# List of CPT Procedure Codes Requiring Prior Authorization

Review Claims/Utilization Review Matrix to determine CPT codes managed by NIA.

CPT Codes and their Allowable Billable Groupings.

Located on [www.RadMD.com](http://www.RadMD.com).

Defer to Buckeye Health Plan Policies for Procedures not on Claims/Utilization Review Matrix.

## Buckeye Health Plan Utilization Review Matrix 2022

The matrix below contains all of the CPT 4 codes for which National Imaging Associates, Inc. (NIA)<sup>1</sup> manages on behalf of Buckeye Health Plan. This matrix is designed to assist in the resolution of claims adjudication and claims questions related to those services authorized by NIA. The "Allowable Billed Groupings" is meant to outline that if a given procedure is authorized, that any one of the listed procedure codes could be submitted on a claim representing that service. This assumes that the member is eligible at the time of the service, that appropriate rebundling rules are applied, that the claim includes an appropriate diagnosis code for the CPT code and that the service is performed within the validity period.

If a family of CPT codes is not listed in this matrix, an exact match is required between the authorized CPT code and the billed CPT code. If the exact match does not occur, the charge should be adjudicated accordingly.

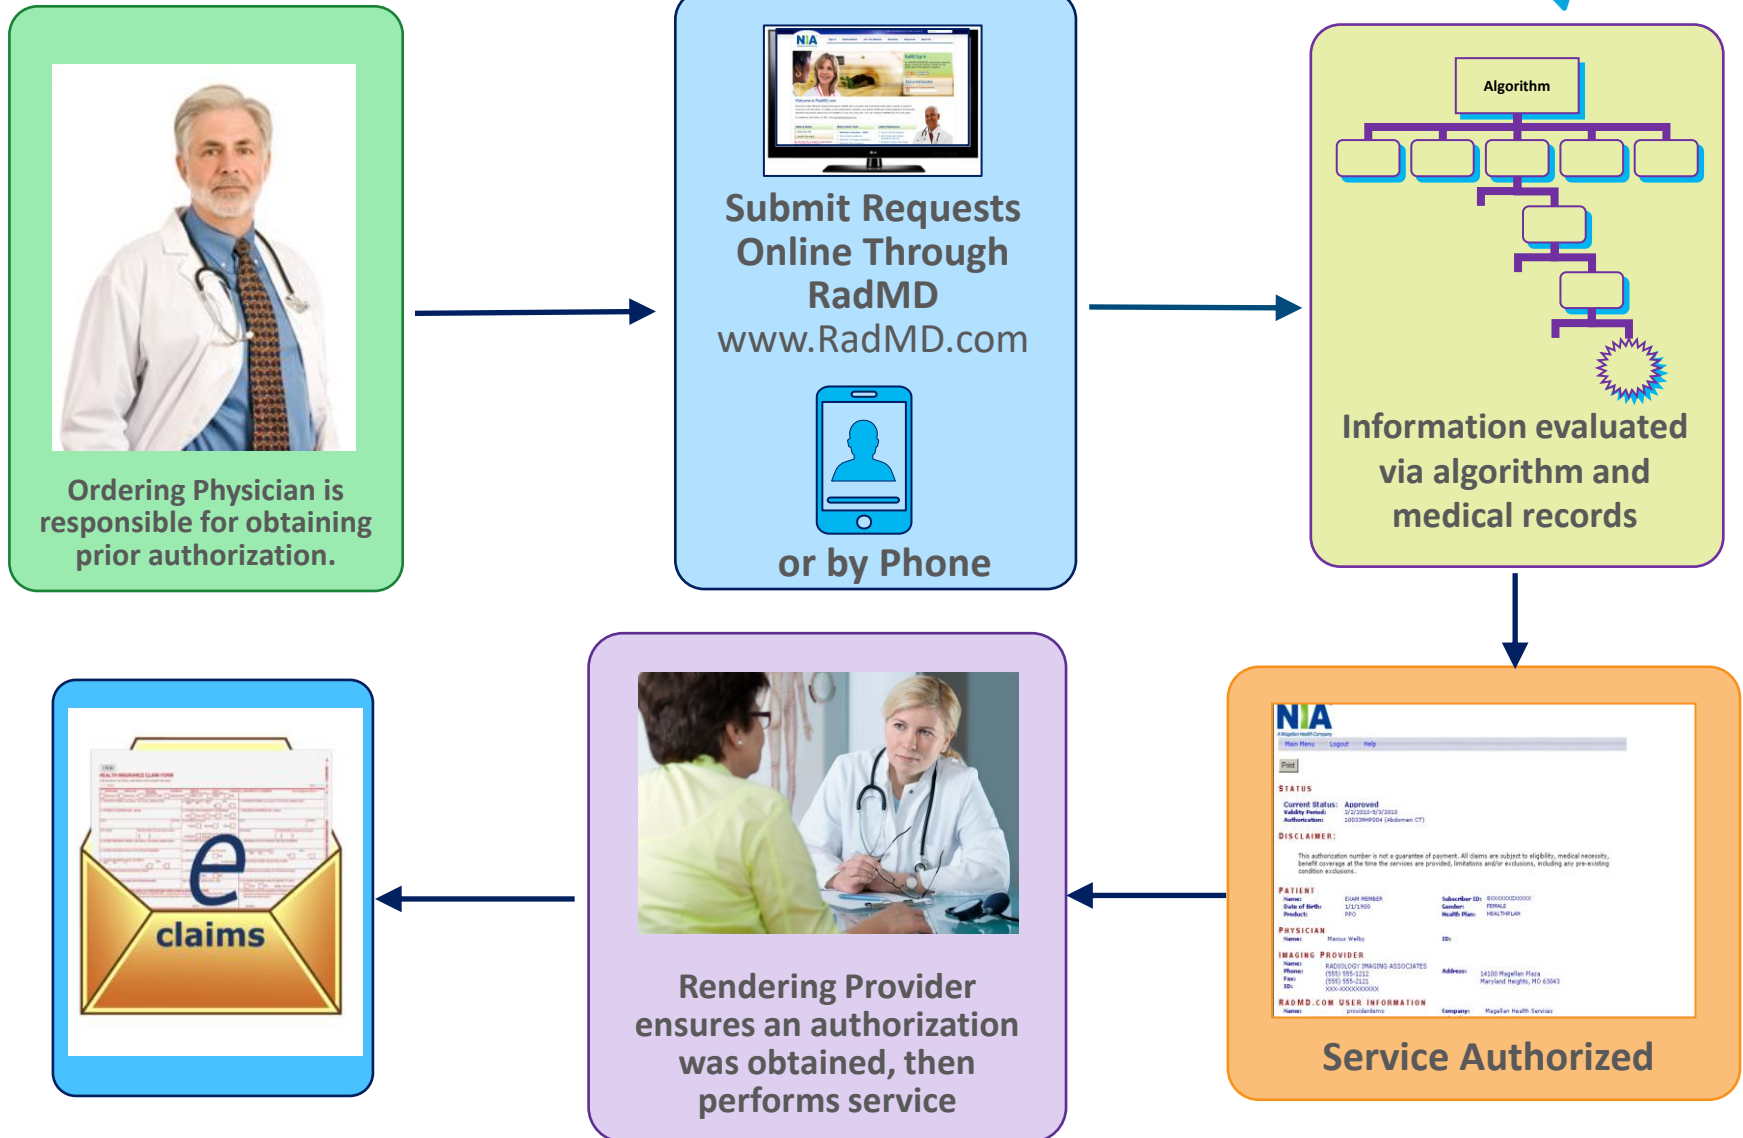

**\*Please note: Services rendered in an Emergency Room, Surgery Center or Hospital Inpatient setting are not managed by NIA.**

# Prior Authorization Process Overview

**Recommendation to Rendering Providers: Do not schedule test until authorization is received**

# NIA's Clinical Foundation & Review

- **Clinical guidelines** were developed by practicing specialty physicians, through literature reviews and evidenced-based research. Guidelines are reviewed and mutually approved by the Plan and NIA Medical Officers and clinical experts. **Clinical Guidelines are available on [www.RadMD.com](http://www.RadMD.com)**
- Algorithms are a branching structure that changes depending upon the answer to each question.
