographic (CT) colonography, diagnostic, including image postprocessing; without contrast material	Radiology Services Denied Not Medically Necessary	; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Disapproval	74261 Computed tomographic (CT) colonography, diagnostic, including image postprocessing; without contrast material	Radiology Services Denied Not Medically Necessary	Pt has family history of colon cancer, bloody stool; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Disapproval	74263 Computed tomographic (CT) colonography, screening, including image postprocessing	Radiology Services Denied Not Medically Necessary	This is a request for CT Colonoscopy for screening purposes only.	1
Gastroenterology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Patient being evaluated for a liver transplant. Testing is to evaluate cardiac abnormalities.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
Gastroenterology	Disapproval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	2
Gastroenterology	Disapproval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)	Radiology Services Denied Not Medically Necessary	patient present today for a follow up visit. He states he continues to suffer from upper right quad pain and reports a pressure like sensation. his intestinal isoenzyme levels remain high and so does alkaline phosphatase isoenzyme levels. Concerned that t; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Gastroenterology	Disapproval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)	Radiology Services Denied Not Medically Necessary	Ultrasound was done in August, normal, however the MRCP reasoning is to check the pancreas is to ensure that there isn't a stone or anything that was missed; Physician is wanting to ensure the pancreas is okay considering the change in medication; patient; This study is being ordered for Inflammatory/ Infectious Disease.; September 26, 2018; There has been treatment or conservative therapy.; Onset severe abdominal pain; patient has multiple times higher than normal lipase; Unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	71250 Computed tomography, thorax; without contrast material		Pre-operative evaluation describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	71250 Computed tomography, thorax; without contrast material		Pt had a colonoscopy on February 2, 2018 that showed focal active colitis and Hyperplastic polyps. She had an EGD on April 6, 2018 that showed gastritis.; This study is being ordered for Inflammatory/ Infectious Disease.; January 2018; It is not known if there has been any treatment or conservative therapy.; She is having diarrhea 30-40 pound weight loss, and reflux.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	71250 Computed tomography, thorax; without contrast material		Staging, new diagnosis; This study is being ordered for a metastatic disease.; There are 2 exams being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; None of the above; &lt; Enter Additional Clinical Information&gt;; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of paresthesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Gastroenterology	Approval	72192 Computed tomography, pelvis; without contrast material		Pt has a Hx of Celiac Disease and is now having abd pain and bloody diarrhea.; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1

Gastroenterology	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/20/18; There has been treatment or conservative therapy.; pain; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		Patent presents for consultation for continuing abnormal pain. The symptoms have been progressive since onset. She has been having heartburn, constipation, and diarrhea. She did have a colonoscopy and EGD with another physician in 2017 and has followed u; This is a request for a Pelvis MRI.; The study is being ordered for something other than suspicion of tumor, mass, neoplasm, metastatic disease, PID, abscess, Evaluation of the pelvis prior to surgery or laparoscopy, Suspicion of joint or bone infect	1
Gastroenterology	Disapproval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)	Radiology Services Denied Not Medically Necessary	unknown; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
General/Family Practice	Approval	70336 Magnetic resonance (eg, proton) imaging, temporomandibular joint(s)		This is a request for a temporomandibular joint MRI.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 02/20/2018; There has not been any treatment or conservative therapy.; NECK SPASMS NUMBNESS AND TINGLING MEMORY DIFFICULTIES HEADACHES RIDICULAPATHY; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		Duration of Symptoms: Start: 09/23/2018 &#x0D; &#x0D; Physical Exam Findings: headaches and severe tremors of bilateral hands at rest&#x0D; Neurological&#x0D; Comments&#x0D; severe tremor at rest of both hands and head and it gets worse as she signs her name&#x0D; &#x0D; 1. Headache &#x0D; On; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		headaches continue. shifts from temples, back of head , and jaw; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		History of head injury of physical injury and trauma; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		Patient comes in today complaining of headaches and some facial pain. Patient states he got hit in the face 10 days ago. Has a history of facial reconstruction in 2007; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		patient has facial trauma and worst headache of life; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		Patient is having problems with his right foot and left arm, ankle was swollen 10/05/2018 and has a cold feeling in his whole right foot. left arm seems to be having tremors and shakes that are getting stronger and it happens every day.Can't sleep on his ; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		Patient presents to clinic with chronic headaches, eye pain and history of left temporal osteoma.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Gastroenterology	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		follow up from a mri last 12/2017, pancreatic cyst 1.1 cm cystic lesion, making sure the lesion has not grown; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1

				MESSAGE &#x0D; &#x0D; &#x0D; &#x0D; Patient Name GINA WILLIAMS&#x0D; Date of Birth 05/20/1974&#x0D; Date of Call 10/01/2018 &#x0D; Home phone (479)841-5518&#x0D; Day phone (479)521-1107&#x0D; Alternate phone (479)841-5518&#x0D; _____; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material			
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		Patient presents with continuing epigastric pain. She had an EGD with biopsy that was negative and an ultrasound that showed no findings. She continues to have this chronic pain in the epigastrum area. Dr. Jones is looking for the cause of this ongoing; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		pt had moderate mid upper abdomen tenderness near her old incision site for gall bladder removal; ruling scar tissue, hernia or possible lesions; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		Pt has had weight loss; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		Patient reports cough , wheezing, and shortness of breath but reports no coughing up blood. She reports muscle aches and arthralgias/joint pain. She reports weakness and dizziness but reports no loss of consciousness, no numbness, no seizures, and no head; This study is being ordered for Vascular Disease.; 2011; There has been treatment or conservative therapy.; HEART MURMUR&#x0D; POSSIBLE STROKE; STENTS PUT IN 2011; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		PT HAD A RECENT FALL WITH HEAD INJURY, STILL HAVING PAIN AND DIZZINESS, Hematoma with palpable mass in the left cheek and been blowing blood from left nostril as well . Vision not affected. Advised of further eval with ct scan after XR done . recurrent sp; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		PT WAS RECENTLY SEEN IN ER FOR NUMBNESS IN HER FACE, Left side feels static like, tingling, WITH HEADACHES CAUSING DIFF WITH CONCENTRATION. Bell's Palsy 2007. CURRENT EVERDAY SMOKER. loss of ability to talk think or perform any of her duties.lasted for a; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; The patient is able to have a Brain MRI for evaluation of these symptoms.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; Known or suspected TIA (stroke) with documented new or changing neurologic signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.	6
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The headache's character is unknown.; Headache best describes the reason that I have requested this test.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The patient has a suspected brain tumor.; Known or suspected tumor best describes the reason that I have requested this test.; There are documented neurologic findings suggesting a primary brain tumor.; This is NOT a Medicare member.	2
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The patient has a suspected tumor outside the brain.; Known or suspected tumor best describes the reason that I have requested this test.	2
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.	4

General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; The patient is NOT able to have a Brain MRI for evaluation of these symptoms.	3
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		Virginia is here for apparently seizure on Tuesday. She had twitching of R eye while at work, lasted 3 hrs, associated the R side body numbness. No brain injury or seizure history in the past. She had another episode at night, she complained of RUE numbne; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for new onset of seizures or newly identified change in seizure activity or pattern.	1
General/Family Practice	Approval	70480 Computed tomography, orbit, sella, or posterior fossa or outer, middle, or inner ear; without contrast material			1
General/Family Practice	Approval	70480 Computed tomography, orbit, sella, or posterior fossa or outer, middle, or inner ear; without contrast material		"This request is for orbit,sella, int. auditory canal,temporal bone, mastoid, CT.239.8"; "There is suspicion of bone infection, cholesteatoma, or inflammatory disease.ostct"	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		"This request is for face, jaw, mandible CT.239.8"; "There is a history of serious facial bone or skull, trauma or injury.fct"; Yes this is a request for a Diagnostic CT	9
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		"This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is suspicion of neoplasm, tumor or metastasis.fct"; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; "This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; This is not a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		; This study is being ordered for Inflammatory/ Infectious Disease.; ; It is not known if there has been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been less than 14 days since onset; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		Chronic; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	5
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	15
Gastroenterology	Approval	74150 Computed tomography, abdomen; without contrast material		Want to rule out mass/tumor due to elevated AFP.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient has new lab results or other imaging studies including doppler or x-ray (plain film) findings.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing		This is a request for CT Angiography of the Abdomen and Pelvis.	2
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material			11

Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Had a CT done in august Mcrotriding Pancreatitis; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		Left ocular pain, peri-ocular numbness; "This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; This is not a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		Patient has been seen multiple times this year for recurrent sinusitis and ear infections.; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		patient has facial trauma and worst headache of life; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		PT HAD A RECENT FALL WITH HEAD INJURY, STILL HAVING PAIN AND DIZZINESS, Hematoma with palpable mass in the left cheek and been blowing blood from left nostril as well . Vision not affected. Advised of further eval with ct scan after XR done . recurrent sp; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		This is a request for a Sinus CT.; This study is being ordered for pre-operative evaluation.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are unknown.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been less than 14 days since onset; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		This is a request for a Sinus CT.; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		&lt; Enter answer here - or Type in Unknown If No Info Given. &gt;; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material	; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has NOT been examined twice at least 30 days apart.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material	; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is NOT a palpable neck mass or lump.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material	Mass (back of tongue, right side x 3 week painful ); Sore Throat; and Cough patient has also been treated on two different antibiotics and is not getting any better at this point.; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material	Nausea, vomiting, severe stomach cramps ultrasound does not show any anything but patient has lost weight drastically the past 4 months.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material	Neck is swollen and patient has difficulty in moving neck and neck size is increasing day by day.; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material	Neck: supple and no masses. Lymph Nodes: cervical LAD; right node enlarged 1 in below ear. Nontender, mobile. Firm.; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material	On the left mandibular angle there is a mass approximately the size of half unremarkable which is well circumscribed and freely movable no overlying skin changes including erythema are noted on the right side there is a similar mass in a similar position ; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	patient had colonoscopy 11/14/18 and EGD at the same time. She is complaining that her abdominal pain is worsening. She has been treated with medication but that does not seem to be helping. This test is being ordered to seek the cause of the patients pa; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Patient is a liver transplant recipient. Liver cancer diagnosis while transplanted. Since patient is a transplant recipient tested for recurrence of cancer every 3 to 6 months because of the medications the patient is taking. As the patient has the trans; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Patient seen 11/8/18 for follow up. She has been diagnosed with NAFLD/NASH and has remained stable until now. She complains for chronic diarrhea. Sometimes she has 5-7 loose stools per day and experiences fecal urgency. She complains of abdominal cramping; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	PERIUMBILICAL ABDOMINAL PAIN, MID EPIGASTRIC PAIN WITH VOMITING, HISTORY OF CONSTIPATION TREATED WITH LINZESS AND A BRAT DIET. NAUSEA, VOMITING, WITH REPORTED WEIGHT LOSS, WILL HAVE ENDOSCOPY. FATHER WITH COLON CANCER AT AGE 55. ADHESIONS HISTORY OF.; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Pt has a hx of abd pain and diarrhea and ulcerative colitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1

Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Staging, new diagnosis; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have an amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	4
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for something other than bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have an amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has not been a physical exam.; The patient did not have an amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have an amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	6
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; It is unknown if there has been a physical exam.; The patient did not have an amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; It is unknown if there has been a physical exam.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		Parotid swelling&#x0D; K11.9: Disease of salivary gland, unspecified&#x0D; CT, NECK, SOFT TISSUE, W/ CONTRAST&#x0D; Rule Out: round firm swelling noted anterior to left ear Side: LEFT&#x0D; Parotid swelling&#x0D; K11.9: Disease of salivary gland, unspecified&#x0D; CT, NECK, SOFT TISSU; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; It is not known if there is a palpable neck mass or lump.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		patient has a mass of undetermined source, after an abnormal ultrasound, radiologist recommended a follow-up CT; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is 1 cm or smaller.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		She appears well, vital signs are as noted. Eye exam - pupils equal and reactive, extraocular eye movements intact. ENT exam reveals - 1-2 cm firm tender mass palpated on lower right jaw line.; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; Yes this is a request for a Diagnostic CT	53
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		unknown; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has been examined twice at least 30 days apart.; The lump did not get smaller.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/20/17; There has been treatment or conservative therapy.; dizzy, headaches, vomiting,TIA; meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		PT will no longer work with patient until there is evidence of no arterial occlusion and there has been no effective treatment at this time.; This study is being ordered for Vascular Disease.; 05/14/2018 initial visit for complaint; There has been treatment or conservative therapy.; Severe Vertigo; Pt was given at home exercises to do as well as OTC Meds for nausea without improvement. The patient was then referred to Physical Therapy but then discharged due to inability to complete sessions due to severe Vertigo. There is a concern of Vertebral Art; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the brain.	11
General/Family Practice	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/27/18, There has not been any treatment or conservative therapy.; HIGH BLOOD PRESSURE ON RIGHT SIDE, NO BLOOD PRESSURE DETECTED ON LEFT SIDE; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Vascular Disease.; 11/4/2018; There has been treatment or conservative therapy.; mbr has vision loss in left eye HX optic stroke ultrasound abnormal; ultrasound; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		had a ultrasound of abdomen and carotid us. both were abnormal findings; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.; skin discoloration; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		History of cardiovascular disease, carotid doppler shows 50 to 70 percent stenosis of right ICA.&#x0D; Associated nausea and "motion sickness" suggest vertebral origin.; This study is being ordered for Vascular Disease.; August 2018; There has been treatment or conservative therapy.; Transient loss of vision in right eye, lasting up to 30 minutes; Plavix. Pt is allergic to aspirin. Also being treated for hyperlipidemia with lipitor. Also hypertension with Lisinoprol; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the Neck.	14
General/Family Practice	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)		"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for trauma or injury of the orbit, face or neck soft tissue	1

General/Family Practice	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 6/16/18; There has been treatment or conservative therapy.; vision change, gait; PT evaluation; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	4
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is pre-op or post op evaluation.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient did NOT have an abnormal abdominal Ultrasound, CT or MR study.; Yes this is a request for a Diagnostic CT	4
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is vascular disease.; There is not a known or suspicion of an abdominal aortic aneurysm.; There is an abnormal abdominal/pelvic ultrasound.; This study is not being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the study is infection.; The patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is being requested for abdominal and/or pelvic pain.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT ; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)		history of bells palsy; This study is being ordered for a neurological disorder.; 10/23/18; It is not known if there has been any treatment or conservative therapy.; unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)		Imaging is required to determine the cause of the swelling and pain due to symptoms not getting better with medications.; This study is being ordered for Inflammatory/ Infectious Disease.; 10/31/2018; There has been treatment or conservative therapy.; Swelling to eye and surrounding tissue and severe pain; Patient is on antibiotics and NSAIDs; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)		There is not a suspicion of an infection or abscess.; There is not a suspicion of an infection or abscess.; This examination is being requested to evaluate lymphadenopathy or mass.; This examination is being requested to evaluate lymphadenopathy or mass.; This is a request for an Orbit MRI.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.; There is not a history of orbit or face trauma or injury.	1

General/Family Practice	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)		This is a request for an Orbit MRI; There is a history of orbit or face trauma or injury.	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		He has a remote history of vertebral artery hemorrhage that caused a stroke.; This study is being ordered for a neurological disorder.; 2 to 3 months ago; There has not been any treatment or conservative therapy.; Vision loss, severe spasms in his anterior neck, episodes of vertigo and unable to walk from 4 to 14 days.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		Headache for 5 days, "different" this time. Mild changes in eye position. Tried Epley eye maneuvers, but caused too much vertigo. Father was diagnosed with EP this year.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		Pt has new onset headaches, no history of migraines. Pt has throbbing pain behind the right ear. This gets worse with exercise.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		see notes under N18120500131 - 055760795 **12/5/2018 9:45:23 AM Suzette G Powell, MD Peer-to-Peer Discussion held. Case decision discussed with and understood by Dr. Howard. Synopsis of discussion: Pt has ha that awakes from sleep, case needs to be ; This study is being ordered for a neurological disorder.; 12/03/2018; It is not known if there has been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		seizure; This study is being ordered for a neurological disorder.; on 12/8/18 patient had a syncope episode and started having convulsions; There has not been any treatment or conservative therapy.; passed out, new onset seizure activity; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		Suspected TIA or Stroke; This study is being ordered for a neurological disorder.; 12/04/2018; There has been treatment or conservative therapy.; left sided weakness, numbness tingling; Eliquis 5mg bid, daily aspirin; US carotid doppler; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		Suspected TIA or Stroke; This study is being ordered for a neurological disorder.; 12/4/18; There has been treatment or conservative therapy.; Left sided weakness numbness tingling; Eliquis 5mg bid; daily aspirin; US carotid Doppler; CT head; echo; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		There is an immediate family history of aneurysm.; This is a request for a Brain MRA.	8
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		unknown; This study is being ordered for a neurological disorder.; 9/27/18; There has not been any treatment or conservative therapy.; continuous headache with dizziness, difficulty forming sentences, patient doesn't feel like she is functioning right.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		With regard to the headache, onset was yesterday. The location is primarily behind the left eye. Associated symptoms include nausea and photophobia. She denies vision disturbance. Began with orgasm during intercourse last night; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70547 Magnetic resonance angiography, neck; without contrast material(s)		The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is not a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This is a request for a Neck MR Angiography.; The patient has not had an abnormal ultrasound of the neck.	1
General/Family Practice	Approval	70547 Magnetic resonance angiography, neck; without contrast material(s)		This is a request for a head and neck MR Angiogram.; There is an immediate family history of aneurysm.	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Aneurysm or a Pelvis Mass.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	10
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Aneurysm or a Pelvis Mass.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has fatigue or malaise; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has hearing loss.; The patient did not have an audiogram.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; MIGRAINS; &lt; Describe treatment / conservative therapy here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; for 11 years had this problem; There has been treatment or conservative therapy.; history of pain and tingling on left side of her body, weakness in arm and leg , neck and low back pain as well; was on medication and physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; Is is not known if the patient has a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; It is not known if the doctor notes on exam that the patient has delirium or acute altered mental status.; The patient does not have a Brain CT showing abscess, brain infection, meningitis or encephalitis.; This is NOT a Medicare member.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/2018; There has been treatment or conservative therapy.; nausea&#x0D; dizziness&#x0D; pressure&#x0D; headache; medication&#x0D; lab; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		3 days of double vision and (L) cranial nerve 6th palsy.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient has Bell's Palsy.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		A mass is present in the region the right facial nerve. This may represent a facial nerve schwannoma. An MRI of the facial nerve with contrast is recommended; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		CONFUSION, DIZZINESS; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Discussed with the pt that with the type MRI brain for persistant and change in headache and locked behind right side behind right eye; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		dizziness, tingling, sensory changes, weakness.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/27/2018; There has been treatment or conservative therapy.; weakness, headaches, confusion, blurred vision, difficulty with balance, tingling in arms and legs, numbness in both hands, difficulty grasping with hands, visual blackouts; home exercises, pain meds, and nsaid; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	9
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Unknown; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)			13

Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; July 1, 2018; There has been treatment or conservative therapy.; elevated Lipase (972) abdominal pain; CT scan, Labs, Colonoscopy, EGD; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/20/18; There has been treatment or conservative therapy.; pain; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Attestation signed by Jonathan A. Dranoff, MD at 8/15/2018 9:55 AM&#x0D; &#x0D; Pt with difficult, mixed mesenteric thrombotic disease. Her abdominal pain is almost certainly due to venous backup and/or capsular stretch due to hepatic vein thrombosis. In either cas; This request is for an Abdomen MRI.; This study is being ordered for pre-operative evaluation.; It is not known if surgery is planned for within 30 days.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Frontal temporal headache for 3 weeks, intermittent but severe when occurring, lasts up to 2 to 3 hours then remit; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	He has a remote history of vertebral artery hemorrhage that caused a stroke.; This study is being ordered for a neurological disorder.; 2 to 3 months ago; There has not been any treatment or conservative therapy.; Vision loss, severe spasms in his anterior neck, episodes of vertigo and unable to walk from 4 to 14 days.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	he is able to do everything I ask her to do but has an extended amount of time needed to process a request. Her cranial nerves are intact. She has no current headache or pain with cervical movement. No dizziness or nystagmus noted. She is concerned th; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Headache for 5 days, "different" this time. Mild changes in eye position. Tried Epley eye maneuvers, but caused too much vertigo. Father was diagnosed with EP this year.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	headache, constant x's 2 months , triptan medication did not help. does not feel like her normal migraines, feels like something is "sloshing behind her eyes"&#x0D; need MRI to /o CVA vs space occupying lesion.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	HEENT Present- Headache (SEVERE HAEADACHE FOR THE PAST 5 DAYS CONSTANT GOES TO BED WITH IT AND WAKES WITH IT HAS NOT WOKE HER UP BUT STILL THERE IF SHE WAKES UP NEVER HAD HEADACHE LIKE THIS BEFORE NAUSEATED WITH HEADACHE NO VOMITING HAS TAKEN 800 IBUPROFE; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		Change in medication; This study is being ordered for Inflammatory/ Infectious Disease.; Unknown; There has been treatment or conservative therapy.; Crohns disease; Rx medication ABX; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		Patient was referred by her PCP to follow up on abnormal CT. Her PCP states she has dilatation of extrahepatic bile duct and was sent to Dr. Patel for a GI evaluation. She is being treated currently for IBS. She presented to Dr. Patel with abdominal pain.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		Patient's liver functions are showing elevated and patient has lesion of liver. Would like to look closer.; This request is for an Abdomen MRI; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		THIS PT PRESENTS WITH A LONG HX OF CROHN'S DX. PT HAS HAD LONG HX OF CROHNS. PT HAS HAD SEVERAL SURGERIES FOR THIS. WE ARE WANTING TO ORDER A MRI TO AVIOD RADATION.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; abd pain	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; Suzanne Davis is seen today for a follow-up visit. We have followed the patient for evaluation and treatment of chronic diarrhea. Diarrheal symptoms have improved since last visit. Bowel movements are now occurring 1 - 3 time(s) per day. The patient is	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is a gastroenterologist, urologist, or infectious disease specialist."; There is hepatic cirrhosis with multiple areas of hypoattenuating&#x0D; nodularity. Given the lack of arterial enhancement, I suspect&#x0D; regenerative and dysplastic nodule formation. However, there is an&#x0D; elevated alpha-fetoprotein lab value. I recommend a pre-	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected vascular disease.; The ordering physician is a surgeon.; evaluate for portal hypertension and/or shunt	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Here today for medicine refills but admits to recent relentless h/a that has caused nausea and vomiting x3 in the last twelve hours with visual disturbances, and limiting activity. Pain is described as a throbbing pound to bilateral temples and forehead w; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		History of head trauma, dizziness, repeated falls; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		history of non functioning pituitary micro adenoma, Follow up; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Hx of neurofibromatosis and -s/p surgery 2012 -pilocystic astrocytoma left parietal lobe, Has been having recurrent headaches ,Not followed recently with neurosurgery, Seen in august in Er for severe HA , ct scan done at this time . Due for repeat MRI ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		loss of fine motor skills, confusion, right upper extremity weakness, neurological deficits. .; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		mass on head, 9x8 mil.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Metastatic ca to whole body facial numbness; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for Known Tumor; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon.";	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for Known Tumor; This study is being ordered for follow-up.; The patient is undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Patient listed for a liver transplant undergoing treatment for hepatocellular carcinoma. Imaging is to restage tumor after treatment.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; gastritis located in the stomach antrum	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for organ enlargement.; There is an ultrasound or plain film evidence of an abdominal organ enlargement.; history of hypertension, cholecystectomy, fatty liver disease was diagnosed to have sphincter of Oddi dysfunction and referred to Dallas where she underwent a sphincterotomy in 2011, 2012 and 2017 is in the clinic for a follow up. per my previous note she	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for organ enlargement.; There is no ultrasound or plain film evidence of an abdominal organ enlargement.; Shown on MRI organ enlargement htn gastroesophageal varices 4 cm cyst in kidney	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for pre-operative evaluation.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; Patient being evaluated for listing for a liver transplant. Pre-op exam.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;"	2
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" Dx: (1) external mass pushing in on anti-mesenteric side of the lumen in the 2nd-3rd portion of the duodenum distal to the ampulla r/o pancreatic mass and abdominal mass	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" Dx: (1) external mass pushing in on anti-mesenteric side of the lumen in the 2nd-3rd portion of the duodenum distal to the ampulla r/o pancreatic mass and abdominal mass.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Migraines stress; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		MRI Recommended after CT scan; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; It is not known if there is a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		None; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		None; This study is being ordered for Vascular Disease.; 8 months ago; There has not been any treatment or conservative therapy.; Mild hearing loss tinnitus right sided bruit; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		PATIENT HAS A FAMILY HISTORY OF BRAIN CANCER.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		patient has a history of aneurysm; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		PATIENT HAS HAD COMPLAINTS OF HEADACHES WITH LEFT TEMPLE PAIN THAT COME AND GO SINCE LAST OFFICE VISIT IN MAY OF THIS YEAR. SHE HAS BEEN ON TOPAMAX AND STEROIDS IN THE RECENT MONTHS BUT IS NOT HELPING WITH RELIEF; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" Further evaluation with AB/US on 5.16.2018 showed increased echogenicity of the liver may represent hepatic parenchymal disease and/or hepatic steatosis; no focal hepatic mass lesion, biliary ductal dilation, or significant ascites; no splenomegaly. Labs	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" MRI done 10/2018. Elev. liver enzymes.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" THIS PT HAD AN ABD U/S THAT WAS ABNORMAL. PT HAS A CYST OF THE PANCREAS, POLYPS ON THE GALLBLADDER AND ABNORM LFT'S. REQUESTING MRI TO EVALUATE AND TREAT.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" Urinary loss of control.weight loss (3 lbs).&#x0D; easy bruising and clotting problems.Mass noted on sono. Elevated AFP&#x0D; &#x0D; Allergies: Y&#x0D; Anemia: Y&#x0D; Cancer: Y - breast&#x0D; Depression: Y&#x0D; High Cholesterol: Y&#x0D; Hyperlipidemia: Y&#x0D; Hypertension: Y&#x0D; Liver Disease: Y	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" ascites on CT, possible adenomas	1

Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Pt has a mass on the upper left kidney	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.;	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.;; ELEVATED AFP	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Patient has not had regular menses since age 14. Pt states she took birth control around the age of 14 and stopped taking it, and has not had a regular period since. Admits pre-menstrual symptoms like cramping, but no bleeding. FSH, LH, and prolactin level; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		patient has recurrent migraines and has a history of head trauma; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Patient is experiencing dizziness 2 weeks, fatigue, losing balance and headache and spouse stuttering; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Patient is having memory deficit issues and gait is unsteady; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head occurred more than 1 week ago.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Patient is progressively getting more dizzy and has a family history of brain tumors.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Positive for loss of consciousness. Negative for dizziness; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		right side weakness and headaches, trouble getting around affecting knee, problems with bowels; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.;; Pt has liver lesion and needs a follow up abdominal MRI.	1
Gastroenterology	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		Unspecified cirrhosis of liver abnormal rad findings dx imaging unsp testicle; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
Gastroenterology	Approval	74261 Computed tomographic (CT) colonography, diagnostic, including image postprocessing; without contrast material		; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	3

Gastroenterology	Approval	74261 Computed tomographic (CT) colonography, diagnostic, including image postprocessing; without contrast material		THIS PT IS HIGH RISK SEDATION. HE IS IN RIGHT HEART FAILURE AND IS ON LONG TERM US OF ANTICOAGULANTS. PT HAD A PERSONAL HX OF COLON POLYPS AND A PERSONAL HX OF CANCER. REQUESTING CT COLON TO EVALUATE AND TREAT.; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Approval	75571 Computed tomography, heart, without contrast material, with quantitative evaluation of coronary calcium		Patient being evaluated for listing for a liver transplant. CT is to evaluate for cardiac abnormalities before listing patient for a liver transplant.; This is a request for a CT scan for evaluation of coronary calcification.	1
Gastroenterology	Approval	75571 Computed tomography, heart, without contrast material, with quantitative evaluation of coronary calcium		Patient being evaluated for listing for a liver transplant. Transplant Hepatologist and Transplant Surgeon request this CT Coronary Calcification Scan as part of cardiac evaluation for abnormal cardiac issues.; This is a request for a CT scan for evaluation of coronary calcification.	1
Gastroenterology	Approval	78813 Positron emission tomography (PET) imaging; whole body		This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made); This study is being requested for Colo-rectal Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
Gastroenterology	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
Gastroenterology	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)			5
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		Patient was referred by her PCP to follow up on abnormal CT. Her PCP states she has dilatation of extrahepatic bile duct and was sent to Dr. Patel for a GI evaluation. She is being treated currently for IBS. She presented to Dr. Patel with abdominal pain.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		Patient with Hepatitis C and needing to begin therapy. Had abdominal ultrasound on 8/31 that showed dilated common bile duct and calcified polyp vs gallstone. Needing to rule out any other issues before treating Hepatitis C.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)		Pt is having severe LT upper quad pain, HX of recurring pancreatitis; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.	1
Gastroenterology	Disapproval	70490 Computed tomography, soft tissue neck; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; It is unknown if there is a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	2

Gastroenterology	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	female who is referred for evaluation of abdominal pain. The pain is located chest, entire abdo, radiating to her back and arms. The pain is described as sharp, and is 8/10 in intensity. Onset was several months ago, Starting in July, after the pt underw; This study is being ordered for Inflammatory/ Infectious Disease.; 07/2018; There has been treatment or conservative therapy.; Symptoms have been gradually worsening since. Other symptoms with the abdo pain: &#x0D; 1. Inability to eat solid food&#x0D; 2. odonophagia&#x0D; 3. Chills/fever&#x0D; 4. Diffuse body ache&#x0D; 5. Low energy &#x0D; 6. Diarrhea; Pt underwent repeat EGD 9/6/18, Bx showed candida esophagitis. Her original EGD/colon on 7/12 shoed 3 sessile serrated adenoma in cecum/ascending colon. Upper third esophageal Bx showed candida esophagitis. She was treated with diflucan x 14 days but the; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Disapproval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Radiology Services Denied Not Medically Necessary	Ultrasound EGD; This study is being ordered for trauma or injury.; 10/31/2018; There has not been any treatment or conservative therapy.; Intense pain radiating from back to abdomen; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Disapproval	74150 Computed tomography, abdomen; without contrast material	Radiology Services Denied Not Medically Necessary	ABNORMAL CONTURE OF LIVER SUSPICIOUS FOR SCEROSIS; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74150 Computed tomography, abdomen; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	This is a request for CT Angiography of the Abdomen and Pelvis.	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	female who is referred for evaluation of abdominal pain. The pain is located chest, entire abdo, radiating to her back and arms. The pain is described as sharp, and is 8/10 in intensity. Onset was several months ago, Starting in July, after the pt underw; This study is being ordered for Inflammatory/ Infectious Disease.; 07/2018; There has been treatment or conservative therapy.; Symptoms have been gradually worsening since. Other symptoms with the abdo pain: &#x0D; 1. Inability to eat solid food&#x0D; 2. odonophagia&#x0D; 3. Chills/fever&#x0D; 4. Diffuse body ache&#x0D; 5. Low energy &#x0D; 6. Diarrhea; Pt underwent repeat EGD 9/6/18, Bx showed candida esophagitis. Her original EGD/colon on 7/12 shoed 3 sessile serrated adenoma in cecum/ascending colon. Upper third esophageal Bx showed candida esophagitis. She was treated with diflucan x 14 days but the; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	has chrones disease.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		States the HA is changingHad MRI last week&#x0D; Patient to be evaluated for tension-type headache, unspecified, not intractable. Onset was 25 days ago. The location is primarily over the crown. The pain radiates to the pulses with heart rate. He is unable; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		The Chief Complaint is: Problems with speech, tiredness, forgetful.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient is experiencing fatigue or malaise.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This is a request for an Internal Auditory Canal MRI.; There is a suspected Acoustic Neuroma or tumor of the inner or middle ear.	4
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is not a suspected cholesteatoma of the ear.; The patient has not had a recent brain CT or MRI within the last 90 days.; There are neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.	3
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	12
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	24
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a "thunderclap" or the worst headache of the patient's life.	10
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient's life (within the last 3 months).	13
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	persistent abdominal pain, multi visit to ER, normal colonoscopy and EGD, elevated Lipase; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	2
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	Pt having severe LLQ abd pain. Need to rule out diverticulitis.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	Pt is having nausea and vimoiting with weight loss. She is in end stage renal diseae on hemodialysis with recent pulmonary edema. She had recent EGD that wa unremarkable, weight oss and protein calorie malnutrition anorexia.; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	rectal bleeding; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	13

Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.	13
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	2
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has undergone treatment for multiple sclerosis.	2
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has been a previous Brain MRI completed.; The brain MRI was abnormal.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.	13
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are not physical findings or laboratory values indicating abnormal pituitary hormone levels.; There has not been a previous Brain MRI completed.; This is NOT a Medicare member.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	7
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	2
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	4
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.	5
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Type 2 diabetes mellitus without complication, without long-term current use of insulin +1 more &#x0D; Dx; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack); This study is NOT being ordered as a 12 month annual follow up.	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		visual changes , numbness and tingling; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		went to ER with worse headache ever 10/10 pain, not relieved by pain medication, ct showed abnormality in the carotid artery; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Will FAX; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; It is unknown if there has been a physical exam.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has not been a physical exam.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient did NOT have an abnormal abdominal Ultrasound, CT or MR study.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	8
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	3

General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	"There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is radiologic evidence of a lung abscess or empyema.; It is unknown if there is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; There is no radiologic evidence of mediastinal widening.; It is not known if there is physical or radiologic evidence of a chest wall abnormality.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; It is unknown if there is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2017; There has been treatment or conservative therapy.; 10mm pulmonary nodule&#x0D; cervical spine pain&#x0D; lumbar spine pain; Naproxen, Tylenol, tramadol; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; She has been coughing up blood since 10/18/2018 and she has had the knot since 04/2018 but it has gotten bigger and is painful to the patient.; It is not known if there has been any treatment or conservative therapy.; Coughing up blood. Knot that has gotten bigger and is painful.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	3.6 mm lower lobe nodule; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.; Yes this is a request for a Diagnostic CT	4
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Chest pain describes the reason for this request.; An abnormal imaging (xray) finding led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema).; Yes this is a request for a Diagnostic CT	2

General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Chest pain describes the reason for this request.; Initial staging prior to treatment is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Chest pain describes the reason for this request.; 'None of the above' were related to the suspicion of cancer in this patient.; This is a request for a Chest CT.; This study is being requested for suspected cancer or tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Chest pain describes the reason for this request.; This study is being requested for an unresolved cough; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Chest pain describes the reason for this request.; This study is being requested for suspicion of pulmonary embolism (PE); This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	5
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; It is unknown if the patient had an Ultrasound.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	12
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT	3
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	2
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74176 Computed tomography, abdomen and pelvis; without contrast material	Radiology Services Denied Not Medically Necessary	To rule out bowel obstruction; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is NO suspicion of metastasis.	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Chest x-ray was performed on 12/4; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Coughing up blood (hemoptysis) describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	9
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Faxing OV notes; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Jaw pain 12-1-2018 Office visit 12-11-2018 CT of Chest is because of nodule found on X ray 30 pack a year smoker OV of 12-11-2018; There has not been any treatment or conservative therapy.; Chronic Jaw Pain hurts patient to Chew trouble eating due to pain 30 pack a year smoker and lesion/nodule shown on X ray; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Follow up CT to look at pulmonary nodules found on previous CT from May 2018, pt has seen Pulmonologist for work up and they also recommend follow up CT to be sure the nodules are stable as they show they have increased in size from the previous CT; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		monitoring of known breast ca restaging while undergoing tx.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; Surveillance of a known cancer following treatment is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	7
Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	Liver nodule on ultrasound. Pain. Liver panel was normal.; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	MRI and blood work suggested cirrhosis so he needs a follow up MRI recommended; This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; There are NO physical findings or abnormal blood work consistent with peritonitis, pancreatitis or appendicitis.; It is unknown if there is active or clinical findings of ulcerative colitis, bowel inflammation or diverticulitis.	1
Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	patient present today for a follow up visit. He states he continues to suffer from upper right quad pain and reports a pressure like sensation. his intestinal isoenzyme levels remain high and so does alkaline phosphatase isoenzyme levels. Concerned that t; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	restaging from treatment; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; none	1
Gastroenterology	Disapproval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	Radiology Services Denied Not Medically Necessary	Ultrasound was done in August, normal, however the MRCP reasoning is to check the pancreas is to ensure that there isn't a stone or anything that was missed; Physician is wanting to ensure the pancreas is okay considering the change in medication; patient; This study is being ordered for Inflammatory/ Infectious Disease.; September 26, 2018; There has been treatment or conservative therapy.; Onset severe abdominal pain; patient has multiple times higher than normal lipase; Unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
Gastroenterology	Disapproval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for being evaluated prior to a noncardiac surgical procedure.; Abnormal findings on diagnostic imaging of other specified body structures	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; This study is being requested for 'none of the above'; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	4

General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		'None of the above' describes the reason for this request.; This study is being requested for suspicion of pulmonary embolism (PE); This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		none; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Patient has a pulmonary nodule.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Patient is due for a f/u chest CT to evaluate a 6mm nodule discovered on her last chest CT!; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Pre-operative evaluation describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		PT HAD A CT 6 MONTHS AGO THAT SHOWED A NODULE AND THE REPORT REQUESTED A FOLLOW UP CT IN 6 MONTHS TO MAKE SURE THERE WAS NO CHANGES, PTS PRIMARY INS OK'D THE CT, AMBETTER IS PTS 2 INS; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		PT HAD A CT DONE IN 9/2017 THAT SHOWED A 8MM NODULE, PT HAS HAD SOME SHORTNESS OF BREATH RECENTLY; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Pt has a CT Chest in Sept 2017 which was abnormal with pulmonary nodules and suspicious for Sarcoidosis. The pt was to have a repeat CT in 6 months and it was never followed through. The pt now is having SOB, chest pain again.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
Gastroenterology	Disapproval	75635 Computed tomographic angiography, abdominal aorta and bilateral iliofemoral lower extremity runoff, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the abdominal arteries.	1
Gastroenterology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)	Radiology Services Denied Not Medically Necessary	Patient being evaluated for a liver transplant. Patient has cardiac risk factors, testing is to evaluate cardiac abnormalities.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; The patient has had a stress echocardiogram within the past eight weeks.	1
Gastroenterology	Disapproval	58037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)	Radiology Services Denied Not Medically Necessary		1
Gastroenterology	Disapproval	58037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)	Radiology Services Denied Not Medically Necessary	none; This study is being ordered for Inflammatory/ Infectious Disease.; 09/22/2018; There has been treatment or conservative therapy.; recurrent episodes of upper quadrant pain following gallbladder removal in 2010; medication, hospital stay for IV fluids, etc; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	4
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1

General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		SHORTNESS OF BREATH; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		There is radiologic evidence of mediastinal widening.; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		This is a request for a Thorax (Chest) CT.; Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		This is a request for a Thorax (Chest) CT.; Abnormal imaging test describes the reason for this request.; Yes this is a request for a Diagnostic CT	5
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		This is a request for a Thorax (Chest) CT.; 'None of the above' describes the reason for this request.; This study is being requested for an unresolved cough; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		X-RAY WAS ABNORMAL; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		CT calcium scoring CT(non contrast study)shows there is dilatation of the ascending thoracic aorta,measuring up to 5 cm caliber. need this study for proper measurement of aortic dilatation .; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known or Suspected Congenital Abnormality.; The abnormality is of a cardiac nature.; There is no known or suspected coarctation of the aorta.; There is no other type of arch anomaly.; Yes, this is a request for a Chest CT Angiography.	1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material		There are no documented clinical findings of immune system suppression.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; None of the options listed is the reason for the study.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing cervical neck pain not improving despite treatment.	1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material		; This study is being ordered for a neurological disorder.; 07/2018; There has not been any treatment or conservative therapy.; Bilateral shoulder/arm pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has Bell's Palsy.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		assault hit in head several times 3 weeks ago dizziness forgetfulness; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		concussion injury of brain, symptoms include vision changes, memory loss and speech changes.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		evaluation of injury; This study is being ordered for trauma or injury.; 12/3/2018; There has been treatment or conservative therapy.; pain; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		fell one month ago and hit head having headaches nausea double vision; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1

General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	Gastrointestinal: Positive for vomiting. &#x0D; Genitourinary: Negative for dysuria. &#x0D; Musculoskeletal: Positive for arthralgias and back pain. &#x0D; Skin: Negative for color change. &#x0D; Neurological: Positive for dizziness, light-headedness and headaches. &#x0D; Psychia; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	Mental status changes and seizures; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for new onset of seizures or newly identified change in seizure activity or pattern.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	none; This study is being ordered for trauma or injury.; 11/3/18; There has not been any treatment or conservative therapy.; Pt has weakness in left hand, numbness and severe headache left shoulder and neck pain limited ROM in the neck tenderness of per spinal c-spine, and lateral left neck; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	Patient fell and hit the right side of head and ear and pain is getting worse. Patient also lost consciousness; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material	; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material	arm numbness/pain &#x0D; radiculopathy, cervical region; There are no documented clinical findings of immune system suppression.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; None of the options listed is the reason for the study.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is not experiencing cervical neck pain not improving despite treatment.	1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.	2
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to trauma or acute injury within 72 hours.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Bowel or bladder dysfunction.	1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material	The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.	2
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material	This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to follow-up surgery or fracture within the last 6 months.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; There is a reason why the patient cannot have a Cervical Spine MRI.	2
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material	This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; The patient is experiencing or presenting symptoms of asymmetric reflexes.; There is a reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material	Unknown; This study is being ordered for Congenital Anomaly.; 12/7/18; There has not been any treatment or conservative therapy.; cervical neck pain with swelling around T7 and T1, on her C spine x-ray there's an additional vertebral body; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material	Unknown; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	Patient states that she has noticed a lump in the back of her head that swells up when she has a migraine. She noticed this about 4-5 months ago. When she does not have a headache, she states that she cannot feel the lump. She complains of pain to the tou; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1

