

Important Authorization Steps for High End Radiology and Interventional Cardiology Providers

Neighborhood News – April 2026

Neighborhood Health Plan of Rhode Island (Neighborhood) is reminding our high end radiology and interventional cardiology providers of the required steps to follow when submitting authorization requests through [Evolent](#).

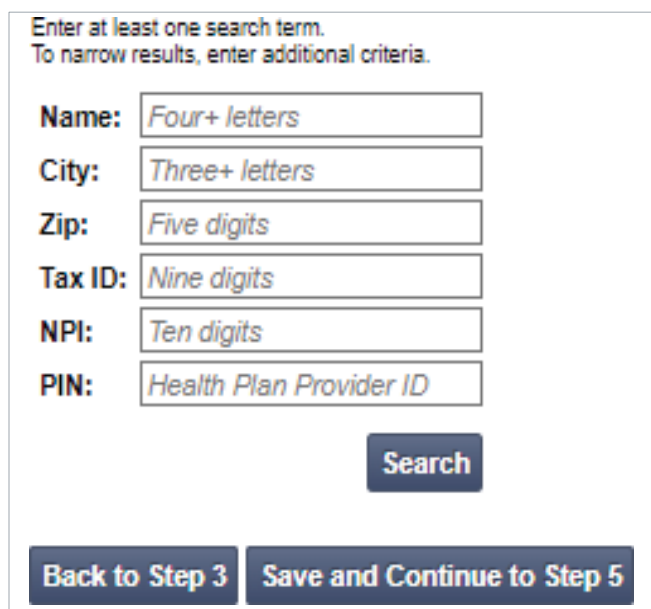

When submitting an authorization request on the Evolent online portal, providers must enter the **appropriate facility information in the rendering provider field**. The rendering provider is the **facility where the service is being performed**.

Required Criteria include:

- Name
- City
- ZIP
- Tax ID
- NPI
- PIN

Please ensure the **correct facility record (by NPI)** is selected. To identify the rendering provider, enter the criteria and then select “Search.”

Figure 1.

Enter at least one search term.
To narrow results, enter additional criteria.

Name:

City:

Zip:

Tax ID:

NPI:

PIN:

Please note: Selecting a rendering provider that is performing the **professional component** instead of the facility will prevent proper authorization placement and will result in a **facility claim denial**.
