Trillium Health Resources Utilization Review Matrix 2024

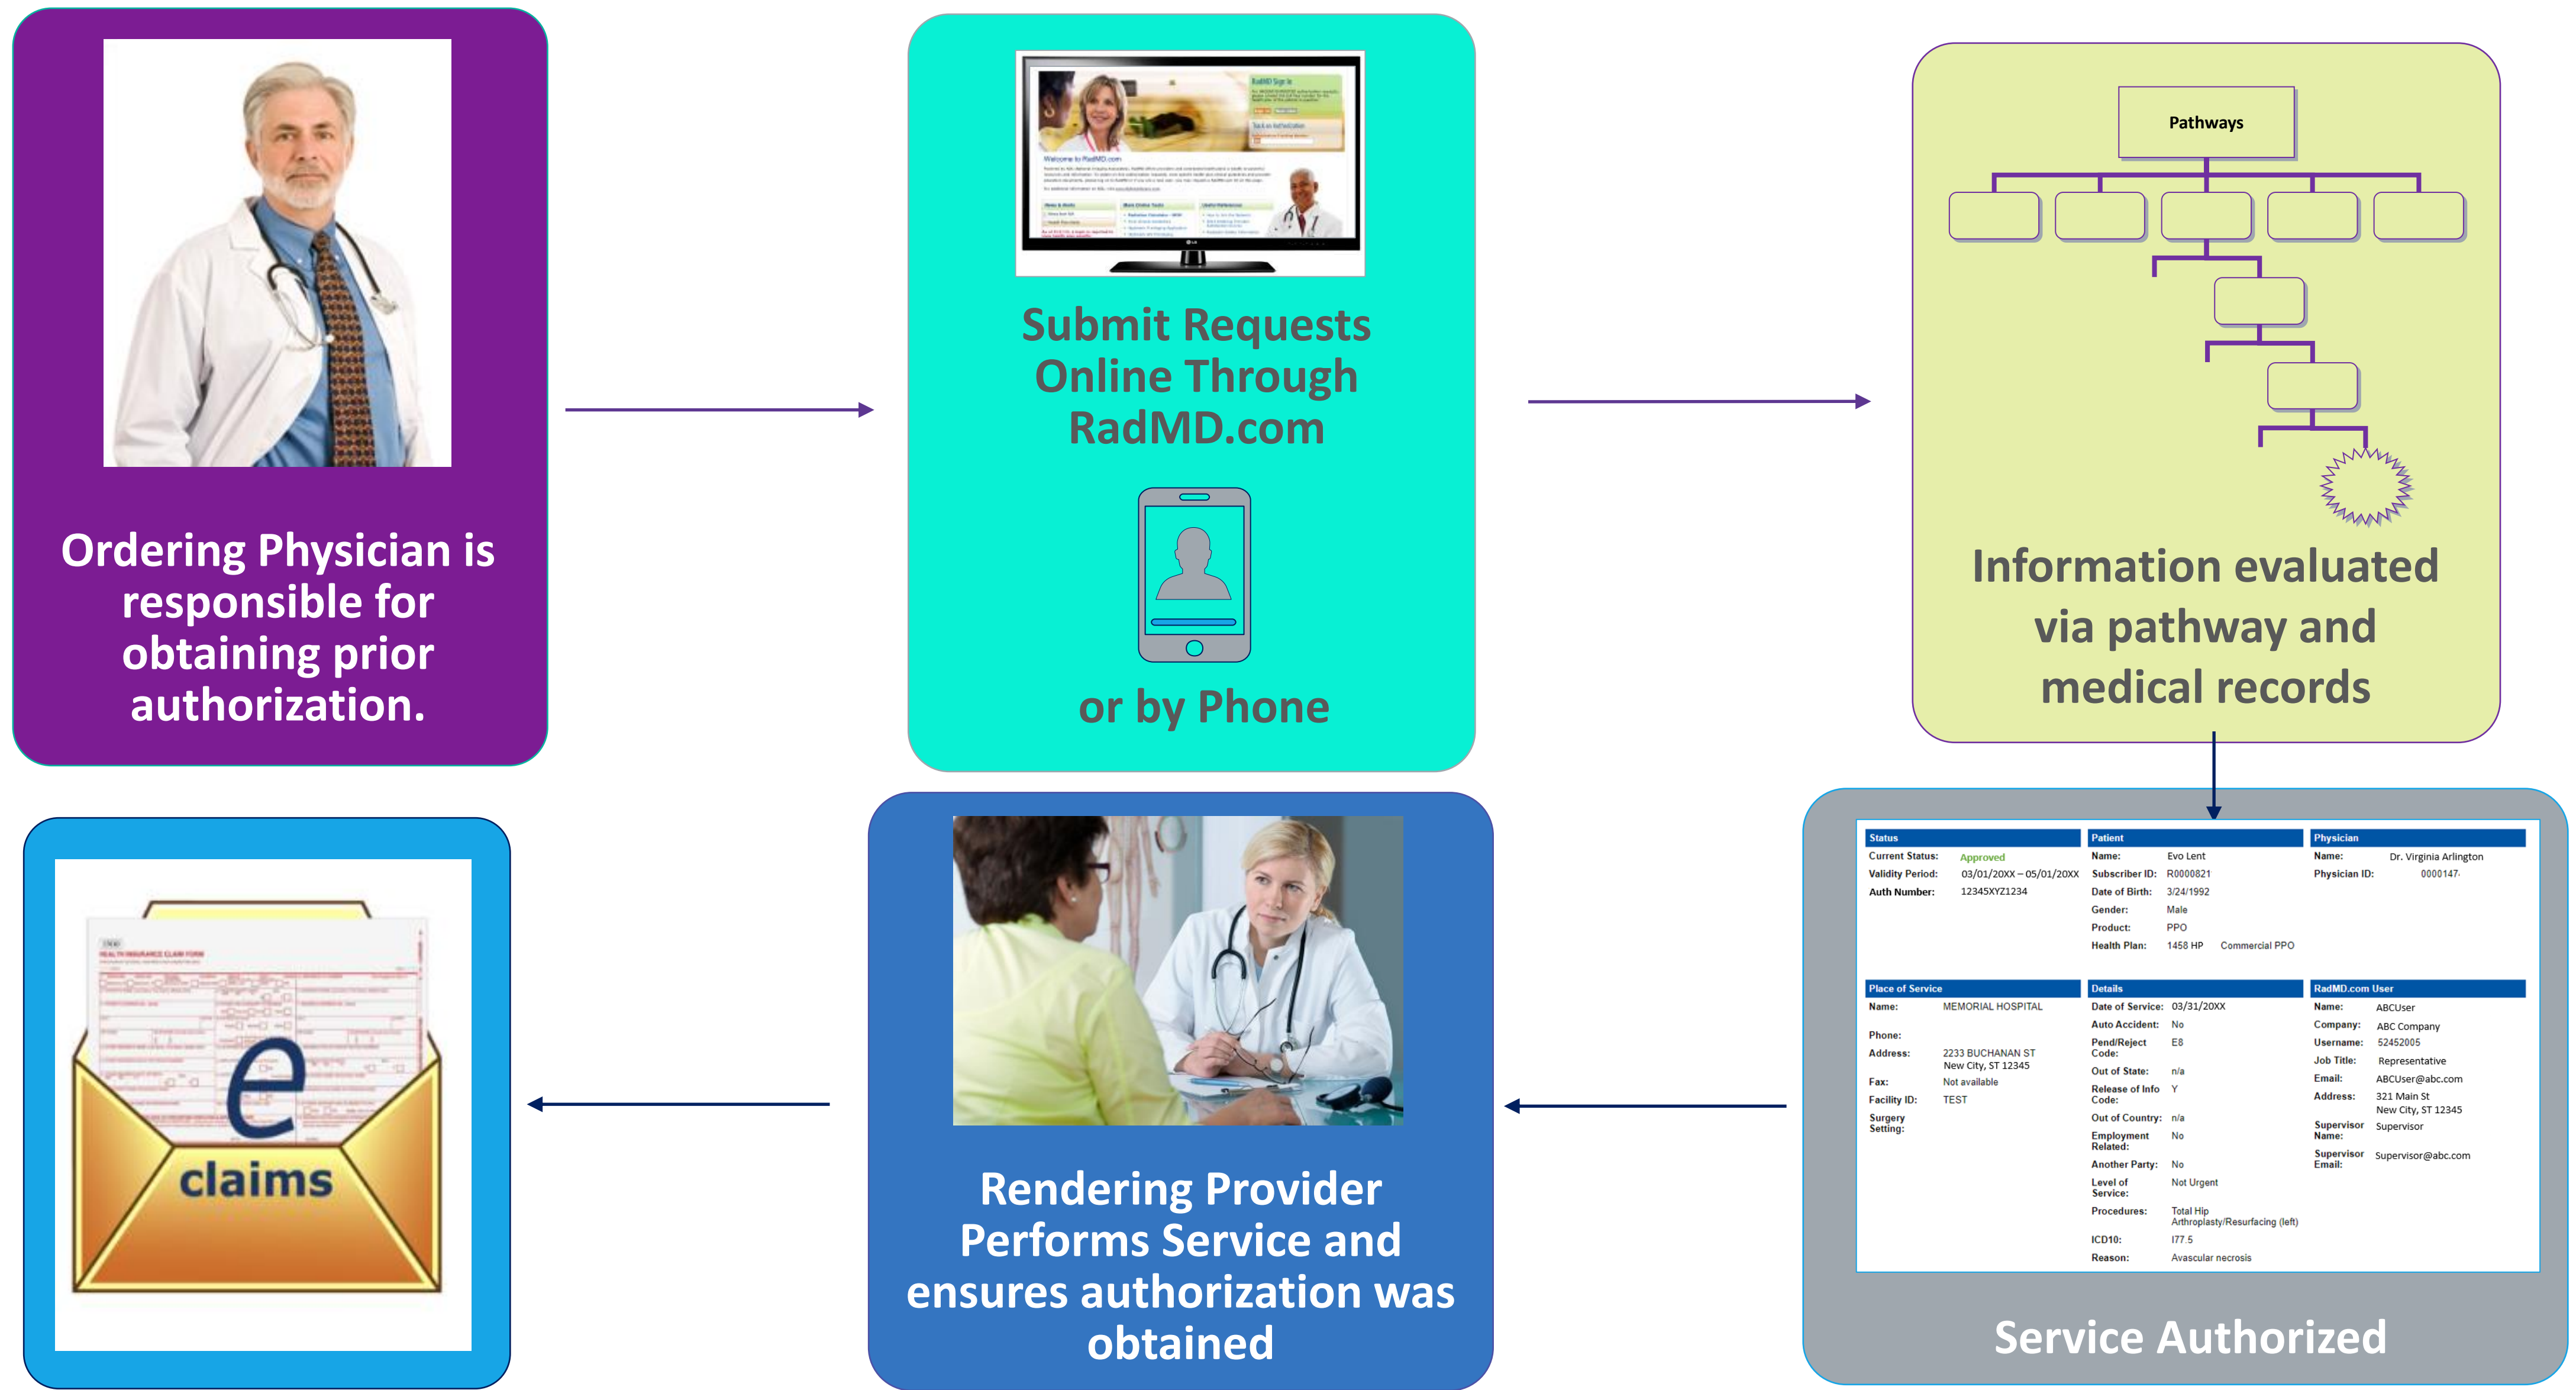

The matrix below contains the CPT 4 codes for which Evolent (formerly National Imaging Associates, Inc.) manages on behalf of Trillium Health Resources. This matrix is designed to assist in the resolution of claims adjudication and claims questions related to those services authorized by NIA. The "Allowable Billed Groupings" is meant to outline that if a given procedure is authorized, that any one of the listed procedure codes could be submitted on a claim representing that service. This assumes that the member is eligible at the time of the service, that appropriate rebundling rules are applied, that the claim includes an appropriate diagnosis code for the CPT code and that the service is performed within the validity period.

If a family of CPT codes is not listed in this matrix, an exact match is required between the authorized CPT code and the billed CPT code. If the exact match does not occur, the charge should be adjudicated accordingly.

Please note: Services rendered in an Emergency Department, Observation Room, Surgery Center, or Hospital Inpatient setting are not managed by Evolent.