General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	Patient thought she was in her bedroom but ended up on the floor of her bathroom after several hours but didn't remember how she had gotten there, what happened in bathroom, and she got sick right after.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	Pediatric Headache; Reported by patient.; Location: right side.; Quality: worst headache ever.; Severity: pain level 7/10.; Duration: started: (10/28/2018); constant.; Onset/Timing: worse; abrupt onset; still present; wakes from sleep.; Context: related to; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	Positive for dizziness, light-headedness and headaches; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for a previous stroke or aneurysm.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	This is a request for a brain/head CT.; Changing neurologic symptoms best describes the reason that I have requested this test.	33
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	This is a request for a brain/head CT.; It is unknown if the study is being requested for evaluation of a headache.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	This is a request for a brain/head CT.; Known or suspected blood vessel abnormality (AVM, aneurysm) with documented new or changing signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	This is a request for a brain/head CT.; Known or suspected infection best describes the reason that I have requested this test.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	This is a request for a brain/head CT.; Known or suspected inflammatory disease best describes the reason that I have requested this test.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material	This is a request for a brain/head CT.; 'None of the above' best describes the reason that I have requested this test.; None of the above best describes the reason that I have requested this test.	5
General/Family Practice	Approval	72128 Computed tomography, thoracic spine; without contrast material		1
General/Family Practice	Approval	72128 Computed tomography, thoracic spine; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/27/2018; There has been treatment or conservative therapy.; Pain, tenderness, ROM, stiffness; OTC medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72128 Computed tomography, thoracic spine; without contrast material	The patient does not have any neurological deficits.; This is a request for a thoracic spine CT.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72131 Computed tomography, lumbar spine; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/21/2018; There has not been any treatment or conservative therapy.; pain, swelling, trauma r lbp; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72131 Computed tomography, lumbar spine; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/27/2018; There has been treatment or conservative therapy.; Pain, tenderness, ROM, stiffness; OTC medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72131 Computed tomography, lumbar spine; without contrast material	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.; Yes this is a request for a Diagnostic CT	4

General/Family Practice	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.; Yes this is a request for a Diagnostic CT	13
General/Family Practice	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material			10
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; right arm; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness to extremities with grips, previous imaging showed spinal stenosis.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; for 11 years had this problem; There has been treatment or conservative therapy.; history of pain and tingling on left side of her body, weakness in arm and leg , neck and low back pain as well; was on medication and physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness, tingling, and weakness of left arm and fingers; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This study is being ordered for a neurological disorder.; 07/2018; There has been treatment or conservative therapy.; Ataxic gait, cervical radiculopathy, urinary retention with incomplete bladder emptying; physical therapy, epidural steroid injection, nsaid, opioid analgesics; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/14/2018; There has been treatment or conservative therapy.; Back and Neck Pain; Physical Therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Abn reflexes radiating pain down the left leg; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Back pain; Rx medication anti inflammatory meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Acute neck pain on the rt side. Also low back pain. X Rays were done and requested further imaging.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Headaches, dizziness. symptoms are worsening, despite treatment.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/04/2017; There has been treatment or conservative therapy.; Pain, decreased mobility, swelling, tingling in the arms and legs.; Pain medicine, PT, Home exercises; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	No improvement and increased pain. Headache, neck stiffness, bilateral upper extremity paresthesia, numbness, frequently dropping things; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	pain increases with almost any movement; This study is being ordered for trauma or injury.; 11-5-2018; There has been treatment or conservative therapy.; cervical pain radiating into left arm and pain described as aching, burning, tingling; lumbar pain radiating into right hip and pain described as aching, sharp, stabbing; trigger point injections/chiro treatment/physical therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Patient is a 38-year-old female who comes in today for a follow-up regarding an MVA she had about 2 weeks ago. She said approximately 6-7 days after the accident she started to have numbness in her index and middle finger on the right. She says that occas; This study is being ordered for trauma or injury.; Patient is a 38-year-old female who comes in today for a follow-up regarding an MVA she had about 2 weeks ago. She said approximately 6-7 days after the accident she started to have numbness in her index and middle finger on the right. She says that occas; There has been treatment or conservative therapy.; Patient is a 38-year-old female who comes in today for a follow-up regarding an MVA she had about 2 weeks ago. She said approximately 6-7 days after the accident she started to have numbness in her index and middle finger on the right. She says that occas; antiinflammatory which are not helping she has had numbness on both side of the body. she has had headaches, has been given valium with does not help at all; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		Patient is having ROM of motion issues along with spasms of her neck. C-Spine: Myofascial trigger points are present along with trapezius tenderness bilaterally. Patient has been to chiropractor and had massage on multiple occasions without relief.; This study is being ordered for a neurological disorder.; Patient reports pain started in neck on 09/12/2018.; There has been treatment or conservative therapy.; Patient complains of acute worsening of chronic conditions. Pain is describe as sharp, shooting, burning pain. Radiation of pain bilateral, constant and to bilateral arms. Patient also complains of tingling/numbness down both arms.&#x0D; Patient reports bac; Patient has used NSAIDs for 8 weeks, physical therapy for 6 weeks twice a week with worsening symptoms. Patient has also used muscle relaxers, rest, ice and heat all with no relief. Pain is worsening.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		patient was in a MVA; This study is being ordered for trauma or injury.; 9/6/2018; There has been treatment or conservative therapy.; neck pain that radiates to rt shoulder, decreased range of motion with neck and rt shoulder, neck stiffness, decreased forward fluxation neck left and rt rotation; pain medications, OTC medications, rest; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; Post-operative evaluation best describes the reason that I have requested this test.; None of the above best describes the reason that I have requested this test.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; Recent (in the past month) head trauma with neurologic symptoms/findings best describes the reason that I have requested this test.	42
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.	8
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The patient has a new onset of a headache within the past month; Headache best describes the reason that I have requested this test.	9
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The patient has the worst headache of patient's life with onset in the past 5 days; Headache best describes the reason that I have requested this test.; This is NOT a Medicare member.	11
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is described as a "thunderclap" or the worst headache of the patient's life.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; The patient is NOT able to have a Brain MRI for evaluation of these symptoms.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	3
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.	3
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for evaluation of known tumor.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		unknown; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Approval	70450 Computed tomography, head or brain; without contrast material		Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/29/2018; There has not been any treatment or conservative therapy.; severe headache described as thunderclap makes her vomit.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70480 Computed tomography, orbit, sella, or posterior fossa or outer, middle, or inner ear; without contrast material		"This request is for orbit,sella, int. auditory canal,temporal bone, mastoid, CT.239.8"; "There is suspicion of bone infection, cholesteatoma, or inflammatory disease.ostct"; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		"This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is not a suspicion of bone infection, [osteomyelitis].fct"; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		"This request is for face, jaw, mandible CT.239.8"; "There is not a history of serious facial bone or skull, trauma or injury.fct"; "There is not a suspicion of neoplasm, tumor or metastasis.fct"; "There is suspicion of bone infection, [osteomyelitis].fct"; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		; This study is being ordered for sinusitis; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		; This study is being ordered for trauma or injury.; 10/18/2018; There has not been any treatment or conservative therapy.; Pain ,seizures, confusion; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		Failed all prescription medications, having intractable headaches. constant pressure behind eyes and face; This study is being ordered for sinusitis; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		This is a request for a Sinus CT.; This study is being ordered for sinusitis; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	4
General/Family Practice	Approval	70486 Computed tomography, maxillofacial area; without contrast material		This study is being ordered for a known or suspected tumor; This is a request for a Sinus CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		6-7 cm mass posterior base of neck , severe neck pain for several months; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		Pt c/o numbness in his right hand and not able to pick anything up&#x0D; &#x0D; Xray C-spine findings&#x0D; FINDINGS:&#x0D; There are degenerative disc changes at C2-C3, C3-C4, C4-C5, C5-C6, and&#x0D; C6-C7. These changes are greatest at C4-C5 and C5-C6. There are&#x0D; degenerative c; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Neurological: He is alert and oriented to person, place, and time. He displays abnormal reflex. He exhibits abnormal muscle tone (right hand and forearm weakness. dropping things. ).&#x0D; Musculoskeletal: Normal range of motion. He exhibits tenderness (wea; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		Pt has been having this pain for over 2 months and does not get off of work often so we are trying to rule out something more extensive due to not getting relief and it becoming worse; This study is being ordered for trauma or injury.; 2 months ago; There has been treatment or conservative therapy.; Neck pain, Numbness and tingling in right shoulder, unable to use right shoulder most days; Pt has been given pain medication and muscle relaxers to help with relief. Pt states it continues to get worse; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		Pt is in chronic pain for over a year; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		Pt suffers with lumbago w sciatica.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		set up with neurosurgery evaluation; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; chiari 1 malformation	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	2

General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.	6
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		lesion on the left side of her neck at the inferior angle of the jaw. Patient previously had a benign tumor of the parotid gland that was resected on 3 different occasions Initially in Ecuador, followed by a second surgery in Ecuador and then a surgery; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The size of the neck mass is unknown.; The neck mass has NOT been examined twice at least 30 days apart.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		Needs further evaluation for lymphoma; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		pt has 2 masses on the neck that are preventing blood flow, suspected lymphoma in lungs, pt has been short of breath; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		solitary thyroid nodule.; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is NOT a palpable neck mass or lump.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		This is a request for neck soft tissue CT.; There has been recent trauma or other injury to the neck.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.; Yes this is a request for a Diagnostic CT	5
General/Family Practice	Approval	70490 Computed tomography, soft tissue neck; without contrast material		This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/27/18; There has not been any treatment or conservative therapy.; HIGH BLOOD PRESSURE ON RIGHT SIDE, NO BLOOD PRESSURE DETECTED ON LEFT SIDE; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Vascular Disease.; 11/4/2018; There has been treatment or conservative therapy.; mbr has vision loss in left eye HX optic stroke ultrasound abnormal; ultrasound; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing		History of cardiovascular disease, carotid doppler shows 50 to 70 percent stenosis of right ICA.&#x0D; Associated nausea and "motion sickness" suggest vertebral origin.; This study is being ordered for Vascular Disease.; August 2018; There has been treatment or conservative therapy.; Transient loss of vision in right eye, lasting up to 30 minutes; Plavix. Pt is allergic to aspirin. Also being treated for hyperlipidemia with lipitor. Also hypertension with Lisinoprol; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	70498 Computed tomographic angiography, neck, with contrast material(s), including noncontrast images, if performed, and image postprocessing		PT will no longer work with patient until there is evidence of no arterial occlusion and there has been no effective treatment at this time.; This study is being ordered for Vascular Disease.; 05/14/2018 initial visit for complaint; There has been treatment or conservative therapy.; Severe Vertigo; Pt was given at home exercises to do as well as OTC Meds for nausea without improvement. The patient was then referred to Physical Therapy but then discharged due to inability to complete sessions due to severe Vertigo. There is a concern of Vertebral Art; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)			1
General/Family Practice	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)		"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of neoplasm, tumor or metastasis	4
General/Family Practice	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)		"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass	1
General/Family Practice	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)		Metastatic ca to whole body facial numbness; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)		There is not a suspicion of an infection or abscess.; This examination is being requested to evaluate lymphadenopathy or mass.; This is a request for an Orbit MRI.; There is not a history of orbit or face trauma or injury.	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; MIGRAINS; &lt; Describe treatment / conservative therapy here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/2018; There has been treatment or conservative therapy.; nausea&#x0D; dizziness&#x0D; pressure&#x0D; headache; medication&#x0D; lab; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		None; This study is being ordered for Vascular Disease.; 8 months ago; There has not been any treatment or conservative therapy.; Mild hearing loss tinnitus right sided bruit; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		R/O TRANSECETED ARTERY; This study is being ordered for trauma or injury.; 12/10/2018; There has not been any treatment or conservative therapy.; HEADACHE, NAUSEA, VOMITING, DIFFICULTY SPEAKING, CHEST PRESSURE, TROUBLE BREATHING, DIZZINESS, SHAKING; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		see attached; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	1
General/Family Practice	Approval	70544 Magnetic resonance angiography, head; without contrast material(s)		This is a request for a head and neck MR Angiogram; There is an immediate family history of aneurysm.	1
General/Family Practice	Approval	70547 Magnetic resonance angiography, neck; without contrast material(s)		The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This is a request for a Neck MR Angiography.	2

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material			2
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.	8
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; This patient is being referred to a Neurosurgeon and they are needing a current MRI. See attached note	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.	2
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	16
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; It is not known if there is evidence of tumor or metastasis on bone scan or x-ray.; Suspected Tumor with or without Metastasis;	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; Yes, the patient is demonstrating unilateral muscle wasting.; yes, there are documented clinical findings of Multiple sclerosis.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is unknown if the patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing fatigue or malaise.	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head occurred more than 1 week ago.	2
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/1/2018; There has been treatment or conservative therapy.; mbr has migraine where vision was lost completely three different times - R/O tumor; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 10-11-18; There has not been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Neurological deficits; Neck Mass/Pain&#x0D; Reported by patient.&#x0D; Onset/Timing: initially started 3months ago &#x0D; Quality: no change since last visit &#x0D; Duration: constant &#x0D; Severity: moderate; limits daily activities&#x0D; Location: posterior neck pain that radiates down the right arm to t; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; None of the above; &lt;Enter Additional Clinical Information&gt;; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Pre-Operative Evaluation; Surgery is scheduled within the next 4 weeks.; The last Cervical Spine MRI was not performed within the past two weeks.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	15
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	10
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head was between 24 hours and 1 week ago.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		; This study is being ordered for a neurological disorder.; 12/2017; There has not been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		chronic headache, facial nerve issues; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		Upper Extremity weakness; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Decreased strength of upper extremity and chronic pain with cervical pain.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.; Stated that he was having pain in his testicles, Ultrasound and MRI of the Lumbar spine abnormal imaging.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is recent evidence of a thoracic spine fracture.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; It is not known if the patient has seen the doctor more then once for these symptoms.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		; This study is being ordered for a neurological disorder.; 07/2018; There has been treatment or conservative therapy.; Ataxic gait, cervical radiculopathy, urinary retention with incomplete bladder emptying; physical therapy, epidural steroid injection, nsaid, opioid analgesics; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; before 11/21/2018; There has been treatment or conservative therapy.; ; advil, tramadol, muscle relaxers, steroid injection, worse with stretching; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		ct of head without contrast shows erosions of the inner table of the skull with a radiolucent lesion is identified to the left of midline that measures 2.5cm in diameter with thinning of the calvarium to the right of the midline across a diameter of 2.6cm; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is not known if the headache is described as a "thunderclap" or the worst headache of the patient's life.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is a new and sudden onset of headache (less than 1 week) not improved by pain medications.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		DIZZINESS SHORTNESS OF BREATH BP ISSUES; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Documentation in the office note states pt reports feeling of passing out and some dizziness. Pt is being referred back to Cardiology with pre syncope as well as chest heaviness and previous history of CAD. Doctor Smith believes MRI to be warranted over C; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; It is not known if there are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; It is not known if there a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		facial weakness; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell's Palsy.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		has a headache. She has been hit in the head 4 times by a volleyball last week. She was hit yesterday as well really hard and her headache worsened. She has had some nausea. Light bothers her some. Loud noise has bothered her.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have a sudden severe, chronic or recurring or a thunderclap headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		HEADACHE; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Lastly we discussed his cognitive decline. He states he has some brain fog periodically. He is not really having any at the moment. He is been fairly ill and had a hospitalization and may well of just had some cognitive changes secondary to his illness; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		abnormal nerve conduction study was done on 11/1/2018; This study is being ordered for a neurological disorder.; 8/5/2018; There has been treatment or conservative therapy.; leg pain, numbness; steroid shot, medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		chronic low back pain from thoracic to lumbar spines. Has history of scoliosis, no radiculopathy or neuropathy but history of Diabetes Mellitus. Treated with chiropractor services for greater than 4 months without adequate response, TENS unit, Nsaids.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.	6
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		Patient is having ROM of motion issues along with spasms of her neck. C-Spine: Myofascial trigger points are present along with trapezius tenderness bilaterally. Patient has been to chiropractor and had massage on multiple occasions without relief.; This study is being ordered for a neurological disorder.; Patient reports pain started in neck on 09/12/2018.; There has been treatment or conservative therapy.; Patient complains of acute worsening of chronic conditions. Pain is describe as sharp, shooting, burning pain. Radiation of pain bilateral, constant and to bilateral arms. Patient also complains of tingling/numbness down both arms.; Patient reports bac; Patient has used NSAIDs for 8 weeks, physical therapy for 6 weeks twice a week with worsening symptoms. Patient has also used muscle relaxers, rest, ice and heat all with no relief. Pain is worsening.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		Pt had xray 7/19/17 showed mild disc space narrowing, osteophytosis, mild chronic degenerative changes. Has tried conservative treatment nsaid, steroids, physical therapy exercises which have not helped. Pain is worse, radiating down to right gluteal m; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		Pt suffers with lumbago w sciatica.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		medications for several months with no help dizziness; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/25/2018; There has been treatment or conservative therapy.; H/A; Hospital stay; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		patient complains of memory loss, dizziness, "feels like the room is spinning," nausea, history of falling - gait shuffling causing falls intermittently.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing vertigo	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Patient fell and hit head on concert step, aprox 2 weeks ago, since has recurrent dizziness, ringing of ears and headache, nothing really prompts, the dizziness and ringing of ears has stayed for last 2 weeks, did not go hospital, did not call ambulance.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Patient has been having chronic headaches multiple times a day that have sharp pains into his neck and right side of brain.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Patient has been having headaches for one month. Patient has tried medicine and other therapies with no success. The typical headache is primarily central frontal. The frequency of headaches is usually everyday. Patient experiences nausea and photophobia.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Patient has been seen and evaluated in ER x2 the past month. Clinical work-up is negative thus far. Patients symptoms are persisting and not improving despite conservative treatment.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing dizziness.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Patient is having numbness in bilateral hands and feet associated with numbness of the lips.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient had a normal audiogram.; The patient is experiencing hearing loss.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Patient is having some dizzy spells, ataxia, tinnitus, and cervicalgia.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Prolactin level is very high. She needs to have a brain MRI for possible tumor. &#x0D; Galactorrhea/amenorrhea-likely a prolactinoma problem.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Pt has new onset headaches, no history of migraines. Pt has throbbing pain behind the right ear. This gets worse with exercise.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Pt has random headaches.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	pt has severe headache when sexually active; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Pt has worsening tremor of head, eyes, and arms for years; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are not intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	PT HAVING HEADACHES WITH DIZZINESS FOR OVER A MONTH. NEW ONSET TODAY WITH WORSENING SYMPTOMS OF DIZZINESS AND FEELING DRUNK.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Pt lost sight in right eye about 3 weeks ago d/t dizziness. He states he had a dizzy spell a few weeks ago and lost the vision in his right eye. Complete right eye. Blurred. No pain. Dizziness went away in 4-5 minutes. No weakness on one side or the ; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Pt presents with cc of persistent HA x 2 weeks that has been in various locations. States that she has taken multiple meds and the HA resolves but soon returns. Quality - patient states that she feel a pressure sensation and currently the pain is on the ; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Pt slipped on wet garage floor and hit her head one month ago. She continues to have headache with dizziness and "foggy" feeling; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Pt states he has had a headache every morning for 2 weeks; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		refer for MRI of the brain without dye, headaches. MLA APRN No Info Given.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		see notes under N18120500131 - 055760795 **12 /5/2018 9:45:23 AM Suzette G Powell, MD Peer-to-Peer Discussion held. Case decision discussed with and understood by Dr. Howard. Synopsis of discussion: Pt has ha that awakes from sleep, case needs to be ; This study is being ordered for a neurological disorder.; 12/03/2018; It is not known if there has been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		seizure; This study is being ordered for a neurological disorder.; on 12/8/18 patient had a syncope episode and started having convulsions; There has not been any treatment or conservative therapy.; passed out, new onset seizure activity; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine MRI; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.	3
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine MRI; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of asymmetric reflexes.	2
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; pt reports that her back is still hurting. she states that it is severe in pain. she continues to have to sleep sitting up. she states that she doesn't really want to take pain meds she just really wants to be fixed. NECK/THYROID: CS area tapping cause; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	4
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; &lt;Enter Additional Clinical Information&gt;	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	18
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; "The patient has not been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist.;" This is not a continuation or recurrence of symptoms related to a previous surgery or fracture.; "The caller indicated that there is not a known condition of: Tumor, Infection or Neurological deficits.;" The study is being ordered due to follow-up to surgery or fracture within the last 6 months.; R/O fx	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is recent evidence of a thoracic spine fracture.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1

General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; ; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to Neurological deficits.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	2
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This study is being ordered for staging.; This is a request for a thoracic spine MRI.; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.;" The study is being ordered due to known tumor with or without metastasis.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		thoracolumbar spine disc disease; This study is being ordered for trauma or injury.; 7/30/18; There has been treatment or conservative therapy.; limited range of motion, back pain radiating down his legs, instability, severe migraines; 6 weeks physical therapy, muscle relaxers; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		was in an accident and pain has not got better; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material			26
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; reflexes 2+ at left knee 1+ at right knee absent at the ankle	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Right sided leg weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; RT SIDE WEEKNESS & MEMBER IS ON A WALKER; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	2
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; progressive leg weakness and left leg numbness pt. has lumbar radiculopathy; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Right leg weakness , not able to walk well need help getting from place to place; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for None of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	9

