Prior Authorization Process Overview

Evolent's Clinical Foundation & Review

- **Clinical guidelines** were developed by practicing specialty physicians, through literature reviews and evidenced-based research. Guidelines are reviewed and mutually approved by Superior HealthPlan and Evolent Medical Officers and clinical experts. **Clinical Guidelines are available on [RadMD.com](https://www.radmd.com)**
- Algorithms are a branching structure that changes depending upon the answer to each question.
- The member's clinical information/medical record will be required for validation of clinical criteria before an approval can be made.
- Evolent has specialized clinical teams.
- Peer-to-peer discussions are offered for any request that does not meet medical necessity guidelines.
- **Our goal – ensure that members are receiving appropriate care.**

Radiation Safety and Awareness

Studies suggest a significant increase in cancer in dose estimates in excess of 50 mSv.

- 1mSv = 4 months of natural exposure/50 chest x-rays

CT scans and nuclear studies are the largest contributors to increased medical radiation exposure.

According to the 2019 NCRP Report, a dramatic decrease in average radiation dose per person by as much as 15 – 20% has been demonstrated due to radiation safety and technological advances.

Evolent has developed a Radiation Awareness Program designed to create member and physician awareness of radiation concerns.

Radiation Awareness Program