Evolut's Clinical Foundation & Review

- **Clinical guidelines** were developed by practicing specialty physicians, through literature reviews and evidenced-based research. Guidelines are reviewed and mutually approved by Trillium Health Resources and Evolut Medical Officers and clinical experts. **Clinical Guidelines are available on [RadMD.com](https://www.radmd.com)**
- Pathways are a branching structure that changes depending upon the answer to each question.
- The member's clinical information/medical record will be required for validation of clinical criteria before an approval can be made.
- Evolut has a specialized clinical team.
- Peer-to-peer discussions are offered for any request that does not meet medical necessity guidelines.
- **Our goal – ensure that members are receiving appropriate care.**

Member and Clinical Information Required for Authorization

General

- Includes: ordering physician information, member information, rendering provider information, requested examination, etc.

Clinical Information

- Includes clinical information that will justify examination, symptoms and their duration, physical exam findings
- Preliminary procedures already completed (e.g., x-rays, CTs, lab work, ultrasound reports, scoped procedures, referrals to specialist, specialist evaluation)
- Reason the study is being requested (e.g., further evaluation, rule out a disorder)

Refer to the Prior Authorization Checklists on RadMD for more specific information.

Clinical Specialty Team Review

Automated Timeliness Routing

**Clinical Specialization Pods
Overseen by a Medical Director**

Advanced Imaging

Physician Review Team

**Physician Panel of Board-Certified Physician Specialists
with ability to meet any State licensure requirements**

**Physician clinical reviewers conduct peer reviews on specialty products
(interventional pain management, surgery, sleep management and genetic
testing)**

Document Review

- ✔ Evolent may request members' medical records/additional clinical information.
- ✔ When requested, validation of clinical criteria within the member's medical records is required before approval can be made.
- ✔ Ensures that clinical criteria that supports the requested test are clearly documented in medical records.