General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/1/18; There has been treatment or conservative therapy.; ACUTE PAIN; PT, CHIROPRACTIC, INJECTIONS, NERVE BLOCK; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/13/18; There has not been any treatment or conservative therapy.; LOW E T WESAKNESS AND PAIN; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		(pt has had chiropractor x 1 year, NSAIDS x 6 months, Gabapentin, tyl #3, hydro's) Had xrays at ER - pain in the lower back and radiating down both legs to mid thighs; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; the results of the EMG of BLE are slowing BLE sural sensories. Lumbo sacral radiculopathy with widespread and marked acute and chronic axon loss across bil upper,mid,lower lumbar as well as the sacral paraspinals. Mild sensory demyelination distally in BL	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/03/2018; There has been treatment or conservative therapy.; Low back and cervical spine pain; Physical therapy prescribed on 07/03&#x0D; Gabapentin; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/27/2018; There has been treatment or conservative therapy.; Neck and lumbar spine pain; 07/27/2018 - Physical therapy prescribed; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; before 11/21/2018; There has been treatment or conservative therapy.; ; advil, tramadol, muscle relaxers, steroid injection, worse with stretching; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Acute neck pain on the rt side. Also low back pain. X Rays were done and requested further imaging.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		DECREASED PATELLAR REFLEX RIGHT LOWER EXTREMITY, &#x0D; Other: Patient reports numbness on the outside of her right foot. She awakens with right lateral aspects of leg hurting. Long&#x0D; periods of standing worsens the pain. Patient reports a fall where she landed; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; DECREASED PATELLAR REFLEX RIGHT LOWER EXTREMITY,&#x0D; Other: Patient reports numbness on the outside of her right foot. She awakens with right lateral aspects of leg hurting. Long&#x0D; periods of standing worsens the pain. Patient reports a fall where she landed	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Enter answer here - or Type In Duration of Diagnosis: Reports months (8)&#x0D; Pain/Symptom Onset: gradual&#x0D; Activity at Onset: Reports lifting&#x0D; Work Related Injury: No&#x0D; Pain Location: Reports thoracic Reports upper and midline&#x0D; Pain Radiation: Reports neck and; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		increasing numbness in right later leg having problems walking at times xray found lumber sponyolysis at L5S1 with grade two anterostyololthesis; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		LBP radiating down right leg; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Low back pain noted. The discomfort is most prominent in the lumbar spine. This radiates to the right buttock and right foot. He characterizes it as throbbing. This is a chronic problem, with essentially constant pain. He states that the current epis; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness of the right leg, hip and foot.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		LOWER BACK PAIN WORSENING X 6 MONTHS,INCLUDE NUMBNESS AND WEAKNESS,INCAPACITATING,PERSISTENTLY,ACHE AND DEEP,HISTORY OF RECURRENT TRAUMA. CHIROPRACTIC CARE HASN'T HELPED,IF ANYTHING FEELS LIKE MADE IT WORSE.&#x0D; Detail Type&#x0D; Description&#x0D; Assessment&#x0D; Lumbar b; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; NEURO:POSITIVE - DIFFICULTY INITIATING SLEEP,DIFFICULTY MAINTAINING SLEEP,EXTREMITY WEAKNESS,GAIT DISTURBANCE,NOCTURNAL AWAKENING,NUMBNESS,NUMBNESS IN EXTREMITY,SHAKING,FATIGUE,BACK PAIN,DECREASED MOBILITY,JOINT PAIN AND SWELLING,JOINT TENDERNESS,MUSCLE W; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		L-spine MRI: The pt is a 61y/o female with hx of chronic low back pain that radiates down her right leg, and causes difficulty walking at times. Suspect nerve route impingement.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Lumbosacral radiculopathy, NUMBNESS AND TINGLING DOWN RIGHT LEG TO THE KNEE.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		No clinical information; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		numbness; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; WITH RANGE OF MOTION; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Patient had XR with spondylolysis and spondylolisthesis of the L4-L5 with muscle weakness and numbness persistent with this pattern of nerve compression.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Right sided weakness of quadriceps and tibialis anterior muscles, 4-/5. 5/5 on left.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		patient has bilateral muscle pain in back. Right upper and lower quadrant pain. Associated with radiculopathy down bilateral legs.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient has bilateral leg weakness. Can not stand for long periods of times. Legs are swelling; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		patient reports falling off of a trash truck a few times, she reports neck and back pain.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Pt has bulging disc; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		pt stated for the last six months the lower L side of her back has been hurting and is swollen; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Pt suffers with lumbago w sciatica.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		pt. have diminish reflexes on rt. side, trying to rule out Laminar stenosis and cord compression, prescribed pain med-tramadol that have not helped, raiding down rt. side; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; reflexes diminished on rt. side	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		see attached; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The patient has not found anything that helps or ameliorates symptoms Associated symptoms include feels NUMBNESS AND TINGLING IN RIGHT THIGH. &#x0D; Positive for back pain and for paresthesia ( right lower extremity ); The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		She complains of having headaches located on the right side of her head. She describes the headaches as aching pain. The headaches were sporadic but the past week she has had a headache every day. She denies nausea with the headaches. Her headaches are wo; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Suspected TIA or Stroke; This study is being ordered for a neurological disorder.; 12/04/2018; There has been treatment or conservative therapy.; left sided weakness, numbness tingling; Eliquis 5mg bid; daily aspirin; US carotid doppler; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Suspected TIA or Stroke; This study is being ordered for a neurological disorder.; 12/4/18; There has been treatment or conservative therapy.; Left sided weakness numbness tingling; Eliquis 5mg bid; daily aspirin; US carotid Doppler; CT head; echo; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	127
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	70
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	2
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has the inability to speak.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	3
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	3
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has Bell's Palsy.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the patient has undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; The patient has a congenital abnormality.	2
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	20
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.	3
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo	9

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing dizziness.	2
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing vertigo	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient did not have a normal audiogram.; The patient is experiencing hearing loss.	3
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; The patient has a congenital abnormality.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	11
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient has a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; This is NOT a Medicare member.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	9
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	34
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.	5
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; There has been a recent assessment of the patient's visual acuity.; This study is being ordered for stroke or TIA (transient ischemic attack).	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for and infection or inflammation.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has been a change in seizure pattern or a new seizure.	8
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This request is for a Brain MRI; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are not physical findings or laboratory values indicating abnormal pituitary hormone levels.; There has not been a previous Brain MRI completed.; This is NOT a Medicare member.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		This study is being ordered for excruciating facial pain and hyperesthesia in right cheek distribution. This is a recurrent problem that is becoming more common.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation); Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The patient has Bell's Palsy.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Tinnitus of the left ear.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		Unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		unknown; This study is being ordered for a neurological disorder.; 9/27/18; There has not been any treatment or conservative therapy.; continuous headache with dizziness, difficulty forming sentences, patient doesn't feel like she is functioning right.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/8/18; There has not been any treatment or conservative therapy.; headache an neck pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material		We also discussed some headache problems she has had. She has had some pain mostly in the upper left hemispheric.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

General/Family Practice	Approval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	worsening memory; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		2
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	6 mo cancer surveillance; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	8MM PULM NODULE NOTED ON CT CHEST 4/21/2018, NEEDS 6 MONTHS FOLLOWUP. THIS IS THE FIST FOLLOWUP CT SINCE NODULE WAS NOTED.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	A Chest/Thorax CT is being ordered.; The patient had a Chest x-ray in the past 2 weeks.; The study is being ordered for none of the above.; This study is being ordered for hemoptysis.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.; Yes this is a request for a Diagnostic CT	6
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.	5
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	6
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	35
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	7
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material	The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.	5

General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	398
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	90
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	249
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		unknown; The study requested is a Lumbar Spine MRI.; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Unknown; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; Chronic back pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered as a follow-up to trauma.; There is NO laboratory or physical evidence of a pelvic bleed.; There are no physical or abnormal blood work consistent with peritonitis or pelvic abscess.; There is physical or radiological evidence of a pelvic fracture.; "Caller does not know whether the ordering physician is a gastroenterologist, urologist, gynecologist, or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This study is being ordered for initial staging.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		Abdominal Pain (Right), testicle pain&#x0D; Right testicle pain difficulty urinating; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		Coccydynia,&#x0D; History of Present Illness:&#x0D; 1. musculoskeletal pain &#x0D; Severity level is moderate. It occurs constantly and is fluctuating. Location: tailbone. The pain is aching and burning. Context: there is no injury. Additional information: Patie; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are NO documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		Diagnostic imaging. Patient has family history (mother) of ulcerative colitis). He has had dark red blood in stool for a year that comes and goes, as well as sharp lower abd pain.; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		LLQ pain with rebound and guarding. Pain x 48 hours. Unrelieved by Tylenol/Ibuprofen. Suspected ovarian torsion.; This study is being ordered due to organ enlargement.; There is no ultrasound or plain film evidence of a pelvic organ enlargement.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material	Patient had a pelvic transvag US that showed a questionable nodule.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study.;" This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material	patient had an u/s, results said "Indistinct equivocal lipoma or isoechoic mass to the; adjacent fat in the left buttocks 5 x 4 x 3 cm. Indeterminate finding; by ultrasound consider CT correlation.;" This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient.;" This study is being ordered for initial staging.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material	Patient is in severe pain that is not getting better with medication. Has history of diverticulitis; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient.;" This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material	Pt is having bilateral flank pain and hematuria; The patient has painful hematuria.; The patient has not had an IVP.; This study is being ordered due to hematuria.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material	right flank pain x 2 months, pain is now radiating straight through to front of her pelvis and is constant; The patient has painful hematuria.; The patient has not had an IVP.; This study is being ordered due to hematuria.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material	This is a 50 y/o male who comes in today c/o pain in groin. Pt states that he has an inguinal hernia repair approximately a year ago. Pt states that he lifted something approximately 3 weeks ago and since that time he has been having a lot of pain since; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material	unknown; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material	US of pelvis showed cystic mass in the midline of the pelvis measuring 3 x 2.5 x 2.5cm Cystic neoplasm could not be excluded and recommended CT.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study.;" This is a request for a Pelvis CT.; There are NO documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	MASS FOUND IN CT FOR ADRENAL; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	Patient had hysterectomy 10 years ago. After CT results a MRI is suggested for further imaging after mass was seen on CT exam.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	This is a request for a Pelvis MRI.; The request is for suspicion of joint or bone infection.	2
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?	4
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	ULTRASOUND IMPRESSION:&#x0D; There is appearance of separation of the endometrial echo complex&#x0D; towards the superior aspect of the uterus, which may suggest a&#x0D; Mullerian ductal anomaly, although this is incompletely characterized&#x0D; on this exam. This may be fu; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)	unknown; This is a request for a Pelvis MRI.; It is not known if this is a preoperative study.; The study is being ordered for suspicion of pelvic inflammatory disease or abscess.	1
General/Family Practice	Approval	73200 Computed tomography, upper extremity; without contrast material	NUMBNESS AND TINGLING; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.; This is a request for an Arm CT Non Joint; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	73200 Computed tomography, upper extremity; without contrast material		There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.; This is a request for an Arm CT Non Joint; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73200 Computed tomography, upper extremity; without contrast material		This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73200 Computed tomography, upper extremity; without contrast material		This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.	1
General/Family Practice	Approval	73200 Computed tomography, upper extremity; without contrast material		This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73220 Magnetic resonance (eg, proton) imaging, upper extremity, other than joint; without contrast material(s), followed by contrast material(s) and further sequences			2
General/Family Practice	Approval	73220 Magnetic resonance (eg, proton) imaging, upper extremity, other than joint; without contrast material(s), followed by contrast material(s) and further sequences		The request is for an upper extremity non-joint MRI.; This is a preoperative or recent postoperative evaluation.	5
General/Family Practice	Approval	73220 Magnetic resonance (eg, proton) imaging, upper extremity, other than joint; without contrast material(s), followed by contrast material(s) and further sequences		The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is not a history of upper extremity trauma or injury.	3
General/Family Practice	Approval	73220 Magnetic resonance (eg, proton) imaging, upper extremity, other than joint; without contrast material(s), followed by contrast material(s) and further sequences		The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is suspicion of upper extremity bone or soft tissue infection.	8
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)			7
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; It is not known if the physician has directed conservative treatment for the past 6 weeks.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		; This study is being ordered for a neurological disorder.; 07/2018; There has not been any treatment or conservative therapy.; Bilateral shoulder/arm pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		; This study is being ordered for trauma or injury.; Pt states it started about 7 weeks ago; There has been treatment or conservative therapy.; Pain; Catching sensation when arm goes past 70 degrees.; Meloxicam, ortho; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		patient was in a MVA; This study is being ordered for trauma or injury.; 9/6/2018; There has been treatment or conservative therapy.; neck pain that radiates to rt shoulder, decreased range of motion with neck and rt shoulder, neck stiffness, decreased forward flexion neck left and rt rotation; pain medications, OTC medications, rest; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		Previous rotator cuff injury.; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; pain medicine and home exercises, two steroid packs sitting on the shoulders. No improvement with conservative therapy; The patient received oral analgesics.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; decreased range of motion and numbness to the left hand	1

General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; left Shoulder popped today during water aerobics and now cannot move arm without pain. has weakness. this has been going on for the past 6mos with only worsening of sx. has been doing water aerobics and controlled training of upper body therapy at the gym	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; mri left shoulder needed to evaluate. pain x 2 months no known injury. decreased rom positive Neer's sign with Widened AC space on XRay	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; pain in rt shoulder after a fall a few weeks ago. decreased and painful rom. positive lift off. tender over subacromial space in upper arm to level of mid humerus	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Patient complains of pain in left shoulder. Limited range of motion in all directions related to pain. Complains of numbness at night. X-ray does show narrowing of AC joint. Pain radiates to elbow with motion and sometimes without. Patient received steroi	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; pt had fallen when he was coughing and had passed out. pain in right arm, muscle weakness, pain in right shoulder and limited range of motion	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Right shoulder 3 views No acute displaced fracture identified in the proximal humerus. There is questionable linear lucency in the right scapula just inferior to the glenoid fossa and may represent bony trabeculation vs. non-displaced fracture and if pati	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; He is a pleasant 50-year-old right-hand-dominant cabinet maker who comes today complaining of significant right shoulder pain. He has a history of chronic instability with multiple dislocations, none for years. He has had 2 subacromial shots which did n	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; RCT or rupture	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.	9
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; The patient has a documented limited range of motion on physical examination.; It is not known if there is documented findings of severe pain on motion.	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; 39 year old female presents with c/o pain in the right shoulder pain which seems to be getting worse, the joint has started to pop and crack with certain types of motion, and the pain is getting worse with certain positions that the shoulder is in. Of no	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Acute Left Shoulder Strain -- Robaxin is not in stock. I have replaced it w/ Skelaxin 800mg TID prn spasm #30 refill 0. It might make you sleepy. I suspect that she has torn her left rotator cuff. &#x0D; Xrays ordered of the left shoulder, and an MRI of th	1

General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; limited range of motion	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Persistent right shoulder pain with failed conservative treatment.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were not normal.	6
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; The patient has had recent plain films of the shoulder.; The plain films were not normal.	4
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; The pain is from a known mass.; The diagnosis of Mass, Tumor, or Cancer has been established.; The study is requested for staging.; The request is for shoulder pain.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; This study is being ordered for Known Tumor.; The ordering physician is not an oncologist or orthopedist.; The patient has had 3 or fewer follow-up shoulder MRIs.; The patient is not presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.	3
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.	4
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.	1

General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	This is a preoperative or recent postoperative evaluation.; This is a request for a Knee CT.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	This is a request for a foot CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is a suspected infection of the hip.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass adjacent to or near the hip.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; The patient has been treated with and failed a course of supervised physical therapy.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material	This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.; This is a request for a Knee CT.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	73706 Computed tomographic angiography, lower extremity, with contrast material(s), including noncontrast images, if performed, and image postprocessing		1
General/Family Practice	Approval	73706 Computed tomographic angiography, lower extremity, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Yes, this is a request for CT Angiography of the lower extremity.	4

General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences			7
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a foot MRI.; It is not known if surgery is planned for in the next 4 weeks.; The study is being ordered for infection.; There are physical exam findings, laboratory results, other imaging including bone scan or plain film confirming infection, inflammation and or aseptic necrosis.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		Pain in left knee; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		patient has a fracture of left fibular with displacement patient is still having pain and swelling, pain is worse when walking and standing, patient has used OTC medication and Lidocaine patches with no relief; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		severe pain in foot and swelling; This is a request for a foot MRI.; The study is being ordered for known fracture.; The study is NOT being ordered for a routine follow up or for a possible non union fracture.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		swelling severe pain unable to bear wt; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	7
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient does not have a documented limitation of their range of motion.	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.	1

General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Instability; It is unknown if surgery is planned.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Instability; Surgery is being planned.; Arthroscopic surgery	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Locking; Surgery is NOT being planned.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for None of the above; Instability	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for None of the above; Instability; Surgery is NOT being planned.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for None of the above; Swelling greater than 3 days	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.	15
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; No, the member do not experience a painful popping, snapping, or giving away of the knee.	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	7
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	7
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability	39
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion	23
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Locking	15
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days	11

General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for None of the above; Pain greater than 3 days; Surgery is NOT being planned.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	3
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days	4
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; Surgery is NOT being planned.	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	9
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy	5
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		abnormal find dx imaging oth body structures; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	49
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal imaging test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	92
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Abnormal laboratory test describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		abnormal ultrasound; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		ABOUT 1 MONTH AGO PT NOTICED A LUMP ON HER NECK,HAVING CHECKED OUT TODAY 12/4/18.DOES NOT MOVE.HARD/FIRM TO THE TOUCH.DENIES ANY PAIN; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material		Bilateral indeterminate renal lesions; Found on CT while patient in the ER on 9/2. "Bilateral indeterminate renal lesions. Recommend further evaluation with contrast enhanced MRI of the abdomen to exclude solid mass." The masses were both about 1.8 x 1.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Chest pain describes the reason for this request.; Abnormal finding on physical examination was relevant in the diagnosis or suspicion of inflammatory bowel disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	6
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Chest pain describes the reason for this request.; Abnormal imaging (xray) finding was relevant in the diagnosis or suspicion of vascular disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Chest pain describes the reason for this request.; An abnormal finding on physical examination led to the suspicion of infection.; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema).; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Chest pain describes the reason for this request.; Another abnormality was relevant in the diagnosis or suspicion of vascular disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Chest pain describes the reason for this request.; This reason this study is being requested is unknown.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Chest pain describes the reason for this request.; This study is being requested for 'none of the above'; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	CT chest in 12/2017 for uncontrolled coughing. Lung nodules present. one year F/U was recommended; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	F/U to previous film 06/12/2018; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	had noncontrast CT chest per Saline recently and they advised f/u in 3 months due to nodules in lung; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	He was recently found to have a pulmonary nodule in his left upper lobe. It was recommended to repeat a CT scan in 3 months.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Hypertension; The patient is NOT presenting new signs or symptoms.; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	lung mass was found 08/21/18 and this is for the recommended 6 month follow up; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Multiple abnormal chest xrays indicating pulmonary nodule of unknown behavior.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Need to know if the masses have grown or stayed the same.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/05/2018; There has not been any treatment or conservative therapy.; 3.1 cm AAA, 5.5 mm lung nodule right lung base.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	No, the patient was NOT seen by a specialist because of the traumatic injury.; Chest pain describes the reason for this request.; Abnormal finding on physical examination was noted on evaluation after the injury.; This is a request for a Chest CT.; This study is being requested for chest injury or trauma within the past 2 weeks.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	'None of the above' describes the reason for this request.; Abnormal ultrasound finding was relevant in the diagnosis or suspicion of vascular disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	'None of the above' describes the reason for this request.; It is unknown what led to the suspicion of infection; This is a request for a Chest CT.; This study is being requested for known or suspected infection (pneumonia, abscess, empyema).; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	'None of the above' describes the reason for this request.; The patient had an abnormal imaging (xray) finding related to the suspicion of cancer in th is patient.; This is a request for a Chest CT.; This study is beign requested for suspected cancer or tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	'None of the above' describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	'None of the above' describes the reason for this request.; This reason this study is being requested is unknown.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	4
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	none; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; It is unknown if the patient quit smoking in the past 15 years.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Patient had an xray showing a 1cm solitary nodule on the right lung base that appears to be likely calcified. The radiologist recommended a chest CT for confirmation.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Patient is having persistent cough and hiccups.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Patient just had recent CT abdomen which shows a subpleural nodule that is present in the middle lobe that measures 9mm. &#xOD; Radiologist is recommending a CT Chest be performed.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" It is unknown if they had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Positive for cough, shortness of breath and wheezing. Negative for sputum production. pt has been battling cough since 6/1/18; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection.;" There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Post-operative evaluation describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Pt had a chest CT on 2/26/18 that showed multiple pulmonary nodules. Radiologist recommends a 6 month follow up.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Pt had CT in 7/2018 and 3 to 6 month follow up was recommended.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days.;" A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	PT HAS MULTI NODULES... ALSO HX OF COPD, RECENT BRONCHITIS; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Pt with chronic cough. Chest xray reveals a new 5.5 cm pleural based opacity in the right upper lung with mass like affect; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Pulmonary Nodule; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Restaging post chemotherapy treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	SOLITARY PULMONARY NODULE; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT suspicious findings on abnormal chest xray; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	The patient is presenting new signs or symptoms.; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	The Pt has lung nodules in right lung.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	There is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	6
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Two nodules on the left lower lobe.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Unexplained weight loss describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Unknown; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	5
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/15/2015; There has been treatment or conservative therapy.; left upper quad pain , chest pain; chest xray, GI work up; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	71250 Computed tomography, thorax; without contrast material	Yes, the patient was seen by a specialist because of the traumatic injury.; 'None of the above' describes the reason for this request.; The patient was seen by another type of physician; This is a request for a Chest CT.; This study is beign requested for chest injury or trauma within the past 2 weeks.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Ascending aortic aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
General/Family Practice	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	history of COPD; This study is being ordered for a neurological disorder.; 12/27/2018; There has not been any treatment or conservative therapy.; abdominal pain, chest pain, wheezing, coughing; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing		This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	57
General/Family Practice	Approval	71555 Magnetic resonance angiography, chest (excluding myocardium), with or without contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Vascular Disease.; 10/12/2018; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material			1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material		This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; The patient is experiencing or presenting symptoms of radiculopathy.; There is a reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Approval	72125 Computed tomography, cervical spine; without contrast material		This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT	3
General/Family Practice	Approval	72128 Computed tomography, thoracic spine; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine CT.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; The patient has a recent fracture or abnormality seen on a previous imaging study; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72128 Computed tomography, thoracic spine; without contrast material		The patient does have neurological deficits.; This is a request for a thoracic spine CT.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; The patient is experiencing or presenting lower extremity weakness.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72131 Computed tomography, lumbar spine; without contrast material		; This study is being ordered for trauma or injury.; 12/7/18; There has not been any treatment or conservative therapy.; hematuria and severe pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72131 Computed tomography, lumbar spine; without contrast material		This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.; Yes this is a request for a Diagnostic CT	27
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Document exam findings; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient is experience weakness in right hand.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/1/2018; There has been treatment or conservative therapy.; mbr has migraine where vision was lost completely three different times - R/O tumor; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 10-11-18; There has not been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.;	1

