

*Evolut	
Clinical guidelines URGENT/EMERGENT CRITERIA	Original Date: November 2009
Guideline Number: Evolut_CG_100	Last Revised Date: March 2023
	Implementation Date: January 2024

GENERAL INFORMATION

- *It is an expectation that all patients receive care/services from a licensed clinician. All appropriate supporting documentation, including recent pertinent office visit notes, laboratory data, and results of any special testing must be provided. If applicable: All prior relevant imaging results and the reason that alternative imaging cannot be performed must be included in the documentation submitted.*
- *Where a specific clinical indication is not directly addressed in this guideline, medical necessity determination will be made based on widely accepted standard of care criteria. These criteria are supported by evidence-based or peer-reviewed sources such as medical literature, societal guidelines and state/national recommendations.*

INDICATIONS FOR EMERGENT STUDIES

The requested study is required to render immediate medical attention needed to prevent loss of life, limb, or risk of significant morbidity/permanent disability.^{1, 2}

Conditions that demonstrate immediate medical attention include, **but are not limited to:**

- Conditions that impair bodily functions that support life (airway, breathing & circulation)
- Conditions that are consistent with (or precipitate) any type of shock (e.g., hypovolemic or cardiogenic)
- Conditions that are consistent with a disorder that damages tissue in a substantial fashion (e.g., compartment syndrome or thrombus/embolus)

INDICATIONS FOR URGENT STUDIES

For the evaluation of a condition that requires prompt medical intervention to prevent additional consequences to the health/wellbeing of the member. This includes preventing the medical condition from precipitating an emergency situation.²

Conditions that demonstrate a requirement for prompt medical attention include, **but are not limited to:**

- Any condition that cannot be postponed for a period of time (24 hours) without risking progression to an emergent condition^{3, 4}
 - Any condition that cannot be postponed for a period of time (24 hours) without risking loss of life, limb, or risk of permanent disability³
-

BACKGROUND

Evolent reviews certain imaging studies for the existence of an urgent/emergent situation. This type of medical necessity review is only conducted for those requests where the date of service has passed (a retrospective review). The indications below can be applied to all imaging modalities managed by Evolent.

The indications presented herein are not intended to limit the peer clinical reviewer from using his/her independent clinical judgment. A case-by-case evaluation of the member's clinical presentation should be conducted when determining the presence of an emergent or urgent clinical situation.
