How can providers check the status of an authorization request?	Providers can check on the status of an authorization by clicking the "Search for Request" link on RadMD's main menu.
How can I confirm what clinical information has been uploaded or faxed to NIA?	Clinical Information that has been received via upload or fax can be viewed by clicking the member name via the "Search for Request" link from the main menu. At the bottom of the "Exam Request Verification: Detail" page, click "View" in the "Documents Received" section and select the appropriate link for the upload or fax.
Where can providers find their case-specific communication from NIA?	Links to case-specific communication to include requests for additional information and determination letters can be found via the "Search for Request" link.
If I did not submit the initial authorization request, how can I view the status of a case or upload clinical documentation?	The "Track an Authorization" feature will allow users who did not submit the original request to view the status of an authorization, as well as upload clinical information. This option is also available as a part of your main menu options using the "Search for Request" feature. A tracking number is required to use this search method.
Can I share my RadMD access with my coworkers?	Yes, through our "Shared Access" feature. This process allows providers to view authorization requests initiated by other RadMD users within your practice. By sharing access with other users, the user will be able to view and manage the authorization requests that you initiated, allowing them to communicate with your patients and progress with treatment if you are not available.
Paperless Notification: How can I receive notifications electronically instead of paper?	NIA defaults communications including final authorization determinations to paperless/electronic. Correspondence for each case is sent to the email of the person submitting the initial authorization request. Users will be sent an email when determinations are made.
	 No PHI will be contained in the email. The email will contain a link that requires the user to log into RadMD to view PHI. Providers who prefer paper communication will be given the option to opt out and receive communications via fax.