General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This is a request for cervical spine MRI; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; muscle atrophy of upper extremity, muscle spasms of bilateral lower extremities, muscle weakness; activity modification, epidural steroid injection 4 years ago, no current treatment; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/03/2018; There has been treatment or conservative therapy.; Low back and cervical spine pain; Physical therapy prescribed on 07/03/2018; Gabapentin; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/27/2018; There has been treatment or conservative therapy.; Neck and lumbar spine pain; 07/27/2018 - Physical therapy prescribed; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		been seen at the MDO more than once for these symptoms; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; pt. arm numbness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		dizziness, tingling, sensory changes, weakness; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/27/2018; There has been treatment or conservative therapy.; weakness, headaches, confusion, blurred vision, difficulty with balance, tingling in arms and legs, numbness in both hands, difficulty grasping with hands, visual blackouts; home exercises, pain meds, and nsaid; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		Enter answer here - or Type InSpurlings test positive for numbness and tingling to left arm. &#x0D; Patient states that he overexerted himself in the shop this weekend and has pain to left shoulder/shoulder blade that radiates into neck with a shooting pain d; This is a request for cervical spine MRI; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has not been any treatment or conservative therapy.; Ovarian and colon ca DDD tenderness si joints tender pain radiating down legs to buttocks; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		none; This study is being ordered for trauma or injury.; 11/3/18; There has not been any treatment or conservative therapy.; Pt has weakness in left hand, numbness and severe headache left shoulder and neck pain limited ROM in the neck tenderness of per spinal c-spine, and lateral left neck; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		NUMBNESS AND TINGLING DOWN ARMS AND SHOULDERS LAST MRI 10/26/2016; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; WEEKNESS OF BILATERAL UPPERER EXTREMEITY, REDUCE RANGE OF MOTION , TENDERNESS, NUMBNESS AND WEEKNESS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		pain is a 10:10 and getting worse according to Pt; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/2018; There has been treatment or conservative therapy.; tingling arms, sciatica in both legs, affecting ADL; PT, Rx medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		patient initially seen 10/01/18 with cervical pain, sent for PT, could only complete 2 weeks due to the pain, returned to the clinic 10/26/18 with continued pain and nausea and vomiting.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		Patient is a 51-year-old white male presents today for follow-up for neck pain, low back pain. I saw him as a new patient on 11/27/2018, for ER follow-up. Patient reported fall at lows 2 weeks prior to that visit. Where a cabinet fell off of a shelf and; This study is being ordered for trauma or injury.; FELL TWO WEEKS AGO YESTERDAY, TRANSPORTED TO ER. &#x0D; --NECK PAIN &#x0D; RADIATING TO BACK &#x0D; NOT GETTING ANY RELIEF.; There has been treatment or conservative therapy.; FELL TWO WEEKS AGO YESTERDAY, TRANSPORTED TO ER. &#x0D; --NECK PAIN &#x0D; RADIATING TO BACK &#x0D; NOT GETTING ANY RELIEF.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		patient is also having migraines; This study is being ordered for trauma or injury.; 11/7/2018; There has not been any treatment or conservative therapy.; parathesia -sharp pains in the shoulder and no feeling in left hand; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		Patient is having some dizzy spells, ataxia, tinnitus, and cervicalgia.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		patient reports falling off of a trash truck a few times, she reports neck and back pain.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	5
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	25
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		The patient is presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.;" Known Tumor with or without metastasis	2

General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		the patient was seen on 11/26/18 with c/o continue neck, upper back and bilateral arms. patient has completed 10 visits of physical therapy with minimal improvement. Patient was first treated for this condition on 09/24/2018, treated with steroids, NSAIDs; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient unable to lift bilateral arms above head. patient states her pain increased with lying down supine and when rotating her head to the right.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; There is x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is x-ray evidence of a recent cervical spine fracture.	2
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	133
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.; yes, there are documented clinical findings of Multiple sclerosis.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Known Tumor with or without metastasis; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient been not been seen by or is not the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	73
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	3
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; Pre-Operative Evaluation; No, the last Cervical spine MRI was not performed within the past two weeks.	3
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	47
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Patient complains of pain between his shoulder blades, right arm has been getting numb, and his right hand has been tingling states this has been going on and off for a couple of months.&#x0D; &#x0D; NECK/THYROID: C6 tapping and light pressure causes shooting elect	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; There is no laboratory or x-ray evidence of osteomyelitis.; Known or Suspected Multiple Sclerosis, Infection or abscess; No, there are no documented clinical findings of Multiple sclerosis.; No, there is not a laboratory or x-ray evidence of Meningitis.; No, there is not a laboratory or x-ray evidence of an infected disc, septic arthritis or "discitis"; Yes, there is laboratory or x-ray evidence of a paraspinal abscess.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		This is a request for cervical spine MRI; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.; yes, there is a documented evidence of extremity weakness on physical examination.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		this is relative acute starting about two weeks ago and is increasing in weakness and pain; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material		thoracolumbar spine disc disease; This study is being ordered for trauma or injury.; 7/30/18; There has been treatment or conservative therapy.; limited range of motion, back pain radiating down his legs, instability, severe migraines; 6 weeks physical therapy, muscle relaxers; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	72141 Magnetic resonance (eg, proton) imaging, spinal canal and contents, cervical; without contrast material	Unknown; This study is being ordered for trauma or injury.; 10/30/18; There has been treatment or conservative therapy.; weakness in right shoulder, decreased range of motion, pain, inability to perform daily tasks; physical therapy and medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		4
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Document exam findings; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Over 1 year; There has been treatment or conservative therapy.; Pain&#x0D; Radiculopathy; 6 weeks Physical therapy&#x0D; Multiple Epidural injections; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	back pain. xray showed degenerative changes in facet joints at multiple levels. Medrol dose pack effective- but when completed discomfort returned. Pain starts in low back and makes it way up her back to her neck- per pt.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	Enter answer here - or Type In Duration of Diagnosis: Reports months (8)&#x0D; Pain/Symptom Onset: gradual&#x0D; Activity at Onset: Reports lifting&#x0D; Work Related Injury: No&#x0D; Pain Location: Reports thoracic Reports upper and midline&#x0D; Pain Radiation: Reports neck and; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	The patient does have neurological deficits.; The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.	2
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material	The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	2

General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; "The patient has not been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist.;" This is a continuation or recurrence of symptoms related to a previous surgery or fracture.; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.; patient in rollover accident resulting in a burst fracture of the T-12. He was taken to ER and then airlifted to a distant hospital. The had made arrangements for the patient to follow-up with neurosurgeon but patient did not wish to travel that distanc	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; "The caller indicated that there is not a known condition of: Tumor, Infection or Neurological deficits.;" The study is being ordered due to pre-operative evaluation.; pt x-ray shows fracture T11. MRI is needed for age determination, prior to kyphoplasty	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.	2
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		This is a request for a thoracic spine MRI.; There is x-ray or laboratory evidence of osteomyelitis.; The study is being ordered due to known or suspected infection or abscess.	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; Chronic back pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72146 Magnetic resonance (eg, proton) imaging, spinal canal and contents, thoracic; without contrast material		Xray show degenerative disc mild to moderate at every level in the thoracic spine. Sounds like there has to be a pinched nerve. Patient must have an MRI for referral to Pain Management. Has failed NSAIDS, four weeks of PT, and muscle relaxants. New neuro! This is a request for a thoracic spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Decreased strength of the right arm to fifth digie which is the T1 dermatome with muscle wasting on the left upper arm. Patient has trigger points noted on the upper outer trapezius ; sacroiliac joints bilaterally, medial elbows, medial aspects of the kne; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; mild stenosis, despite PT X 12 wks,	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; back left lateral flexion. Worse pain with lifting. Constant and sharp pain.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Right arm numbness/weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; TROUBLE STANDING ,LEG WEAKNESS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Neurological deficits; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness and decreased strength; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; The study requested is a Lumbar Spine MRI.; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; See other explanation in other box; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/14/2018; There has been treatment or conservative therapy.; Back and Neck Pain; Physical Therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Over 1 year; There has been treatment or conservative therapy.; Pain&#x0D; Radiculopathy; 6 weeks Physical therapy&#x0D; Multiple Epidural injections; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		1996 he had lumbar discectomy surgery He states that hot showers help just for a few minutes but did not resolve the pain. He also states that Aleve no longer helps with his back pain, he states that the pain radiates down his right leg lumbar midline spi; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Positive for arthralgias and back pain Lumbar back: He exhibits tenderness, bony tenderness and pain (radiates bilaterally down both legs). did complete physical therapy earlier this year, and that it only made his pain worse. He states that now his low; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Abn reflexes radiating pain down the left leg; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Back pain; Rx medication anti inflammatory meds; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		ABNORMAL LUMBAR MRI APPROX APRIL 2018 AND STILL EXPERIENCING PAIN. FOLLOW-UP REQUIRED; The study requested is a Lumbar Spine MRI.; Follow-up to Surgery or Fracture within the last 6 months; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.; There has not been a recurrence of symptoms following surgery.; The patient been not been seen by or is not the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		abnormal nerve conduction study was done on 11/1/2018; This study is being ordered for a neurological disorder.; 8/5/2018; There has been treatment or conservative therapy.; leg pain, numbness; steroid shot, medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Ambulating with limp and stoop posture, ABN x ray, going on for several weeks and worsening; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Tenderness to lower back and hip area, all movement makes pain worse; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		back pain. xray showed degenerative changes in facet joints at multiple levels. Medrol dose pack effective- but when completed discomfort returned. Pain starts in low back and makes it way up her back to her neck- per pt.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Back pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		chronic low back pain from thoracic to lumbar spines. Has history of scoliosis, no radiculopathy or neuropathy but history of Diabetes Mellitus. Treated with chiropractor services for greater than 4 months without adequate response, TENS unit, Nsaids.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		decreased strength bilateral +1 edema; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; she was seen oct 12, 2018 sensor deficit S2 (R) side; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Enter answer here - or Type In UnknowBack Pain&#x0D; Reported by patient.&#x0D; Location: lumbar; pain radiating to the buttocks&#x0D; Quality: dull&#x0D; Severity: worsening; severe (8-10); interference with sleep&#x0D; Duration: chronic &#x0D; Onset/Timing: recurrent episode &#x0D; Conte; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; NUMBNESS OF HAND AND FEET; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Faxing; The study requested is a Lumbar Spine MRI.; it is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		had PT; x-ray;; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		He c/o pain worse and radiating to L leg and groin as well as weakness in L leg tried PT for last 4-5 weeks w/o improvement; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Headaches, dizziness. symptoms are worsening, despite treatment.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/04/2017; There has been treatment or conservative therapy.; Pain, decreased mobility, swelling, tingling in the arms and legs.; Pain medicine, PT, Home exercises; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		MEMBER HAS NOW COMPLETED 6 WEEKS OF CONSERVATIVE TX INCLUDING PT; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Document exam findings hips and legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		No clinincs available; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has not been any treatment or conservative therapy.; Ovarian and colon ca DDD tenderness si joints tender pain radiating down legs to buttocks; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Numbness in the left leg, pain in the left and right leg, spinal fusion in the past I5 and S1. Pain radiates from lower back to her hips.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		pain is a 10:10 and getting worse according to Pt; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/2018; There has been treatment or conservative therapy.; tingling arms, sciatica in both legs, affecting ADL; PT, Rx medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		PATIENT HAS HAD MULTIPLE VISITS TO A CHIROPRACTOR. THE CHIROPRACTOR STATES PATIENT HAS A BULGING DISC.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; APROXIMATELY 11/12/18; There has been treatment or conservative therapy.; SEVERE LOW BACK PAIN; CHIROPRACTOR VISITS X13; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Patient is a 51-year-old white male presents today for follow-up for neck pain, low back pain. I saw him as a new patient on 11/27/2018, for ER follow-up. Patient reported fall at lows 2 weeks prior to that visit. Where a cabinet fell off of a shelf and; This study is being ordered for trauma or injury.; FELL TWO WEEKS AGO YESTERDAY, TRANSPORTED TO ER. &#x0D; --NECK PAIN &#x0D; RADIATING TO BACK &#x0D; NOT GETTING ANY RELIEF.; There has been treatment or conservative therapy.; FELL TWO WEEKS AGO YESTERDAY, TRANSPORTED TO ER. &#x0D; --NECK PAIN &#x0D; RADIATING TO BACK &#x0D; NOT GETTING ANY RELIEF.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Patient is having leg and foot pain. Can't sit or stand for long. Unable to exercise.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Patient is having ROM of motion issues along with spasms of her neck. C-Spine: Myofascial trigger points are present along with trapezius tenderness bilaterally. Patient has been to chiropractor and had massage on multiple occasions without relief.; This study is being ordered for a neurological disorder.; Patient reports pain started in neck on 09/12/2018.; There has been treatment or conservative therapy.; Patient complains of acute worsening of chronic conditions. Pain is describe as sharp, shooting, burning pain. Radiation of pain bilateral, constant and to bilateral arms. Patient also complains of tingling/numbness down both arms.&#x0D; Patient reports bac; Patient has used NSAIDs for 8 weeks, physical therapy for 6 weeks twice a week with worsening symptoms. Patient has also used muscle relaxers, rest, ice and heat all with no relief. Pain is worsening.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		patient with chronic low back pain having worsening symptoms including periodic loss of bowel and bladder; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Progressive worsening of symptoms; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.;	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Pt is in chronic pain for over a year; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		pt tried physical therapy and is unable to tolerate it; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Pt was first seen for back pain on 11/23/18, stated that he had been having back pain "for a while"; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		RADICULAPATHY NEUROLOGICAL CHANGES CHRONIC BACK PAIN TYPE 2 INSULIN DEPENDENT DIABETIC HX OF POLY NEURAPATHY; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; NUMBNESS; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		she is having worsening in symptoms we tried to do physical therapy and the therapist called and she could not tolerate it. I am well aware, if they would approve this i wouldn't have to keep ordering. My note goes into great detail regading this. also, The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		Sitting at a table and had just started eating their breakfast and a elderly lady hit the gas instead of the brake. they were thrown on to the floor. she is having pain in the entire left side from shoulder, with a pain into the 4th and 5th fingers on t; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	14
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; It is not known if the patient has been treated with medication.; The patient has completed 6 weeks or more of Chiropractic care.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has completed 6 weeks or more of Chiropractic care.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Follow-up to Surgery or Fracture within the last 6 months; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for Neurologic deficits	2
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; None of the above; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits	5
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine	9
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks	5
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	4
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		The study requested is a Lumbar Spine MRI.; There is evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis	2
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		u/k; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; when pt walks legs are weak and gives out and hard to get up and down; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/26/2018; There has been treatment or conservative therapy.; back pain, right lower spine mainly, Physical therapy made condition worse; physical therapy, ice/heat packs, nsids, muscle relaxers, anti-inflammatories; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has not directed conservative treatment for the past 6 weeks.	1
General/Family Practice	Approval	72148 Magnetic resonance (eg, proton) imaging, spinal canal and contents, lumbar; without contrast material		With regard to the low back pain, the discomfort is most prominent in the lower, left lumbar spine. This radiates to the left foot. This is a chronic, but intermittent problem with an acute exacerbation. Medical history is significant for spinal stenosis; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; With regard to the low back pain, the discomfort is most prominent in the lower, left lumbar spine. This radiates to the left foot. This is a chronic, but intermittent problem with an acute exacerbation. Medical history is significant for spinal stenosis; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered due to known or suspected infection.; It is not known if the ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient.; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		; The patient is not undergoing active treatment for cancer.; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is NOT an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This study is not being ordered for initial staging.; The patient is presenting new signs (e.g. lab findings or imaging) or symptoms.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		; This study is being ordered for known tumor, cancer, mass, or rule-out metastasis.; "The ordering physician is NOT an oncologist, urologist, gynecologist, gastroenterologist or surgeon or PCP ordering on behalf of a specialist who has seen the patient."; This study is being ordered for initial staging.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		Cervical Cyst; This study is being ordered for some other reason than the choices given.; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		Elevated white blood count, have elevated temp and elevated Heart rate; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "There are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		Mass of ovary - new problem. will repeat CT scan pelvis.&#x0D; R19.09: Other intra-abdominal and pelvic swelling, mass and lump&#x0D; CT, PELVIS, W/WO CONTRAST&#x0D; Abnormal vaginal bleeding - new problem&#x0D; N93.9: Abnormal uterine and vaginal bleeding, unspecified; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		N92.6: Irregular menstruation, unspecified, Due to this patient's history, it seems she is having problems with irregular/painful menstrual cycles. ordered a pelvic ultrasound to help rule out ovarian cysts, tumor and enlarged uterine masses/wall.R10.2: P; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; It is not known if there documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		Pt is here today for f/u on knot on her leg. Pt states shes not noticed any decrease in size and still has 1 day left of bactrim.; This study is being ordered because of a suspicious mass/ tumor.; "The patient has NOT had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		Ultrasound in the region of the palpable lump in the right buttock demonstrates 2.5 x 3.4 x 0.9 cm low echogenicity in the soft tissue and may represent hematoma versus soft tissue mass from other etiology. ; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72192 Computed tomography, pelvis; without contrast material		Unknown; This study is being ordered because of a suspicious mass/ tumor.; "The patient has had a pelvic ultrasound, barium, CT, or MR study."; This is a request for a Pelvis CT.; There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)			1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		; This is a request for a Pelvis MRI.; The study is being ordered for something other than suspicion of tumor, mass, neoplasm, metastatic disease, PID, abscess, Evaluation of the pelvis prior to surgery or laparoscopy, Suspicion of joint or bone infect	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		; This is a request for a Pelvis MRI.; Yes, this is a preoperative study.; Surgery is not planned for within 30 days.; The study is being ordered for suspicion of pelvic inflammatory disease or abscess.	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		Ms. Escobar recalls developing pain in her right lower back region after wrestling one day in December 2017. She suspected injury occurred when she was thrown to the ground and the other girl (whom she states outweighed her by 30 pounds) landed her should; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		Patient had an abnormal pelvic ultrasound; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		This is a request for a Pelvis MRI.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A tumor or mass was noted on previous imaging.; An abnormality was found in the ovary.; The study is being ordered for suspicion of tumor, mass, neoplasm, or metastatic disease.	2
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.	1
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.	5

General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.	4
General/Family Practice	Approval	72196 Magnetic resonance (eg, proton) imaging, pelvis; with contrast material(s)		Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Oct. 2018; It is not known if there has been any treatment or conservative therapy.;; back pain, bowel/bladder incontinence; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	72198 Magnetic resonance angiography, pelvis, with or without contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Vascular Disease.; 10/12/2018; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	73200 Computed tomography, upper extremity; without contrast material		This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT	15
General/Family Practice	Approval	73200 Computed tomography, upper extremity; without contrast material		This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is not suspicion of upper extremity bone or joint infection.; The ordering physician is not an orthopedist or rheumatologist.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	73220 Magnetic resonance (eg, proton) imaging, upper extremity, other than joint; without contrast material(s), followed by contrast material(s) and further sequences		The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.	7
General/Family Practice	Approval	73220 Magnetic resonance (eg, proton) imaging, upper extremity, other than joint; without contrast material(s), followed by contrast material(s) and further sequences		The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 11/9/2018; There has not been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; This request is for a wrist MRI; This study is requested for evaluation of wrist pain.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.;; The patient received oral analgesics.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		; This study is being ordered for a neurological disorder.; 6 months ago; There has been treatment or conservative therapy.; , her pan just has not gone away. She Describes the pain in her trapezius and going into her right lat neck.; pt has under gone pt tried otc meds and rx pain meds.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		decreased range of motion, tenderness, pain and spasms; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		He reports that approximately 3 weeks ago when playing disc golf he felt like he pulled something in his right shoulder. Since that time he has been experiencing continued pain that radiates from his right shoulder down through his right arm into his rig; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		pain; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.	1

General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		Patient has weakness, numbness, tingling, instability, tenderness and pain of the right shoulder. unable to lift arm over head, popping/catching w/rom, limited rom, tenderness of sternoclavicular joint, ac joint, greater tuberosity and scapula. pain is ; The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		patient is also having migraines; This study is being ordered for trauma or injury.; 11/7/2018; There has not been any treatment or conservative therapy.; parathesia -sharp pains in the shoulder and no feeling in left hand; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		PT FELL OFF HORSE AND HURT WRIST. rt wrist pain with decreased rom.&#x0D; No acute fracture identified.&#x0D; Lucency in the lunate may represent an intraosseous cyst or subtle erosion.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; There is not a suspicion of fracture not adequately determined by x-ray.; It is not known if there is a suspicion of tendon or ligament injury.; This request is for a wrist MRI.; This study is requested for evaluation of wrist pain.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.";	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Inflammation of rotator cuff tendon	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; patient had a injury	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; Right shoulder injury - approximately 1 week ago pt was on a hover board and jumped off. The board slipped and caused her to fall backwards hitting her right hip and buttocks. She extended her arms trying to catch herself. She has been experiencing wor	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; It is unknown if surgery is planned.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; Yes, the member experience a painful popping, snapping, or giving away of the knee.	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is a pre-operative study for planned surgery.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	11
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.	22

