

Evolut | Superior HealthPlan Interventional Cardiology Program

Introductory Meeting – Go Live July 1, 2025

How We Will Spend Our Time Together

01 | Evolent Overview

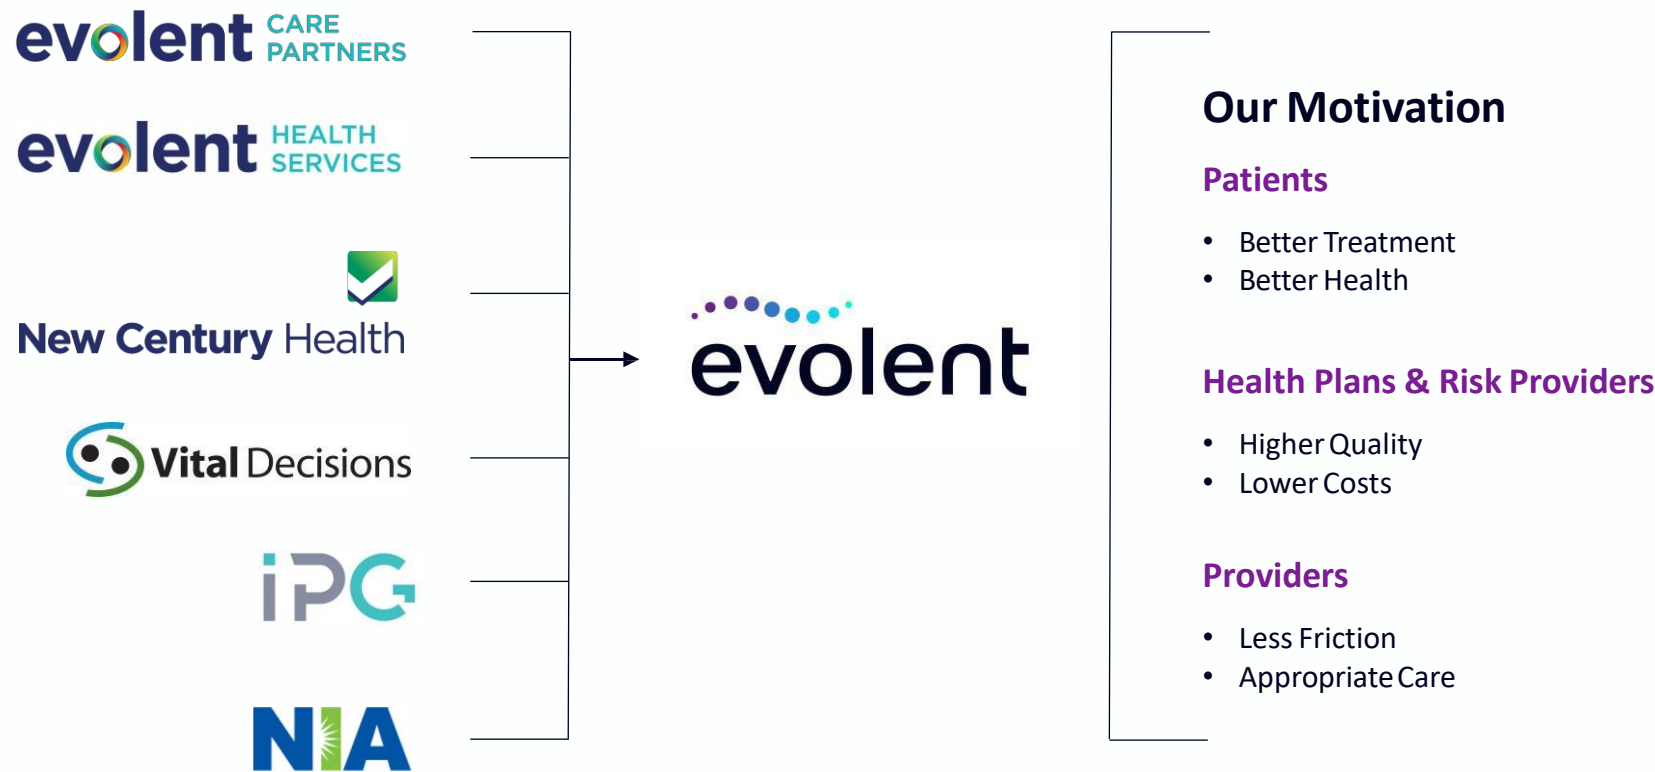

02 | Top in Class Clinical Expertise

03 | Interventional Cardiology Program
Scope Overview

Evolut | Overview

NIA and New Century Health Are Now Evolent

Connecting Our Brands is About Connecting Care

Evolut – A New Alternative to Specialty Management

Create Value for Healthcare Organizations

- Deep expertise within individual specialties
 - Comprehensive clinical resources including, specialist-matched peer-to-peer
 - Robust, provider centric utilization management platforms
-

Create Value for Providers

- Trust-provider relationships via comprehensive physician engagement models
 - Consistent pipeline of technology enhancements to ease provider burden
 - Targeted and tailored value-based initiatives across specialties
 - Dedicated clinical response team staffed by subject matter experts
 - Targeted provider engagement education, outreach, and in-depth training offered pre/post go-live
 - Actionable clinical data and benchmarking
-

Create Value for Patients

- Diagnostic and intervention programs designed to improve quality and reduce member cost
- Robust analytics capabilities to enrich care management goals
- Broader, population-wide commitment to reduce health disparities

Clinical Decision Support Platform, Practice Enablement: Evolent Interventions Improve Quality at Every Step

1

Evolent RadMD platform facilitates appropriate auto authorizations at initial request submission through intuitive Q&A, auto-generated code lists, and plan preferred policy tags

2

Manual reviews to ensure authorization request meets medical necessity – request modified and subsequently approved, or escalated to Medical Directors for further review

3

Clinicians conduct practice outreach or peer-to-peer calls to discuss and agree on the best treatment plan – request withdrawn or subsequently approved