- The member's clinical information/medical record will be required for validation of clinical criteria before an approval can be made.
- NIA has a specialized clinical team.
- Peer-to-peer discussions are offered for any request that does not meet medical necessity guidelines.
- **Our goal – ensure that members are receiving appropriate care.**

# Member and Clinical Information Required for Authorization

## General

- Includes: ordering physician information, member information, rendering provider information, requested examination, etc.

## Clinical Information

- Includes clinical information that will justify examination, symptoms and their duration, physical exam findings
- Preliminary procedures already completed (e.g., x-rays, CTs, lab work, ultrasound reports, scoped procedures, referrals to specialist, specialist evaluation)
- Reason the study is being requested (e.g., further evaluation, rule out a disorder)

**Refer to the Prior Authorization Checklists on RadMD for more specific information.**

# Clinical Specialty Team Review

# Document Review

NIA may request member's medical records/additional clinical information.

When requested, validation of clinical criteria within the member's medical records is required before an approval can be made.

Ensures that clinical criteria that supports the requested test are clearly documented in medical records.

Helps ensure that members receive the most appropriate, effective care.

# Radiation Safety and Awareness

Studies suggest a significant increase in cancer in dose estimates in excess of 50 mSv

CT scans and nuclear studies are the largest contributors to increased medical radiation exposure

According to the 2019 NCRP Report, a dramatic decrease in average radiation dose per person by as much as 15 – 20% has been demonstrated due to radiation safety and technological advances.

1 mSv=

 4 months of   
natural exposure

 50 chest x-rays

NIA has developed a Radiation Awareness Program designed to create member and physician awareness of radiation concerns