General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is a suspected tarsal coalition.	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	9
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient had an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient had an abnormal plain film study of the ankle other than arthritis.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; There is a suspicion of fracture not adequately determined by x-ray.; The study is requested for ankle pain.; Tendon or ligament injury is not suspected.	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		U/K; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for None of the above; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		Unknown; This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; There is no conservative treatment of Physical Therapy, physician directed course of non-steroidal medications, Immobilization or Physical directed exercise.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		unknown; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		xray came back normal pt complains of pain rule out tears; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6months prior to visit 7/19/2018; There has been treatment or conservative therapy.; Symptoms include knee pain, decreased range of motion, difficulty bearing weight and difficulty ambulating; BILATERAL KNEE PAIN SEVERAL MONTHS GETTING WORSE PAINFUL POPPING , OCC GIVING, NO LOCKING OR SWELLING INJECTED BACK IN JULY IWTH KENALOG BUT ONLY HEL; Pt had Kenlog Injection and took OTC NSAIDs; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2

General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a requests for a hip MRI.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.; There is a suspicion of tendon or ligament injury.; The hip pain is due to a recent injury.; The request is for hip pain.	1
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		; This study is being ordered for a neurological disorder.; 6 months ago; There has been treatment or conservative therapy.; , her pan just has not gone away. She Describes the pain in her trapezius and going into her right lat neck.; pt has under gone pt tried otc meds and rx pain meds.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		for evolution; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	2
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.	5
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone).	1
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient has a documented limitation of their range of motion.	6
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone); The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone).	5
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone); The patient had an abnormal plain film study of the hip other than arthritis.; The patient does not have a documented limitation of their range of motion.	2
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	4

General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Abd pain x 1 yr; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Abdominal Pain&#x0D; Reported by patient.&#x0D; Location: RUQ; epigastric &#x0D; Quality: sharp and achy &#x0D; Severity: pain level 0/10 &#x0D; Duration: intermittent &#x0D; Onset/Timing: wax/wane &#x0D; Context: food &#x0D; Modifying Factors: eating (worse) &#x0D; Associated Symptoms: no fever; no; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Bilirubin; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	concern of a palpable mass at her previous hernia repair site. This seems to have been getting larger over the past few months.; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	CT to make sure there is no hidden pathology within your liver. I would check a vitamin D a parathyroid hormone and a calcium level.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Diverticulitis of colon Abd pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	History of diverticulitis with perforation, gall bladder disease with multiple stones, abdominal wall hernias that have been repaired with mesh extensively; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Lipoma; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Nausea, vomiting, severe stomach cramps ultrasound does not show any anything but patient has lost weight drastically the past 4 months.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	pain upon palpation; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		Patient has a known ovarian cyst that was surgically removed. Her wound has granular tissue has smaller, thick yellow discharge and palpable pain on left side of wound, MDO will hold wound back this week, and get CT to ensure no large hernias fistula or w; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		patient has a possible incisional hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		Patient has been having abdominal pain for several weeks. She recently had an Abdominal Ultrasound that was abnormal and needing CT to further evaluate.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		Patient has had abdomen pain x 3 month with no relief.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		Patient was found to have right renal cyst in abdominal ultrasound. c/o LUQ pain for some time.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		Persistent abdominal pain without improvement conservatively; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		Pt complaining of hernia type pains in abdomen; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		Pt has persistent epigastric pain not relieved by meds. Pancreatic enzymes abnormal; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		Pt having persistent abdominal pain and chronic constipation. Looking for any GI problems; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Pt states that this LUQ pain is the same pain that he was seeing GI for and he states that they did EGD, colonoscopy, and U/S for and could not find anything wrong. States that they put him on the PPI, which has helped some, but not all the way. States t; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Pt suffers with epigastric pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Pt with right lateral periumbilical tenderness with palpable mass; increasing fatigue; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; Yes, there is a ls there an abdominal and pelvic or retroperitoneal or abdominal mass that has been confirmed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.; Yes this is a request for a Diagnostic CT	7
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; This patient is experiencing hematuria.; The hematuria is not newly diagnosed, it's known previous history.; There are new signs or symptoms other than hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Yes this is a request for a Diagnostic CT	15
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	24
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; Yes this is a request for a Diagnostic CT	3

General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	9
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; Which organ is enlarged? Liver; The patient had an Ultrasound.; The Ultrasound results were equivocal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for trauma.; This request is not for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; There is recent trauma with physical findings or abnormal blood work indicating either peritonitis or abscess.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Unknown; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing	; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	74174 Computed tomographic angiography, abdomen and pelvis, with contrast material(s), including noncontrast images, if performed, and image postprocessing	This is a request for CT Angiography of the Abdomen and Pelvis.	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt; Suspected MASS; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is being ordered for follow-up.; It is not known if the patient is presenting new symptoms.; It is not known if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; The patient is female.; The last Abdomen/Pelvis CT was performed within the past 10 months.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for something other than bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.; The study is being ordered for acute pain.; It is unknown if there has been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; She has been coughing up blood since 10/18/2018 and she has had the knot since 04/2018 but it has gotten bigger and is painful to the patient.; It is not known if there has been any treatment or conservative therapy.; Coughing up blood. Knot that has gotten bigger and is painful.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	abdominal pain - Chronic. She has multiple large abdominal hernias, repair with mesh attempted in 2007, had wound vac for 3 months now healed, bu has large hernias as a result. She got Ct abdomen in March 2017 which did not show any other plausible caus; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Appendicitis , Pain is sharp and burning several times a day every 5 to 10 min. never had ovarian cyst.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Chronic right flank pain; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Complains of pain in right lower quadrant, left lower quadrant, epigastric pain, pain seems worse throughout the day. Has threw up a bit of blood; was running fever yesterday. Tenderness in right lower quadrant with guarding and pain to area when doing leg; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Enter answer here - or Type In Unknown Ms. Braton presents with CC of GI symptoms. For the past days, she has had water diarrhea consistency. This morning after sleeping for 2 1/2 hours so when she went to go she threw up. She has not threw up since then.; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		had a ultrasound of abdomen and carotid us. both were abnormal findings; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.; skin discoloration; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		HEMATUREA CHRONIC PAIN HURTS TO STAND AND MOVE; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		history of COPD; This study is being ordered for a neurological disorder.; 12/27/2018; There has not been any treatment or conservative therapy.; abdominal pain, chest pain, wheezing, coughing; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		HX of IBS lower left quad pain, pt is guarding; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Kidney protocol; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		mild diffuse tenderness. &#x0D; Complains of diffuse abdominal pain for 3-4 weeks. Eating does not make it better or worse and appetite is not affected. Feels like he needs to defecate a lot, but he is going 1-2 times a day. It is solid most of the time, occas; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Need to know if the masses have grown or stayed the same.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/05/2018; There has not been any treatment or conservative therapy.; 3.1 cm AAA, 5.5 mm lung nodule right lung base.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Patient had a baby 2 months ago and since then has had abdominal pain and abnormal bleeding. Abnormal abdominal ultrasound showed ascites and splenomegaly; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		patient has abd pain elevated lipase 80 and amtlase is 124 Acute pancreatitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	patient having lower ab pain. Fever. UA negative. CBC, diverticulitis possible flare up . UA was negative.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Patient is having increased lower abdominal pain with diarrhea and 17 pound weight loss.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	patient is having left flank pain and hematuria. x ray shows a 7mm stone; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Patient is seen today with complaining of having urinary symptoms. In the past she had history of kidney stone. She has extensive family history of kidney stones. Previously CT was ordered when she was having similar symptoms. She is complaining of right; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Patient reports muscle aches and arthralgias/joint pain. She reports weakness and dizziness (ongoing) but reports no loss of consciousness, no numbness, no seizures, and no headaches. She reports fatigue. She reports no fever. She reports no ear pain. She; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; I am concerned that he may have torn something in his right shoulder, possibly his supraspinatus. Right shoulder with pain to external rotation. Pt is unable to actively raise his arm above his head, but I am able to raise his shoulder passively. patient	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; The patient has a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.	3
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	156
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; There are no documented findings of crepitus.; There are no documented findings of swelling.; The ordering physician is not an orthopedist.; Patient has had right shoulder pain for several weeks. States that it does keep her awake at night. Patient has taken muscle relaxer with no relief. Patient had an x-ray done of right shoulder which did show osteophyte formation. Patient called and is sti; The patient is NOT experiencing joint locking or instability.; The patient does not have a documented limited range of motion on physical examination.; There is no documented findings of severe pain on motion.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	3
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; arm is weak not able to lift things .... weakness of right shoulder	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Left shoulder with pain and limited ROM after catching himself last week when he slid down a hill in the rain while walking his dog. Shoulder pops.	1

General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; pt had an injury in July 2018, pt has tried medications, positive Epley's test, pt worsens with vertical abduction, tenderness from anterior and superior right shoulder	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	patient was on antibiotics for uti and has gotten any better. patient presents with right flank pain and blood in urine; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Physical exam finds RLQ pain, tender to touch, with nausea.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Pt with L LE popliteal pain for almost 2+ years. Had US about 18 months ago to r/o DVT. States pain never really resolved. States pain is worse with squatting and trying to stand again. Knee is not popping or catching. States it doesn't give way on her. &#x0D;; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Suspected Diverticulitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	tenderness in the ,slight tenderness in mid lower abdomen on palpation with bowel sounds present in all four quadrants.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for something other than billirubin, ketones, nitrites, hematuria/blood, glucose or protein.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The results of the urinalysis were normal.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; pt was hiking and slipped, grabbed a branch and heard something pop. when working out heard something pop again and hurts profusely. has tenderness in acromion Positive Hawkins and drop arm test and acts like has torn rotator cuff. too much pain for p	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Right shoulder injury 5 days ago, severe pain, unable to use, positive for weakness, restricted ROM, unable to elevate over head, nonexistent internal rotation, restricted abduction, Rotator cuff injury with possible tear.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; unknown	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; It is not known if the patient is experiencing joint locking or instability.; The patient has a documented limited range of motion on physical examination.	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is experiencing joint locking or instability.	6

General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The plain films were normal.; The patient is NOT experiencing joint locking or instability.; The patient has a documented limited range of motion on physical examination.	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The results of the plain films is not known.; The patient is experiencing joint locking or instability.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has not had recent plain films of the shoulder.;	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered for pre-operative evaluation; This study is being ordered prior to arthroscopic surgery.;	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; There are physical findings (palpable mass) of a suspicious mass or known primary site of cancer.; The patient has not had a recent bone scan.; The patient has not had recent plain films of the shoulder.; The patient has not had a recent CT of the shoulder.	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; Study is being ordered for known/suspected joint infection.; The patient has not had a recent bone scan.; The patient has not had a recent ultrasound of the shoulder.; The plain films were normal.; There are documented physical or laboratory findings of a joint infection.; The patient has not had a recent CT of the shoulder.	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	10
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has completed 6 weeks or more of Chiropractic care.; The patient received oral analgesics.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).	2
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.; There is documented findings of severe pain on motion.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		The requested study is a Shoulder MRI.; This study being ordered for suspected aseptic necrosis.; The ordering physician is not an orthopedist or infectious disease specialist.; The patient has had recent plain films of the shoulder.; The plain films were normal.; &lt; Enter answer here - or Type In Unknown if No Info Given. &gt;	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)		This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.	9
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the urinalysis results were normal or abnormal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	4

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for bilirubin.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for acute pain.; There has not been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for acute pain.; There has not been a physical exam.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; It is unknown if there has been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.	3
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	This is a request for an upper extremity joint MRI; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	This is a request for an upper extremity joint MRI; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; unknown; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Unknown; This study is being ordered for trauma or injury.; 10/30/18; There has been treatment or conservative therapy.; weakness in right shoulder, decreased range of motion, pain, inability to perform daily tasks; physical therapy and medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs speciality is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	73221 Magnetic resonance (eg, proton) imaging, any joint of upper extremity; without contrast material(s)	Widening of the right AC joint measuring 7mm is noted cannot grade 1 ac separation, and recommending further studies and she had on 12/6/18 @ ER. Accident happened on 12/6/18; The requested study is a Shoulder MRI.; The pain is from a recent injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1

General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; found a mass in ultrasound, and it was recommended to do a f/u ct; This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	2
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		Patient had an abnormal Doppler arterial bilateral lower extremity done. SHe is needing this for further testing due to an abnormal test already done. She is having leg pain as well.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	2
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		This is a preoperative or recent postoperative evaluation.; This is a request for a Leg CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; Yes this is a request for a Diagnostic CT	4
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		This is a request for a foot CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is no history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is no history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.; This is a request for a Leg CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.; This is a request for a Leg CT.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73700 Computed tomography, lower extremity; without contrast material		Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown date... Post right hip replacement surgery.; There has been treatment or conservative therapy.; THIS IS THE CASE OF A 62 Y/O BLK FEMALE STATUS POST RIGHT HIP REPLACEMENT ( ARTHROPLASTY )  ATAXIA . LEG LENGTH DISCREPANCY .; Physical Therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; It is not known if the ordering physician is an orthopedist.; This study is being ordered for None of the above; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.	1

General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	; This study is being ordered for trauma or injury.; Injury to right foot and ankle.; There has been treatment or conservative therapy.; pain to right foot and ankle with swelling; walking boot, ice ,rest; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	33 yo female with acute left achilles tendon injury. Her history, exam and x-ray findings suggest an acute rupture. Will place her in a CAM walking boot for support. She will remain NWB on crutches. Advised to use ibuprofen 800mg TID and ice to help with ; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	Anti-inflammatory medications and ice packs; This study is being ordered for trauma or injury.; 12/26/18; There has not been any treatment or conservative therapy.; Unable to bare weight, swollen knee, tenderness, limited range of motion, knee and hip pain, and strain hip flexor muscle.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	had xray that shows something; The patient has not had a recent bone scan.; This is a request for a foot MRI.; The study is being ordered for suspected fracture.; They did not have 2 normal xrays at least 3 weeks apart that did not show a fracture.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	IMPRESSION:&#x0D; 1. Degenerative joint disease with chondrocalcinosis involving the&#x0D; meniscal cartilages.&#x0D; 2. Soft tissue swelling is present in the suprapatellar region. I&#x0D; can't exclude a quadriceps tendon or muscular injury&#x0D; Electronically Signed By: Russe; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	No clinical information; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; It is not known if the ordering physician is an orthopedist.; This study is being ordered for None of the above; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	5
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	46
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for ketones.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	4
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	8
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient has a documented limitation of their range of motion.	5
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Instability	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Locking	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury	16
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Instability	7
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Limited range of motion	11
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Limited range of motion; Surgery is NOT being planned.	3
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Locking	4
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Swelling greater than 3 days	17

General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; Swelling greater than 3 days; Surgery is NOT being planned.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for None of the above; Limited range of motion	3
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Limited range of motion; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	8
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	10
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days	29
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for None of the above; Pain greater than 3 days	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	7
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	7
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	14
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; It is not know if this study is being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The hematuria is due to Renal Calculi/kidney/ ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	23
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The hematuria is due to tumor or mass.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	13
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is pre-op or post op evaluation.; It is not known if this study is being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed more than 10 months ago.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	4
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient did NOT have an abnormal abdominal Ultrasound, CT or MR study.; Yes this is a request for a Diagnostic CT	8
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	15
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	3
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	12
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; &lt;Additional Clinical Information&gt;; This study is being ordered for Suspicious Mass or Suspected Tumor/ Metastasis	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; PT unable to walk, fluid in the joint seen on xray alone with a foreign body.; This study is being ordered for Suspicious Mass or Suspected Tumor/ Metastasis	1

General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Non-acute Chronic Pain; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; This study is being ordered for Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed exercise program	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a lower extremity MRI; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a lower extremity MRI; There is a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a lower extremity MRI; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a lower extremity MRI; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.	3
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for a lower extremity MRI; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is a study for a fracture which does not show healing (non-union fracture).; This is a pre-operative study for planned surgery.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.	7
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient had an abnormal plain film study of the ankle other than arthritis.; There is not a suspected tarsal coalition.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	2
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 Magnetic resonance (eg, proton) imaging, lower extremity other than joint; without contrast material(s), followed by contrast material(s) and further sequences		trying to rule out a ligament tear. xray showed negative for any fractures.; This study is being ordered for trauma or injury.; 9/4/18; There has been treatment or conservative therapy.; Pain radiating from right ankle down into right foot. pain not getting any better. swelling to the ankle and foot; Patient was prescribed a walking boot, resting, elevation, ice and heat alternating instructions, tramadol for pain.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material			3
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		; This is a requests for a hip MRI; It is not known if the member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.	1