4

Denials are a last resort to address requests that do not meet appropriate evidence-based guidelines

National Performance

Cardiovascular | January – December 2023

68%

Auto Approval

90%

Denials Avoided When P2P Occurs

Evolut | Superior HealthPlan Interventional Cardiology Program Scope

Go-Live July 1, 2025

High Level Partnership Responsibilities Across Entities

Evolent:

- Online portal for authorization requests
- Clinical guidelines and policies
- Review requests for medical necessity
 - Auto-approval of requests that meet criteria.
 - Medical necessity reviews are conducted initially by a nurse and a Clinical Reviewer (cardiologist) if needed
- Ordering provider and member notifications
- Medicaid and Ambetter appeals

Health Plan:

- Medicare appeals
- Claims management
- Case management
- Provider contracts and credentialing

Empowering Cardiology Clinical Team and Prior Authorization Staff to Work With Evolent

PREPARE COMPLETE, CLEAR NOTES

- Document your rationale for performing the desired service
- Clinical guidelines are available on [RadMD.com](https://www.radmd.com)
- Include notes on any patient limitations that require use of the desired service instead of alternatives

REQUIRED CLINICAL NOTES

- Required supporting information can be attached to your request; this helps to avoid any delays in patient care, reduces the need for Evolent peer-to-peer calls, and avoids denials

EXPEDITED REQUESTS

- CMS defines an expedited request as one for which “the standard timeframe could seriously jeopardize the patient’s life or health”
- Contact the Evolent Call Center (Monday - Friday from 7:00 a.m. to 7:00 p.m. CST)
 - Superior HealthPlan: 1.800.642.7554
 - Ambetter from Superior HealthPlan: 1.800.424.4916
 - Wellcare By Allwell: 1.866.214.1703

FREQUENCY GUIDELINES

- Used to monitor the frequency of treatments
- Requests exceeding the frequency guidelines should include the rationale in the clinical notes
