

Tufts Health Plan Utilization Review Matrix 2024 Medical Specialty Solutions

The matrix below contains the CPT-4 codes for which Evolent (formerly National Imaging Associates, Inc.) manages on behalf of Tufts Health Plan. This matrix is designed to assist in the resolution of claims adjudication and claims questions related to those services authorized by Evolent. The "Allowable Billed Groupings" is meant to outline that if a given procedure is authorized, that any one of the listed procedure codes could be submitted on a claim representing that service. This assumes that the member is eligible at the time of the service, that appropriate re-bundling rules are applied, that the claim includes an appropriate diagnosis code for the CPT code and that the service is performed within the validity period.

If a family of CPT codes is not listed in this matrix, an exact match is required between the authorized CPT code and the billed CPT code. If the exact match does not occur, the charge should be adjudicated accordingly.

Please note: Services rendered in an Emergency Room, Observation Room, Surgery Center, or Hospital Inpatient setting are not managed by Evolent.

- 1 Evolent will not be making a medical necessity determination as to which of these codes are appropriate. Instead, we will make a determination as to whether the PET scan itself is indicated and then expect the imaging facility to bill in a fashion that accurately describes what was performed.
- The 78814 series describes a newer type of a PET scan where CT technology is used to better "focus" the PET scanning. When an ordering physician requests a PET scan, they won't know whether or not an older machine will be used without the CT component. Evolent's tumor imaging clinical guidelines does not make a distinction between which technique is used. If a PET scan is clinically indicated, use of either series of codes is acceptable. Accordingly, we are expanding the list of "Allowable Billable Groupings" to take this into account. These codes are NOT to be used for a study typically called PET fusion. A PET fusion study is where a PET Scan and a diagnostic CT scan are performed on the same machine simultaneously. Under this situation one is instructed by CPT to bill using both the PET CPT code and the CT scan code describing the body region and procedure performed. The CT code should be appended with a modifier 59 to ensure proper payment. When receiving such requests, Evolent will review the medical necessity for both the PET scan and the CT scan and issue UM determinations on both codes.
- This procedure does not require pre-authorization or medical necessity review for members under 18 years old beginning 02/01/17. US Family Health Plan (USFHP) is excluded from the Cardiac program, these codes do not require Prior Authorization for USFHP
- 4 Procedures considered to be a Noncovered Investigational Service, include:
 - (3) +93356 (Myocardial strain imaging using speckle tracking-derived assessment of myocardial mechanics
 - (4) +78434 (Absolute quantitation of myocardial blood flow (AQMBF), positron emission tomography (PET), rest and pharmacologic stress.
- 5 +0698T is considered a Noncovered Investigational Service.