General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.	4
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).	3
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	5
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient has a documented limitation of their range of motion.	4
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	8
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	40
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Anerysm or a Pelvis Mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; It is unknown if the patient had an Ultrasound.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.	2
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.	8
General/Family Practice	Approval	73721 Magnetic resonance (eg, proton) imaging, any joint of lower extremity; without contrast material		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip.;" There is not a suspicion of AVN.; The patient is receiving long-term steroid therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	2
General/Family Practice	Approval	73725 Magnetic resonance angiography, lower extremity, with or without contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Vascular Disease.; 10/12/2018; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material			1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is not experiencing hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.; abdominal swelling, chronic cough; medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		10/15/2018 Normal abdominal ultrasound,10/31/2018 with same complaint on the left side. Gastric pain. lab test normal. Further evaluation. Fatigued and has headaches, fever.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		abdominal and pelvic swelling, 3 month follow up for a 10 mm nodule.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		abnormal abdominal x-ray and abdominal pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		Abnormal ct scan 1/2017 and ultrasound normal but 15mm on ct with liver lesion on right lobe radiologist recommended multi phase ct of abdomen; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		Abnormal ultrasound. Abdominal pain.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		blood in stool, abdominal pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		CHRONIC PAIN; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		elevated liver enzymes, abd pain, and appetite changes; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		evaluation of vascular lesion in the liver noted on non contrasted CT abdomen and pelvis performed 11/3/18; This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are not being ordered for known or suspected aneurysms, hematoma, or blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; It is not known if there is evidence of vascular abnormality seen on plain film and/or Ultrasound/ Doppler.; There are no symptoms or findings to indicate the member has internal abdominal and or pelvic bleeding such as hematoma or hemorrhage.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		In regard to the generalized abdominal pain, this is located primarily in the left upper quadrant. It does not radiate. It began August 2018. The onset of pain occurred with no apparent trigger. He characterizes it as sharp. Associated symptoms include; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		mass originally seen on MRI L Spine. pt then had abd US showing 2.6cm isoechoic/hypochoic mass. radiologist recommended CT Abd with and without contrast; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; No, this is not a request for follow up to a known tumor or abdominal cancer.; This study being ordered for a palpable, observed or imaged abdominal mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		PAIN; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		patient has been having this pain for two months; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		Physical exam of GI during initial office visit showed: no masses palpated, soft, tender in upper epigastric area on palpation, no organomegaly, bowel sounds normal.; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; It is unknown if there are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		pt has a hx of hernia repair one year ago. pt is having pain and noticeable bulging in abdomen. surgeon will require new ct prior to appt; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; This patient does NOT have known prostate cancer with a PSA (prostate-specific antigen) greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.; Yes this is a request for a Diagnostic CT	4
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material		This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Yes this is a request for a Diagnostic CT	5
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are being ordered for known or suspected hematoma and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are known or endoscopic findings of Diverticulitis.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are known or endoscopic findings of Ulcerative Colitis.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Diverticulitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of Diabetic patient with gastroparesis.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of Hematuria.; The hematuria is newly diagnosed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	This is a request for an Abdomen CT.; This study is being ordered for trauma.; This request is for follow up to abdominal and/or pelvic trauma ordered by a specialist or PCP on behalf of a specialist who has seen the patient.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	unknown; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Unknown; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	unsure of cause of hypertension, greater than 2 months; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74150 Computed tomography, abdomen; without contrast material	Will fax clinical info.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74175 Computed tomographic angiography, abdomen, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Yes, this is a request for CT Angiography of the abdomen.	4
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		6
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	6
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1yr; There has not been any treatment or conservative therapy.; abd pain, headache; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	; This study is being ordered for trauma or injury.; 12/7/18; There has not been any treatment or conservative therapy.; hematuria and severe pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	6 mo cancer surveillance; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		ABDOMINAL PAIN, PALPITATION RIGHT UPPER QUADRANT FULLNESS; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		abdominal tenderness, abnormal US - spleen enlargement, abnormal liver enzymes.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		ABNORMAL PH; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; It is not know if this study is being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for something other than bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		blood on the urine.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for bilirubin.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		c/o abdominal pain x's one week. worsening. r/q fullness, tendernes. UA negative, xray negative. needs CT to r/o appendicitis; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Elevated creatinine level and within an ultrasound showed obstructive uropathy and hydronephrosis, requested study by urology before they would see him; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		elevated white blood count and kidney stones; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		feeling weak and fever, abd pain&#x0D; post hysterectomy 5 days ago.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		flank pain, fever; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		has had injections and has rheumatoid arthritis and acute cystitis with hematuria; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Having a rectal exam SHOULD NOT be a criteria for an ABD/Pelvis CT!!!! This man has Gross Hematuria an severe Flank Pain!!! We are going to have to send him to the EMERGENCY ROOM to have a CT done because YOU think he needs a RECTAL EXAM BEFORE HE IS ABL; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		hematuria; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; It is unknown if there has been a physical exam.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Henry V Williams, a 73 y.o. male presents with a Chief Complaint of Abdominal Pain&#x0D; x 2 months. Pain is diffusely over his abdomen. BM normal frequency, color, and consistency. + flatus. No fever, constipation, nor diarrhea. No BRBPR/melena. Colonos; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient did not have an endoscopy.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient had an endoscopy.; The endoscopy was abnormal.; The patient is 50 years or older.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	6
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	118
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Today with a constellation of concerning gastrointestinal symptoms. About a year ago his stools started softening. He now alternates between soft stools and diarrhea regularly. He has had melena essentially constantly, with intermittent hematochezia. He h; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	Trouble eating for 3.5mos, causes nausea, vomiting and dizziness. Barely eats, not hungry. Ab pain worse w/ food. Ultrasound 2016; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	hernia; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	low back/abdominal pain, sharp, pt states feels like a kidney stone.&#x0D; Exam: guarding, LLQ tenderness, CVA tenderness; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	mild sigmoid diverticulosis; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		monitoring of known breast ca restaging while undergoing tx.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Mr. HEFFNER is a 51 year old White male. This is a follow-up visit. &#x0D; It began 1 week ago. It is of moderate intensity. There are no obvious aggravating factors. Nothing relieves the symptoms. Associated symptoms include rectal pain w bm. APPETITE ; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		ongoing abdominal pain. acutely worse in last 24-48 hours. Needs hernia repair surgery. has large palpable umbilical mass. possible incarcerated hernia vs malignancy; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		PAIN; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		patient has had continued abdominal pain since 11/14/2018.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		unknown; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Unknown; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not known if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		We saw the patient who presented with abdominal pain which was a follow up to and emergency room visit. She had an abnormal ultrasound which showed a mass on her liver. The radiologist requested an abdominal/pelvic CT.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		XRAY WAS DONE on abdomen and it was normal; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A kidney abnormality was found on a previous CT, MRI or Ultrasound.; It is unknown if the patient has a renal cyst or tumor.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Patient has Pain, after eating, vomiting when pain worsens, eating causes pain, asthma attack, constantly has diarrhea, bright red blood in stools, hernia on right lower quadrant for 10 years, fatty liver; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		patient has rlw pain, elevated wbc, tender to palpation, guarding; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for something other than bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		patient was seen at hospital, she had a CT that showed and abcess, this is just a follow up since she is still having abdominal pain; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for something other than bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; The patient had an amylase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT possible appendicitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		PT C/O LOWER ABDOMINAL PAIN, LEFT INGUINAL PAIN AND GROIN PAIN; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		PT has had an IVP that recommended the CT.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		pt needs 6 month follow up on a right iliac artery aneurysm; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		1. 3.5 cm lesion in the right lobe of the liver corresponding to the lesion seen on the previous CT has signal and enhancement characteristics consistent with a hemangioma. 2. Similar appearing lesion in the spleen has signal and enhancement characteristics; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is NO suspicion of metastasis.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		abd mass found on us; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		ABNORMAL CT SCAN / LIVER SHOWS POSSIBLE INJURY WITH THICKENING OF COLON ON RIGHT SIDE; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		Bilateral indeterminate renal lesions; Found on CT while patient in the ER on 9/2. "Bilateral indeterminate renal lesions. Recommend further evaluation with contrast enhanced MRI of the abdomen to exclude solid mass." The masses were both about 1.8 x 1.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		Incidental 7 mm lesion within the body of the pancreas. Not optimally defined on this study. Nonemergent further characterization of this lesion with MRI pre and post contrast, MRCP, is recommended.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		MASS FOUND IN CT FOR ADRENAL; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		positive liver enzymes ABN ULTRA; This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; There are physical findings or abnormal blood work consistent with pancreatitis.; An abnormal amylase or lipase was NOT noted.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		RENAL MASS; Flank pain, stone disease suspected; Hematuria, unknown cause; transient episodic hematuria, failure abx x 2, cva; tenderness Flank pain; Hematuria, unspecified type; Bilateral flank pain; pain; Leukocytes in urine; CVA tenderness; History of recu; This request is for an Abdomen MRI.; This study is being ordered for hematuria.; The patient has NOT had previous abnormal imaging including a CT, MRI or Ultrasound.; This study is NOT being ordered to evaluate an undescended testicle in a male.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; "There are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; It is not known if there are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis.; "There are no active or clinical findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "There is not radiographical or ultrasound findings consistent with abnormal fluid collection, abdominal abscess, or ascites."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is an oncologist, urologist, gastroenterologist, or surgeon."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is not presenting new symptoms.; The patient has had 3 or fewer follow-up abdomen MRIs.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; Patient presents to clinic to schedule follow up MRI Abdomen for known hypervascular masses in the liver. Patient was scheduled for MRI in September 2016 and did not show for the appointment. Her last MRI of the abdomen was February 2016.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; The patient is presenting new symptoms.; This study is being ordered for follow-up.; The patient is not undergoing active treatment for cancer.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; COMPLAINING OF SPASUM RIGHT FLANK PAIN RADIATED TO THE BACK AND DOWN TO THE LEGS HISTORY OF HEPATIC LEGION FOUND ON MRI A YEAR A GO	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; Pt having abdominal pain & nausea. Pt does not have a gallbladder. CT A/P showed a 2.2 x 2.9cm right adrenal mass which had developed since the last study from 2004.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study.";	4
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; ***PLEASE EXPEDITE APPROVAL; CT ABDOMEN AND PELVIS 12/07/18 IMPRESSION: 3.1 x 3.2 CM MASS-LIKE LESION INVOLVING THE LEFT LATERAL KIDNEY WHICH DEMONSTRATES HETEROGENEOUS ENHANCEMENT, PARTICULARLY ALONG ITS MEDIAL MARGIN. THIS IS SUSPICIOUS FOR RENAL CELL CA	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Restaging post chemotherapy treatment; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		right side weakness and headaches, trouble getting around affecting knee, problems with bowels; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		suspects appendicitis. pain in lower right abdomen just below beltline. sometimes radiates to mid-lower abd and groin.; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the hematuria is not known.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; Yes this is a request for a Diagnostic CT	5
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; It is not known if the urinalysis was positive for bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.; The study is being ordered for acute pain.; It is unknown if there has been a physical exam.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for something other than bilirubin, ketones, nitrites, hematuria/blood, glucose or protein.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	4
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for acute pain.; There has not been a physical exam.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were unknown.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; The reason for the study is renal calculi, kidney or ureteral stone.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	2

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; It is not known if this is the first visit for this complaint.; It is unknown if there has been a physical exam.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material	This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" A mass was found on ultrasound. The radiologist recommended follow up with MRI.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" Abnormal labs	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" Elevated ALT/AST &#x0D; "fever" off and on &#x0D; Microscopic hematuria &#x0D; Liver masses	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" Liver lesion RUQ pain abn findings on ultrasound	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" Mass/Nodules in the right upper quadrant adjacent to the right lobe of the liver.&#x0D; Monitor follow-up imaging in 4-6 months.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" Patient has been having epigastric pain. She had an ultrasound on 12/14/18 and it shows a 3.2cm lesion in the left lobe of the liver. It recommended an MRI.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" Pt had a CT showing a liver mass. Pt then had a MRI done that suggested she have a repeat MRI done in three months.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" The patient had a recent liver ultrasound and CT abdomen and pelvis with contrast that indicated patient having 3 solid liver masses. Recommendations for an MRI Liver for further evaluation.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" There is a mass in the medial upper pole of the right&#x0D; kidney seen by CT which measures 10 mm in maximal diameter. This is&#x0D; not identified by ultrasound. Because of this it should be assumed to&#x0D; be solid. Because of the patient's age malignancy is felt to	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" There is an oblong mass in the retroperitoneum at the level of the&#x0D; celiac axis measuring 4 x 1.3 x 2 cm. Given the location, this is most&#x0D; likely related to an enlarged lymph node but is overall indeterminate&#x0D; in etiology. Recommend correlation to previo	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)	This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor.;" "The patient has had an abdominal ultrasound, CT, or MR study.;" There was a growing 2.5 cm adrenal nodule noted on LDCT for Lung cancer screening...the MRI is to follow up in mass.	1

General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Patient recently had a CT scan of abdomen due to urinary calculus. CT scan noted a lesion on Liver that is unchanged since last scan in 4/2017.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study."; Abdominal Mass	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the spleen during a previous CT, MRI or Ultrasound.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A kidney abnormality was found on a previous CT, MRI or Ultrasound.; The patient has a tumor.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.;	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; LIVER DISEASE UNSPECIFIED&#x0D; Abdomen: Bowel Sounds: normal. Inspection and Palpation: no guarding, masses, or CVA tenderness; epigastric tenderness, LUQ tenderness, and RUQ tenderness (Positive Murphy's sign); and non-distended. Liver: non-tender and no he	1
General/Family Practice	Approval	74185 Magnetic resonance angiography, abdomen, with or without contrast material(s)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Vascular Disease.; 10/12/2018; There has been treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; 1. Chest pain; Continues to c/o intermittent chest pressure, worsening in intensity over the past several months. Negative MPI and normal echo 11/17. Given continued symptoms, will arrange for CTA of coronaries.&#x0D; 2. Palpitations: Continues to report worse; Yes, there is Chronic Chest Pain.	1
General/Family Practice	Approval	75574 Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3D image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)		This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Patient has been having Precordial Pain for several months, has recently had a Nuclear Stress Test that was negative.	1
General/Family Practice	Approval	75635 Computed tomographic angiography, abdominal aorta and bilateral iliofemoral lower extremity runoff, with contrast material(s), including noncontrast images, if performed, and image postprocessing		Yes, this is a request for CT Angiography of the abdominal arteries.	13
General/Family Practice	Approval	77058 Magnetic resonance imaging, breast, without and/or with contrast material(s); unilateral		; This is a request for Breast MRI; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	4
General/Family Practice	Approval	77058 Magnetic resonance imaging, breast, without and/or with contrast material(s); unilateral		; This is a request for Breast MRI; This study is being ordered for known breast lesions.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; No, this is not a confirmed breast cancer.; No, this patient does not have axillary node adenocarcinoma.; No, there are no anatomic factors (deformity or extreme density) that make a simple mammogram impossible.; It is unknown if there are benign lesions in the breast associated with an increased cancer risk.	1

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were normal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; It is not know if this study is being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; Yes this is a request for a Diagnostic CT	5
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is follow up trauma.; There is not laboratory or physical evidence of an intra-abdominal bleed.; There is not physical or abnormal blood work consistent with peritonitis or abdominal abscess.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; It is not known if the patient has a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient has Diverticulitis.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient does not have Crohn's Disease, Ulcerative Colitis or Diverticulitis.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient has Diverticulitis.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is known tumor.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	6
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	77058 Magnetic resonance imaging, breast, without and/or with contrast material(s); unilateral		Her mother has a history of breast cancer diagnosed at age 32. Her lifetime risk=20% using the Tyrer-Cuzick Risk Assessment. She has right breast pain and nipple discharge. MRI is being requested for further evaluation.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1
General/Family Practice	Approval	77058 Magnetic resonance imaging, breast, without and/or with contrast material(s); unilateral		Tenderness under Rt axilla and lateral aspect breast at 9 o'clock; This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; It is not known if this is an individual who has known breast cancer in the contralateral (other) breast.	1
General/Family Practice	Approval	77058 Magnetic resonance imaging, breast, without and/or with contrast material(s); unilateral		The patient reports a positive family history of breast cancer. She states her mother and two maternal aunts. have had breast cancer (see FMHx). &#x0D; &#x0D; &#x0D; Her mother was diagnosed with breast cancer at 60 and colon cancer at 65.&#x0D; Maternal aunt diagnosed with; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1
General/Family Practice	Approval	77058 Magnetic resonance imaging, breast, without and/or with contrast material(s); unilateral		This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20.	3
General/Family Practice	Approval	77058 Magnetic resonance imaging, breast, without and/or with contrast material(s); unilateral		This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	9
General/Family Practice	Approval	77058 Magnetic resonance imaging, breast, without and/or with contrast material(s); unilateral		This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; Yes, this is an individual who has known breast cancer in the contralateral (other) breast.	2

General/Family Practice	Approval	77058 Magnetic resonance imaging, breast, without and/or with contrast material(s); unilateral		This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are benign lesions in the breast associated with an increased cancer risk.	6
General/Family Practice	Approval	77078 Computed tomography, bone mineral density study, 1 or more sites, axial skeleton (eg, hips, pelvis, spine)		This is a request for a Bone Density Study.; This patient has not had a bone mineral density study within the past 23 months.; This is a bone density study in a patient with clinical risk of osteoporosis or osteopenia.	5
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.; This study is being ordered for None of the above; The patient has not had a stress echocardiogram within the past eight weeks.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.; It is unknown if the patient has known diabetes	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		normal ekg chest pain fsatigue sob high bp; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		Patient has chest pain starting from 12/17/18. She has taken aspirin and has not worked, patient has a EKG.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		SEVERAL EPISODES OF LEFT SIDE DNECK STARTIN IN THE LEFT CHEST AND MOVIN UP ACCOMPANIED BY PALPATIONS LASTIN ANYWHERE FROM 20 MIN TO A 1.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The patient is not diabetic.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient is less than 45 years old.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	2

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.; This is NOT a Medicare member.; The patient's age is between 45 and 64 years old.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.; This is NOT a Medicare member.; The patient is 65 or older.	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; It is not know if this study is being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; It is not known if the study is requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	7
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is organ enlargement.; There is ultrasound or plain film evidence of an abdominal organ enlargement.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is pre-op or post op evaluation.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is not presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The last Abdomen/Pelvis CT was performed within the past 10 months.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; The reason for the study is suspicious mass or suspected tumor or metastasis.; The patient is presenting new symptoms.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient had an abnormal abdominal Ultrasound, CT or MR study.; The patient has NOT completed a course of chemotherapy or radiation therapy within the past 90 days.; Yes this is a request for a Diagnostic CT	4
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; It is not known if the member has known or suspected coronary artery disease.	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); single study, at rest or stress (exercise or pharmacologic)		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study); This is a Medicare member.; This study is being ordered for Cardiac symptoms including chest pain (angina) and/or shortness of breath; The symptoms cannot be described as "Typical angina" or substernal chest pain that is worse or comes on as a result of physical exertion or emotional stress; There is a physical restriction to the member's ability to exercise	1
General/Family Practice	Approval	78472 Cardiac blood pool imaging, gated equilibrium; planar, single study at rest or stress (exercise and/or pharmacologic), wall motion study plus ejection fraction, with or without additional quantitative processing		This is a request for a MUGA scan.; This study is being ordered for Suspected Cardiomyopathy/ Myocarditis.; The patient has not recently been diagnosed with and/or treated for congestive heart failure.; The patient is presenting new cardiac signs or symptoms.; The patient has not had a recent MI.; There are documented clinical findings consistent with a valve disease.; chest pain and palpitations	1
General/Family Practice	Approval	78813 Positron emission tomography (PET) imaging; whole body		This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
General/Family Practice	Approval	78813 Positron emission tomography (PET) imaging; whole body		This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has not been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; This study is being requested for Lung Cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
General/Family Practice	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
General/Family Practice	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
General/Family Practice	Approval	78816 Positron emission tomography (PET) with concurrently acquired computed tomography (CT) for attenuation correction and anatomical localization imaging; whole body		This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; More than 4 PET Scans have already been performed on this patient for this cancer.; This is NOT a Medicare member.; This is for a Routine/Standard PET Scan using FDG (fluorodeoxyglucose)	1
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		Suspected TIA or Stroke; This study is being ordered for a neurological disorder.; 12/04/2018; There has been treatment or conservative therapy.; left sided weakness, numbness tingling; Eliquis 5mg bid; daily aspirin; US carotid doppler; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has high blood pressure	1
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.	3
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This is a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has an enlarged heart; The patient has known or suspected pulmonary hypertension.	1

General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected pulmonary hypertension	1
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Mass.; This is for the initial evaluation of a cardiac mass.	1
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; It is unknown if this request is for initial evaluation of a murmur.; It is unknown if this is a request for follow up of a known murmur.	1
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; It is unknown if this is a request for follow up of a known murmur.	1
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; This is NOT a request for follow up of a known murmur.	1
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	1
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.	4
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; It is unknown if there been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	1
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.	3
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	4
General/Family Practice	Approval	93307 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, without spectral or color Doppler echocardiography		This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of a recent myocardial infarction (heart attack).	1
General/Family Practice	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This is a request for a Stress Echocardiogram.; This patient has not had a Nuclear Cardiac study within the past 8 weeks.; This study is being ordered for suspected coronary artery disease.	2
General/Family Practice	Approval	93350 Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, during rest and cardiovascular stress test using treadmill, bicycle exercise and/or pharmacologically induced stress, with interpretation and report;		The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient is female.; The patient has not had a recent non-nuclear stress test.; This is a request for a Stress Echocardiogram.; This patient has not had a Nuclear Cardiac study within the past 8 weeks.; This study is being ordered for suspected coronary artery disease.; "Patient is not clinically obese, nor has an emphysematous chest configuration."	1
General/Family Practice	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING			1
General/Family Practice	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING		&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Low Dose CT for Lung Cancer Screening.; It is unknown if this patient has had a Low Dose CT for Lung Cancer Screening in the past 11 months.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.	1

General/Family Practice	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Low Dose CT for Lung Cancer Screening.; This request is for a Low Dose CT for Lung Cancer Screening.; This patient has had a Low Dose CT for Lung Cancer Screening in the past 11 months.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.	1
General/Family Practice	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING	oct for 6 mts fu but have to wait till then to send request they wont approve now for test in oct so hold this referal and resubmit after 10/18/18 they have all the documentation they need and see no reason it should be denied at that time; This request is for a Low Dose CT for Lung Cancer Screening.; This patient has had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.	1
General/Family Practice	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING	pt gets LDCT annually; This request is for a Low Dose CT for Lung Cancer Screening.; No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening.; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.	1
General/Family Practice	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING	screening for cancer; This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; It is unknown if this patient is a smoker or has a history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.	1
General/Family Practice	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING	This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.	1
General/Family Practice	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING	This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.	13
General/Family Practice	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING	This request is for a Low Dose CT for Lung Cancer Screening.; This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.; The patient quit smoking less than 15 years ago.	1
General/Family Practice	Approval	G0297 LOW DOSE CT SCAN FOR LUNG CANCER SCREENING	unknown; This request is for a Low Dose CT for Lung Cancer Screening.; This patient has NOT had a Low Dose CT for Lung Cancer Screening in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; It is unknown when or if the patient quit smoking.	1
General/Family Practice	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)	; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
General/Family Practice	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)	impression of abdominal ultrasound stated that further eval with MRCP is recommended to exclude a common duct stone.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
General/Family Practice	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)	This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.	1
General/Family Practice	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)	Ultrasound does show a possible choledocholithiasis.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
General/Family Practice	Approval	S8037 MAGNETIC RESONANCE CHOLANGIOPANCREATOGRAPHY (MRCP)	Ultrasound impression suggested that patient have MRCP done for further evaluation.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1

General/Family Practice	Disapproval	70336 Magnetic resonance (eg, proton) imaging, temporomandibular joint(s)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Disapproval	70336 Magnetic resonance (eg, proton) imaging, temporomandibular joint(s)	Radiology Services Denied Not Medically Necessary	This is a request for a temporomandibular joint MRI.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	3
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has not been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/9/2018; There has not been any treatment or conservative therapy.; Moderate headache; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1yr; There has not been any treatment or conservative therapy.; abd pain, headache; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	2
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; ; It is not known if there has been any treatment or conservative therapy.; Describe primary symptoms here - or Type In Unknown &#x0D;&#x0D; Patient reports photophobia and blind spots She reports occur daily (between 4pm and 6pm)&#x0D; She reports bright light makes it worse&#x0D; She reports avoiding bright light&#x0D; Pt. states she had an incapait; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Inflammatory/ Infectious Disease.; ; It is not known if there has been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Inflammatory/ Infectious Disease.; ; There has been treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	abdominal pain; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	evaluation; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	faxed in clinical info.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	headache and factor 5 leiden mutation; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	None; This study is being ordered for trauma or injury.; 10/29/2018; There has been treatment or conservative therapy.; Abn imaging xray in Vietnam head injury; Blood work CXR; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	Patient has a family history of CVA. And is having very bad dizzy spells with high blood pressure.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	Patient has been seen in our office twice regarding this issue. has tried flexeril, ibuprofen, and bc powder. which has not helped. reports seeing spots occasionally; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	patient is having increased Syncope. Medications is not working, rx and OTC. Headache has been present for 8 days with no relief. Needing a CT scan to see what is going on.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	patient seen on 9/12 and follow up on 9/20 with complaints of dizziness/vertigo that have not improved; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	63
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	9
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	6

General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam are unknown.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	seizures; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for new onset of seizures or newly identified change in seizure activity or pattern.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; Known or suspected blood vessel abnormality (AVM, aneurysm) with documented new or changing signs and or symptoms best describes the reason that I have requested this test.; This is NOT a Medicare member.	3
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; The patient has a chronic headache, longer than one month; Headache best describes the reason that I have requested this test.	63
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; The patient has a headache involving the back of the head and the patient is over 55 years old; Headache best describes the reason that I have requested this test.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; The patient has a new onset of a headache within the past month; Headache best describes the reason that I have requested this test.	28
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a brain/head CT.; The patient has the worst headache of patient's life with onset in the past 5 days; Headache best describes the reason that I have requested this test.; This is NOT a Medicare member.	7
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	trauma to head, headache; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.	1
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	2
General/Family Practice	Disapproval	70450 Computed tomography, head or brain; without contrast material	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for a neurological disorder.; 10/2018; There has been treatment or conservative therapy.; headache, mri of the back atrophy and thicken.; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for Inflammatory/ Infectious Disease.; 11/24/2018; There has been treatment or conservative therapy.; right side gentle tenderness with gum swelling to right ear and eye; Meds.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	2
General/Family Practice	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/17/18; There has not been any treatment or conservative therapy.; SWELLING, HARDNEST, TINDER; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; ; It is not known if there has been any treatment or conservative therapy.; Describe primary symptoms here - or Type In Unknown &#x0D; &#x0D; Patient reports photophobia and blind spots She reports occur daily (between 4pm and 6pm)&#x0D; She reports bright light makes it worse&#x0D; She reports avoiding bright light&#x0D; Pt. states she had an incapaci; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	Acute non-recurrent maxillary sinusitis; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	2

General/Family Practice	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	Faxing OV notes; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Jaw pain 12-1-2018 Office visit 12-11-2018 CT of Chest is because of nodule found on X ray 30 pack a year smoker OV of 12-11-2018; There has not been any treatment or conservative therapy.; Chronic Jaw Pain hurts patient to Chew trouble eating due to pain 30 pack a year smoker and lesion/nodule shown on X ray; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology PT SXS HAVE WORSENEDE DESPITE TREATMENT; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for a known or suspected tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for follow-up to trauma.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks); Yes this is a request for a Diagnostic CT	2
General/Family Practice	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for sinusitis.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Recurrent Acute Rhinosinusitis (4 or more acute episodes per year); Yes this is a request for a Diagnostic CT	2
General/Family Practice	Disapproval	70486 Computed tomography, maxillofacial area; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Sinus CT.; This study is being ordered for sinusitis.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are unknown.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	70490 Computed tomography, soft tissue neck; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70490 Computed tomography, soft tissue neck; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11/17/18; There has not been any treatment or conservative therapy.; SWELLING, HARDNEST, TINDER; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70490 Computed tomography, soft tissue neck; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 10/03/2018; There has been treatment or conservative therapy.; neck pain, headaches, pain in left lower extremity; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70490 Computed tomography, soft tissue neck; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Disapproval	70490 Computed tomography, soft tissue neck; without contrast material	Radiology Services Denied Not Medically Necessary	Ultrasound impression showed that the mass was solid and a CT was recommended for further study.; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.; Yes this is a request for a Diagnostic CT	1

General/Family Practice	Disapproval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Patient has a nodule on left jaw; This study is being ordered for a neurological disorder.; patient has had four seizures in one month; There has not been any treatment or conservative therapy.; patient has had four seizures in one month; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70496 Computed tomographic angiography, head, with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the brain.	5
General/Family Practice	Disapproval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a neurological disorder.; 9/28/2018; There has not been any treatment or conservative therapy.; double vision; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)	Radiology Services Denied Not Medically Necessary	pain in neck radiating to both arms, numbness in fingers, hands, and arms bilaterally;"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection,cancer, mass, tumor, pre or post-operative evaluation	1
General/Family Practice	Disapproval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)	Radiology Services Denied Not Medically Necessary	Patient states that she woke up with neck pain Monday morning and is unable to move her neck at all. Her left ear is hurting her really bad now and patient is complaining of a headache. Patient describes the neck pain as throbbing while at rest and shooti;"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection,cancer, mass, tumor, pre or post-operative evaluation	1
General/Family Practice	Disapproval	70540 Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/8/18; There has not been any treatment or conservative therapy.; headache an neck pain; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70544 Magnetic resonance angiography, head; without contrast material(s)	Radiology Services Denied Not Medically Necessary	There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	4
General/Family Practice	Disapproval	70544 Magnetic resonance angiography, head; without contrast material(s)	Radiology Services Denied Not Medically Necessary	There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	5
General/Family Practice	Disapproval	70544 Magnetic resonance angiography, head; without contrast material(s)	Radiology Services Denied Not Medically Necessary	Will Upload Document; This study is being ordered for Vascular Disease.; Onset of headaches 11/01/2018; There has been treatment or conservative therapy.; Headaches With Neck Pain; Stretching and OTC Pain Medications And Prescribed Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	2
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	3
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6 months; There has been treatment or conservative therapy.; nystagmus headaches and eye pressure vision changes; over the counter medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 11/30/2018; There has been treatment or conservative therapy.; unk; unk; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	2
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient is experiencing dizziness.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	A mass is present in the region the right facial nerve. This may represent a&#x0D; facial nerve schwannoma. An MRI of the facial nerve with contrast is&#x0D; recommended.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	also having vision changes and headache; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/30/2018; There has been treatment or conservative therapy.; Dizziness, nausea, phonophobia, photophobia and vomiting; Medrol dose pack, headache came back worse. Also Indomethicin and Topomax. Staydol nasal spray as well.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	back pain of lumbar region with sciatica numbness and tingling in left hand EMG results show sensory neuropathy in left upper extremity rule out brain issues and stroke; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).; This study is NOT being ordered as a 12 month annual follow up.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	cat scan in ER found asymmetric enlargement; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Chronic recurring headaches approx 2-3 per month since the age of 10. Unrelieved with medication.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	dementia; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Doctor is trying to evaluate for multiple sclerosis; This study is being ordered for a neurological disorder.; 10/11/2018; It is not known if there has been any treatment or conservative therapy.; Bilateral leg weakness evaluate for multiple sclerosis; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Enter answer here - or Type In New onset of dizziness after something popped in neck. Reports he feels drained for some hours after dizziness. This has occurred 3 times in the past 10 days, with each episode lasting 10-15 minutes. Associated symptoms inc; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	facial numbness and tingling, head and scalp tingling; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient is experiencing fatigue or malaise.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Fatigue, sudden metal changes, impulsive, memory impairment, agitated; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Follow up:The pt states he changed my Topamax but it doesn't seemed to have helped&#x0D; Appointment for MRI Brain WO, worsening headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	headache for 2 weeks with no relief, neck pain; This study is being ordered for a neurological disorder.; 12/4/2018; There has been treatment or conservative therapy.; headache that feels different from other headaches in the past and no relief of pain with medications; has tried several OTC and prescription medications for headache with no relief; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	headaches with numbness and tingling in hands and feet and blurred vision; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	HEENT Present- Headache (HAS HAD TO MISS WORK 2 DAYS THIS WEEK DUE TO RIGHT SIDE HEADACHE GETS MIGRAINE HEADACHE FREQUENTLY; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	loss of consciousness and memory changes; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	patient is having memory problem with times of feeling "foggy headed" - had neurologist appt and workup was normal; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Positive for headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have a sudden severe, chronic or recurring or a thunderclap headache.	1

General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	pt has a history of brain cyst and has not had them checked out in a while.; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Pt having fainting spells, episodes of syncope, malaise.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	R/O TRANSECETED ARTERY; This study is being ordered for trauma or injury.; 12/10/2018; There has not been any treatment or conservative therapy.; HEADACHE, NAUSEA, VOMITING, DIFFICULTY SPEAKING, CHEST PRESSURE, TROUBLE BREATHING, DIZZINESS, SHAKING; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	She has a benign tumor that they are watching; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a "thunderclap" or the worst headache of the patient's life.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	tingling on left side; possible TIA; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	unknown; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for a neurological disorder.; 5 months ago; There has been treatment or conservative therapy.; headache, pain in frontal area, neck pain, vision changes, neck stiffness pin in left arm, paresthasias, upper extremity weakness; physical therapy, medications, muscle relaxers; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/12/18; There has been treatment or conservative therapy.; Pain, tightness, interference with sleep, photophobia, sensitivity to light, limited range of motion with straight leg raises, tenderness, radiating pain down bilateral legs; Anti-inflammatory medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	US of head completed-no definite findings; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Disapproval	70551 Magnetic resonance (eg, proton) imaging, brain (including brain stem); without contrast material	Radiology Services Denied Not Medically Necessary	Will Upload Document; This study is being ordered for Vascular Disease.; Onset of headaches 11/01/2018; There has been treatment or conservative therapy.; Headaches With Neck Pain; Stretching and OTC Pain Medications And Prescribed Medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt; Patient has copd and smokes quit a bit; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.; abdominal swelling, chronic cough; medications; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	; It is not known if there is radiologic evidence of asbestosis.; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; It is not known if there is radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; It is unknown if there is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	3
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	5. Low back pain -&#x0D; symptoms have persisted since MVA in lower lumbar spine. NO imaging of lower spine done post MVA. Given neurological symptoms will order MRI.&#x0D; &#x0D; M54.5: Low back pain&#x0D; MRI, LUMBAR SPINE, W/O CONTRAST&#x0D; &#x0D; 6. Solitary nodule of lung&#x0D; R91.1; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Abnormal finding on examination of the chest, chest wall and or lungs describes the reason for this request.; This is a request for a Chest CT.; Yes this is a request for a Diagnostic CT	44

General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	c/o pain in upper left shoulder, radiates into left arm, &#x0D; symptoms have been ongoing for a while. He has some supraclavicular swelling noted for a few months.&#x0D; &#x0D; also c/o muscle tightness in posterior legs.; This study is being ordered for a neurological disorder.; 10/23/2018; There has not been any treatment or conservative therapy.; ; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Chest pain describes the reason for this request.; 'None of the above' were related to the suspicion of cancer in this patient.; This is a request for a Chest CT.; This study is being requested for suspected cancer or tumor.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Chest pain describes the reason for this request.; The patient had an abnormal imaging (xray) finding related to the suspicion of cancer in th is patient.; This is a request for a Chest CT.; This study is being requested for suspected cancer or tumor.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Chest pain describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.; Yes this is a request for a Diagnostic CT	35
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.; Yes this is a request for a Diagnostic CT	10
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed a pelvic mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	8
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was not performed.; Yes this is a request for a Diagnostic CT	24
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient did not have an Ultrasound.; Yes this is a request for a Diagnostic CT	3
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; A rectal exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was normal.; A contrast/barium x-ray has NOT been completed.; The patient had an endoscopy.; The endoscopy was normal.; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Chest pain describes the reason for this request.; This reason this study is being requested is unknown.; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	4

General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Chest pain describes the reason for this request.; This study is being requested for an unresolved cough; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	4
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Chest xray last week.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	coughing , chest pain, hemoptysis, and a xray was done; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	In the context of the above, 25-pack-year smoker and quit December 2017. Chest x-ray in June showed no significant abnormalities; normal cardiac silhouette. Says his shortness of breath first started getting worse after his stent was placed in February.; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Labs drawn 10/10/2018 showing elevated alkaline phosphate level at 204 and elevated creatinine level at 1.02; This study is being ordered for Inflammatory/ Infectious Disease.; 10/10/2018; There has not been any treatment or conservative therapy.; back pains; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	left side chest and still persist and in pain and its been for awhile pain is at 8 out of 10; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	lung nodule; nicotine dependence; sob; cough; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	mass of chest wall; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	No, the patient was NOT seen by a specialist because of the traumatic injury.; Chest pain describes the reason for this request.; 'None of the above' were noted on evaluation after the injury.; This is a request for a Chest CT.; This study is being requested for chest injury or trauma within the past 2 weeks.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	'None of the above' describes the reason for this request.; Initial staging prior to treatment is related to this request for imaging of a known cancer or tumor; This is a request for a Chest CT.; This study is being requested for known cancer or tumor; Yes this is a request for a Diagnostic CT	2
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	'None of the above' describes the reason for this request.; 'None of the above' were relevant in the diagnosis or suspicion of vascular disease; This is a request for a Chest CT.; This study is being requested for known or suspected blood vessel (vascular) disease; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	'None of the above' describes the reason for this request.; This is a request for a Chest CT.; This study is being requested for Screening of Lung Cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; It is unknown if the patient has a 30 pack per year history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	'None of the above' describes the reason for this request.; This study is being requested for an unresolved cough; This is a request for a Chest CT.; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	8
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	None; This study is being ordered for trauma or injury.; 10/29/2018; There has been treatment or conservative therapy.; Abn imaging xray in Vietnam head injury; Blood work CXR; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Patient has pain radiating from her back to her front.; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has not been a physical exam.; The patient had an lipase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT	9
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an lipase lab test.; The results of the lab test were abnormal.; Yes this is a request for a Diagnostic CT	8
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		trama to abdomen; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Unexplained weight loss, enlarged liver on physical exam; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		Unknown; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		unknown; This study is being ordered for a neurological disorder.; 10/2018; There has been treatment or conservative therapy.; headache, mri of the back atrophy and thicken.; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/06/2018; There has been treatment or conservative therapy.; tenderness, vomiting, diarrhea.; treatment; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	patient was scheduled for surgery on March 26, 2018. When they were trying to put tube down throat, they couldn't go any further due to swelling and mass in neck/upper chest.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; march 26, 2018; There has been treatment or conservative therapy.; palpable mass and swelling in neck and upper chest.; patient was scheduled for surgery on March 26, 2018. When they went to put tube down her throat, they couldn't go any further due to palpable mass and swelling in neck that extends down into upper chest.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology see attached; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/10/18; It is not known if there has been any treatment or conservative therapy.; adenopathy with longstanding hypoproteinemia; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary		1

General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	She has had plain films without any explanation. Extreme pain at times. Her other conditions make this a more urgent request due to possible problems.; This study is being ordered for Inflammatory/ Infectious Disease.; 10/15/2018; There has been treatment or conservative therapy.; Diffuse abd pain. Unbearable at times. Plain films were unremarkable. She has PCOS, POTS, Ehlers Danlos syndrome.; Pt has tried medications, had imaging, and rest. Without relief. Her unlying medical conditions make this more of a risk; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	This is a request for a Thorax (Chest) CT.; 'None of the above' describes the reason for this request.; This study is being requested for 'none of the above'; This study is being requested for none of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Thoracic aortic aneurysm without rupture.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71250 Computed tomography, thorax; without contrast material	Radiology Services Denied Not Medically Necessary	Weight loss; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	71275 Computed tomographic angiography, chest (noncoronary), with contrast material(s), including noncontrast images, if performed, and image postprocessing	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/09/2018; There has been treatment or conservative therapy.; upper left back pain; medication; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/15/2015; There has been treatment or conservative therapy.; left upper quad pain , chest pain; chest xray, GI work up; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74176 Computed tomography, abdomen and pelvis; without contrast material		What she has already provided.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)			2
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		; This request is for an Abdomen MRI; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; It is unknown if there is suspicion of metastasis.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		; This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		abnormal ct & hematuria; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A kidney abnormality was found on a previous CT, MRI or Ultrasound.; It is unknown if the patient has a renal cyst or tumor.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		Abnormal CT showing lesions on liver and kidneys; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is NO suspicion of metastasis.	1

General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		Patient had hysterectomy 10 years ago. After CT results a MRI is suggested for further imaging after mass was seen on CT exam.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	71550 Magnetic resonance (eg, proton) imaging, chest (eg, for evaluation of hilar and mediastinal lymphadenopathy); without contrast material(s)	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; It is not known if there has been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	71550 Magnetic resonance (eg, proton) imaging, chest (eg, for evaluation of hilar and mediastinal lymphadenopathy); without contrast material(s)	Radiology Services Denied Not Medically Necessary	; This study is NOT being ordered for a Work-up for Suspicious Mass, Known Tumor, Known or Suspected Inflammatory Disease, etc...; This is a request for a chest MRI.	1
General/Family Practice	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has not been any treatment or conservative therapy.; &lt; Describe primary symptoms here - or Type In Unknown If No Info Given &gt;; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for trauma or injury.; 02/20/2018; There has not been any treatment or conservative therapy.; NECK SPASMS NUMBNESS AND TINGLING MEMORY DIFFICULTIES HEADACHES RIDICULAPATHY.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	back pain; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	MVA R/O fx; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	patient has already had an MRI, is now needing the CT; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Disapproval	72125 Computed tomography, cervical spine; without contrast material	Radiology Services Denied Not Medically Necessary	unknown; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Disapproval	72128 Computed tomography, thoracic spine; without contrast material	Radiology Services Denied Not Medically Necessary	; This is a request for a thoracic spine CT.; There is no reason why the patient cannot undergo a thoracic spine MRI.; Yes this is a request for a Diagnostic CT	1
General/Family Practice	Disapproval	72128 Computed tomography, thoracic spine; without contrast material	Radiology Services Denied Not Medically Necessary	bent over heard his back pop; This study is being ordered for trauma or injury.; 12/10/18; There has been treatment or conservative therapy.; severe lower back pain radiating down with burning; medications, steroid dose packs, lidacaine patches; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	72128 Computed tomography, thoracic spine; without contrast material	Radiology Services Denied Not Medically Necessary	Chronic back pain&#x0D; M54.13: Radiculopathy, cervicothoracic region&#x0D; CT, THORACIC SPINE, W/O CONTRAST&#x0D; CT, CERVICAL SPINE, W/O CONTRAST&#x0D; &#x0D; muscle aches, weakness, and cramps; and arthralgias/joint pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; muscle aches, weakness, and cramps; and arthralgias/joint pain.; It is not known if there has been any treatment or conservative therapy.; muscle aches, weakness, and cramps; and arthralgias/joint pain.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1

General/Family Practice	Disapproval	72131 Computed tomography, lumbar spine; without contrast material	Radiology Services Denied Not Medically Necessary	&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; &lt; Enter date of initial onset here - or Type In Unknown If No Info Given &gt;; There has been treatment or conservative therapy.; low back pain ...pelvic pain; home therapy; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	72131 Computed tomography, lumbar spine; without contrast material	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; patient initial visit 10/30/2018. she was given pain med and steroids. she is not any better and called stating it was getting worse; There has been treatment or conservative therapy.; pain and radiating down leg - tender left lateral hip pain, low back spasm with pain, hip pain when laying down, low back pain worse when walking; pain medication and steroids; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	72131 Computed tomography, lumbar spine; without contrast material	Radiology Services Denied Not Medically Necessary	bent over heard his back pop; This study is being ordered for trauma or injury.; 12/10/18; There has been treatment or conservative therapy.; severe lower back pain radiating down with burning; medications, steroid dose packs, lidacaine patches; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		Renal mass was found on the ultrasound incidently . US had been ordered to check out the gallbladder.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11-13-2018; There has not been any treatment or conservative therapy.; Pt had abd ultrasound that showed renal mass. Radiology recommened follow up with CT or MRI.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for hematuria.; "The patient has had an abdominal ultrasound, CT, or MR study."; The hematuria is not painful.; gross hematuria	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for known or suspected infection.; "The ordering physician is not a gastroenterologist, urologist, or infectious disease specialist."; "There are physical findings or abnormal blood work consistent with peritonitis, pancreatitis, or appendicitis."; Enter answer here - or Type In Unknown If No Info Given&#x0D; &#x0D; &#x0D; ABD PAIN Hepatic Steatosis Dilated bile Duct.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for Known Tumor.; This study is being ordered for staging.; "The ordering physician is not an oncologist, urologist, gastroenterologist, or surgeon."; renal failure labwork, CT showed it and recommend MRI	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; &lt; Enter answer here - or Type In Unknown If No Info Given. &gt;	3
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; A CT of the abdomen was done on 10/22/18. A lesion was found on the right lobe of the liver and a mass was found on the left adrenal gland. This MRI is to further identify the hepatic lesion and adrenal mass.	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Ct in june 2018	1
General/Family Practice	Approval	74181 Magnetic resonance (eg, proton) imaging, abdomen; without contrast material(s)		This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Found neoplasm of left kidney on CT. &#x0D; upper abdominal pain, unspecified, this is located primarily in the left upper quadrant. It does not radiate. It began years ago. He characterizes it as muscle cramps, in lower ribs. It is of moderate intensity.	1

General/Family Practice	Disapproval	72131 Computed tomography, lumbar spine; without contrast material	Radiology Services Denied Not Medically Necessary	Needing diagnostic imaging to determine what is causing severe pain in patient; This study is being ordered for a neurological disorder.; 05/15/2018; There has been treatment or conservative therapy.; severe pain in upper and lower back. Numbness and pain to Upper and Lower extremities; Patient has had surgery, as well as medication treatment; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	72131 Computed tomography, lumbar spine; without contrast material	Radiology Services Denied Not Medically Necessary	Ongoing pain in both hips ,radiating to BLE and worse on the rt.&#x0D; Pain radiating down rt leg , hx of rt hip/thigh surgery after trauma few yrs ago .&#x0D; Steroid shot has helped for 2months but pain being severe again . Affecting ability to ambulate and funct; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Disapproval	72131 Computed tomography, lumbar spine; without contrast material	Radiology Services Denied Not Medically Necessary	possible cancer abnormal xray; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering MDs specialty is NOT Hematologist/Oncologist, Thoracic Surgery, Oncology, Surgical Oncology or Radiation Oncology	1
General/Family Practice	Disapproval	72131 Computed tomography, lumbar spine; without contrast material	Radiology Services Denied Not Medically Necessary	Pt was in a MVA previously and complains of back pain that is non-radiating, severe, dull, and aching.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
